Be it enacted, etc., That (a) the Commissioners of the District of Columbia may designate any employee of the District to protect life and property in and on the buildings and grounds of any institution upon land outside the District acquired by the United States for the District of Columbia for the establishment or operation thereon of any sanitorium, hospital, training school, correctional institution, reformatory, workhouse, or jail. Whenever any employee is so designated he is hereby authorized and empowered (1) to arrest under a warrant within the buildings and grounds of any such institution any person accused of having committed within any such buildings or grounds any offense against the laws of the United States, or against any rule or regulation prescribed pursuant to this act; (2) to arrest without a warrant any person committing any such offense within such buildings or grounds, in his presence; or (3) to arrest without warrant within such buildings or grounds, any person whom he has reasonable grounds to believe has committed a felony in such buildings or grounds.

(b) Any individual having the power to arrest as provided in subsection (a) of this section may carry firearms or other weapons as the Commissioners may direct or by regulation may prescribe.

SEC. 2. The Commissioners may make and amend such rules and regulations as they deem necessary for the protection of life and property in or on the buildings and grounds of any such institution.

SEC. 3. Any person who knowingly and willfully violates any rule or regulation prescribed under this act shall be guilty of a misdemeanor, and shall be fined not more than $500 or imprisoned not more than 6 months or both.

SEC. 4. The officer on duty in command of those employees designated by the Commissioners as provided in section 1 of this act may accept deposit of collateral from any person charged with the violation of any rule or regulation prescribed under this act, for appearance in court or before the appropriate United States commissioner; and such collateral shall be deposited with the United States commissioner sitting in the district where the offense has been committed.

SEC. 5. The Commissioners may enter into agreements with any of the States, or any political subdivision thereof, where any such institution mentioned in section 1 of this act is located, for such municipal services as the Commissioners shall deem necessary to the efficient and proper government of such institution, and they may, from time to time, agree to modifications in any such agreement: *Provided*, That where the charge for any such service is established by the laws of the State within whose territorial limits such institution is situated, the Commissioners may not pay for such service an amount in excess of the charge so established. There is hereby authorized to be appropriated such sums as may be necessary for the making of payment for services under any such agreement.

CORRECTION OF CERTAIN INEQUITIES IN THE DISTRICT OF COLUMBIA POLICE AND FIREMEN'S SALARY ACT

The bill (S. 3329) to amend the District of Columbia Police and Firemen's Salary Act of 1953 to correct certain inequities was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That subsection (d) of section 102 of the District of Columbia Police and Firemen's Salary Act of 1953, approved June 20, 1953 (67 Stat. 77), as amended, is amended to read as follows:

"(d) The minimum basic salaries contained in subsection (a) of section 101 of this act in the grade or rank of Chief of Police shall not be increased by more than 4 longevity increases, nor shall the minimum basic salaries of grades or ranks below that of

Chief of Police be increased by more than 5 longevity increases."

SEC. 2. Section 102 of said act is amended by adding thereto the following new subsection:

"(f) In initially adjusting salaries in accordance with the provisions of this section, any officer or member promoted from a lower grade to a higher grade prior to July 1, 1953, shall receive credit for such part of continuous service in both grades for longevity purposes as is necessary to establish his basic salary, including longevity pay, at least equal to the basic salary he would have received under the provisions of this section in the lower grade had such promotion not been made. Service for future longevity increases of any officer or member whose salary is adjusted under authority of this subsection shall begin as of the date such adjustment became effective."

SEC. 3. Subsection (d) of section 202 of said act, as amended, is amended to read as follows:

"(d) The minimum basic salaries contained in subsection (a) of section 201 of this act in the grade or rank of Fire Chief shall not be increased by more than 4 longevity increases, nor shall the minimum basic salaries of grades or ranks below that of Fire Chief be increased by more than 5 longevity increases."

SEC. 4. Section 202 of said act is amended by adding thereto the following new subsection:

"(f) In initially adjusting salaries in accordance with the provisions of this section, any officer or member promoted from a lower grade to a higher grade prior to July 1, 1953, shall receive credit for such part of continuous service in both grades for longevity purposes as is necessary to establish his basic salary, including longevity pay, at least equal to the basic salary he would have received under the provisions of this section in the lower grade had such promotion not been made. Service for future longevity increases of any officer or member whose salary is adjusted under authority of this subsection shall begin as of the date such adjustment became effective."

SEC. 5. The provisions of this amending act shall become effective as of July 1, 1953.

AMENDMENT OF DISTRICT OF COLUMBIA CREDIT UNIONS ACT

The Senate proceeded to consider the bill (S. 3683) to amend the District of Columbia Credit Unions Act, which had been reported from the Committee on the District of Columbia with amendments, on page 1, beginning with line 3, to strike out "That section 4 of the act entitled 'An act to provide for the incorporation of credit unions within the District of Columbia,' approved June 23, 1932, as amended, is further", and insert "That section 4 of the District of Columbia Credit Unions Act is hereby"; in line 8, after the word "and", to strike out "by"; after line 9, to strike out:

SEC. 2. That section 6 of the said act is hereby amended by striking out the entire section and inserting in lieu thereof the following:

And insert:

SEC. 2. Section 6 of such act is hereby amended to read as follows.

On page 2, line 3, after the word "unions", to strike out "provided for by" and insert "established under"; in line 9, after the word "union", to strike out "chartered" and insert "established"; in line 15, after the word "section", to strike out "1755" and insert "5"; in line 22, after the word "Each", to to strike out "District chartered credit union" and insert "credit union established under this act"; in line 3, after the word "any", to strike out "persons" and insert "person"; in line 5, after the word "to", to strike out "District chartered credit unions" and insert "credit unions established under this act"; in line 7, after the word "each", to strike out "District chartered credit union" and insert "credit union established under this act"; in line 11, after the word "section", to strike out "1755" and insert "5"; in line 14, after the word "any", to strike out "such credit union" and insert "credit union established under this act"; in line 20, after the word "*Provided*", to strike out "however"; on page 4, line 4, after "Sec. 3", to strike out "That section 12 of the said act, as amended, is" and insert "Section 12 of such act is hereby"; in line 5, after the word "out", to strike out "in (b)", and in line 6, after the word "and", to strike out "by", so as to make the bill read:

Be it enacted, etc., That section 4 of the District of Columbia Credit Unions Act is hereby amended by striking out "Comptroller of the Currency" and inserting in lieu thereof "Director of the Bureau of Federal Credit Unions."

SEC. 2. Section 6 of such act is hereby amended to read as follows:

"SEC. 6. (a) Credit unions established under this act shall be under the supervision of the Director of the Bureau of Federal Credit Unions. They shall make such financial reports to him (at least annually) as he may require.

"(b) Not later than January 31 of each calendar year each credit union established under this act shall pay to the Bureau of Federal Credit Unions, for the preceding calendar year, a supervision fee in accordance with the scale prescribed for Federal credit unions. All such fees shall be deposited with the Treasurer of the United States for the account of the Bureau in the special fund created by section 5 of the Federal Credit Unions Act and may be expended by the Director for such administrative and other expenses incurred in carrying out the provisions hereof as he may determine to be proper, the purpose of such fees being to defray, as far as practical, the administrative and supervisory costs of the Bureau incident to the execution of its functions under this act.

"(c) Each credit union established under this act shall be subject to examination by, and for this purpose shall make its books and records accessible to, any person designated by the Director. The scale of examination fees prescribed for Federal credit unions shall also be applicable to credit unions established under this act which fees shall be assessed against and paid by each credit union established under this act promptly after the completion of such examination. Examination fees collected under the provisions of this section shall be deposited to the credit of the special fund created by section 5 of the Federal Credit Unions Act, and shall be available for the purposes specified in subsection (a) of this section.

"(d) It shall be unlawful for any credit union established under this act to transact business in the District of Columbia without procuring a license from the District of Columbia; and all such credit unions shall pay a license tax of $5 per annum to the District of Columbia. No license shall be granted for a longer period than 1 year: *Provided*, That the Commissioners of the District of Columbia may suspend or revoke a license upon proof of the bankruptcy or insolvency of any such credit union or upon conviction of a violation of any provision of this act or any law or regulation of the District of Columbia or of the United States."

SEC. 3. Section 12 of such act is hereby amended by striking out "Comptroller of the Currency" and inserting in lieu thereof "Director of the Bureau of Federal Credit Unions."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF DISTRICT OF COLUMBIA TEACHERS' SALARY ACT OF 1947, AS AMENDED

The Senate proceeded to consider the bill (S. 2655) to amend the District of Columbia Teachers' Salary Act of 1947, as amended, which had been reported from the Committee on the District of Columbia with amendments, on page 1, at the beginning of line 5, to strike out "edition, Supp. I)" and insert "edition)", and on page 2, line 1, after the numerals "1951", to strike out "edition Supp. I)" and insert "edition)", so as to make the bill read:

Be it enacted, etc., That section 3 of the District of Columbia Teachers' Salary Act of 1947, as amended (sec. 31–661, D. C. Code, 1951 edition), is amended by striking therefrom the proviso and inserting in lieu thereof the following: "*Provided*, That for other than temporary employees the first 2 years of service within a salary class shall be probationary."

SEC. 2. Subsection (a) of section 5 of such act, as amended (sec. 31–663, D. C. Code, 1951 edition), is amended to read as follows:

"SEC. 5. (a) Each teacher, school officer, or other employee appointed or promoted on probationary tenure after June 30, 1952, and who is not entitled to annual increases of salary in accordance with section 7 of this act, as amended, shall receive his first annual increase in salary on the beginning date of his second year of probationary service in the position to which he has been appointed or promoted and he shall receive the second annual increase in salary on the date when his appointment or promotion is made permanent. Subsequent annual increases in salary within the same salary class shall be made in accordance with section 7 of this act, as amended."

SEC. 3. This act shall become effective as of July 1, 1952.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF DISTRICT OF COLUMBIA TRAFFIC ACT

The Senate proceeded to consider the bill (S. 1585) to amend the District of Columbia Traffic Act, 1925, as amended, which had been reported from the Committee on the District of Columbia with amendments, on page 2, line 1, after the word "application", to strike out "made under oath"; in line 21, after the word "application", to strike out "made under oath"; on page 6, line 20, after the word "Resident", to strike out "Commissioners, and" and insert "Commissioners;"; on page 7, line 2, after the word "appointed", to insert a semicolon and "and officers of the executive branch of the Government of the United States who are not domiciled within the District of

Columbia, whose appointment to the office held by them was by the President of the United States, subject to confirmation by the Senate, and whose tenure of office is at the pleasure of the President"; in line 21, after the word "of", to insert "any of"; on page 8, line 5, after the word "is", to strike out "personal" and insert "bodily"; in line 8, after the word "involving", to strike out "personal" and insert "bodily"; in line 11, after the word "is", to strike out "used" and insert "involved"; in line 12, after "(e)", to strike out "Upon conviction of any offense set forth in subsection (d) of this section, the clerk of the court shall forthwith" and insert "Whenever a judgment of conviction of any offense set forth in subsection (d) has become final, the clerk of the court in which the judgment was entered", and in line 19, after the word "section.", to insert "A Judgment of conviction shall be deemed to have become final for the purposes of this subsection—

"(1) if no appeal is taken from the judgment, upon the expiration of the time within which an appeal could have been taken, or

"(2) if an appeal is taken from the judgment, the date upon which the judgment, having been sustained, can no longer be appealed from or reviewed on a writ of certiorari", so as to make the bill read:

Be it enacted, etc., That paragraph (1) of subsection (a) of section 7 of the District of Columbia Traffic Act, 1925 (43 Stat. 1121), as amended (sec. 40–301 (a) (1), D. C. Code, 1951 edition), is amended (a) by striking from the first sentence thereof so much as reads "Upon application made under oath and the payment of the fee hereinafter prescribed, the Commissioners or their designated agent shall issue a motor vehicle operator's permit to any individual" and inserting in lieu thereof "The Commissioners or their designated agent shall, upon application, the payment of a fee of $3, and compliance with such regulations as the Commissioners or their designated agent may prescribe, issue a motor vehicle operator's permit valid for a period not in excess of 3 years, to any individual 16 years of age or over"; (b) by inserting in the second sentence thereof after "give a practical demonstration" the following ", or produce evidence acceptable to the Commissioners or their designated agent,"; (c) by striking from the second sentence thereof so much as reads "and in the presence of such individuals as may be authorized to conduct the demonstration"; (d) by striking therefrom the fourth, fifth, and sixth sentences; and (e) by striking from the last sentence thereof the colon and proviso, and inserting in lieu thereof "and not for compensation."

SEC. 2. Paragraph (2) of subsection (a) of section 7 of such act (43 Stat. 1121), as amended (sec. 40–301 (a) (2), D. C. Code, 1951 edition), is amended to read as follows:

"(2) The Commissioners or their designated agent may, upon application and the payment of a fee of $1, issue a learner's permit, valid for a period of 60 days, to any applicant for a motor vehicle operator's permit, 16 years of age or over, who has successfully passed all parts of the examination other than the driving demonstration test. Such permit shall entitle the permittee, while having such permit in his immediate possession, to operate a passenger motor vehicle, used solely for purposes of pleasure and not for compensation, when accompanied by the holder of a valid District motor vehicle operator's permit who is occupying a seat beside such permittee."

SEC. 3. Subsection (a) of section 7 of such act (43 Stat. 1121), as amended (sec. 40–301 (a), D. C. Code, 1951 edition), is amended by adding at the end thereof a new paragraph to read as follows:

"(6) Notwithstanding the provisions of this subsection, the Commissioners or their designated agent may, upon compliance with such regulations as they or their designated agent may prescribe, extend for a period not in excess of 6 years the validity of the operator's permit of any person who is a resident of the District and who is on active duty outside the District in the Armed Forces or the merchant marine of the United States and who was at the time of leaving the District the holder of a valid operator's permit."

SEC. 4. Subsection (b) of section 7 of such act (43 Stat. 1122), as amended (sec. 40–301 (b), D. C. Code, 1951 edition), is amended to read:

"(b) Each operator's permit shall state the name and address of the permittee, together with such other matter as the Commissioners or their designated agent may by regulation prescribe, and shall bear the signature of the permittee."

SEC. 5. Subsection (d) of section 7 of such act (43 Stat. 1122), as amended (sec. 40–301 (d), D. C. Code, 1951 edition), is repealed, and subsections (e) and (f) of section 7 of such act, as amended, are redesignated subsections (d) and (e), respectively.

SEC. 6. Subsection (a) of section 8 of such act (43 Stat. 1123), as amended (sec. 40–303) (a), D. C. Code, 1951 edition), is amended to read as follows:

"(a) The owner or operator of any motor vehicle who is not a legal resident of the District, and who has complied with the laws of any State, Territory, or possession of the United States, or of a foreign country or political subdivision thereof, in respect of the registration of motor vehicles and the licensing of operators thereof, shall, subject to the provisions of this section, be exempt from compliance with section 7 and with any provision of law or regulation requiring the registration of motor vehicles or the display of identification tags in the District. Such exemption shall cover the period immediately following the entrance of such owner or operator into the District equal to the period for which the Commissioners or their designated agent have previously found that a similar privilege is extended to legal residents of the District by such State, Territory, or possession of the United States, or foreign country or political subdivision thereof. The Commissioners or their designated agent shall from time to time ascertain such privileges and cause their or his findings to be promulgated. When the laws of any State, Territory, or possession of the United States or of a foreign country or of a political subdivision thereof contain a reciprocity provision similar to that herein above set forth, or the privilege extended to a legal resident of the District is for the remaining portion of the current District of Columbia registration year, then the owner of any motor vehicle who is a legal resident of such State, Territory, or possession of the United States, or of a foreign country or political subdivision thereof shall comply with the provisions of section 7 of this act and with every other provision of law or regulation requiring the registration of motor vehicles and the display of identification tags in the District at the time of the expiration of the current motor vehicle registration issued to such owner by such State, Territory, or possession of the United States or a foreign country or political subdivision thereof, unless the Commissioners or their designated agent shall have entered into a reciprocal agreement or arrangement with the duly authorized representatives of such State, Territory, or possession of the United States or a foreign country or political subdivision thereof, further to limit or to extend the period of time during which the validity of the motor vehicle registration and identification tags of such State, Territory, or posession of the United States or foreign country or political subdivision thereof shall be recognized by the District. The Commissioners or their designated agent are hereby authorized and empowered to enter into reciprocal agreements and arrangements as aforesaid. The following persons shall, with respect to the registration of motor vehicles and the licensing of operators thereof, if they have complied with the laws of the State, Territory, or possession from which they have been elected or appointed, or of which they are legal residents, be exempt during their respective terms of office or during the period of their employment as administrative employees from compliance with section 7 and with any other provision of law or regulation requiring the registration of motor vehicles and the display of identification tags in the District: Senators and Representatives in Congress; Delegates to Congress; Resident Commissioners; administrative employees of Senators, Representatives, Delegates, and Resident Commissioners who are legal residents of the State, Territory, or possession from which said Senators, Representatives, Delegates, and Resident Commissioners have been elected or appointed; and officers of the executive branch of the Government of the United States who are not domiciled within the District of Columbia, whose appointment to the office held by them was by the President of the United States, subject to confirmation by the Senate, and whose tenure of office is at the pleasure of the President."

SEC. 7. Subsection (b) of section 10 of such act (43 Stat. 1124), as amended (sec. 40–609 (b), D. C. Code, 1951 edition), is amended by striking the third sentence thereof.

SEC. 8. Section 10 of such act (43 Stat. 1124), as amended (sec. 40–609, D. C. Code, 1951 edition), is amended by adding two new subsections "(d)" and "(e)", to read as follows:

"(d) The Commissioners or their designated agent shall revoke the operator's permit or the privilege to drive a motor vehicle in the District of Columbia, or revoke both such permit and privilege, of any person who is convicted in the District of any of the following offenses:

"(1) Operating a motor vehicle while under the influence of any intoxicating liquor or narcotic drug.

"(2) Any homicide committed by means of a motor vehicle.

"(3) Leaving the scene of an accident in which the motor vehicle driven by him was involved and in which there is bodily injury, without giving assistance or making known his identity and address and the identity and address of the owner of said vehicle.

"(4) Reckless driving involving bodily injury.

"(5) Any felony in the commission of which a motor vehicle is involved.

"(e) Whenever a judgment of conviction of any offense set forth in subsection (d) has become final, the clerk of the court in which the judgment was entered shall certify such conviction to the Commissioners or their designated agent, who shall thereupon take the action required by subsection (d) of this section. A judgment of conviction shall be deemed to have become final for the purposes of this subsection—

"(1) if no appeal is taken from the judgment, upon the expiration of the time within which an appeal could have been taken, or

"(2) if an appeal is taken from the judgment, the date upon which the judgment, having been sustained, can no longer be appealed from or reviewed on a writ of certiorari."

SEC. 9. This act shall become effective 30 days after its enactment.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ALLEY DWELLINGS IN THE DISTRICT OF COLUMBIA

The bill (S. 3506) to repeal the act approved September 25, 1914, and to amend the act approved June 12, 1934, relating to alley dwellings in the District of Columbia, was announced as next in order.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. SMATHERS. Mr. President, I should like to ask the chairman of the committee whether or not the proposed legislation has been approved by the present District of Columbia Commissioners.

Mr. CASE. It was.

Mr. SMATHERS. And the committee, I presume, has a letter to that effect?

Mr. CASE. The clerk advises me that is correct.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill (S. 3506) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the act entitled "An act to provide, in the interest of public health, comfort, morals, and safety, for the discontinuance of the use as dwellings of buildings situated in the alleys in the District of Columbia," approved September 25, 1914 (38 Stat. 716), as amended (secs. 5–101, 102, D. C. Code, 1951 edition), is hereby repealed.

SEC. 2. Subsections (b), (c), and (d) of section 4 of the act entitled "An act to provide for the discontinuance of the use as dwellings of buildings situated in alleys in the District of Columbia, and for the replatting and development of squares containing inhabited alleys, in the interest of public health, comfort, morals, safety, and welfare, and for other purposes," approved June 12, 1934 (48 Stat. 932), as amended (sec. 5–106, D. C. Code, 1951 edition), are hereby repealed.

SEC. 3. This act shall take effect 60 days after approval or July 1, 1955, whichever is earlier.

DISTRICT OF COLUMBIA UNEMPLOYMENT COMPENSATION ACT

The Senate proceeded to consider the bill (S. 3482) to amend the District of Columbia Unemployment Compensation Act, which had been reported by the Committee on the District of Columbia with amendments.

Mr. CASE. Mr. President, I ask that the committee amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the amendments are agreed to en bloc.

The amendments agreed to en bloc are as follows:

On page 6, at the beginning of line 21, to strike out "(2)"; on page 9, line 9, after "Section 3", to strike out "(a)" and insert "(c)"; on page 17, line 3, after the word "individual", to strike out "qualified" and insert "qualifies"; in line 7, after the word "amount", to insert "or 38 percent of the wages for employment paid to such individual by employers during his base period, whichever is the lesser"; and on page 26, after line 2, to strike out:

"(b) All initial and continued claims for benefits for weeks occurring within a benefit year which commences prior to the effective date shall be computed and paid in accordance with the old law. All initial and continued claims for benefits for weeks occurring within a benefit year which commences on or after the effective date shall be computed and paid in accordance with the new law."

And in lieu thereof to insert the following:

"(b) The benefit rights of any individual having a benefit year current on or after the effective date shall be redetermined and benefits for calendar weeks ending subsequent to the effective date shall be paid in accordance with the new law: *Provided*, That no claimant shall have his benefits reduced or denied by redetermination resulting from the application of this provision. All initial and continued claims for benefits for weeks occurring within a benefit year which commences on or after the effective date shall be computed and paid in accordance with the new law."

The amendments were agreed to.

Mr. MORSE. Mr. President, I wish to make a brief statement about the bill and to offer some amendments on pages 18 and 19. The bill was considered by the committee, and I think a grand job was done by the staff in working out a bill which, in my opinion, represents, the best compromise of differences between the labor groups and the employer groups which could be worked out under all the circumstances.

It should be said that probably the representatives of each group—as was pointed out to us yesterday in committee, when we unanimously approved the bill—will probably say there are features of the bill which they wish were different, and they would not want to be urged to make public pronouncements in favor of the bill in its entirety. But, Mr. President, here we have the legislative process working very effectively, and we are greatly indebted, not only to the members of the subcommittee, but also to the very excellent staff of the Committee on the District of Columbia, for the excellent job they have done.

Since the taking of the action on yesterday, further consideration has been given to the bill by some of us; and, as a result, we now suggest certain amendments to the bill. I think they will be approved by the chairman of the committee on the basis of the further inquiry that has been made by the very able clerk of the committee. So I propose the following amendments:

On page 18, in line 19, to strike out the words "not less than four nor more than nine" and insert in lieu thereof "six."

On the same page, beginning in line 22 to strike out:

In addition such individual's total benefit amount shall be reduced in a sum equal to the number of weeks of disqualification multiplied by the weekly benefit amount.

Mr. CASE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. CASE. As I understand, the language the Senator from Oregon proposes to strike out is not contained in the present law. In that respect, if that language is stricken from the bill, we shall return to the status quo of the so-called penalty provision.

Mr. MORSE. That is correct.

Mr. CASE. Mr. President, under the circumstances, I see no objection to accepting the amendment. If there is any strong argument in favor of inserting the language of that part of the bill, as it now stands, the insertion can be made when the bill reaches the other body.

With respect to the first amendment proposed by the Senator from Oregon, namely, to strike out "not less than four nor more than nine" and insert "six", obviously the suggestion of the insertion of "six" is in the nature of a compromise. I see no objection to it, and I am willing to accept the amendment.

Mr. MORSE. Mr. President, the same changes will have to be made on page 19, in lines 6 and 7, and also in lines 9, 10, 11, and 12; and on the same page, in line 22 and line 25; and on page 20, in lines 1, 2, and 3.

The PRESIDING OFFICER. Without objection, the amendments of the Senator from Oregon will be considered en bloc.

The question is on agreeing to the amendments offered by the Senator from Oregon.

The amendments were agreed to.

Mr. MORSE. Mr. President, I should like to say a further word. I wish to make perfectly clear, for reference purposes, so that objectors in either employer or labor groups will know the reason for the action we have taken, that I am satisfied all parties in interest will be willing to admit that this measure constitutes a great forward step in improving this particular law in the District of Columbia, which law, all the testimony before our committee showed, in its present form is the worst in the country. Certainly in the case of the District of Columbia we need to come somewhat nearer to the program in the various States. So I am very glad to see this compromise measure passed.

Mr. CASE. Mr. President, in supplementing what the Senator from Oregon has said, let me state that I suppose the distinction of having about the least desirable law of this sort is shared by the District of Columbia with approximately 2 States, or at least I have been told there were 2 States in which such a situation prevails. Nevertheless, the District of Columbia was being pointed out as being exceedingly behind the times in its legislation in this field.

The question of improving the existing legislation was discussed by me and by the Senator from Maryland [Mr. BEALL] with the Undersecretary of Labor, Mr. Larson. We agreed to try to get something done in this field, so that the District of Columbia might be, as it properly should, a leader or a model for the Nation.

I am glad to see this measure passed by the Senate at this time.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3482) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the District of Columbia Unemployment Compensation Act, approved August 28, 1935 (49 Stat. 946), as

amended (title 46, ch. 3, D. C. Code, 1951 edition), is amended as follows:

Section 1 (b) (2) (B) is amended by adding at the end thereof the following:

"Service shall be deemed to be localized within a State if—

"(i) the service is performed entirely within such State; or

"(ii) the service is performed both within and without such State, but the service performed without such State is incidental to the individual's service within the State, for example, is temporary or transitory in nature or consists of isolated transactions."

Section 1 (b) (4) is amended to read as follows:

"(4) Notwithstanding any other provisions of this subsection, the term employment shall also include all service performed after the effective date of this amendment by an officer or member of the crew of an American vessel on or in connection with such vessel, provided that the operating office, from which the operations of such vessel operating on navigable waters within or within and without the United States are ordinarily and regularly supervised, managed, directed, and controlled, is within the district."

Section 1 (b) (5) is amended by adding at the end thereof the following subsections:

"(Q) service performed on or in connection with a vessel not an American vessel by an individual if he performed service on and in connection with such vessel when outside the United States;

"(R) service performed by an individual in (or as an officer or member of the crew of a vessel while it is engaged in) the catching, taking, harvesting, cultivating, or farming of any kind of fish, shellfish, crustacea, sponges, seaweeds, or other aquatic forms of animal and vegetable life (including service performed by any such individual as an ordinary incident to any such activity), except (A) service performed in connection with the catching or taking of salmon or halibut, for commercial purposes, and (B) service performed on or in connection with a vessel of more than 10 net tons (determined in the manner provided for determining the register tonnage of merchant vessels under the laws of the United States)."

Section 1 (b) is amended by adding at the end thereof the following subsections:

"(7) Notwithstanding any of the provisions of subsection 1 (b) (5) of this act, services shall be deemed to be in employment if with respect to such services a tax is required to be paid under any Federal law imposing a tax against which credit may be taken for contributions required to be paid into a State unemployment compensation fund."

"(8) (i) Any service performed for an employing unit, which is excluded under the definition of employment in section 1 (b) (5) and with respect to which no payments are required under the employment security law of another State or of the Federal Government may be deemed to constitute employment for all purposes of this act: *Provided*, That the Board has approved a written election to that effect filed by the employing unit for which the service is performed, as of the date stated in such approval. No election shall be approved by the Board unless it (A) includes all the service of the type specified in each establishment or place of business for which the election is made, and (B) is made for not less than 2 calendar years.

"(ii) Any service which, because of an election by an employing unit under section 1 (b) (8) (i), is employment subject to this act shall cease to be employment subject to the act as of January 1 of any calendar year subsequent to the 2 calendar years of the election, only if not later than March 15 of such year, either such employing unit has filed with the Board a written notice to that effect, or the Board on its own motion has given notice of termination of such coverage."

Section 1 (c) is amended by repealing subsection (1) and renumbering subsection (2) to be subsection (1) and subsection (3) to be subsection (2) and subsection (4) to be subsection (3).

Section 1 (h) is amended to read as follows:

"(h) 'Benefit year' with respect to any individual means the 52 consecutive-week period beginning with the first day of the first week with respect to which the individual first files a valid claim for benefits, and thereafter the 52 consecutive-week period beginning with the first day of the first week with respect to which the individual next files a valid claim for benefits after the termination of his last preceding benefit year. Any claim for benefits made in accordance with section 11 of this act shall be deemed to be a 'valid claim' for the purposes of this subsection if the individual has during his base period been paid wages for employment by employers as required by the provisions of section 7 of the act."

Section 1 (m) is amended to read as follows:

"(m) 'Employment office' means a free public employment office or branch thereof operated by this or any other State as a part of a State-controlled system of public employment offices or by a Federal agency or any agency of a foreign government charged with the administration of an unemployment-insurance program or free public employment offices."

Section 1 is amended by adding at the end thereof the following subsections:

"(t) The term 'American vessel' means any vessel documented or numbered under the laws of the United States; and includes any vessel which is neither documented or numbered under the laws of the United States nor documented under the laws of any foreign country, if its crew performs service solely for one or more citizens or residents of the United States or corporations organized under the laws of the United States or of any State.

"(u) The term 'principal base period employer' means the employer that paid a claimant the greatest amount of wages used in the computation of his claim. In the event two or more employers paid the claimant identical amounts, the employer in such group for whom the claimant most recently worked shall be the principal base period employer."

Section 3 (c) (1) is amended by adding at the end thereof the following: "Each year the Board shall credit to each of such accounts having a positive reserve on the computation date, the interest earned by such accounts from the Federal Government. This shall be done by averaging the interest rate paid for the four quarters ending on the computation date and crediting to each such account the amount which the reserve on such computation date would earn at such average rate of interest."

Section 3 (c) (2) is amended by adding at the end thereof the following:

"The principal base period employer shall be notified of each payment of benefits to a claimant at the time of such payment."

Section 3 (c) (7) (a) is amended to read as follows:

"(a) If 25 percent or more of the business of any employer is transferred, the transferee shall be determined a successor for the purposes of this section.

"(i) If the Board is unable to get information upon which to determine whether or not 25 percent of the business has been transferred, it may, in its discretion, make such determination based upon the quarterly payrolls of the employers involved for the last complete calendar quarter prior to the transfer and the first complete calendar quarter after such transfer.

"(ii) In the event of a transfer of 25 percent or more of the assets of a covered employer's business by any means whatever, otherwise than in the ordinary course of trade, such transfer shall be deemed a transfer of business and shall constitute the transferee a successor hereunder, unless the Board, on its own motion or on application of an interested party, finds that all of the following conditions exist:

"(1) The transferee has not assumed any of the transferor's obligations;

"(2) The transferee has not continued or resumed transferor's goodwill;

"(3) The transferee has not continued or resumed the business of the transferor, either in the same establishment or elsewhere; and

"(4) The transferee has not employed substantially the same employees as those the transferor had employed in connection with the assets transferred."

Section 3 (c) (7) (c) is amended to read as follows:

"(c) The successor shall take over and continue the employer's account, including its reserve and all other aspects of its experience under this section, in proportion to the payroll assignable to the transferred business as determined for the purposes of this section by the Board. However, his successor shall take over only the reserve actually credited to the account of the transferor or for which the transferor has filed a claim with the Board at the date of transfer. The successor shall be secondarily liable for any amounts owed by the employer to the fund at the time of such transfer; but such liability shall be proportioned to the extent of the transfer of business and shall not exceed the value of the assets transferred."

Section 3 (c) (7) (d) is amended to read as follows:

"(d) The benefit chargeability of a successor's account under section 3 (c), if not accrued before the transfer date, shall begin to accrue on the transfer date in case the transferor's benefit chargeability was then accruing; or shall begin to accrue on the date otherwise applicable to the successor, or on the date otherwise applicable to the transferor, whichever is earlier, in case the transferor's benefit chargeability was not accruing on the transfer date. Similarly, benefits from a successor's account, if not chargeable before the transfer date, shall become chargeable on the transfer date, in case the transferor was then chargeable for benefit payments; or shall become chargeable on the date otherwise applicable to the successor or on the date otherwise applicable to the transferor, whichever is earlier, in case the transferor was chargeable for benefit payments on the transfer date."

Section 3 (c) (7) (f) is amended to read as follows:

"(f) Notwithstanding any other provisions of this section, if the successor employer was an employer subject to this act prior to the date of transfer, his rate of contributions the remainder of the calendar year shall be his rate with respect to the period immediately preceding his date of acquisition. If the successor was not an employer prior to the date of transfer, his rate shall be the rate applicable to the transferor or transferors with respect to the period immediately preceding the date of transfer, provided there was only one transferor or there were only transferors with identical rates; if the transferor rates were not identical, the successor's rate shall be the highest rate applicable to any of the transferors with respect to the period immediately preceding the date of transfer. The rate of the transferor, if still subject to the act, will not be redetremined and shall remain the rate with respect to the period immediately preceding the date of transfer.

"For future years, for the purposes of section 3 (c), the Board shall determine the 'experience under this section' of the successor employer's account and of the transferring employer's account by allocating to

the successor employer's account for each period in question the respective proportions of the transferring employer's payroll, contributions and the benefit charges which the Board determines to be properly assignable to the business transferred."

Section 3 (c) (7) (g) is hereby repealed.

Section 3 (c) (8) (i) is amended to read as follows:

"i. If as of the computation date the total of all contributions credited to any employer's account, with respect to employment since May 31, 1939, is in excess of the total benefits paid after June 30, 1939, then chargeable or charged to his account, such excess shall be known as the employer's reserve, and his contribution rate for the ensuing calendar year or part thereof shall be—

"(A) 2.7 percent if such reserve is less than 0.9 percent of his average annual payroll;

"(B) 2 percent if such reserve equals or exceeds 0.9 percent but is less than 1.4 percent of his average annual payroll;

"(C) 1.5 percent if such reserve equals or exceeds 1.4 percent but is less than 1.9 percent of his average annual payroll;

"(D) 1 percent if such reserve equals or exceeds 1.9 percent but is less than 2.9 percent of his average annual payroll;

"(E) 0.5 percent if such reserve equals or exceeds 2.9 percent but is less than 3.4 percent of his average annual payroll;

"(F) 0.1 percent if such reserve equals or exceeds 3.4 percent of his average annual payroll."

Section 3 (c) (10) is amended by substituting the word "thirty" for the word "fifteen" in the second and seventh sentences thereof.

Section 3 is amended by adding at the end thereof the following new subsections:

"(e) From December 31, 1939, to January 1, 1955, wages, for the purpose of section 3, shall not include any amount in excess of $3,000 paid by an employer to any person arising out of his or her employment during any calendar year. After December 31, 1954, wages shall not include any amount in excess of $3,000 (or in excess of the limitation on the amount of taxable wages fixed by the Federal Unemployment Tax Act (26 U. S. C. 1600, 1607), whichever is greater) actually paid by an employer to any person during any calendar year. After December 31, 1954, the term 'employment' for the purpose of this subsection shall include services constituting employment under any employment security law of another State or of the Federal Government.

"(f) In the event the District of Columbia should elect to cover employees under this act under the provisions of section 1 (b) (8) (i) in lieu of contributions required of employers under this act, the District of Columbia shall pay into the fund an amount equivalent to the amount of benefits paid to individuals based on wages paid by the District. If benefits paid an individual are based on wages paid by both the District of Columbia and one or more other employers, the amount payable by the District to the fund shall bear the same ratio to total benefits paid to the individual as the base-period wages paid to the individual by the District of Columbia bears to the total amount of the base-period wages paid to the individual by all of his base-period employers.

"The amount of payment required under this section shall be ascertained by the Board quarterly and shall be paid from the general funds of the District at such time and in such manner as the Commissioners of the District of Columbia may prescribe except that to the extent that benefits are paid on wages paid by the District from special administrative funds, the payment by the District into the unemployment fund shall be made from such special funds.

"(g) Contributions due under this act with respect to wages for insured work shall, for the purpose of this section, be deemed to have been paid to the fund as of the date payment was made as contributions therefor under another State or Federal employment security law if payment into the fund of such contributions is made on such terms as the director finds will be fair and reasonable as to all affected interests. Payments to the fund under this subsection shall be deemed to be contributions for purposes of section 3."

Section 4 (c) is amended to read as follows:

"(c) (1) If contributions are not paid when due, there shall be added, as part of the contributions, interest at the rate of one-half of 1 percent per month or fraction thereof from the date the contributions became due until paid.

"(2) If contributions or wage reports are not filed when due or contributions are not paid when due, there shall be added as part of the contributions a penalty of 10 percent of the contributions, but such penalty shall not be less than $5 nor more than $25 and for good cause such penalty may be waived by the Board with the approval of the Commissioners of the District of Columbia."

Section 4 (d) is amended to read as follows:

"(d) In the event of the death, dissolution, insolvency, receivership, bankruptcy, composition, or assignment for benefit of creditors of any employer, contributions then or thereafter due from such employer under this section shall have priority over all other claims, except taxes due the United States or the District, and wages (not exceeding $600 with respect to any individual) due for services performed within the 3 months preceding such event."

Section 4 (j) is amended by substituting the following:

"(j) The Board in its discretion, whenever it may deem it administratively advisable, may charge off of its books any unpaid account due the Board or any credit due an employer who has been out of business for a period of more than 3 years. Whenever an account is charged off by the Board, there shall be placed in the minutes of the Board a reason for such action."

Section 4 (l) is amended by adding at the end thereof the following:

"There is hereby established in the Treasury of the United States a special escrow account into which the Board shall deposit all funds received in connection with an offer of compromise. Such funds shall be kept in such escrow account until final action is had upon the offer of compromise and shall not be subject to offset for any indebtedness whatsoever. In the event the compromise is approved, the funds shall be transferred to the District Unemployment Compensation Fund. In the event the compromise is disapproved, the funds shall be immediately returned to the individual who made the offer of compromise."

Section 7 is amended to read as follows:

"AMOUNT AND DURATION OF BENEFITS

"SEC. 7. (a) On and after January 1, 1938, benefits shall become payable from the benefit account of the District unemployment fund. All benefits shall be paid through employment offices, in accordance with such regulations as the Board may prescribe.

"(b) Except as provided in section 7 (c), an individual's weekly benefit amount shall be the amount in column (B) of the table in this subsection on the line on which, in column (A), there appears his total wages for employment paid to such individual by employers during that quarter of his base period in which such wages were the highest.

"TABLE A

High-quarter wages (Col. A)	Basic weekly benefit (Col. B)	Minimum qualifying wages (Col. C)
$130 to $184	8	276
$184.01 to $207	9	310
$207.01 to $230	10	345
$230.01 to $253	11	379
$253.01 to $276	12	414
$276.01 to $299	13	448
$299.01 to $322	14	483
$322.01 to $345	15	517
$345.01 to $368	16	552
$368.01 to $391	17	586
$391.01 to $414	18	621
$414.01 to $437	19	655
$437.01 to $460	20	690
$460.01 to $483	21	724
$483.01 to $506	22	759
$506.01 to $529	23	793
$529.01 to $552	24	828
$552.01 to $575	25	862
$575.01 to $598	26	897
$598.01 to $621	27	931
$621.01 to $644	28	966
$644.01 to $667	29	1,000
$667.01 and over	30	1,035

"(c) To qualify for benefits an individual must have been paid wages for employment in his base period totaling not less than the amount in column (C) of the table in section 7 (b) on the line on which, in column (B), there appears his weekly benefit amount, and such wages must have been in at least two calendar quarters in his base period: *Provided*, That if an individual during his base period has not been paid such an amount but has been paid wages in at least two quarters in his base period totaling not less than the amount in column (C) of the table in section 7 (b) on the line next above the line on which, in column (B), there appears the computed weekly benefit amount, he can qualify for benefits and his weekly benefit amount shall be the amount appearing in column (B) on the line for which the individual qualifies for benefits in column (C).

"(d) Any otherwise eligible individual shall be entitled during any benefit year to a total amount of benefits equal to 26 times his weekly benefit or 38 percent of the wages for employment paid to such individual by employers during his base period, whichever is the lesser: *Provided*, That such total amount of benefits, if not a multiple of $1, shall be computed to the next higher multiple of $1.

"(e) Any individual who is unemployed in any week as defined in section 1 (e) and who meets the conditions of eligibility for benefits of section 9 and is not disqualified under the provisions of section 10 shall be paid with respect to such week an amount equal to his weekly benefit amount, less the earnings (if any) payable to him with respect to such week. For the purpose of this subsection, the term 'earnings' shall include only that part of the remuneration payable to him for such week which is in excess of 40 percent of his weekly benefit amount for any week. Such benefits, if not a multiple of $1, shall be computed to the next higher multiple of $1.

"(f) Dependent's allowance: In addition to the benefits payable under the foregoing subsections of this section, each eligible individual who is unemployed in any week shall be paid with respect to such week $1 for each dependent relative, but not more than $3 shall be paid to an individual as dependent's allowance with respect to any 1 week of unemployment nor shall any weekly benefit which includes a dependent's allowance be paid in the amount of more than $30. An individual's number of dependents shall be determined as of the day with respect to which he first files a valid claim for benefits in any benefit year, and shall be fixed for the

duration of such benefit year. The dependent's allowance is not to be taken into consideration in calculating the claimant's total amount of benefits in subsection (d) of this section."

Section 10 (a) is amended to read as follows:

"(a) An individual who has left his most recent work voluntarily without good cause, as determined by the Board under regulations prescribed by it, shall not be eligible for benefits with respect to the week in which such leaving occurred and with respect to 6 consecutive weeks of unemployment which immediately follow such week, as determined by the Board in such case according to the seriousness of the case."

Section 10 (b) is amended to read as follows:

"(b) An individual who has been discharged for misconduct occurring in the course of his most recent work proved to the satisfaction of the Board shall not be eligible for benefits with respect to the week in which such discharge occurred and for 6 weeks of consecutive unemployment immediately following such week, as determined by the Board in such case according to the seriousness of the misconduct."

Section 10 (c) is amended to read as follows:

"(c) If an individual otherwise eligible for benefits fails, without good cause as determined by the Board under regulations prescribed by it, either to apply for new work found by the Board to be suitable when notified by any employment office or to accept any suitable work when offered to him by any employment office, his union hiring hall, or any employer direct, he shall not be eligible for benefits with respect to the week in which such failure occurred and with respect to 6 consecutive weeks of unemployment which immediately follow such week, as determined by the Board in such case according to the seriousness of the refusal. In determining whether or not work is suitable within the meaning of this subsection the Board shall consider (1) the physical fitness and prior training, experience and earnings of the individual, (2) the distance of the place of work from the individual's place of residence, and (3) the risk involved as to health, safety, or morals."

Section 10 (f) is amended to read as follows:

"(f) An individual shall not be eligible for benefits with respect to any week if it has been found by the Board that such individual is unemployed in such week as a direct result of a labor dispute, such as a strike or jurisdictional labor dispute still in active progress in the establishment where he is or was last employed: *Provided*, That this subsection shall not apply if it is shown to the satisfaction of the Board that—

"(1) he is not participating in or directly interested in the labor dispute which caused his unemployment; and

"(2) he does not belong to a grade or class of workers of which, immediately before the commencement of the dispute, there were members employed at the premises at which the dispute occurs, any of whom are participating in or directly interested in the dispute: *Provided*, That if in any case separate branches of work which are commonly conducted as separate businesses in separate premises are conducted in separate departments of the same premises, each such department shall, for the purposes of this subsection, be deemed to be a separate factory, establishment, or other premises."

Section 10 is amended by adding at the end thereof the following subsection:

"(h) An individual shall not be eligible for benefits for any week within the 6 weeks prior to the expected date of such individual's childbirth and within the 6 weeks after the date of such childbirth. In determining the expected date of childbirth the Board in its discretion may rely solely upon a doctor's certificate."

Section 13 (c) is amended to read as follows:

"(c) The Board shall each year, not later than May 1, submit to Congress a report covering the administration and operation of this act during the preceding calendar year, and containing such recommendations as the Board wishes to make."

Section 14 is amended to read as follows:

"SEC. 14. All moneys received by the Board from the United States under title III of the Social Security Act or from other sources for administering this act shall, immediately upon such receipt, be deposited in the Treasury of the United States as a special deposit to be used solely to pay such administrative expenses (including expenditures for rent, for suitable office space in the District of Columbia, and for lawbooks, books of reference, and periodicals), traveling expenses when authorized by the Board, premiums on the bonds of its employees, and allowances to investigators for furnishing privately owned motor vehicles in the performance of official duties at rates not to exceed $40 per month. All such payments of expenses shall be made by checks drawn by the Board and shall be subject to audit by the Commissioners of the District of Columbia in the same manner as are payments of other expenses of the District. Notwithstanding the provisions of this section and the provisions of sections 2 and 8 of this act, the Board is authorized to requisition and receive from its account in the Unemployment Trust Fund in the Treasury of the United States of America, in the manner permitted by Federal law, such moneys standing to the District's credit in such fund, as are permitted by Federal law to be used for expenses incurred by the Board for the administration of this act and to expend such moneys for such purposes. Moneys so received shall, immediately upon such receipt, be deposited in the Treasury of the United States in the same special account as are all other moneys received for the administration of this act. All moneys received by the Board pursuant to section 302 of the Social Security Act shall be expended solely for the purposes and in the amounts found necessary by the Department of Labor for the proper and efficient administration of this act. In lieu of incorporation in this act of the provision described in section 303 (a) (9) of the Social Security Act, the Board shall include in its annual report to Congress, provided in section 13 (c) of this act, a report of any moneys received after July 1, 1941, from the Department of Labor under title III of the Social Security Act, and any unencumbered balances in the unemployment compensation administration fund as of that date, which the Department of Labor finds have, because of any action or contingency, been lost or have been expended for purposes other than, or in amounts in excess of, those found necessary by the Department of Labor for the proper administration of this Act."

Section 15 (c) is amended to read as follows:

"(c) The Commissioners of the District shall serve on the Board without additional compensation, but the representatives of employees and employers, respectively, shall be paid $25 for each day of active service. For the purposes of this subsection, a part of a day shall be construed as an entire day."

Section 19 (a) is amended to read as follows:

"(a) Whoever makes a false statement or representation knowing it to be false, or knowingly fails to disclose a material fact, to obtain or increase any benefit or other payment provided for in this act or under an employment security law of any other State, of the Federal Government, or a foreign government for himself or any other individual, shall, for each such offense, be fined not more than $100 or imprisoned not more than 60 days, or both."

Section 19 is amended by adding at the end thereof the following subsection:

"(e) Any person who the Board finds has made a false statement or representation knowing it to be false, or who knowingly fails to disclose a material fact, to obtain or increase any benefit or any other payment under this act may be required by the Board to repay to it for the fund a sum equal to the amount of all benefits received by him for weeks subsequent to the date of the offense and falling within the benefit year current at the time of the offense. Such claimant may also be disqualified for benefits for all or part of the remainder of such benefit year and for a period of not more than 1 year commencing with the end of such benefit year and thereafter while any sum payable to the Board for the fund under this subsection is still due and unpaid, unless the Board in its discretion shall decide, after the disqualification imposed has been served, to allow the claimant to file a claim for benefits and recoup from such benefits the amount still payable to the Board.

"All findings under this subsection shall be made by an appeals tribunal of the Board which shall afford the claimant a reasonable opportunity for a fair hearing in accordance with the provisions of section 11 of this act and such findings shall be subject to review in the same manner as all other disqualifications decided by an appeals tribunal of the Board."

There shall be added after section 26 the following:

"Section 27. (a) Wherever this act prescribes the performance of a duty by any official or agency of the District of Columbia, such duty shall be performed by the Commissioners of the District of Columbia or such officer, employee, or agency as the Commissioners may delegate to perform the duty for them.

"(b) Where any provision of this act, or any amendment made by this act, refers to an office or agency abolished by or under the authority of Reorganization Plan No. 5 of 1952, such reference shall be deemed to be to the office, agency, or officer exercising the functions of the office or agency so abolished."

SEC. 2. (a) As used in this section, unless the context clearly requires otherwise—

(1) "old law" means the unemployment compensation law prior to its amendment by this act;

(2) "new law" means the unemployment compensation law as amended by this act; and

(3) "effective date" means the date upon which the new law becomes effective.

(b) The benefit rights of any individual having a benefit year current on or after the effective date shall be redetermined and benefits for calendar weeks ending subsequent to the effective date shall be paid in accordance with the new law: *Provided*, That no claimant shall have his benefits reduced or denied by redetermination resulting from the application of this provision. All initial and continued claims for benefits for weeks occurring within a benefit year which commences on or after the effective date shall be computed and paid in accordance with the new law.

SEC. 3. This act shall take effect on the first day of the next succeeding calendar quarter following the enactment of this act.

PAYMENT OF CERTAIN TRUST ACCOUNTS

The bill (H. R. 8692) to permit the payment of certain trust accounts to the beneficiary on the death of the trustee

by saving and loan and similar associations in the District of Columbia was considered, ordered to a third reading, read the third time, and passed.

AMENDMENT OF DISTRICT OF COLUMBIA APPROPRIATIONS ACT

The bill (H. R. 8973) to amend the act entitled "An act making appropriations for the District of Columbia," approved July 1, 1902, was considered, ordered to a third reading, read the third time, and passed.

INVESTMENT OF INSURANCE COMPANIES IN INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

The bill (H. R. 8974) to permit investment of funds of insurance companies within the District of Columbia in obligations of the International Bank for Reconstruction and Development was considered, ordered to a third reading, read the third time, and passed.

AMENDMENT OF LICENSE LAW OF THE DISTRICT OF COLUMBIA—BILL PASSED OVER

The bill (S. 880) to amend the license law of the District of Columbia was announced as next in order.

The PRESIDING OFFICER (Mr. BARRETT in the chair). Is there objection to the present consideration of the bill?

Mr. SCHOEPPEL. Mr. President, reserving the right to object, I wish to inquire whether I correctly understand that this is one of the bills to which there was some objection, or regarding which there was lack of unanimous consent on the part of the committee.

Mr. CASE. Mr. President, there was some question about the bill. I think one vote was cast against it.

However, I should like to yield at this time to the Senator from Maine [Mr. PAYNE].

Mr. PAYNE. Mr. President, it is true that the Senator from North Carolina [Mr. ERVIN] voted "no" in the committee when the committee voted on this particular measure.

Mr. SMATHERS. Mr. President, will the Senator from Maine yield to me?

Mr. PAYNE. I very gladly yield.

Mr. SMATHERS. Mr. President, by request, I ask that this bill go over.

The PRESIDING OFFICER. Objection being heard, the bill will be passed over.

TAX EXEMPTION ON PROPERTY OF VETERANS OF FOREIGN WARS IN DISTRICT OF COLUMBIA

The bill (H. R. 7132) to exempt from taxation certain property of the Veterans of Foreign Wars in the District of Columbia was considered, ordered to a third reading, read the third time, and passed.

SABINE RIVER COMPACT

The Senate proceeded to consider the bill (S. 3699) granting the consent of Congress to a compact entered into by the States of Louisiana and Texas and relating to the waters of the Sabine River.

Mr. JOHNSON of Texas. Mr. President, I introduced the proposed legislation for myself and my able colleague, the junior Senator from Texas, Mr. DANIEL, at the request of Congressman JACK BROOKS from the Second Texas Congressional District. Congressman BROOKS is the author of the legislation creating the Sabine River Authority. He has already obtained favorable action on this identical legislation in the House Subcommittee on Interior and Insular Affairs.

Mr. President, this measure is of such urgency that a distinguished group of Texans spent a part of last week in Washington urging its immediate passage. Mr. Byron Tinsley, attorney for the Sabine River Authority; Mr. John Simmons, the Sabine Compact Commissioner for Texas, and head of the Orange Industrial Development Committee; and Mr. John Lowe, leader of waterway and navigation development in southeast Texas for the past 25 years, all discussed with Congressman BROOKS and the Senators from Texas the importance and urgency of the bill.

Congressman BROOKS is present in the Senate Chamber at this time, and has impressed upon the Senators from Texas the necessity of obtaining action on the legislation he has proposed at the earliest possible date.

Mr. President, this is basically a bill designed to promote the proper conservation and utilization of the waters of a river important to my own State of Texas and the neighboring State of Louisiana.

The bill proposes that the consent of Congress be given to an interstate compact relating to the Sabine River and its tributaries.

It should be noted that this compact has been signed by representatives of the States of Texas and Louisiana, has been approved by a representative of the United States, and has been ratified by the legislatures of both States.

The major purposes of this compact may be simply stated. They are as follows:

First. To provide for an equitable division between the States of Texas and Louisiana of the waters of the Sabine River and its tributaries.

Second. To encourage the development, conservation, and use of these water resources.

Third. To establish a basis for cooperative planning and action by the two States for the construction, operation, and maintenance of water conservation and utilization projects on the part of the Sabine River touching both States.

Passage of this bill will enable the States of Louisiana and Texas to proceed to carry out these purposes of the compact upon which they have agreed.

I earnestly urge passage of the bill by the Senate.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3699) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the consent of the Congress is hereby given to the interstate compact relating to the waters of the Sabine River and its tributaries authorized by the act of November 1, 1951 (Public Law No. 252, 82d Cong., 1st sess.), which was signed by the representatives for the States of Louisiana and Texas and approved by the representative of the United States, at Logansport, La., on January 26, 1953, and thereafter ratified and approved by the Legislatures of the States of Louisiana and Texas, which compact reads as follows:

"SABINE RIVER COMPACT

"The State of Texas and the State of Louisiana, parties signatory to this compact (hereinafter referred to as 'Texas' and 'Louisiana,' respectively, or individually as a 'State,' or collectively as the 'States'), having resolved to conclude a compact with respect to the waters of the Sabine River, and having appointed representatives as follows:

"For Texas: Henry L. Woodworth, interstate compact commissioner for Texas; and John W. Simmons, president of the Sabine River Authority of Texas;

"For Louisiana: Roy T. Sessums, director of the Department of Public Works of the State of Louisiana;

and consent to negotiate and enter into the said compact having been granted by act of Congress of the United States approved November 1, 1951 (Public Law No. 252; 82d Cong., 1st sess.), and pursuant thereto the President having designated Louis W. Prentiss as the representative of the United States, the said representatives for Texas and Louisiana, after negotiations participated in by the representative of the United States, have for such compact agreed upon articles as hereinafter set forth. The major purposes of this compact are to provide for an equitable apportionment between the States of Louisiana and Texas of the waters of the Sabine River and its tributaries, thereby removing the causes of present and future controversy between the States over the conservation and utilization of said waters; to encourage the development, conservation, and utilization of the water resources of the Sabine River and its tributaries; and to establish a basis for cooperative planning and action by the States for the construction, operation, and maintenance of projects for water conservation and utilization purposes on that reach of the Sabine River touching both States, and for apportionment of the benefits therefrom.

"It is recognized that pollution abatement and salt water intrusion are problems which are of concern to the States of Louisiana and Texas, but inasmuch as this compact is limited to the equitable apportionment of the waters of the Sabine River and its tributaries between the States of Louisiana and Texas, this compact does not undertake the solution of those problems.

"*Article I*

"As used in this compact:

"(a) The word 'Stateline' means the point of the Sabine River where its waters in downstream flow first touch the States of both Louisiana and Texas.

"(b) The term 'waters of the Sabine River' means the waters either originating in the natural drainage basin of the Sabine River, or appearing as streamflow in said river and its tributaries, from its headwater source down to the mouth of the river where it enters into Sabine Lake.

"(c) The term 'Stateline flow' means the flow of waters of the Sabine River as determined by the Logansport gage located on the U. S. Highway 84, approximately 4 river miles downstream from the Stateline. This flow, or the flow as determined by such substitute gaging station as may be established

by the administration, as hereinafter defined, pursuant to the provisions of article VII of this compact, shall be deemed the actual Stateline flow.

"(d) The term 'Stateline reach' means that portion of the Sabine River lying between the Stateline and Sabine Lake.

"(e) The term 'the administration' means the Sabine River Compact Administration established under article VII.

"(f) The term 'domestic use' means the use of water by an individual, or by a family unit or household for drinking, cooking, laundering, sanitation, and other personal comforts and necessities; and for the irrigation of an area not to exceed 1 acre, obtained directly from the Sabine River or its tributaries by an individual or family unit, not supplied by a water company, water district or municipality.

"(g) The term 'stock water use' means the use of water for any and all livestock and poultry.

"(h) The term 'consumptive use' means use of water resulting in its permanent removal from the stream.

"(i) The terms '"domestic" and "stock water" reservoir' mean any reservoir for either or both of such uses having a storage capacity of 50 acre-feet or less.

"(j) 'Stored water' means water stored in reservoirs (exclusive of domestic or stock water reservoirs) or water withdrawn or released from reservoirs for specific uses and the identifiable return flow from such uses.

"(k) The term 'free water' means all waters other than 'stored waters' in the Stateline reach including, but not limited to, that appearing as natural stream flow and not withdrawn or released from a reservoir for specific uses. Waters released from reservoirs for the purpose of maintaining stream flows as provided in article V shall be 'free water.' All reservoir spills or releases of stored waters made in anticipation of spills shall be free water.

"(l) Where the name of the State or the term 'State' is used in this compact it shall be construed to include any person or entity of any nature whatsoever of the States of Louisiana or Texas using, claiming, or in any manner asserting any right to the use of the waters of the Sabine River under the authority of that State.

"(m) Wherever any State or Federal official or agency is referred to in this compact, such reference shall apply equally to the comparable official or agency succeeding to their duties and functions.

"Article II

"Subject to the provisions of article X, nothing in this compact shall be construed as applying to, or interfering with, the right or power of either signatory State to regulate within its boundaries the appropriation, use, and control of water not inconsistent with its obligations under this compact.

"Article III

"Subject to the provisions of article X, all rights to any of the waters of the Sabine River which have been obtained in accordance with the laws of the States are hereby recognized and affirmed; provided, however, that withdrawals, from time to time, for the satisfaction of such rights, shall be subject to the availability of supply in accordance with the apportionment of water provided under the terms of this compact.

"Article IV

"Texas shall have free and unrestricted use of all waters of the Sabine River and its tributaries above the Stateline subject, however, to the provisions of article V and X.

"Article V

"Texas and Louisiana hereby agree upon the following apportionment of the waters of the Sabine River:

"(a) All free water in the Stateline reach shall be divided equally between the two States, this division to be made without reference to the origin.

"(b) The necessity of maintaining a minimum flow at the Stateline for the benefit of water users below the Stateline in both States is recognized, and to this end it is hereby agreed that:

"(1) Reservoirs and permits above the Stateline existing as of January 1, 1953, shall not be liable for maintenance of the flow at the Stateline.

"(2) After January 1, 1953, neither State shall permit or authorize any additional users which would have the effect of reducing the flow at the Stateline to less than 36 cubic feet per second.

"(3) Reservoirs on which construction is commenced after January 1, 1953, above the Stateline shall be liable for their share of water necessary to provide a minimum flow at the Stateline of 36 cubic feet per second; provided, that no reservoir shall be liable for a greater percentage of this minimum flow than the percentage of the drainage area above the Stateline contributing to that reservoir, exclusive of the watershed of any reservoir on which construction was started prior to January 1, 1953. Water released from Texas' reservoirs to establish the minimum flow of 36 cubic feet per second, shall be classed as free water at the Stateline and divided equally between the two States.

"(c) The right of each State to construct impoundment reservoirs and other works of improvement on the Sabine River or its tributaries located wholly within its boundaries is hereby recognized.

"(d) In the event that either State constructs reservoir storage on the tributaries below Stateline after January 1, 1953, there shall be deducted from that State's share of the flow in the Sabine River all reductions in flow resulting from the operation of the tributary storage and conversely such State shall be entitled to the increased flow resulting from the regulation provided by such storage.

"(e) Each State shall have the right to use the main channel of the Sabine River to convey water stored on the Sabine River or its tributaries located wholly within its boundaries, downstream to a desired point of removal without loss of ownership of such stored waters. In the event that such water is released by a State through the natural channel of a tributary and the channel of the Sabine River to a downstream point of removal, a reduction shall be made in the amount of water which can be withdrawn at the point of removal equal to the transmission losses.

"(f) Each State shall have the right to withdraw its share of the water from the channel of the Sabine River in the Stateline reach in accordance with article VII. Neither State shall withdraw at any point more than its share of the flow at that point except, that pursuant to findings and determination of the Administration as provided under article VII of this compact, either State may withdraw more or less of its share of the water at any point providing that its aggregate withdrawal shall not exceed its total share. Withdrawals made pursuant to this paragraph shall not prejudice or impair the existing rights of users of Sabine River waters.

"(g) Waters stored in reservoirs constructed by the States in the Stateline reach shall be shared by each State in proportion to its contribution to the cost of storage. Neither State shall have the right to construct a dam on the Stateline reach without the consent of the other State.

"(h) Each State may vary the rate and manner of withdrawal of its share of such jointly stored waters on the Stateline reach, subject to meeting the obligations for amortization of the cost of the joint storage. In any event, neither State shall withdraw more than its pro-rata share in any 1 year (a year meaning a water year, October 1 to September 30) except by authority of the Administration. All jointly stored water remaining at the end of a water year shall be reapportioned between the States in the same proportion as their contribution to the cost of the storage.

"(i) Except for jointly stored water, as provided in (h) above, each State must use its apportionment of the natural stream flows as they occur and there shall be no allowance of accumulation of credits or debits for or against either State. The failure of either State to use the stream flow or any part thereof, the use of which is apportioned to it under the terms of this compact, shall not constitute a relinquishment of the right to such use in the future; conversely, the failure of either State to use the water at the time it is available does not give it the right to the flow in excess of its share of the flow at any other time.

"(j) From the apportionment of waters of the Sabine River as defined in this article, there shall be excluded from such apportionment all waters consumed in either State for domestic and stock water uses. Domestic and stock water reservoirs shall be so excluded.

"(k) Each State may use its share of the water apportioned to it in any manner that may be deemed beneficial by that State.

"Article VI

"(a) The States through their respective appropriate agencies or subdivisions may construct jointly, or cooperate with any agency or instrumentality of the United States in the construction of works on the Stateline reach for the development, conservation, and utilization for all beneficial purposes of the waters of the Sabine River.

"(b) All monetary revenues growing out of any joint State ownership, title, and interest in works constructed under section (a) above, and accruing to the States in respect thereof, shall be divided between the States in proportion to their respective contributions to the cost of construction: *Provided, however,* that each State shall retain undivided all its revenues from recreational facilities within its boundaries incidental to the use of the waters of the Sabine River, and from its severally State-owned recreational facilities constructed appurtenant thereto.

"(c) All operation and maintenance costs chargeable against any joint State ownership, title, and interest in works constructed under section (a) above, shall be assessed in proportion to the contribution of each State to the original cost of construction.

"Article VII

"(a) There is hereby created an interstate administrative agency to be designated as the 'Sabine River Compact Administration' herein referred to as 'the Administration.'

"(b) The Administration shall consist of 2 members from each State and of 1 member as representative of the United States, chosen by the President of the United States, who is hereby requested to appoint such a representative. The United States member shall be ex-officio chairman of the Administration without vote and shall not be a domiciliary of or reside in either State. The appointed members for Texas and Louisiana shall be designated within 30 days after the effective date of this compact.

"(c) The Texas members shall be appointed by the Governor for a term of 2 years; provided, that one of the original Texas members shall be appointed for a term to establish a half-term interval between the expiration dates of the terms of such members, and thereafter one such member shall be appointed annually for the regular term. One of the Louisiana members shall be ex-officio the Director of the Louisiana Department of Public Works; the

other Louisiana member shall be a resident of the Sabine watershed and shall be appointed by the Governor of Louisiana for a term of 4 years; provided, that the first member so appointed shall serve until June 30, 1958. Each State member shall hold office subject to the laws of his State or until his successor has been duly appointed and qualified.

"(d) Interim vacancy, for whatever cause, in the office of any member of the Administration shall be filled for the unexpired term in the same manner as hereinabove provided for regular appointment.

"(e) Within 60 days after the effective date of this compact, the Administration shall meet and organize. A quorum for any meeting shall consist of three voting members of the Administration. Each State member shall have one vote, and every decision, authorization, determination, order, or other action shall require the concurring votes of at least three members.

"(f) The Administration shall have power to:

"(1) Adopt, amend, and revoke bylaws, rules, and regulations, and prescribe procedures for administration of and consistent with the provisions of this compact.

"(2) Fix and determine from time to time the location of the Administration's principal office;

"(3) Employ such engineering, legal, clerical, and other personnel, without regard to the civil-service laws of either State, as the Administration may determine necessary or proper to supplement State-furnished assistance as hereinafter provided, for the performance of its functions under this compact: *Provided*, That such employee shall be paid by and be responsible to the Administration and shall not be considered to be employees of either State;

"(4) Procure such equipment, supplies, and technical assistance as the Administration may determine to be necessary or proper to supplement State-furnished assistance as hereinafter provided, for the performance of its functions under this compact;

"(5) Adopt a seal which shall be judicially recognized.

"(g) In cooperation with the chief official administering water rights in each State and with appropriate Federal agencies, the Administration shall have and perform powers and duties as follows:

"(1) To collect, analyze, correlate, compile, and report on data as to water supplies, stream flows, storage, diversions, salvage, and use of the waters of the Sabine River and its tributaries, and as to all factual data necessary or proper for the administration of this compact;

"(2) To designate as official stations for the administration of this compact such existing water-gaging stations (and to operate, maintain, repair, and abandon the same), and to locate, establish, construct, operate, maintain, repair, and abandon additional such stations, as the Administration may from time to time find and determine necessary or appropriate;

"(3) To make findings as to the deliveries of water at Stateline, as hereinabove provided, from the stream-flow records of the Stateline gage which shall be operated and maintained by the Administration or in cooperation with the appropriate Federal agency, for determination of the actual Stateline flow unless the administration shall find and determine that, because of changed physical conditions or for any other reason, reliable records are not obtainable thereat: in which case such existing Stateline station may with the approval of the administration be abandoned and, with such approval, a substitute Stateline station established in lieu thereof;

"(4) To make findings as to the quantities of reservoir storage (including joint storage) and releases therefrom, diversions, transmission losses and as to incident stream-flow changes, and as to the share of such quantities chargeable against or allocable to the respective States;

"(5) To record and approve all points of diversion at which water is to be removed from the Sabine River or its tributaries below the Stateline; provided that, in any case, the State agency charged with the administration of the water laws for the State in which such point of diversion is located shall first have approved such point for removal or diversion; provided further that any such point of removal or diversion once jointly approved by the appropriate State agency and the Administration, shall not thereafter be changed without the joint amendatory approval of such State agency and the Administration;

"(6) To require water users at their expense to install and maintain measuring devices of approved type in any ditch, pumping station or other water diversion works on the Sabine River or its tributaries below the Stateline, as the Administration may determine necessary or proper for the purposes of this compact; provided that the chief official of each State charged with the administration of water rights therein shall supervise the execution and enforcement of the Administration's requirements for such measuring devices;

"(7) To investigate any violations of this compact and to report findings and recommendations thereon to the chief official of the affected State charged with the administration of water rights, or to the governor of such State as the Administration may deem proper;

"(8) To acquire, hold, occupy, and utilize such personal and real property as may be necessary or proper for the performance of its duties and functions under this compact;

"(9) To perform all functions required of the Administration by this compact, and to do all things necessary, proper, or convenient in the performance of its duties hereunder.

"(h) Each State shall provide such available facilities, supplies, equipment, technical information, and other assistance as the Administration may require to carry out its duties and function, and the execution and enforcement of the Administration's orders shall be the responsibility of the agents and officials of the respective States charged with the administration of water rights therein. State officials shall furnish pertinent factual and technical data to the Administration upon request.

"(i) Findings of fact made by the Administration shall not be conclusive in any court or before any agency or tribunal, but shall constitute prima facie evidence of such facts.

"(j) In the case of a tie vote on any of the Administration's determinations, orders, or other actions subject to arbitration, then arbitration shall be a condition precedent to any right of legal action. Either side of a tie vote may, upon request, submit the question to arbitration. If there shall be arbitration, there shall be three arbitrators: one named in writing by each side, and the third chosen by the two arbitrators so elected. If the arbitrators fail to select a third within 10 days, then he shall be chosen by the representative of the United States.

"(k) The salaries, if any, and the personal expenses of each member of the Administration, shall be paid by the government which he represents. All other expenses incident to the Administration of this compact and which are not paid by the United States shall be borne equally by the States. Ninety days prior to the regular session of the legislature of either State, the Administration shall adopt and transmit to the governor of such State for his approval, its budget covering anticipated expenses for the forthcoming biennium and the amount thereof payable by such State. Upon approval by its governor, each State shall appropriate and pay the amount due by it to the Administration. The Administration shall keep an accurate account of all receipts and disbursements and shall include a statement thereof, together with a certificate of audit by a certified public accountant, in its annual report. Each State shall have the right to make an examination and audit of the accounts of the Administration at any time.

"(l) The Administration shall, whenever requested, provide access to its records by the governor of either State or by the chief official of either State charged therein with the administration of water rights. The Administration shall annually on or before January 15 of each year make and transmit to the governors of the signatory States, and to the President of the United States, a report of the Administration's activities and deliberations for the preceding year.

"Article VIII

"(a) This compact shall become effective when ratified by the legislature and approved by the governors of both States and when approved by the Congress of the United States.

"(b) The provisions of this compact shall remain in full force and effect until modified, altered, or amended in the same manner as hereinabove required for ratification thereof. The right so to modify, alter, or amend this compact is expressly reserved. This compact may be terminated at any time by mutual consent of the signatory States. In the event this compact is terminated as herein provided, all rights then vested hereunder shall continue unimpaired.

"(c) Should a court of competent jurisdiction hold any part of this compact to be contrary to the constitution of any signatory State or of the United States of America, all other severable provisions of this compact shall continue in full force and effect.

"Article IX

"This compact is made and entered into for the sole purpose of effecting an equitable apportionment and providing beneficial uses of the waters of the Sabine River, its tributaries and its watershed, without regard to the boundary between Louisiana and Texas, and nothing herein contained shall be construed as an admission on the part of either State or any agency, commission, department, or subdivision thereof, respecting the location of said boundary; and neither this compact nor any data compiled for the preparation or administration thereof shall be offered, admitted, or considered in evidence, in any dispute, controversy, or litigation bearing upon the matter of the location of said boundary.

"The term 'Stateline' as defined in this compact shall not be construed to define the actual boundary between the State of Texas and the State of Louisiana.

"Article X

"Nothing in this compact shall be construed as affecting, in any manner, any present or future rights or powers of the United States, its agencies, or instrumentalities in, to, and over the waters of the Sabine River Basin.

"In witness whereof, the representatives have executed this compact in three counterparts hereof, each of which shall be and constitute an original, one of which shall be forwarded to the Administrator, General Services Administration of the United States of America and one of which shall be forwarded to the governor of each State.

"Done in the city of Logansport, in the State of Louisiana, this 26th day of January 1953.

SEC. 2. The right to alter, amend, or repeal this act is expressly reserved. This reservation shall not be construed to prevent the vesting of rights to the use of water pursuant to applicable law, and no alteration, amendment, or repeal of this act shall be held to affect rights so vested.

FEDERAL ASSISTANCE IN SCHOOL CONSTRUCTION TO STATES AND TERRITORIES

The bill (S. 2601) to provide for Federal financial assistance to States and Territories in the construction of public elementary and secondary school facilities was announced as next in order.

The PRESIDING OFFICER. Without objection——

Mr. SMATHERS. Mr. President, I think both calendar committees will agree that this particular bill should not be passed on the Consent Calendar, even though the bill is a very meritorious one.

Mr. SCHOEPPEL. I heartily agree with the statement of the Senator from Florida.

The PRESIDING OFFICER. Objection is heard, and the bill will be passed over.

That concludes the calendar.

REPEAL OF SECTION 16 OF THE FEDERAL RESERVE ACT

Mr. BENNETT. Mr. President, last night the Senate passed Senate bill 3268, a bill to repeal the provisions of section 16 of the Federal Reserve Act which prohibits a Federal Reserve bank from paying out notes of another Federal Reserve bank. An identical bill, House bill 9143, had previously passed the House and was referred to the Senate Committee on Banking and Currency.

I ask unanimous consent that the vote by which Senate bill 3268 was passed yesterday be reconsidered.

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). Is there objection? The Chair hears none, and it is so ordered.

Mr. BENNETT. I now ask that the Committee on Banking and Currency be discharged from further consideration of House bill 9143.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BENNETT. I now ask unanimous consent for the present consideration of House bill 9143.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H. R. 9143) to repeal the provisions of section 16 of the Federal Reserve Act which prohibits a Federal Reserve bank from paying out notes of another Federal Reserve bank was considered, ordered to a third reading, read the third time, and passed.

Mr. SMATHERS. Mr. President, I understood the Senator to say that the Senate bill and the House bill were identical.

Mr. BENNETT. That is correct.

The PRESIDING OFFICER. Without objection, Senate bill 3268 is indefinitely postponed.

DEVELOPMENT OF THE PRIEST RAPIDS SITE ON THE COLUMBIA RIVER, WASH.

The Senate resumed the consideration of the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

Mr. PAYNE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PAYNE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUSH. Mr. President, this bill provides for the development of the Priest Rapids site on the Columbia River, in the State of Washington, under a license issued pursuant to the Federal Power Act. The Committee on Public Works, to whom the bill providing for this development was referred, reported the bill favorably, with an amendment, and recommended its passage. The amendment is, on page 4, line 12, at the end of the paragraph, to add the following:

Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system, may be made available to and may be purchased by the Bonneville Power Administrator at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior. The Administrator may use funds in the continuing fund, established under the provisions of section 11 of the Bonneville Project Act of August 27, 1937 (50 Stat. 731), as amended, to purchase such power. Such power may be commingled with power from Federal dams in the Columbia River system for which the Bonneville Power Administrator has been designated marketing agent and shall be sold by the Administrator in accordance with the provisions of the Bonneville Project Act at established rate schedules.

As will be seen, the amendment is permissive. It would permit surplus power to be sold by the public utility district operating the property to the Bonneville Power Administrator, and he would be permitted to take such power if it should become available. The amendment is entirely permissive.

The purpose of the bill is to modify the authorization of the Priest Rapids Dam as contained in the Flood Control Act of 1950 to permit development of the Priest Rapids site by public utility district No. 2, Grant County, Wash., or such district or its successor in combination with such other utilities as it may legally be affiliated with or by any division, subdivision, agency, or commission of the State of Washington, under and in accordance with the terms and conditions of a license issued pursuant to the Federal Power Act and subject to conditions specified in the bill. The bill provides that the Priest Rapids Reservoir site shall be developed to utilize the optimum capabilities of the site and provision is made for determining such development prior to the granting of a license.

Navigation and flood-control facilities would be included either as a part of the initial construction or at a later date.

The Priest Rapids Dam and Reservoir was approved by the Flood Control Act of 1950 as an integral unit in the comprehensive plan for flood control and other purposes in the Columbia River Basin.

The proposed dam site is at mile 397 on the Columbia River, 73 miles above the mouth of Snake River. The dam would be about 195 feet high and 13,500 feet long, consisting of a concrete gravity channel section with earth-fill embankments on each abutment. The reservoir would extend upstream about 56 miles to the existing Rock Island Dam, and would inundate about 52,800 acres at maximum pool and 36,500 acres at normal pool elevation. The total capacity of the reservoir would be 3,300,000 acre-feet, of which 2,100,000 acre-feet between elevations 540 feet and 590 feet would be available for flood-control storage.

The proposed power installation consists of 23 53,000 kilowatt generators initially, a total of 1,219,000 kilowatts, with an ultimate installation of 30 such units, a total of 1,590,000 kilowatts. The power project would be essentially a run-of-river plant, developing an average head of about 145 feet, utilizing the flows as regulated by upstream storage. The total power produced would be about 8 billion kilowatt-hours annually.

The total estimated cost of the project, based on July 1953 price levels, was about $364 million, with the intial power installation of 1,219,000 kilowatts, provisions for future navigation facilities, and with the 2,100,000 acre-feet of flood-control storage. The cost of the flood-control storage is about $65 million, and the provision for navigation facilities is about $10 million. The benefits are estimated to be $22,774,000 for power, and $3,345,000 for flood control and recreation. The economic ratio is 1.43.

H. R. 7664 would modify the authorization of Priest Rapids Dam to permit the development of the site by public utility district No. 2 of Grant County,

Wash., its successor or a combination, under a license issued pursuant to the Federal Power Act, and subject to conditions specified in the bill, such license to authorize the development essentially the same as now authorized, and recommended in House Document 531, 81st Congress.

The license would provide for further construction with respect to flood control and navigation, either initially or at a later date, at Federal expense, with allocation of costs for such features approved by the Federal Power Commission.

Development of the Priest Rapids site by local interests at this time would make available the power benefits to the region at an early date.

I may say that the administration is very much interested in this bill. The Secretary of the Interior and, as I shall later show, various other authorities connected with the Government who have an interest in such matters are all in favor of the bill.

The bill assures that a reasonable portion of the power generated will be made available for equitable distribution within the economic marketing area in adjacent States. The committee recommends an amendment proposed by the sponsors of the companion Senate bill that would permit the Bonneville Power Administrator to use funds from his continuing fund to purchase power surplus to the requirements of the licensee and other non-Federal marketing agencies, and distribute such power through the Bonneville grid for sale at established rates in accordance with the Bonneville Project Act.

The committee believes that the bill adequately protects the public interest insofar as it concerns development in accordance with the comprehensive plan that has been approved by Congress.

With reference to the preference clause, the committee considered an amendment, proposed by the sponsors of the companion Senate bill, which would require that all sales of power by the licensee from this project be made in accordance with the preference requirements of section 5 of the Flood Control Act of 1944 which reads as follows: "Preference in the sale of such power and energy shall be given to public bodies and cooperatives." This was enacted to apply to power sold from dams constructed and operated by the Federal Government in the exercise of its control over navigable waters. Similarly, the Federal Power Act provides that preference be given to public bodies in the granting of licenses for development hydroelectric power in navigable waters.

Neither of these laws contemplated any dictation as to the subsequent disposition of the power after it was purchased or developed under license by such public bodies.

To require public bodies to give preference to other public bodies could result in discrimination against the selling agency and its individual customers. The demands of neighboring public bodies could reach such a volume that the selling agency would have insufficient power for a normal growth in demand of the individual domestic residents, farmers, and industries located in its own marketing area. Such a result would be contrary to the statutory purposes of the public body.

The Federal Government has given financial assistance by loans and grants and has issued licenses for water-power developments to numerous State, municipal, and cooperative public power agencies in the past. It has not imposed any public preference requirements upon these public power agencies which are chartered and dedicated to the marketing of power in the best public interest. The committee feels that it would be wholly inconsistent and discriminatory to impose such conditions in this bill. It has therefore rejected the proposed amendment.

Mr. President, the committee report includes a letter from the Secretary of the Army approving this proposed legislation, a letter from the Bureau of the Budget signed by Mr. Hughes, who is now the Director of the Budget, and a letter from the Federal Power Commission, both recommending the passage of this bill. Those letters are addressed to the chairman of the committee, the distinguished Senator from Pennsylvania [Mr. MARTIN].

It is the purpose of the bill to enable the public utility district in that area to finance and operate this property under license. The money for this project—and it is a very large sum, amounting to $364 million—will largely be raised by the sale of bonds which will be issued by this public power authority. Thus the bill provides, as the Senators from Washington so ably pointed out to the committee, that private funds will be used for the development of this great project, which is so vital to the area in which it is located.

I believe that one of the very fine features of the bill is that it puts no load on the Federal Treasury. The bill was passed by the other House without opposition. So far as I know, there was no yea-and-nay vote, but my information is that there was no opposition to the bill.

Mr. President, that completes my remarks on the bill, and I recommend that it be passed as reported, without further amendment.

Mr. MARTIN. Mr. President, will the Senator yield?

Mr. BUSH. I yield.

Mr. MARTIN. Mr. President, as I understand, no public funds will be used in the construction of the project.

Mr. BUSH. That is correct.

Mr. MARTIN. It will be a self-liquidating project.

Mr. BUSH. That is correct. The financing will be provided locally by the local management of this particular public utility district, through the sale of its obligations, bonds, to the public. They will be tax-free bonds. They will be very attractive bonds, I believe. However, no public funds are involved in financing the project, and therefore there will be no load placed on the Federal Treasury.

Mr. MARTIN. If the Senator will yield further I should like to ask him whether there are any bonds of State or local governments involved.

Mr. BUSH. No. I will say to the distinguished Senator that none of the local governments, State or otherwise, have their credit pledged behind the proposed bonds. They will be obligations of the public utility district. I should like to liken them to bonds of the Port of New York Authority, or bonds of an agency which is created by a State government, but an agency which is sufficient unto itself. It has its own treasury and its own obligations. These obligations will be met from the proceeds from the sale of power under the management of the local public utility district.

Mr. MARTIN. Mr. President, will the Senator yield further?

Mr. BUSH. I yield.

Mr. MARTIN. As I understand, the bonds would be somewhat similar to turnpike bonds.

Mr. BUSH. In a sense, that is correct. They would be the same type of bonds. They would be revenue bonds.

Mr. MARTIN. The only advantage they would get is that they would be tax exempt.

Mr. BUSH. Yes; that is a very important advantage.

Mr. MARTIN. It is a very important advantage; but that is their advantage.

Mr. BUSH. Yes; they would have that advantage.

Mr. MARTIN. I thank the Senator.

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). The Secretary will state the committee amendment.

Mr. MAGNUSON. Mr. President, if the Senator would like to have the committee amendment adopted before I begin, I shall be glad to have that procedure taken now.

Mr. BUSH. I should like to have the committee amendment adopted to this point.

The PRESIDING OFFICER. The Secretary will state the committee amendment.

The LEGISLATIVE CLERK. On page 4, line 12, after the word "thereto", it is proposed to insert the following:

Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system, may be made available to and may be purchased by the Bonneville Power Administrator at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior. The Administrator may use funds in the continuing fund, established under the provisions of section 11 of the Bonneville Project Act of August 27, 1937 (50 Stat. 731), as amended, to purchase such power. Such power may be co-mingled with power from Federal dams in the Columbia River system for which the Bonneville Power Administrator has been designated marketing agent and shall be sold by the Administrator in accordance with the provisions of the Bonneville Project Act at established rate schedules.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

Mr. MAGNUSON. Mr. President, my colleague [Mr. JACKSON] and I appeared before the Public Works Committee and stated our position on this bill at some length and in some detail. However,

because, as the Senator from Connecticut has pointed out, this is a project of great magnitude, I believe the RECORD should not be lacking in some explanation; and I am glad to make an explanation, in which I am sure my colleague joins me.

For the benefit of Members of the Senate who may not have had the opportunity of visiting the State of Washington, I will identify the portion of the Columbia River affected by this bill and give you a brief résumé of the circumstances which bring this particular piece of legislation before us.

Priest Rapids is a dam site on the main stem of the Columbia River, located 10 or 12 miles upstream from the Hanford Engineering Works at Richland, Wash., and about 35 miles upstream from a point where the Snake River runs into the Columbia.

The site is about 25 to 30 miles downstream from an existing dam known in the area by the name of Rock Island. The existing dam was built originally by the Puget Sound Power & Light Co., of Seattle.

In 1950 Congress authorized Priest Rapids Dam for construction by the Corps of Engineers. It was included in the 1950 Flood Control Act and is an integral unit in the comprehensive plan for the development of the Columbia River and its tributaries. As recommended in House Document No. 531, the initial installation of power facilities would develop about 2,100,000 kilowatts with an ultimate installation of 1,500,000 kilowatts.

Senators can see from these figures that the Priest Rapids stretch of the Columbia River, some 30 miles in length, is extremely important to the present and future growth of the Pacific Northwest.

The project will cost in the neighborhood of $360 million. It will be financed by the sale of revenue bonds. As the Senate knows, these are not general obligation bonds. They are bonds which, in effect, represent a mortgage on the revenues produced through sale of power from the project. The key to financing the project, therefore, is not the physical assets owned by the local groups but the feasibility of the project itself—the net revenues the project will produce.

What does the bill, as reported from the committee, provide?

First, the bill modifies the authorization of Priest Rapids Dam as contained in the Flood Control Act of 1950, to permit Grant County Public Utility District and/or such other public agencies as may wish to join with it to seek a license from the Federal Power Commission. This proposed legislation does not give them a license. They must justify their project as to its feasibility and all the other aspects involved in order to obtain a license from the Federal Power Commission.

If the license is granted the local government agency or agencies have the opportunity to see whether they can finance the project and, if they can, they will have the authority to proceed with construction.

If the Federal Power Commission refuses a license, or if the FPC grants a license and the local government agencies are unable to finance the project within a reasonable time, the 1950 authorization of Priest Rapids Dam reverts to its present status.

It is somewhat similar to the agreement which was provided in the case of the Coosa, Ala., project, which allowed a private company, the Alabama Power Co., to develop power there. This is at the other end of the stick, so to speak. It would give an opportunity to a public body to do it.

The 1950 authorization of the project for construction by the Corps of Engineers will become operative just as though H. R. 7664 had never been enacted. In other words the legislation gives the local groups a chance to see what they can do. If they can't perform, Priest Rapids will still be authorized as provided by Congress.

Second, the proposed legislation stipulates that the Priest Rapids reservoir site must be developed to conform to the comprehensive plan already approved by Congress.

That is the reason why in the beginning of my statement I said the bill was a modification of the authorization of Priest Rapids.

The FPC is directed to require this as a condition in any license it may issue. This provision of the bill will prevent underdevelopment of the site—will insure that no portion of the benefits available in this stretch will be lost to the region and the country.

Third, the bill stipulates that the Department of the Army shall review any plans submitted by the local groups to the FPC with particular regard to flood control and navigation. This provision will obviate any possibility that plans developed by the local groups fail to obtain navigation and flood control benefits. It also insures that the Corps of Engineers will have an opportunity to review the plans so as to make certain that the designs and specifications will actually get from the river the full power potential—that the plans actually conform to the concept of comprehensive development.

Mr. President, I wish to say that my colleague and I introduced this bill some 16 or 17 months ago. During that period of time, we have had many conferences with representatives of the Public Utility District, and also with the Corps of Engineers, as to the wording which would permit the construction to proceed. They finally came to an agreement about it. Their views were taken into consideration and they participated in conferences on the bill on several occasions.

Fourth, the bill authorizes the construction of navigation and flood control features in connection with the project. These features may be added either during initial construction or at a later date. I emphasize the word "may."

Since navigation and flood control benefits are nonreimbursable, the Federal Government would stand those costs when and if the Congress decides to appropriate the funds.

That is the same feature that is found in the so-called Coosa bill. There was some uncertainty about the flood-control features, but if later on the Federal Government decided to proceed with them, that feature of the project could be taken care of if the Congress should appropriate the necessary funds.

Mr. MARTIN. Mr. President, will the Senator from Washington yield?

Mr. MAGNUSON. I yield.

Mr. MARTIN. As I understand, that feature of the project would be considered if conditions warranted it at some time in the future.

Mr. MAGNUSON. If it was desired to proceed with it. But I must say, without going into the engineering features of the project, that flood control and navigation are somewhat a minor part of the project. It is primarily a hydroelectric project being built by a public utility.

Local groups, however, will have to make provision in their designs for the addition of these features at their own expense. The power features costing about $300 million can be constructed without a single dime from the Federal Government, if the local groups can finance it. I do not know whether they can or not, but we are giving them the opportunity. The distinguished Senator from Connecticut said that the bonds might be productive. I hope they will be.

Mr. MARTIN. Mr. President, will the Senator from Washington yield further?

Mr. MAGNUSON. I yield.

Mr. MARTIN. I asked these questions of the distinguished Senator from Connecticut, and I think they are very important. As I understand, neither Federal Government nor any local government credit will be extended in issuing these bonds.

Mr. MAGNUSON. That is correct.

The proposed legislation provides that the Corps of Engineers, if requested to do so by the licensee, may undertake actual construction of the project. The licensee would turn over to the Corps the funds obtained from sale of revenue bonds and with these funds the Corps would proceed with construction. It would act as the constructing agent for the licensee.

Sixth, the project when completed would have to be operated and maintained in accordance with reasonable rules and regulations stipulated by the Secretary of the Army in the interest of flood control and navigation. This means that the public utility district would have to operate the project so that it would contribute to the control of floods on the Columbia, and to navigation, even in the way in which it must be built in its initial stages.

Seventh, a reasonable portion of the power output must be offered for sale in neighboring States. I have before me a memorandum which shows that Ohio preserves the concept of regional distribution of benefits from a regional asset. In other words, there is a precedent for this action.

Eighth, the Bonneville Power Administration may purchase power surplus to accommodate the needs of the licensee and other non-Federal customers; and the licensee must sell such power at its cost.

Ninth, the local groups are required to file an application for a license within 2

years following the enactment of the bill. In other words, there is a 2-year limitation, and I think that has been the standard limitation on similar types of legislation. If the application is not filed within 2 years, the legislation will become null and void, and Priest Rapids will revert to its present authorized status.

In addition, section 7 stipulates that if the application for a license is denied, the project reverts to its present status. In other words, if the Federal Power Commission says "No," the project will revert to its present status.

Furthermore, the section provides that if the license is granted and construction on the project is not started within a reasonable time, the authorization and the Flood Control Act of 1950 again become controlling. Moreover, the Federal Power Commission is directed to act on the application within 1 year after it is filed.

That, in substance, is what the bill provides. My colleague and I felt that there should have been a further amendment, and it was considered by the committee. We felt that the amendment would make a much better measure out of the bill, but the committee decided not to accept the amendment. As I understand, at one time it was accepted, and then it was rejected by a close vote. I wish to say, in all fairness, that what the amendment did was to adopt the preference clause which has been enacted in flood control acts by previous Congresses. Perhaps the amendment is not necessary.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. BUSH. Is the Senator from Washington quite certain he is correct about that statement? Does not the Flood Control Act preference clause pertain to operations which are owned by the Federal Government? Is there any precedent for the preference clause in the case of a project of this kind, which is financed by a local public utility district and with private funds? Is there any precedent for giving the Federal Government the power to dictate where the power should go? I wish the Senator would cite some authority for his statement.

Mr. MAGNUSON. I think the Senator from Connecticut is technically correct with the reference to the application of the preference clause. It is only applied generally to federally-owned dams, because there are very few of the other types. But the Federal Power Commission, in considering most applications—I have not run them down—of other public bodies to build dams, has also suggested the inclusion in the license of the preference clause.

Mr. BUSH. Can the Senator cite any similar example?

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. JACKSON. It is my understanding that in the Federal Water Power Act of 1920 there is a provision to the effect that when the Federal Power Commission grants a license, preference must be given to a public agency, in the application for a license to construct a hydropower project. The specific question which the distinguished senior Senator from Connecticut is now raising has never before been presented to the Senate.

Mr. BUSH. That is the point I wish to make.

Mr. JACKSON. I wish to call the attention of the Senator, the fact that in 1920 there was written into what was then called the Federal Water Power Act a specific provision which called for the granting of preference to a public body over a private body, for an application for a license to construct a dam on a navigable stream in the United States.

Historically, of course, the preference clause itself goes back to the Reclamation Act of 1903.

It is included in the Flood Control Act of 1944, section 5. It is in the Bonneville Power Administration Act. It is in the Tennessee Valley Authority Act.

The reason why I say it is important in this particular instance is that this dam is being integrated, in effect, into the Northwest Regional Federal power development program. Federal power in this region is now being sold on a public-preference basis. This amendment would continue that wise policy.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. BUSH. The instances which the Senator has cited, in which preference has been authorized, relate to federally owned projects. That is the point. The only bills which have been before the Senate this year, as I recall, related to the Coosa River, in Alabama, where no such preference clause was even suggested. Likewise in the case of the Markham Ferry development, in Oklahoma, in which a similar situation exists, no Federal preference clause was suggested.

I do not know of any precedent for the amendment about which the Senators from Washington are speaking.

Mr. JACKSON. In this case, the dam is to be part and parcel of the overall regional power development of the Northwest. The bill contains a unique provision to the effect that the power is to be sold in the other States on a proportional basis.

This would mean that the power in those areas, marketed from the dam, would be sold first to the public preference customers in the region.

Mr. BUSH. Mr. President, I may say to the Senator from Washington that what he is speaking about is very different from the policy contained in the bill. Of course, the power to be will be interconected with the power system of the area. The bill so provides. The bill also contains an amendment which is permissive, giving the local authorities the opportunity to sell surplus power. It also gives the Bonneville Dam Authority the right to buy power.

But under the provision which the Senators from Washington desire to include in the bill, the Federal Government would be placed in the position of dictating the flow of the power, which might, as a result, embarrass the public utility district which is promoting the dam for local area needs. I say that under the amendment which the Senators from Washington suggest, that is exactly the possibility which is offered.

Mr. JACKSON. I wish to make it clear that we are dealing with a public resource. It is our desire to have the power resource of the dam distributed fairly and equitably, not merely to the people of the State of Washington, but to the entire Northwest area. The amendment will insure a fair, just, and equitable distribution of a public resource. It will prevent the monopolization of the sale of the power in a given State, by requiring that preference shall be given to the public bodies in that area. I believe that is sound public policy. It is a policy which has been followed in connection with other Federal projects. I think it is a reasonable condition to attach to the bill.

Mr. BUSH. It would surprise me very much, I may say to the Senator, if the laws and the administration of the laws in the State of Washington would permit the public utility district in question to operate this facility unfairly to people of the State of Washington. It seems to me that the Federal preference requirement which is suggested in the proposed amendment opens up an opportunity for unfair distribution of power, and it puts the Federal Government agency in a position of suggesting or dictating a diversion of the power from the place where it is actually supposed to be needed.

That is the reason why this is a local bill, as I understand. The Senator explained to the committee that the power is needed in this particular area. If there is a surplus, surely it has been agreed to make it available. But to say that the Federal Government shall have the right to dictate what amount of the power shall be taken out of the area is, to me, hardly being fair to the people of the State of Washington and to the public utility district which will finance the operation.

Mr. JACKSON. I think there may be some misunderstanding of the nature of the power development in the area. Over the past 20 years we have worked out a fair plan for distributing the power which is marketed from those great dams. We have not paid much attention to State boundary lines, because the Great Columbia River flows through the entire Northwest community. I think the worst thing that could happen to the State of Washington, the State of Oregon, the State of Idaho, and the State of Montana would be to get into a State-versus-State fight.

The bill goes a long way toward preventing that possibility. The addition of the preference clause will insure, in my opinion, a more just marketing of the power in the area. The bill requires that the power be distributed equitably. The State of Washington cannot monopolize the power. The State of Washington should not be given an opportunity to monopolize the power, because it belongs to the people of the United States.

With reference to the preference clause, it is true that the present public utility law in the State of Washington does grant preference. That same rule

does not apply in other States. The amendment is offered for the purpose of assuring the people of the Northwest area that a fair and just formula will be worked out for the marketing of the power. That is the reason for offering the amendment.

I think it will be found on an examination of the amendment, that it is in keeping with a long tradition which we have had in the Northwest community, a tradition which has existed in the United States going back to Theodore Roosevelt's time, when the preference provision was enacted in the Reclamation Act.

Mr. BUSH. May I respond to one point?

Mr. MAGNUSON. Mr. President, I remind the Senator that I have the floor, but I yield to him.

Mr. BUSH. There are certain places where public power is the right solution to the power problem. I know that to be so, and I do not dispute it. There are many places where power would not be available unless the Federal Government had been in a position to step in and develop it.

When it is essential in the public interest and when the situation justifies the Federal Government's doing that, it should be done; but when there are local interests ready, willing, and able to step in and do the job, the idea of the Federal Government's doing it instead is repugnant to me, and I believe it is bad for the country to encourage such a philosophy. Certainly, a majority of the committee is not in favor of it at all.

I hope the Senators from Washington will not press the amendment, because I know they are very much interested in having the bill passed. It is a very important bill. It involves a tremendous project and a very constructive one. However, if the Senators press the amendment, I am afraid it will tie the bill up and that the bill will not be passed during this session of the Congress. I respectfully urge that they not press the amendment.

Mr. MAGNUSON. I should like to say to the Senator from Connecticut that what he says about the amendment is technically correct. There is much precedent for the suggestion, but it is true that this is the first time the suggestion has been applied to this type of legislation.

Mr. BUSH. I am glad the Senator has made that clear.

Mr. MAGNUSON. But it is also the first time this type of legislation has been before the Senate.

Mr. BUSH. I cannot agree with that statement.

Mr. MAGNUSON. As to the public utility districts, I do not think any fear should be expressed that they would not want this type of amendment, because they have gone on record as very much favoring extending the preference clause to public utility dams.

I wish to reiterate my statement, and then I shall sit down. I think I can say that I yield to no one on the floor of the Senate and no one in the Pacific Northwest in my adherence to the importance of the development of public power in the Northwest area. I suppose I have been in the forefront of that fight more than on any other issue. In many instances it has not been a Republican or a Democratic issue. I started the fight back in the State legislature more than 20 years ago, when I authored the so-called Bone power bill, named after a member who served in this body in a very distinguished manner, representing my State, for many years. He was known in the Norestwest area as the father of public power.

I think good progress has been made in 20 years. There should be no interruption of that progress, despite the fact that in my opinion, a change is taking place in the power policy, as I have said on many occasions. I think I have been one of the most frequent critics of what I call the new policy of the administration and the Secretary of the Interior. I thought we should have continued as we have been proceeding in our area for 20 years, because I believe the accomplishments were good. The area was being developed under a comprehensive plan. As a matter of fact, public and private interests, public utility districts, and consumers were happy about the situation. I do not think it was wise to make a change. I have listened to vague terms such as "partnership," but the truth is that there is a change in the policy. For 2 years in that area there have not been any additional power projects, and because of population increases, the power needs there double every 10 years. The people of the Northwest may as well face up to the fact that if they are anticipating new industries and new developments which can use hydroelectric power, we are 2 years behind because of the change in policy. I wanted the policy to continue as it had been in the past, because, in the long run, I think such a policy would be cheaper.

When we talk about more kilowatts for the Northwest, we also have in mind cheap kilowatts. Additional kilowatts are not of any use unless their availability is widespread and they are cheap for industry and consumers. That is my position.

However, I also know that power is needed, and needed badly, in that area, and there is a public body which is going to undertake to provide for its development. Had the development of the Priest Rapids site not been authorized in the comprehensive plan, it could have been built, anyway, by obtaining a license from the Federal Power Commission. All that is being proposed in the bill is the affording of an opportunity to do so. I hope that may be done, because the added power is badly needed.

In my judgment, the bill would have been a much better measure had it included the preference clause, but I do know that the project must go forward.

As to the State law, I say to the Senator from Connecticut that, as a practical matter, I do not believe there will be any trouble about the sale of power if the preference principle is adhered to. However, when the State of Oregon and the State of Idaho are considered, all that was intended was to have the same principle apply, because an interregional development is involved. That is why my colleague and I were so insistent that the amendment be agreed to.

So that the record will be clear, I may say I am still of the opinion I expressed before the committee. I offer the amendment, and ask that it lie on the desk. I appreciate that there is a legislative problem involved. I have been in legislative bodies long enough to know that everything asked for cannot be obtained. Legislation is largely a matter of compromise. But that fact does not deter me from my firm feeling that agreement to the amendment would make the bill much better than it now is. I want the record to be clear on that point, and I think I speak for my colleagues on this matter, because we have discussed it.

The public-utility district and everyone else involved in this matter did not particularly object to the preference clause. So far as I know, there was no objection in the conferences we had, even from the engineers or anyone else. They were for it. But they also realize that there are some persons who are not for it, and that we have to get some cheap kilowatts in the Pacific Northwest because we are away behind when it comes to an adequate power supply. Let me say to my friend, the Senator from Oregon, that the people of the Northwest do not realize it so very much now, but within 2 or 3 years, when the normal development will catch up, these kilowatts will be sorely needed on the line. So I wish to make clear my position on the entire matter.

This bill involves a public body. The same type of public body built a part of Rocky Island Dam, 2 or 3 years ago, and it now furnishes cheap kilowatts. Even though it had not been authorized, they went ahead and sold revenue bonds and built the project, and it has been a very good thing.

In this case we are authorizing it, and are giving the public utility 2 years to obtain a license, and are giving them time to see whether they can sell the revenue bonds, under a great number of restrictions. I think the preference clause would add a great deal to the value of the bill.

Mr. MORSE. Mr. President, will the Senator from Washington yield for a question?

Mr. MAGNUSON. Certainly.

Mr. MORSE. I also address the question to the Senator from Connecticut [Mr. BUSH]; I do not care which Senator answers it.

The Senator from Connecticut spoke of the bill's providing for interconnection. Can either Senator point out language in the bill that provides for interconnection?

Mr. MAGNUSON. Does the Senator from Oregon mean the sales throughout the area?

Mr. MORSE. I assume the Senator from Connecticut meant interconnection for sales throughout the area.

Mr. BUSH. The committee amendment reads in part as follows:

> Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system, may be made available to

and may be purchased by the Bonneville Power Administrator at rates not higher than the rates charged such non-Federal marketing agencies—

And so forth.

Mr. MORSE. The Senator himself said that was permissive.

Mr. BUSH. Let me now read beginning at the bottom of page 3:

To assure that there shall be no discrimination between States in the area served by the project, such license shall provide that the licensee shall offer a reasonable portion of the power capacity and a reasonable portion of the power output of the project for sale within the economic market area in neighboring States and shall cooperate with agencies in such States to insure compliance with this requirement—

And so forth.

Mr. MORSE. Mr. President, in my judgment, that is not interconnection at all. In the first place, the Senator from Connecticut himself, in the course of his explanation earlier today, pointed out that the language he read first was entirely permissive.

Mr. BUSH. Mr. President, will the Senator from Oregon yield to me?

Mr. MORSE. I yield.

Mr. BUSH. What I said was permissive was the sale of surplus power. That is permissive, under the committee amendment. But how in the world can power be delivered unless there is interconnection? Furthermore, the bill provides for it.

Mr. MORSE. That is my question: Where does the bill provide for it?

Mr. BUSH. I just read that part of the bill.

Mr. MORSE. It does not provide for interconnection at all. It provides only for allocation, not delivery. This could be no more than bus-bar sale. There is the whole question of wheeling agreements and transmission lines, and there is no mandatory requirement. It is so different from the regional approach of past Federal power policy, that it would be like walking into a county fair ring and bringing a stallion and a bull into the same ring, and asking the judge to judge them.

Mr. BUSH. Of course it is different. It is not a Federal power project.

Mr. MORSE. It is not interconnection; that is the point I am making. Not a word in the bill really provides for interconnection of the power and really guarantees the development of the power on a regional basis, and consistent with the pooling principle. When that is cut out, the objective of integrated, regional development and use of power of the Army engineers 308 report has really been cut out.

Mr. MAGNUSON. Mr. President, I should like to answer the Senator from Oregon. If he will examine section 6, on page 3, beginning in line 21, he will notice that it provides:

SEC. 6. The operation and maintenance of a project under license pursuant to this act shall be subject to reasonable rules and regulations by the Secretary of the Army in the interest of flood control and navigation. To assure that there shall be no discrimination between States in the area served by the project, such license shall provide that the licensee shall offer a reasonable portion of the power capacity and a reasonable portion of the power output of the project for sale within the economic market area in neighboring States and shall cooperate with agencies in such States to insure compliance with this requirement: *Provided*, That in the event of disagreement between the licensee and the power marketing agencies (public or private)—

And in our case they are mainly public—

in any of the other States within the economic market area, the Federal Power Commission may determine and fix the applicable portion of power capacity and power output to be made available hereunder the terms applicable thereto.

Then it proceeds to state that they may sell power.

Mr. MORSE. But I respectfully submit that is not interconnection. That is allocation of power at the bus bar.

Mr. BUSH. Mr. President, will the Senator from Washington yield to me?

Mr. MAGNUSON. I yield.

Mr. BUSH. Is it not true that this public utility district now is already connected?

Mr. MAGNUSON. It is connected with the power pool, yes. I do not know how sales could be made in the neighboring State without interconnection. If they were to go into the Bonneville power pool and lines, I do not know how they could spell out just what lines would be used. Their hope is—and I do not think the project can be justified unless provision is made to fulfill that hope—that the cost of the power will be such that it can be put into the Bonneville pool. In other words, if Bonneville is not going to be their customer in this situation, they take the position, "Maybe we would not want to go ahead with the project."

Mr. MORSE. But Bonneville will be made the wheeler, and the wheeling costs will be added.

Mr. MAGNUSON. They wheel now from the public utility districts and from cities.

Mr. MORSE. But they wheel now from a regional pool over which they have complete control over delivery from where the power is generated to points at which the power is needed.

Mr. MAGNUSON. But they wheel from cities, including, for instance, Tacoma City Light.

Mr. MORSE. But on a regional basis by means of which they have control of the power.

Mr. MAGNUSON. But they do it by agreements. I have no reason to believe that they are not good agreements. Otherwise, to whom would they sell the power?

Mr. MORSE. I think it is perfectly obvious where some people hope they will sell the power, and to whom—but not to public groups.

Mr. MAGNUSON. I wish to tell my friend, the Senator from Oregon, a little about financing. When an agent puts on his hat and goes down to the lower end of Manhattan Island, to sell revenue bonds, one of the first things he is asked is, "Do you have a contract for the sale?" So that will be taken care of a long time before even the first bit of concrete is poured.

Mr. MORSE. I wish to talk about that point in a few minutes.

Mr. MAGNUSON In my opinion the contract for the sale almost has to provide for integration into the Bonneville pool, under the same type of contract which has been very satisfactory in our area for municipalities and other public utility districts. The contract for sale has to be arranged before the very first step is taken in the actual construction of the dam.

Mr. MORSE. Mr. President, I proceed to discuss this matter today with a very heavy heart, because for the first time on a power issue in 9 years in the Senate I find myself in disagreement with my two very close and highly respected friends, the senior Senator from Washington [Mr. MAGNUSON] and the junior Senator from Washington [Mr. JACKSON].

I speak from a heavy heart, too, Mr. President, because we see so differently on this issue. I think it is most regrettable that great public power forces in the Pacific Northwest—and we represent great public power forces in our respective States and in that area—do not see eye to eye on this issue.

I speak from a heavy heart also because of my conviction that what we are dealing with is a stick of legislative dynamite which is being placed under the whole Federal power program of many years' standing. When we touch off the fuse, I think we shall have an explosion which will do terrific damage to the regional power program.

I know exactly the position of the Senators from Washington. I understand the point of view they have expressed. I have no question as to the sincerity of their intentions. I have no doubt as to their conviction that the Federal power program would not be injured as a result of the enactment of this bill. However, I completely disagree with them.

A BLOW AT THE 308 REPORT PLAN FOR REGIONAL DEVELOPMENT

What we are doing here today is starting the beginning of the end of the comprehensive program of the Corps of Engineers 308 report. When I refer to the 308 report, I am talking about the great power, reclamation, flood-control, and navigation development program worked out by the Army engineers and the Bureau of Reclamation engineers, which really has become the economic development bible of the Pacific Northwest for some years past. All groups—private groups as well as public bodies—have for some time been in remarkable unanimity of agreement in support of the 308 report. It calls for the development by the Federal Government of great multiple-purpose projects in the Pacific Northwest, leaving to private utilities and other groups the development of sites which are not integral parts of the comprehensive plan.

PRIEST RAPIDS SHOULD REMAIN A FEDERAL PROJECT

We are dealing here with a great site for multiple-purpose development. In my judgment it is a site which ought to be developed in consonance with and in keeping with the intention of 308 report,

and should not be developed by any public utility district or by any private utility, or by any other body than the Federal Government, in keeping with that Blueprint.

In my judgment the fact that we are starting with a public utility district does not change one iota the danger of undermining the plan for comprehensive development by starting with it as a bellwether. The bill takes this dam out from under the full control of the Federal Government and the Federal plan for regional development. In my judgment, on principle it makes no difference in this case whether this project is being developed by a public utility district or a private utility. The fact is that we are developing this project under a so-called "partnership"—a catch word of this administration—through a body which will establish jurisdiction over the use of its power outside Federal control.

COMPREHENSIVE REGIONAL DEVELOPMENT IN PACIFIC NORTHWEST BENEFITS THE WHOLE COUNTRY

I happen to believe that the program of comprehensive 308 report is a program which protects the citizens of Connecticut as well as the citizens of Washington and Oregon. It is a plan which protects the citizens of the entire Nation. We in the Pacific Northwest do not have a monopoly of interest in the waters of the Pacific Northwest. I know this is elementary, but apparently these are days elementary principles must be restated.

STREAMS OF COLUMBIA BASIN BELONG TO ALL THE PEOPLE

The elementary fact is that the waters of these rivers belong to all the people of the Nation, not merely to the people of Washington and Oregon, but to all the people of the United States, wherever they live. In my judgment, the economic resources of those waters should be developed in a manner which will benefit the best economic interest of the people of the country as a whole, not merely the interests of the people of the Pacific Northwest.

The philosophy and underlying objective of the plan for regional development in the 308 report was for a regional program which would be of help to the country as a whole. In my judgment, I would have no right, as a Senator from Oregon, to stand as a special pleader in the United States Senate for the development of a resource in Oregon unless it were developed in a manner which would be good for the entire country, and not merely for one region or a part of it. That is why I have been so wedded to the principle of 308 report. I have felt that it is a power program developed under the inspiration and urging of great statesmen in the Congress and by great Presidents who believed that we ought to develop these rivers on a comprehensive basis in the interest of developing cheap power. Without cheap power there is little hope of the maximum industrial and economic development of that area of the country.

That kind of development is very helpful to Boston, Mass. It is very helpful to Miami, Fla., and to Lincoln, Nebr. I do not care what part of the country is pinpointed; it gains by a sound economic development of the water resources in any other part of the country. In my judgment, this bill would not accomplish that purpose. In my judgment, the bill would start to undermine the 308 plan.

The senior Senator from Washington [Mr. MAGNUSON] made what I think was a very able statement before the Public Works Committee. I wish to quote a few paragraphs from that statement, because I go along with his philosophy. My difficulty is that I cannot reconcile his bill with his philosophy.

MAJORITY IN PACIFIC NORTHWEST FAVOR FEDERAL CONSTRUCTION

As will be seen from page 8 of the hearings, in describing this project, the senior Senator from Washington said:

Mr. Chairman, at the beginning of these remarks I was discussing the concept of comprehensive development. You will recall my statement that we would have more to say on this and related facets of Federal power policy at a later point in this statement. I come now to that part of our testimony.

We are discussing legislation affecting a single project on the Columbia River. The decision the Congress makes on this, however, may affect many other projects already authorized by Congress on the Columbia and its tributaries. S. 1793 and its counterpart in the House, H. R. 7664, cannot properly be considered without some reference to the effect on the overall Federal power policy.

I am sure a majority of the people in the Northwest would prefer to see the Federal Government construct Priest Rapids Dam.

So am I. I am convinced of it. I am convinced that all we have to do is to get all the facts before the people of the Pacific Northwest as to what is involved in the bill. If that is done we shall find an overwhelming majority of them saying that the project ought not to be constructed by the Grant County Public Utility District, but that it ought to be constructed by the Federal Government, in consonance with the objectives of the program for comprehensive development.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. MAGNUSON. I am in entire agreement with the Senator from Oregon in that respect.

Mr. MORSE. I am about to quote further from the statement of the senior Senator from Washington, to indicate how completely he agrees with me in philosophy.

Mr. MAGNUSON. I think I would agree with everything the Senator has said on that point.

Mr. MORSE. That is why I think it is so sad that when we come to apply these great principles to a specific bill we do not remain in agreement.

Mr. MAGNUSON. In order to clarify the RECORD, we speak of one public utility district. Several others have joined in this effort. There is a group of public utility districts.

Mr. MORSE. That is brought out in the Senator's statement. Let me say that when I refer to the Grant County Public Utility District I include all the other public utility districts or public bodies which are on the list of agencies which have indicated that they desire to participate in the building of this dam. However, the leader of the movement is the Grant County Public Utility District. As the Senator's own statement points out, it put up most of the money for the planning and presentation of the case in support of the bill.

The Senator from Washington went on to say before the committee:

The primary reason that this legislation is before you stems from the fact that there have been no new starts in the Pacific Northwest for 2 years and this year there are no funds in the budget to initiate construction on new dams. And I can say that with some authority because yesterday afternoon we just wrote up the civil functions bill and Senator STENNIS was there. The administration apparently has decided that budgetary considerations prohibit investment of Federal funds beyond the amount required to keep present projects going at a minimum rate. Under these circumstances Grant County Public Utility District and other local government agencies came to Senator JACKSON and me with the suggestion that they try their hand at financing the Priest Rapids project.

We were willing to go along with the proposal provided certain fundamental principles in our Federal power policy are preserved. We were thinking specifically of the requirement that any stretch of the river be developed to its full potential and that in the sale of power, public bodies and cooperatives receive preference.

When Senator JACKSON and I introduced S. 1793 we debated the wisdom of inserting a preference clause. At that time we decided tentatively that the preference clause was not necessary, because the groups who may apply for a license under S. 1793 are nonprofit local government agencies. We assumed that the power from Priest Rapids would be absorbed in the main by these local government agencies which would become the licensees and which are presently retailers of electric power. Since they serve domestic and rural consumers we thought at the time we introduced the bill the preference principle would prevail in actual practice.

Now a new element has been injected into the picture—something we could not foresee at the time we introduced the original legislation.

The House Public Works Committee added two amendments to its bill. It is a similar bill. One of these amendments would authorize the Washington State Power Commission to construct Priest Rapids in the event Grant County Public Utility District or the other local government agencies with which it is affiliated failed to do so. The law which created the Washington State Power Commission contains no preference and priority clause. And I call this to the particular attention of Senator MORSE.

The other amendment stipulates that if a license is granted to the local government agencies of Washington "a reasonable portion of the power capacity and a reasonable portion of the power output shall be offered to neighboring States." I want to interpose by saying that might not seem an important suggestion, but when you are talking in terms of 1,300,000 kilowatts of power, you are talking about a lot of power which is needed in the whole area. If there is a dispute over what constitutes a reasonable portion of the power output the Federal Power Commission will determine the question.

This means that the power from Priest Rapids Dam will be distributed on a regional basis. It means further, however, that the control over the power output of the project no longer resides in the hands of the local government agencies who will become the licensees and who will construct the project—if all goes well. This raises an entirely new

issue and, in my judgment, dictates that this committee and the Congress consider the effect passage of this legislation will have on existing Federal power policy.

In effect the Priest Rapids legislation is a prototype. It is a bellwether, so to speak.

THIS BILL AS A POSSIBLE PRECEDENT

Mr. President, I digress to say that I completely agree with the senior Senator from Washington. There is no doubt about it that there will be attempts to use this bill as a prototype. There is no doubt about it that this is a bellwether.

In my judgment it means that what we are doing is letting non-Federal interests get their heads into the tent. Before long we will find them with the whole tent on their heads, and on ours, too.

The senior Senator from Washington went on to say:

The committee already has before it H. R. 7815, the so-called Cougar Dam bill. I have no doubt there will be other pieces of legislation presented to the Congress affecting authorized projects in the Northwest.

There are others, such as Green Peter and John Day.

The senior Senator from Washington went on to say:

In acting on each of these bills your committee and the Congress is setting policy. If you consider each bill as an isolated case you will be determining policy on a piecemeal basis. Now that may be the desirable procedure but if we are going to set policy on a piecemeal basis certainly this committee and the Congress and the people of the Northwest and the rest of the country should know what we're doing. We do not want to be led into some kind of a trap.

As far as Senator JACKSON and I are concerned we believe S. 1793 should be amended so as to preserve the preference and priority portion of our Federal power policy irrespective of who constructs the dam. It is our belief that the pattern we set in enacting Priest Rapids legislation should conform in every possible respect to the power policy which has so well served the Nation, particularly in the past 20 years. Within a few days we will submit to the committee an amendment to accomplish that objective. I said a few days. We can get it ready almost immediately.

Mr. President, I read at some length from this very objective and very sincere and fair statement of the senior Senator from Washington before the Public Works Committee, because it outlines the great difference between us. Not that I do not accept most of his premises, but it is the application of the premises to the power needs of the Pacific Northwest and to the country with which I find myself in such disagreement that I cannot vote for this bill.

PIECEMEAL DEVELOPMENT

We are doing exactly what the senior Senator from Washington warned; we are doing this job on a piecemeal basis. This bill has been presented first, among these various bills. This is the bellwether bill. This is the bellwether bill which has a plausible appeal, because some public bodies are seeking to construct the dam.

However, that does not change the fact that the basic principle of 308 is being undermined. The basic principle of that report is the construction of multiple-purpose dams by the Federal Government under a comprehensive program for pooling the power and selling the power with a preference clause under established Federal policy.

THE PUBLIC BODY PREFERENCE PROBLEM

The Senator from Connecticut [Mr. BUSH] is, in my opinion, unanswerably correct when he points out that in effect we would establish a new precedent in this bill if we added the preference clause proposed by the two Senators from Washington.

I say that because we would have a dam that had been built by private money, with private dollars, and we would be telling those who would have these property interests vested in them, as well as having made that expenditure, that they must use their property in such and such a way in accordance with such and such a preference clause. Let me say, Mr. President, that the matter could be tied up in the courts for years. I believe it will raise many complicated legal questions. First, there will be raised the question of the constitutionality of such a clause; second, the question will be raised as to the power of Congress to impose it; third, as to whether or not it does not amount, in effect, to taking property without due process of law; as well as other constitutional questions. I believe the Senator from Connecticut has put his finger on one of the weaknesses in the bill, because certainly preference is not guaranteed by this bill, and, in my judgment, there is serious question whether the kind of preference that we contemplated by the 308 report plan, the kind of preference we are talking about under the Flood Control Act, the kind of preference we are talking about under the Bonneville Act, or the kind of preference we are talking about under the Reclamation Act of 1903 could stand up in the courts if we attached to this bill a preference clause which would seek to require, at least, the owners of this dam to distribute its power in accordance with the provision of that preference clause.

I say I seriously question whether that could be done, although here on the floor of the Senate I will vote for the preference clause. I will vote for it, although I voted against it in committee, and I shall tell the Senate in a moment why I voted against it in committee.

I shall vote for it here if I have an opportunity to vote for that preference amendment because I think there should be a legal determination whether Congress provides for preference under these circumstances. I voted against the amendment in committee because of the various doubts I am expressing here, and because, in my judgment, the bill should not have been reported from the committee. I voted against the bill in committee, and therefore I voted against any amendments to the bill in committee, because, in my judgment, the basic principle of the bill is bad, and I was not going to be a party to reporting the bill with any amendments to it at all.

But here it is on the floor of the Senate, and I shall vote for the Senator's amendment if he offers it. I particularly hope he will offer it, in view of the comments of the Senator from Connecticut. I think the Senator from Connecticut [Mr. BUSH] has laid down a challenge to the Senator from Washington to offer his amendment because, if I correctly interpret the remarks of the Senator from Connecticut, he indicated to the Senator from Washington that, if a choice had to be made between the bill with the Senator's amendment and no bill, it would be no bill. Let us find out. I am all for getting the amendment up and voted on.

PRIVATE UTILITY CAMPAIGN AGAINST PREFERENCE

Without any personal reference to the Senator from Connecticut, but with reference to the forces in America that are against preference, let me say this to the Senator from Washington: One of the reasons why I think we should have fought Priest Rapids is that I do not think we should have moved into a parliamentary position in the Senate where any question could be raised in regard to maintaining preference because the private utilities do not want preference. We are dealing here, Mr. President, with an area of the country in which multipurpose dams are Federal dams, in which the whole program for the development of multipurpose dams must be region-wide; that requires Federal leadership, construction, operation, and coordination.

Of course, the private utilities are bent on getting rid of preference. They do not want preference attached to Priest Rapids because they want to be in a position to dicker, deal, and negotiate for power. Whoever has the control of power from Priest Rapids Dam can do with it as he pleases. That will mean, in my judgment, as it always means, higher rates, unless there is a guaranty of Federal pooling, distribution, transmission to load center, and public-body preference. There will be no pooling agreement involved here. There is no language in the bill that makes that mandatory. What are we doing by this bill is setting up a bus-bar arrangement. We have been fighting these bus-bar arrangements in the Pacific Northwest. If we sell power at bus bar, we may as well turn the dam over to those who have the bus-bar contract.

Mr. President, I cannot go along with a bill which, in my judgment, will undermine preference. I cannot go along with a bill which, in my judgment, is exactly the kind of bill the private utility combine in this country wants to see us pass in the Senate as a bellwether precedent.

Then we will hear the argument made when Cougar, Green Peter, John Day, and the rest of them come up, "You did it in Priest Rapids. Now do it in this one."

COOSA BILL NOT A PRECEDENT

I opposed the Coosa bill. It had some of the same problems. It so happens that Coosa is in a private utility area. I say that for the benefit of the editor of one of the leading newspapers in my home State, which contained an editorial on Coosa some time back. The editor showed his ignorance as to the status of Coosa and sought to give his readers the impression that Coosa was in the area of the TVA and part of the TVA system. That is not true. Coosa is in an area served by private utilities. How-

ever, it was authorized by the Federal Government some time ago because it was recognized that if we wanted to protect the best interests of the people we had better get a yardstick in the area. I have always felt that was probably the controlling reason why Coosa was authorized in the first instance, and I still think that in the area of Alabama there should be a public power yardstick, in addition to that provided by the close proximity of TVA.

There is nothing about the Coosa situation which, in my judgment, justifies it to be cited as a precedent for this Priest Rapids bill. But already in debate on the floor of the Senate we hear the senior Senator from Washington citing Coosa as somewhat similar to the situation which we have in the Pacific Northwest. I think Coosa was bad legislation. We shall not help the situation by passing another bill that is equally bad.

PREFERENCE PART OF PUBLIC POWER YARDSTICK

Mr. President, I wish to emphasize that one of the reasons why we find it necessary to have public preference is that it is the best guaranty for a yardstick as a competitive check upon private utilities which, without that check, always charge high rates.

That is the history of power development in this country. Take me into an area where there is no public power yardstick, and I will show you high rates. Do not tell me that the answer is State regulation. That is to laugh, because the history of State regulatory bodies is that too frequently they have been too politically minded. We have discovered that we cannot protect the interests of the people by State regulatory bodies. To protect the interests of the people let us have a public power yardstick. In my judgment, we do not have the full protection of the public power yardstick in the Priest Rapids project, because I think it is being undermined by being taken out of the 308 plan and the policy of that report.

ADMINISTRATION FAILURE TO APPROPRIATE DOES NOT JUSTIFY BILL

I wish to refer to the argument of the senior Senator from Washington regarding the fact that no appropriations are proposed by this administration for any new starts in the Pacific Northwest. How well I know that, and how shoulder to shoulder I have stood and fought with the 2 Senators from Washington and the 2 Senators from Montana to try to get appropriations for some new starts.

I am not going to surrender just because we failed with this administration to get some new starts. To the contrary, I propose to tell the people of the Pacific Northwest what this administration is doing to them. I propose to tell the people of this country about the administration sellout to the private monopoly combine in this country.

THE THREAT OF UTILITY MONOPOLY

These are days when we should gird for political battle. These are days when monopoly is returning to America, and is seeking to control the natural resources of the country. These are days when, instead of surrendering to this administration, because it would not include some funds for new starts in an appropriation bill, we should be saying that we intend to take this fight to the people—and November is not so far away; it is creeping up on the administration.

I am not going to leave behind me in the Senate today a record of voting for the Priest Rapids bill, which, in my judgment, will be heralded by this administration as its bellwether partnership bill for scuttling the 308 report plan, upon which, in my opinion, the full development of the resources of the rivers of the Pacific Northwest is so dependent.

Mr. President, let us examine some of the provisions of the bill.

I may say, in passing, that I always enjoy seeing the distinguished Senator from Kansas [Mr CARLSON] in the chair. I remember, some months ago, having had the pleasure of looking on his countenance for a good many hours, on a night that was very long for him, but very short for me, becauses I had so much to say on that occasion. I wish to assure him that he will be able to get his dinner tonight. I assure him that I shall be finished by dinnertime, with all facetiousness aside, that I shall be through long before dinnertime.

BILL UNDERMINES COMPREHENSIVE REGIONAL DEVELOPMENT

But I am going to make my record today in opposition to what I think is the beginning of the scuttling of the 308 report and regional development in the Columbia Basin—and not by the intent or the desire of my good friends, the Senators from the State of Washington. We simply disagree as to what the effect of it will be. But, in my judgment, that will be the effect of the bill, because of the precedent which it will establish.

I was very much interested in the comment made earlier this afternoon by the Senator from Connecticut [Mr. BUSH], when he said—and I think I quote him, or at least paraphrase him, with accuracy—that there are some places where public power is the answer. I am inclined to think that those who share that point of view, do so just so long as it does not occur in the United States of America. It is very interesting to observe the support which the Federal Government is giving to great public power developments abroad. Oh, we are doing a great job for public power development abroad. We have provided large sums of money for new starts in other countries. There is no difficulty in getting from the administration funds for new starts abroad, some of which are going to be public power developments. But the private utilities in the United States do not want such developments in this country.

I happen to believe that in the power field, both the public power and the private power utilities can work, live, and prosper side by side in the same area. That is why I have the record in the Pacific Northwest of working with the private utilities and for the private utilities in the development of their facilities at low-head dam sites. That is why I was an enthusiastic supporter of the Tacoma agreement, which was a great pooling agreement, that brought the public groups and the private utility groups together. But that was because, as of that time, there was remarkable unanimity of opinion on the comprehensive report. But since the change of administration, that unanimity no longer exists. I speak most respectfully when I say I am convinced that the private utilities now see a chance to scuttle the program. They now see an opportunity to come in and get control of the generating facilities of some of the great sites which ought to be developed by all the people, by the Government, so that when the developments are finished, and the dams are built, they will be owned by the people, not by the private utilities.

I now wish to return to a discussion of the bill itself.

Mr. CASE. Before the Senator from Oregon takes up the details of the bill, I wonder if he would agree to yield for a few questions with respect to some of the particular policy matters involved.

Mr. MORSE. I shall be very glad to yield.

Mr. CASE. The issues which are presented in the bill are issues which I think this Congress and the succeeding Congress will have to face in connection with a number of proposals for power development in the United States. I think this debate is intensely interesting. It is one that can well be studied by persons who are interested in the development of power and the making of it available to consumers at the lowest possible rates.

A few moments ago I heard the Senator from Oregon refer to his work with the private utilities and to his encouragement of them in the development of low-head dams. I wonder if he would give me some idea, or if he could give all of us some idea, of where he draws the line between a low-head dam and a high dam, and where he thinks it is appropriate for the private interests to develop hydroelectric power, and where he believes the Government should develop it.

Mr. MORSE. When I speak of a low-head dam, I mean the development of a dam outside of those proposed as the main control plan detailed in the 308 report. The dams provided for in the comprehensive program, in my judgment, should be built by the Federal Government. All the power which is developed under the program described in the Army engineers 308 report would be by multiple-purpose dams.

Mr. CASE. It happens that in the Missouri River Basin, with which perhaps I am more familiar than I am with the Northwest power situation, practically every tributary or every stream in the Missouri River Basin which is susceptible of power development, would come under the comprehensive plan for the development of the Missouri River Basin.

Mr. MORSE. The 308 report is very definitive in its terms. For example, I urged the development of private utility dams on the Deschutes and on the Rogue. The sites were not part of the main control plan blueprinted in the 308 report.

Mr. CASE. Perhaps they are streams which run directly to the sea; or are they tributaries of major streams?

Mr. MORSE. Eventually they flow into major rivers.

To understand the position of the junior Senator from Oregon in regard to public preference, in regard to transmission lines, in regard to the busbar issue, and with regard to who should finance the dams, it is necessary to keep in mind that I think the 308 report is a very logical and sound program of development. I have seen nothing yet by way of argument or amending reports which would justify my withdrawing any support from it.

Mr. CASE. In my opinion, the application of the comprehensive plan in the Missouri River Basin would eliminate private utilities from any hydroelectric development.

Mr. MORSE. No; I do not think it would.

Mr. CASE. All the tributaries and subtributaries of the Missouri River are brought into the plan.

Mr. MORSE. That would not be the test.

Mr. CASE. What would be the test?

Mr. MORSE. One would have to sit down with a group of experts, as was done in the preparation of the comprehensive plan contained in Report 308, to decide what the area and sites would be which would be developed by multiple-purpose dams. That was done in connection with that report. There is general endorsement of it in the Pacific Northwest.

Those of us who are for sticking to it are now saying, "Do not propose to come in now and undercut it." Every single area covered by the comprehensive plan of 308 can be served with cheap power through the development of multiple-purpose dams. The private utilities will get their contracts, and they are entitled to contracts, for a fair supply of power from those dams.

The interesting thing to the Senator from Oregon is that I never went along with the idea, in the Pacific Northwest, that private utilities should not be guaranteed fair contracts for reasonable terms of years for the purchase of power which the private companies needed to serve their customers. I am not for squeezing them out of the area covered by the 308 report; but I am saying that the generating of power, flood control, and irrigation should be under Federal jurisdiction at sites which are part of the main control plan for the Columbia River and its tributaries.

Mr. CASE. As I understand, the Senator from Oregon believes that when a multiple-purpose dam is involved, there should be Federal development.

Mr. MORSE. That is correct. I have never said that within the Columbia Basin area a power-generating dam not involving any reclamation or irrigation or flood-control project which is an integral part of the 308 report plan should not be licensed to a private utility to serve some area, provided the licensee will enter into a pooling agreement.

Mr. CASE. By the "pooling agreement," does the Senator mean putting the power in the Northwest power pool?

Mr. MORSE. Yes; providing further that the utility project will not scuttle the site for one of the main control dams of the river.

If the Senator will bear with me, I should like to have the RECORD illustrate that point. One of the reasons why I am fighting so hard against the Idaho Power development of Oxbow dam and insisting on Hells Canyon is that if Idaho Power is permitted to build a low-head dam, the high dam at Hells Canyon will be scuttled, just as was attempted by the proposal to build a private dam at Kettle Falls, until Franklin Roosevelt prevented it. Kettle Falls would have destroyed the Grand Coulee site as Oxbow would prevent construction of a high dam at Hells Canyon.

I have said I shall go along with a low-head program on the Snake River so long as a low-head dam site is picked which will not block out one of the main control dams on the Snake River.

Mr. CASE. Is it the Senator's opinion that if a private power dam site existed and it was developed by the private utility under license, such as the Senator has just suggested, the so-called preference clause should apply to the sale of power by the utility, when it is a private plant?

Mr. MORSE. No, I would not lay that down as an absolute requirement. I would say it would depend upon the location of the dam, the relationship of that dam to surrounding Federal dams, and the whole question of water control.

Mr. CASE. Somewhat earlier in the Senator's remarks he referred to selling power at the busbar, and expressed some disapproval of it.

Mr. MORSE. I am "agin' " it.

Mr. CASE. Even though the contract to the private utility with regard to its distribution of the power would require the passing on of the benefits of the economies of the Federal generation of power to the ultimate consumer?

Mr. MORSE. I am against all sales of power out of a Federal dam at busbar to a private utility, because, in my judgment, control of the dam would really be lost. I am in favor of the grid back transmission system, which carries the power to load center with assurance to the private utility of a fair contract for their power at load center.

Mr. CASE. I appreciate the answers which the Senator from Oregon has given, because I think they help give us a definition of his position on this question and also on the issues which will arise when some of the other bills are considered. As the Senator knows, we have had a protracted series of hearings in the Committee on Public Works on Niagara power. The Senator from South Dakota has taken the position that the Federal Power Commission might well handle the licensing of a project in that area, and thereby relieve the Federal Government, in its present fiscal situation, of the financial load which would be necessary in order to finance that particular development.

There has been a great deal of discussion in the committee on the question of whether a preference clause should be attached to such an arrangement. It has been my thought that if the licensing were left to the Federal Power Commission, and it followed the Federal law, as I am sure it would, and if the State of New York were an applicant to the New York State Power Authority, for the license, as it has stated it would be, then it would be equitable to let the laws of the State of New York govern in the sale of the power, particularly since the State law does provide some standards of conservation for the observance of any person or body receiving a license; and, further, because in section 5 of the New York State Power Act there is a specific provision designed to insure that any power the State handles or develops shall go to domestic consumers and rural users, as opposed to commercial or industrial users.

I find it a little difficult to reconcile the statement which the Senator made a few moments ago, with reference to the attachment of the preference clause to a license to a private utility, with his position on the Niagara power proposal, for in the latter case it is recognized that the State would be responsible for doing the financing. The proposal, as reported by a majority of the committee, would leave the settlement of the preference to the State law, under the restrictions provided in the Federal law.

Mr. MORSE. Of course, I did not vote for that.

Mr. CASE. I know the Senator did not.

Mr. MORSE. I see no inconsistency in my position, because, in the whole Niagara situation, we are dealing with a public body and not a private body, and, as will be developed in the debate on the bill relative to the Niagara matter, when it reaches the floor of the Senate, with a State which was granted certain definite rights, in my judgment, by the Federal Government when the arrangements were made, by treaty with Canada, as to the use or control of the water.

Mr. CASE. But if a private utility which would get a license is to be left free from the application of the Federal preference clause, why should not the State of New York, if it granted the license, be left free from the application of the Federal preference clause?

Mr. MORSE. As the RECORD will show, my statement was not to be universally applied. I said it would depend upon the location of the dam, its relationship to Federal power dams, and the question of the control of the water. I said I did not take the position that in all instances a preference clause would have to be attached. That was my answer to the question the Senator put to me.

Mr. CASE. The junior Senator from South Dakota has gradually adopted a philosophy with regard to this question which may not be wholly consistent; I do not know. I have not gone into the power subject as much as has the junior Senator from Oregon. However, I have thought that where the Federal Government arranged for the financing, or provided financing, there was a sound basis for the application of the Federal preference clause.

Some years ago, at a political convention of my party in my State, the plat-

form advocated repeal of the Federal preference clause. I took occasion to disassociate myself from that particular plank in the State party platform that year. I have consistently taken that position, because I thought it was impossible to repeal that act. I thought it was inconsistent to say that when the Federal Government provides the financing and at the same time is providing for the financing, there should not be cooperation between those two Federal activities, but where the private utility provides the financing, and particularly where, as in the Niagara situation, the New York State law does have a provision for preference to the ultimate consumer, the domestic consumer and rural user, and particularly since between 95 and 98 percent of the rural users in the State of New York are served by private utilities, it seemed to me the State of New York should determine the application of the preference clause, rather than attempt to saddle the State with a Federal preference clause and force the export of power outside the State of New York.

That is applying the principle to a particular case observing what the Senator from Oregon has just stated, that he did not speak with universality, but that each individual case should be looked into.

Mr. MORSE. I have always understood the position of the Senator from South Dakota to be just as he has expressed it on the floor of the Senate this afternoon. I have heard him express his position with great clarity in the Public Works Committee. I only regret that he has not understood my opposing position. We just do not agree. I get the impression, from his discussion, that he is somewhat expressing his disappointment that I do not agree with him; and I do not agree with him. I think the reason for that is that we have to go back to one basic principle, on which there are somewhat different viewpoints as to the consequences that will flow from carrying out that principle.

In other words, I never get out of my head and never overlook the fact that the interests in these streams are not State interests. I never get out of my head the fact that the interests in these streams are the interests of 164 million American people, all the people of the United States; and I do not go along with a proposal that the Federal Government completely relinquished that interest. I think we have a responsibility to see that that interest is administered in a manner that will protect the heritage of all the people of the United States in their right to the maximum economic development of those streams.

So I do not go along with the Senator from South Dakota [Mr. CASE] on the Niagara bill, the so-called Case bill, by means of which those rights would be turned over without safeguards to the State of New York, when licensed by the Federal Power Commission. I prefer the Lehman-Roosevelt proposal; and I was one of those who in the committee voted for that proposal, and I prepared minority views that presently are being circulated; and soon I shall go into the matter in some detail, when it comes to the floor of the Senate.

Mr. CASE. Mr. President, will the Senator from Oregon yield to me?

Mr. MORSE. I shall yield in a moment, when I complete this statement.

Mr. President, I wish to say that I am not going to go along with a program that, with any finality, completely relinquishes the control of the Federal Government over the interests of all the people in the streams of this country.

That brings us to the problem of the property value in the falling water of the streams belonging to all the people. That is a great property value. It is a public property value. It is a property value that I think the Federal Government has a duty to protect. It is bills such as those—and I think the pending bill is one of them, and I think the so-called Case-Niagara bill is another—that in my judgment do not return to the people full value for their interest in that falling water.

That is one reason why I say I am not going to give up the preference right principle unless I am perfectly satisfied that the people are obtaining an adequate return for any relinquishment they make of the right.

Mr. CASE. Pursuing the question of the ownership of the water a little further, does the Senator mean by his statement with respect to the ownership of the water that he rejects the holding of the Supreme Court recently in the so-called Niagara Corporation case?

Mr. MORSE. No; I do not reject it. I do not think it has anything to do with the legislative policy we determine.

Mr. CASE. If my memory is correct, the principle enunciated by the Court was that a State might have proprietary rights in a stream.

Mr. MORSE. That has been long-established water law from the time of Blackstone. There is nothing new about that. I do not quarrel with that principle. It has nothing to do with the question of the national interest and rights in falling water.

Mr. CASE. I thank the Senator from Oregon for his indulgence in responding to my questions.

Mr. MORSE. I thank the Senator from South Dakota. He and I disagree on a good many questions, but we always enjoy our discussions of disagreement, as we have here this afternoon.

Mr. President, I wish to discuss the provisions of the bill.

PROPOSED BILL DOES NOT ASSURE POWER INTEGRATION

In my judgment there is no requirement in the bill for integration. I am talking about a requirement, in mandatory language. I cite section 2 of the bill, on page 2:

SEC. 2. The Priest Rapids Reservoir site shall be developed to utilize the optimum capabilities of the site as a part of the comprehensive plan for economically feasible control and utilization of the water resources for flood control, navigation, power, and other beneficial purposes. Before a license is issued, an applicant for a license shall submit a report on the details of its plans for development to the Federal Power Commission with particular reference to the integration of the proposed Priest Rapids development as a part of the comprehensive plan.

That is only language. It means absolutely nothing from the standpoint of any requirement of integration. The applicant shall report on plans for integration. The FPC need not require it. So I say that we are passing a bill which uses the word "integration." It uses language which would mislead people into thinking that it provides for integration when, in fact, I respectfully submit that it is not true power integration, and, under the circumstances, it would seem impossible to have true integration.

The proposed plan for the sale of power would, in my judgment, encourage the multiplication of transmission lines and further complicate the management of power, which already is too complicated.

HIGHER POWER COSTS—POSTAGE-STAMP-RATE PRINCIPLE ABANDONED

I think the end result would be an increase in the cost of power. When we start dividing the power resources of the Pacific Northwest among a great many administrative authorities, the end result is bound to be not cheap power, but high-cost power. If the Bonneville Power Administration is to be used as a power broker under the terms of the bill, then the Bonneville Power Administration will charge for wheeling, and I say that the arrangement would threaten the postage-stamp rate.

LACK OF NAVIGATION AND FLOOD-CONTROL FEATURES

It provides nothing for navigation and flood control.

Let me call attention to page 22 of the report. General Itschner was testifying before the committee, and the junior Senator from Washington [Mr. JACKSON] had just said:

Senator JACKSON. The only thing, Mr. Chairman, is that in building it, if the Federal Government, for example, is not going to put any money in initially on the flood-control and the navigation features, they would want to have the structure built in such a way that it could accommodate navigation and flood-control features.

The Federal Government, the Corps of Engineers therefore has a vital stake in it to make sure that it is built in a manner that would make available such features if and when, at some later date, such should be done.

On the other hand, it could be and maybe money would be saved if it were done simultaneously.

General ITSCHNER. That is correct. Money would be saved if the entire project, including flood-control and navigation features, were constructed at one time.

Senator MORSE. Let us dwell on that point a moment, General. I understand that on this particular segment of the river where your project is to be built, it would be desirable to have flood-control and navigation features a part of the program if the Federal Government were doing the job.

General ITSCHNER. As far as the flood-control features are concerned, the storage of $2,100,000 acre-feet for flood-control purposes in this reservoir is extremely important to the protection of the Columbia River below The Dalles.

It is especially important because it is at the lower end of the river and therefore is of more value than an equivalent amount of storage far upstream where it is difficult to operate reservoirs so as to store

water in a manner which will be most effective in reducing the flood crest downstream.

As far as the navigation is concerned, no authorized navigation project exists in this portion of the river at this time, and even if the dam were built and financed entirely by the Federal Government at this time, it would be constructed only with a closure section which would be adaptable later at minimum cost to a navigation lock.

Senator MORSE. What difference, if any, would there be in the flood-control features if this project were built as proposed by this bill as compared with the building of a project by the Federal Government?

General ITSCHNER. We would like to insist, and the bill does provide, that the same amount of flood-control storage would be provided in the dam or dams built by the public utility district as would be provided in the authorized Federal project for the single dam at Priest Rapids.

Senator MORSE. Maybe I misunderstood Senator JACKSON and misunderstood you. I thought I understood that if you were proceeding with this bill at once, with the project under this bill at once, you would proceed with the power features and not have the flood-control features incorporated at the same time.

General ITSCHNER. I meant to say this, that if the project is built by the public utility district at this time, and if Congress does not see fit to appropriate funds with which to pay for the flood-control features, it would be necessary for the public utility district to construct a foundation satisfactory to take care of those flood-control features at such time as the Federal Government would provide the additional funds to raise the dam up the additional number of feet necessary to take care of the flood-control storage.

Senator MORSE. So that they could proceed with this dam if they built a dam high enough to take care of the generation of the power, that would meet the immediate needs, and then, at a later date, if the Federal Government became interested it could appropriate the money to add to the dam so as to create a greater flood control.

General ITSCHNER. That is correct, sir. And if that were done, the public utility district would be put to additional expense in order to construct a heavier foundation and a thicker dam in anticipation of a future addition to the dam in order to provide for flood-control storage.

Senator MORSE. Is it the view of the Corps of Engineers that it would be desirable to have the flood-control feature developed in its entirety at the time the dam is built because of the need of it below The Dalles?

General ITSCHNER. Yes, sir; it would be desirable to obtain this flood-control storage as soon as possible.

The senior Senator from Washington pointed out that this dam is proposed as an electrical generation dam, and that that is the primary feature of the Priest Rapids bill.

However, as I have looked into this matter, not only do I have the statement of General Itschner at the hearings, but I have assurances of other men in the Corps of Army Engineers that this dam is a very important dam within the comprehensive program for flood control.

PIECEMEAL CONSTRUCTION MORE COSTLY

As General Itschner points out, it will cost more in the long run to build it by installments. If we want to save money, the way to save money is to do the entire job in one general construction operation. I believe it is most unfortunate that we are dealing with a bill that proceeds on the installment construction program for the development of the power resources and the flood-control resources that we need in the Pacific Northwest. In fact, without reading it, I wish to have printed at this point in my remarks the statement I made in opposition to this bill at the first hearing on it in the Public Works Committee, beginning on page 25 of the report, and running to the middle of page 26 of the report.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Senator MORSE. Yes, sir; and on the whole general problem of the proposals that, in my judgment, greatly modify the whole comprehensive program of river development in the Pacific Northwest, and it would not be fair of me to sit here and not briefly call attention to a problem or two that concern me.

I have joined with all my colleagues in the West some years now in fighting for the development of the comprehensive report plan because I think the comprehensive report plan takes into account the best interests of the Nation as a whole.

There is not a community in America that doesn't have a great stake in the development of the flood control and the irrigation and the navigation and the power resources of the rivers of the West. We do not own them out there. No community in our section of the country owns a single segment of a river in the Pacific Northwest. They belong to the people of this country and the developers of the great power policy of our Nation, Charles McNary, of my State, George Norris, Franklin Roosevelt, to name only a few of the people who have had the very broad concept of the national interest in the development of the streams of America wherever they are located, initiated a program that I think we ought to be very careful about when it comes to modifying it because of any temporary financial problems that seem to confront our country.

I have not passed final judgment on Priest Rapids and I have not passed final judgment on the matter until I complete my study.

May I say most respectfully, Mr. Chairman, that I do not think the Public Works Committee ought to vote on the floor of the Senate any bill that proposes modification of our national power policy without hearings out in the field. I think we had better get out to the grassroots and find out what various organizations think about these problems.

Now, on this matter of flood control, I do not think you can separate it from power. Although we talk about power, it is important to us in the Pacific Northwest and we need that power, but let me tell you it is important to the farmer, who is being washed out along the banks of our streams, that we do something about the flood control and, as to those fellows, I do not think you can say power is more important.

In my judgment, I think the Priest Rapids site is one of the great flood-control sites of that part of the country.

I do not find myself ringing with enthusiasm over a proposal that seeks to postpone flood control, because I have seen a lot of people, and you have too, starting building a house on the addition plan. They start out living in the garage, and 10 years later you still find them living in the garage.

I think that we had better take a very long look at the so-called segment or installment construction program.

I want to be convinced in any of these projects that we are not, in effect, setting back the comprehensive program for the development of the maximum potential of these rivers in the light of their multiple purposes.

Let me make clear, though, I recognize that this is a regional problem, that these rivers do not respect State lines. I have never been for, and am not today for the development of a CVA in our section of the country because I think we have peculiar and particular problems out there where we do not need that kind of an administrative setup.

But as far as the uses of the river are concerned, they are regional. They do raise regional problems and I always agreed with the point of view that McNary and Norris took, let us get the projects built and then we can work out any differences that may exist between us as to how we will administer them once they are built, but I am very much concerned about this segmentized program in the construction of the electric power and flood-control needs of the Pacific Northwest.

I only raise the signal flag this morning and let us go slowly until we have got our facts, and this is not something that can be considered at one meeting of a subcommittee of the Public Works Committee and then move it on to the full committee and then the floor of the Senate.

Mr. MORSE. In the course of my remarks, I said:

I do not find myself ringing with enthusiasm over a proposal that seeks to postpone flood control, because I have seen a lot of people, and you have, too, starting building a house on the addition plan. They start out living in the garage, and 10 years later you still find them living in the garage.

I think that we had better take a very long look at the so-called segment or installment construction program.

I want to be convinced in any of these projects that we are not, in effect, setting back the comprehensive program for the development of the maximum potential of these rivers in the light of their multiple purposes.

Let me make clear though, I recognize that this is a regional problem, that these rivers do not respect State lines. I have never been for, and am not today for the development of a CVA in our section of the country because I think we have peculiar and particular problems out there where we do not need that kind of an administrative setup.

But as far as the uses of the river are concerned, they are regional. They do raise regional problems and I always agreed with the point of view that McNary and Norris took, let us get the projects built, and by that I meant, as they did, built by the Federal Government, and then we can work out any differences that may exist between us as to how we will administer them once they are built, but I am very much concerned about this segmentized program in the construction of the electric power and flood-control needs of the Pacific Northwest.

I only raise the signal flag this morning and let us go slowly until we have got our facts, and this is not something that can be considered at one meeting of a subcommittee of the Public Works Committee and then move it on to the full committee and then the floor of the Senate.

Therefore, I say, Mr. President, that the bill is weak in its flood-control aspects, because I think it will have the effect of delaying the flood-control projects contemplated by the main control plan of the 308 report. In fact, I believe it will set them back for a long time.

Mr. President, I wish to point out that the engineers' plan calls for 2 million acre-feet of storage which would be needed for the high flood stage. It will not only cost more, in my judgment, because we are not proceeding with a continuity of construction of the multipurposes of the dam, but I am satisfied it will result in higher electric rates. I

know the Senators from Washington and I can disagree about this to our hearts' content——

Mr. MAGNUSON. Mr. President, will the Senator from Oregon yield at that point?

Mr. MORSE. I yield.

Mr. MAGNUSON. I do not think the Senator's argument holds good at all. If this dam cannot be built to conform with the cheap rate in the area it will not be possible to get any money to build it.

Mr. MORSE. I do not think that necessarily follows.

Mr. MAGNUSON. Where will the power be sold? If I can buy power from the pool at $17.50, or whatever the price may be, and someone else is selling it at $24 or $25, which will I take? I do not see the Senator's argument at all.

Mr. MORSE. I think we should forget about starting it.

Mr. MAGNUSON. I am not starting it. The people in my area want a try at it, and I, in part, represent those people.

Mr. MORSE. I understand; but my argument, Mr. President——

Mr. MAGNUSON. I want to do what the Senator from Oregon wants to do, if I have my way.

Mr. MORSE. I appreciate that.

Mr. MAGNUSON. But there has been an election since I tried it, and during 18 long months nothing has been done. I want to do it exactly the way the Senator wants it done.

Mr. MORSE. There will be other elections, and I think we should keep ourselves in the strongest possible position for those other elections. I do not think the passage of the bill will keep us in the strongest position on the principle involved for those elections.

Mr. MAGNUSON. The Senator and I should not disagree. It is what I should like to do if I had my way, and I think the Senator should bear with me in that, because he knows that is a fact.

PROPOSAL WOULD BOOST POWER RATES

Mr. MORSE. I certainly have borne with the Senator, but my argument on the cost of power is that we have three estimates as to the cost of power. There is one group of power experts who say that in all probability it would be in 3.22 mills so far as generation costs are concerned. We have the testimony of Mr. Smothers of the Grant County PUD indicating 2.9 mills for the plan proposed by the bill. And we have the cost of 2.03 mills if Priest Rapids were built as a wholly Federal project based on Army engineers' figures.

I wish to point out that the 2.9 mills estimate, based upon Mr. Smothers' testimony, is calculated on the basis of interest rates on borrowed funds of 3.75 percent as compared with the Government rate of 2½ percent. If the interest rate charged the licensee goes to 4 or 5 percent, the cost will be 3.1 mills.

Of course, as the Senator from Washington has pointed out, it depends on what they are going to be able to deal for at the end of Wall Street on Manhattan Island.

Mr. President, in view of the comment made by the Senator from Washington as to his position in regard to the kind of development program he thinks we should have in the Pacific Northwest, a program on which he and I completely agree, so far as policy is concerned, I think the finest statement I have heard the Senator make on that subject is contained on page 20 of the committee hearings. I should like to read it at this point in my speech, because I wish to be exceedingly fair to my friend from Washington. At that time he said:

> At that point again, so that the record is clear, and I think the chairman appreciates that this bill does establish some new policy—I want the record to show that I have always favored the direct Federal appropriation for the construction of these projects in our area, and I still do, and I think it has been a mistake to change it, but nevertheless, we do have a crying need for our continuing power development, and I could not find myself in a position, although I thoroughly disagree with the policy, but not having any new starts, of not allowing our local people to give them the opportunity to do something if they could under proper regulation. I think it is a serious mistake, this change of power policy, and I want the record to show that, but nevertheless I want to give them the opportunity if they can to go ahead on this somewhat new arrangement. I hope it succeeds, but I have some grave doubts, and I want the record to show that.

There is no doubt, Mr. President, that the Senator from Washington has made his position perfectly clear as to the kind of policy he would like to have. It is the same kind of policy that I want, and it is the same kind of policy upon which I shall continue to insist. That is why I shall not vote for the Senator's bill, because the Senator's bill, as he says, does constitute a change in the policy that I think should be maintained under the 308 report.

PRIVATE FINANCING NOT ASSURED

Now, Mr. President, a word about the financing. I do not wish to see PUD's misled and I do not wish to see them disappointed, but, for the life of me, I have serious doubts that this PUD or any other public utility district can go to Manhattan Island and get the financial backing necessary for this dam. In view of the financing costs the generating costs would be high. There is also the problem of whether the backing community will love the PUD proposal as much after the Federal project is modified out of existence as it professes to love it now.

I understand that the Grant County PUD has obtained some encouragement from the John Naveen & Co. of Chicago, investment bankers. But I understand this is the same company which at one time held out hope for the marketing of bonds for an Iowa cooperative to enable it to build generating facilities, but which never came through.

I think the financing of this project will be very questionable, because no concrete load estimate of power customers is available. There is no definite list of customers submitted as to the amounts of power they will take. All they have done is to submit some letters from other PUD's and cooperatives and other agencies in the State of Washington saying they could use some more power. I do not think we can get the dam financed on that kind of representation.

THIS BILL WOULD DELAY, NOT SPEED, PRIEST RAPIDS CONSTRUCTION

Talk about delay, Mr. President. If this bill is passed, and if this approach to the problem is authorized, then what will happen to those of us who would otherwise continue to urge Federal development? We shall be set back then, not only by the administration but by the bill, because it will be necessary to give the agencies time; and you know as well as I do, Mr. President, that they will not give up in 2 years, if they have not obtained financing in 2 years. They will ask for another year's time, and another year's time, and they might get it. They need only file with the FPC within 2 years. Hearings, the examiner's decision, the Commission's decision, and other factors provide for many years of delay.

In my judgment, we are dealing with a project which is of such a questionable financial nature that all we will end up with is further delay.

What I say should be done is to get busy and to make it clear to the people of the country that they ought to convince the administration, whether it be a Republican or a Democratic administration at any given time, that the Federal power policy of many years' standing in this country should be continued.

YEARS OF PRELIMINARY PLANNING REQUIRED

I wish to take a few minutes to discuss briefly a report I have received from the district Army engineer's office in Portland, Oreg. In the first part of the memorandum the project is described. I ask unanimous consent to have the entire memorandum printed in the body of the RECORD at this point as a part of my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

PRIEST RAPIDS DAM, COLUMBIA RIVER, WASH.

1. Project description: Priest Rapids Dam will be located on Columbia River about 397 miles upstream from its mouth and about 73 miles upstream from the mouth of Snake River. The reservoir will extend upstream 56 miles to the tailwater of the Rock Island Dam of the Puget Sound Power & Light Co. In addition, a narrow arm of the reservoir would extend up Crab Creek for about 22 miles.

As outlined in House Document No. 531, 81st Congress, 2d session, the dam would lie across the Columbia in a straight line with the spillway occupying the existing channel, a powerhouse adjoining on the left and an earthfill embankment continuing from the powerhouse to the left abutment. To the right of the spillway would be provisions for future navigation locks. Beyond, and extending to the right abutment, would be an earthfill embankment section. The project as proposed is designed for normal power use up to elevation 550 feet, and a maximum surcharge of 40 feet to be used for flood control purposes. An initial installation of 23 units totaling 1,219,000 kilowatts is planned.

2. Preconstruction planning: Preconstruction engineering and investigations required before construction can be started would involve the following:

(a) Foundation exploration and design studies to select the best layout and type of dam structure.

(b) Selection of a route for relocation of the Milwaukee Railroad satisfactory to both the Government and the railroad.

(c) Satisfactory solution of the relocatins of State highways and other roads.

(d) Preparation of a general design memorandum which will present a complete and detailed plan for the development of the entire project.

(e) Preparation of a detailed cost estimate and construction schedule.

3. Normal and accelerated schedule: The preconstruction planning would normally require 3 years to accomplish. An accelerated schedule would allow construction to start in 2 years.

4. Preconstruction funds requirements: Preconstruction planning would require approximately $1,800,000 to complete. By early concentrated planning on specific features scheduled for early construction, it might be possible under an accelerated schedule, to place the project under construction with a slightly lesser amount of planning funds.

5. Current cost estimate: The current (July 1953 base) cost estimate for the Priest Rapids project is $364,270,000 as itemized in the following table. Interest during construction would amount to $46,425,000.

F. P. C. account number and feature

	Cost
320, lands and damages	$2, 860, 000
320, relocations	39, 303, 000
321, buildings, grounds and utilities	14, 703, 000
321, powerhouse structure	38, 301, 000
322, reservoir and pool preparation	74, 000
322, dams	157, 638, 000
322, locks (initial construction)	10, 698, 000
322, Fish and Wildlife facilities	15, 832, 000
322, construction facilities	182, 000
323, turbines and generators	57, 865, 000
324, transformers and switchgear	17, 678, 000
325, operating equipment	1, 101, 000
326, roads, railroads and bridges	8, 035, 000
Construction cost	364, 270, 000
Interest during construction	46, 425, 000
Capital cost	410, 695, 000

6. Cost allocation: No formal cost allocation has been made for the Priest Rapids project since funds were not available to prepare cost estimates for alternate projects required to complete a cost allocation study. An approximate allocation would be as follows, based on specific costs:

	First cost	*Annual cost*
Power	$288, 313, 000	$14, 500, 000
Flood control	65, 259, 000	3, 290, 000
Navigation	10, 698, 000	540, 000
Recreation	0	0
Total	364, 270, 000	18, 330, 000

The above data should be considered as preliminary and subject to revision.

7. Annual benefits: The annual benefits of the project are estimated as follows:

Power	$22, 774, 000
Flood control	3, 285, 000
Recreation	60, 000
Total annual benefits	26, 119, 000

The power and flood control benefits allocated to the project represent the share of the corresponding Columbia River Basin system benefit commensurate with the contribution which the project makes toward the derivation of the system benefit.

8. Annual charges: Total annual charges, including interest and amortization, operation, maintenance, and interim replacements, amount to $18,330,000 annually.

9. Benefit-cost ratio: The benefit-cost ratio is 1.43 to 1.

Mr. MORSE. Mr. President, the second point raised by the district engineer in the memorandum deals with preconstruction planning.

Mr. President, this spells time. It spells a large amount of time, in my judgment. It spells some waste of time, because the Army engineers will have to be in constant conference with an independent body which really has the statutory authority to go ahead and build the dam. The Army engineers are going to be held up by that kind of jurisdictional problem.

The preconstruction planning, according to the memorandum, would consist of the following:

a. Foundation exploration and design studies to select the best layout and type of dam structure.

b. Selection of a route for relocation of the Milwaukee Railroad satisfactory to both the Government and the railroad.

c. Satisfactory solution of the relocations of State highways and other roads.

d. Preparation of a general design memorandum which will present a complete and detailed plan for the development of the entire project.

e. Preparation of a detailed cost estimate and construction schedule.

Mr. President, to accomplish that will require a tremendous length of time, and it will be complicated, I say now, by jurisdictional factors. The Federal Government will not be in a position to do a good job to the point of being able to say to the Army engineers, "This is it. Go ahead and complete the job."

I think the mixed jurisdiction which will result from the bill will be costly in terms of time also. The memorandum continues:

Normal and accelerated schedule. The preconstruction planning would normally require 3 years to accomplish. An accelerated schedule would allow construction to start in 2 years.

It must be understood that that will be the earliest possible time in which to begin the construction of the dam, after the financing has been arranged for. It is going to take a considerable length of time. On the other hand, if the fight is made which I think ought to be made in carrying this issue to the people, as I think it should be carried to the people, to have the Federal Government do the job, consonant with the comprehensive plan for full multipurpose development, it would not take any such period of time as I think will be lost through this approach to the problem.

I know what the intention is, but there is no assurance, as I read the bill, at least, that the Grant County PUD will be a licensee. The bill provides alternates, as will be found in section 1.

Mr. President, I ask unanimous consent to have section 1 of the bill printed at this point in the RECORD, in order to illustrate my contention.

There being no objection, section 1 was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Flood Control Act of 1950 (64 Stat. 170, 179), insofar as it adopted and authorized to be prosecuted the Priest Rapids Dam on the Columbia River, Wash., substantially in accordance with the plans recommended in the report of the Chief of Engineers dated June 28, 1949, contained in House Document No. 531, 81st Cong., 2d session, is hereby modified to permit the development of the Priest Rapids site by Public Utility District No. 2, of Grant County, Wash., or such district or its successor in combination with such other utilities as it may legally affiliate with or by any division, subdivision, agency, or commission of the State of Washington under and in accordance with the terms and conditions of a license duly issued pursuant to the Federal Power Act and in accordance with this act.

Mr. MORSE. Mr. President, it is also interesting, as was brought out in this section, that Washington State operating agency No. 1 might be the licensee. Members have indicated some interest in following the proposition that the State generating the power has a prior claim upon the power which would be produced at this site. That is directly contradictory of the regional approach to power development. That attitude is bitterly resented and opposed in Oregon and Idaho.

I can see a considerable amount of intrastate dispute, after the passage of the bill, as to who will do the job. I do not feel that the interests of all the people of the United States in the maximum development of the power resources of this area should be thrown into a State political dispute. I think it is not beyond the realm of probability that that is exactly what will happen, even if it is assumed that everything provided in the bill will go along as smooth as wax.

I could continue, Mr. President, to analyze what I think are some of the serious administrative difficulties which are going to be costly both in terms of money and in loss of time by reason of the passage of the bill; but I shall close this phase of my speech by saying that I think the bill is a hodgepodge. I think it is what would have to be expected when a start is made on exceptions to a very sound policy which has proved its worth.

The Federal power development policy has proved its worth, Mr. President. All that is necessary is to go out into my section of the country and to see what has happened to the economy of the States of Montana, Idaho, Washington, and Oregon as a result of bringing cheap power into that area. It has been dramatic; it has been an economic miracle. But much still remains to be done.

I think we should stand with a proven program. I think we should stand with the great statesmen who really were the parents of this proven program—our predecessors in this body and the predecessors of the present administration in the White House. They were the men who had the vision, who recognized the importance of regional development by the Federal Government on a comprehensive plan basis of the power resources of the area.

I think it is so important that that program be continued, and that it should not be developed on a piecemeal basis, a warning against which the Senator from Washington [Mr. MAGNUSON] himself gave so eloquently in the hearing before the Committee on Public Works, because

I think the program should not be continued on a piecemeal basis.

I urge again on the floor of the Senate, as I did in committee, that the entire matter be postponed until hearings can be held in the field on the whole region, on all of the piecemeal proposals—Cougar, Green Peter, John Day, Priest Rapids. There are differences. No doubt there are many differences between Priest Rapids and the other projects; but they have many problems in common, too, especially one great problem in common: They all represent exceptions to the long existing Federal power development program under the 308 report plan.

I think the people of our area, and through the people of our area the people of the United States, should have an opportunity to take a thorough look at these proposals, by means of comprehensive hearings in the field this fall and early next winter.

That is why, Mr. President, before the debate is concluded, I shall move to recommit the bill. I think the bill ought to slumber in committee until the people of all the States of the Pacific Northwest can be heard on the issue. Until then, I do not think Congress should change or make any exception to the Federal power program as contemplated in the 308 plan for maximum multipurpose development in the Columbia Basin.

During the delivery of Mr. MORSE's speech—

Mr. CASE. I should like to ask the Senator from Oregon if he would permit me to have inserted in the RECORD at this point a two-page statement by Mr. Robert Moses, head of the New York State Power Authority, setting for the contentions of the State of New York as to its rights in the Niagara River.

Mr. MORSE. Let me say to my good friend from South Dakota that I have no objection to Mr. Moses' statement going into the RECORD. However, I have great pride in preserving the continuity of any speech I make on the floor of the Senate, and I have some pride in its artistic development. I am sure that my friend from South Dakota would not want to have such a note of discord and sour cream slipped into the speech diet in which I am indulging this afternoon by having a statement from Mr. Moses appear in the midst of my remarks. Let it appear at the end. Does the Senator object to that?

Mr. CASE. Not particularly. I am glad the Senator from Oregon used the word "discord," because thereby he recognized that there might be some dissent as between the opinion expressed by Mr. Moses and that expressed by himself, with respect to the rights of the State of New York.

I do not know that the "sour cream" is a bad figure either, since I understand that sour cream is supposed to improve digestion; and I think a little of the sentiment expressed by Mr. Moses would improve the digestibility of the whole question.

I have no objection to the letter from Mr. Moses being placed in the RECORD following the remarks of the Senator from Oregon, if the RECORD may show that it was I who asked to have it inserted in the RECORD.

I ask also to have inserted in the RECORD the editorial comment of the New York Times and the New York Herald Tribune upon the appointment of Mr. Moses to the chairmanship of the New York State Power Authority at the time he was recently appointed by Governor Dewey, of New York. It seems to me that would be ample comment upon the statement of the Senator from Oregon.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Dakota? The Chair hears none, and it is so ordered.

Mr. CASE. In accord with the permission granted, Mr. President, I submit for the RECORD an excerpt from our hearings in the Public Works Committee giving editorial comment by the New York Times and the New York Herald Tribune on the character of Mr. Robert Moses, at the time of his appointment to the chairmanship of the New York State Power Authority. Following that, I submit a memorandum sent to me by Mr. Moses under date of June 10, 1954, setting forth the legal rights of the State of New York to the Niagara River:

EXCERPT FROM HEARING BEFORE PUBLIC WORKS COMMITTEE

Senator CASE. I have here an editorial from the New York Times of Tuesday, March 9, which reads in part—it is headed "Another Job for Mr. Moses"—and the first paragraph says:

"Robert Moses has now taken on the New York State Power Authority as one of a dozen or more jobs he handles with miraculous ease.

"The news is good because the authority at the moment has two tasks of great importance to accomplishment."

I skip a part of it and come to this paragraph:

"The Niagara powerplant is another matter. Here there is a first-class struggle, in which all Mr. Moses' proved fighting qualities and civic spirit will be needed.

"A bill to give the right to develop the Niagara power to five private utility companies and not to the State, the Capehart-Miller bill, has already passed the House of Representatives. It comes up for a hearing tomorrow before the Senate Public Works Committee.

"The bill should be defeated in the Senate or, barring that, it should be vetoed by President Eisenhower."

Now, that is the New York Times, which is a fairly representative New York newspaper.

The New York Herald Tribune, of the same date, has as its lead editorial "Mr. Moses' New Post":

"Mr. Robert Moses already wears a large number of hats to the advantage of the people of New York City and State. The latest which he has donned at the invitation of Governor Dewey, that of chairman of the State power authority, promises to be at least equally beneficial."

And then I skip part of it for the purpose of brevity and come to this part:

"It is a real question whether Congress will allow the State power authority to go ahead with the development of power at Niagara Falls and St. Lawrence.

"Hearings will start shortly on the Senate bill to confine such development to private companies, a proposal which, as Governor Dewey has pointed out, would place New York State at an acute disadvantage in competition with hydroelectric developments of other States.

"In testifying on behalf of the State and before the Senate committee on this bill, Mr. Moses will speak from a background of language familiarity with the problem and active concern to carry through the New York plan.

" 'He combines a national reputation as one of the most efficient builders of our time,' to quote the Governor, 'with practice in serving many administrations of differing political complexions on a wholly nonpartisan basis.'

"All of this, when sparked by Mr. Moses' energy and articulateness, should have a decided effect upon Congress. It is wise and proper, therefore, to allow him to testify with the full weight of official authority as chairman of a State group most intimately concerned.

"Governor Dewey's offer of a post to Mr. Moses deserves applause.

"By accepting this unsalaried, tough chore, the new chairman of the power authority has again earned the gratitude of New Yorkers."

And I suggest the New York Herald Tribune and New York Times are fairly competent authorities to express New York opinion.

THE LEGAL RIGHTS OF THE STATE OF NEW YORK TO THE NIAGARA RIVER

POWER AUTHORITY
OF THE STATE OF NEW YORK,
New York, N. Y., June 10, 1954.

Memorandum to Senator FRANCIS CASE.
From Robert Moses.
Subject: The Legal Rights of the State of New York to the Niagara River.

The State of New York holds absolute title to the bed of the Niagara River, having acquired such title by boundary agreement with the State of Massachusetts. Since 1883 the State has also owned all the land along the Niagara River in the vicinity of the falls and also all the offshore islands.

The Federal Government has never seriously challenged the State's proprietary rights in the Niagara River. The Federal Power Commission urged in a recent litigation that the Federal Power Act had abolished proprietary rights under State law, but this contention was rejected by the Supreme Court of the United States (*Federal Power Commission* v. *Niagara Mohawk Power Corporation* (347 U. S. 239, Mar. 15, 1954)). You also will recall that the Congress confirmed the proprietary titles of the States and their lessees in inland waters by the Submerged Lands Act of 1953.

In the 1890's the Legislature of the State of New York granted certain temporary rights in the Niagara River to power developers, which were predecessors in interest of the Niagara Mohawk Power Corp. Subsequently, the power policy of the State came under the close scrutiny of the public, the legislature, and of a series of distinguished governors who were greatly interested in the conservation of natural resources. A joint legislative committee appointed in 1912 recommended after several years' study that development of the State's waterpowers be carried out by and in behalf of the State itself. The State law was amended to forbid any further grants of private rights to use waters of the Niagara River, and now provides that all new power resources "shall always remain inalienable, and ownership, possession, and control thereof shall always be vested in the people of the State" (public authorities law, sec. 1001).

Although the Niagara Mohawk Power Corp. and its associates do not propose to locate works for the intake and discharge of water within the State Reservation owned by New York, they do propose to divert water above the reservation and conduct it by tunnel to a point in the river below the reservation. Their ownership of land above

the falls gives them no right to make such a diversion, because the benefits of a fall of water belong to the owner of the bed and banks at the place where the fall takes place. For this reason the development proposed by the five companies cannot be carried out unless the Congress attempts to take the property of this State and deliver it in violation of State law to private persons.

The situation is analogous to that which was before the Supreme Court of the United States in *International Bridge Co.* v. *New York* (254 U. S. 126 (1920)), involving a bridge across the Niagara River. In that case Mr. Justice Holmes, writing for the Court, dismissed objections by the bridge company to an assertion of jurisdiction by the State of New York. Referring to the land upon which the bridge was constructed, he stated:

"The State was the source of every title to that land and apart from the special purposes to which it might be destined, of every right to use it. Any structure upon it considered merely as a structure is erected by authority of New York. The nature and qualifications of ownership are decided by the State and although certain supervening uses consistent with those qualifications cannot be interefered with by the State, still the foundation of a right to use the land at all must be laid by State law."

The Supreme Court of the United States construed the Federal Power Act in the same way in the opinion of March 15, 1954.

The special legislation sought by the five companies is based upon an extreme, revolutionary and untenable theory of Federal power never before seriously proposed to be asserted by Congress. The five companies are driven to this legislation because they hope under the cloak of Federal authority to seize State property for private purposes. It is our conviction that the Senate will manage this project with the same respect for State law which was incorporated in the Federal Power Act. We urge, therefore, that the Senate enact your bill which properly provides that the Niagara development shall be carried out according to long established procedures under the Federal Power Act and the laws of the State of New York.

ROBERT MOSES,
Chairman.

During the delivery of Mr. MORSE's remarks,

Mr. KNOWLAND. Mr. President, at this time I wish to propound a unanimous-consent agreement relating to the further proceedings in connection with this bill. The Senator from Oregon now has before him the proposed agreement.

Mr. MORSE. I should like to take time to read it.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

Mr. KNOWLAND. Mr. President, in explanation I may say that I have prepared a proposed unanimous-consent agreement. I wish to send it to the desk and have it read for the information of the Senate.

Let me say to the Senate that under the proposed agreement, if it is entered into, I propose that the Senate remain in session today as long as any Members of the Senate wish to make speeches on the pending bill. In other words, if Senators wish to speak for 1 or 2 hours longer, in making speeches on the pending bill, we plan to keep the Senate in session that long, so that Senators will have ample opportunity to make any remarks on the bill they may care to make.

Then, on Monday next, the provisions of the proposed unanimous-consent agreement would go into effect, following the usual morning hour.

The PRESIDING OFFICER. Does the Senator from California submit the proposed unanimous-consent agreement?

Mr. KNOWLAND. Mr. President, in order that the Senate may be advised as to the proposed unanimous-consent agreement, I send it to the desk and ask that it be read for the information of the Senate. The proposed agreement is submitted on behalf of both the distinguished minority leader, the senior Senator from Texas [Mr. JOHNSON], and myself.

The PRESIDING OFFICER. The proposed unanimous-consent agreement will be read.

The legislative clerk read as follows:

Ordered, That following the morning business on Monday, July 12, during the further consideration of H. R. 7664, to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act, debate on any amendment or motion (including appeals) shall be limited to not exceeding 30 minutes, to be equally divided and controlled, respectively, by the mover of any such amendment or motion and the Senator from Connecticut [Mr. BUSH] in the event he is opposed to such amendment or motion; otherwise, by the mover and the minority leader or some Senator designated by him: *Provided,* That no amendment that is not germane to the subject matter of the said bill shall be received: *And provided further,* That debate upon the bill itself shall be limited to not exceeding 1 hour, to be equally divided and controlled, respectively, by the Senator from Connecticut [Mr. BUSH] and the Senator from Texas [Mr. JOHNSON]. (July 10, 1954.)

The PRESIDING OFFICER. Is there objection to the proposed unanimous-consent agreement?

Mr. MORSE. Mr. President, reserving the right to object, I should like to suggest an amendment to the proposed agreement.

Mr. KNOWLAND. I am always glad to hear any suggestions on the part of the Senator from Oregon.

Mr. MORSE. I wish the majority leader were as anxious to act on them. [Laughter.]

Let me ask the Senator from California whether he would agree to amend the proposed agreement—for I am sure there is other business that can be transacted in that period of time—by providing that the vote on the pending bill shall take place not before 4 p. m. on Monday.

Mr. KNOWLAND. If the Senator from Oregon feels that it is urgent that such a provision be made, I assume the proposed agreement can be reworded accordingly. However, I hope we can proceed to dispose of this measure in prompt fashion, because it is necessary that we act on certain other measures on Monday, and they cannot be acted on until this measure is disposed of.

So I am anxious to have the pending measure disposed of at a reasonably early hour—as early as possible. Even so, it probably will be Tuesday before we can reach the bill amending the Atomic Energy Act.

I am not certain whether the Senator from Oregon feels that the time proposed for debate is insufficient in length or whether he regards the hour proposed for the vote as an inconvenient one.

Mr. MORSE. I shall explain. I am perfectly willing to discuss the matter on the floor of the Senate, although such discussions usually occur in the cloakrooms. I have some cohorts on this bill—even though some persons may be surprised to hear that; nevertheless, there are some who share my view of the bill. It happens that some of them will not be able to return before 3 or 4 o'clock on Monday, although I know they will be here by 4 o'clock. So if we can arrange to have the vote taken at 4 o'clock, that will accommodate everyone concerned. In the meantime, we could take up some other measures of the so-called minor, calendar type. I would wish to have the postponement until 4 o'clock for the vote on the preference clause, too.

Mr. MAGNUSON. I do not know whether such an arrangement would be for the benefit of those who oppose the bill or for the benefit of those who wish to vote for it. Cannot we conclude action today on this bill?

Mr. MORSE. I do not know how long the Senator from South Dakota [Mr. CASE] will desire to cross-examine me.

Mr. MAGNUSON. But he will discuss the Niagara project, not the Priest Rapids bill.

Mr. MORSE. Nevertheless, I wish to accommodate my friend, the Senator from South Dakota.

I believe I could answer the question in a few minutes. But I suggest to the Senator from Washington, that, even in behalf of some Senators who are not here today——

Mr. MAGNUSON. I shall not object to the proposed agreement.

Mr. MORSE. I suggest that even in behalf of some Senators who are not here today, and who will vote for the bill, as well as in behalf of some Senators who are not here today, and who will vote against the bill, I believe it would be more convenient to have the vote taken at 4 o'clock.

Mr. KNOWLAND. I think I understand the position of the Senator from Oregon.

Instead of providing "that following the morning business on Monday, July 12, during the further consideration," would it be agreeable to provide that at 3 o'clock on Monday afternoon, the proposed procedure will begin to run?

Mr. MORSE. I accept.

Mr. KNOWLAND. I modify the unanimous-consent request accordingly.

Mr. CASE. Mr. President, reserving the right to object—and I shall not object—I wonder if the majority leader would ask that the colloquy with respect to the time for voting appear following the discussion between the Senator from Oregon and myself.

Mr. KNOWLAND. I meant to make that request, so as not to interrupt the discussion.

The PRESIDING OFFICER. Is there objection to the unanimous-consent, as modified? The Chair hears none, and it is so ordered.

Mr. KNOWLAND. I thank the distinguished Senator from Oregon and the minority leader.

The unanimous-consent agreement, as modified, is as follows:

Ordered, That on Monday, July 12, at 3 o'clock during the further consideration of H. R. 7664, to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act, debate on any amendment or motion (including appeals) shall be limited to not exceeding 30 minutes, to be equally divided and controlled, respectively, by the mover of any such amendment or motion and the Senator from Connecticut [Mr. BUSH] in the event he is opposed to such amendment or motion; otherwise, by the mover and the minority leader or some Senator designated by him: *Provided*, That no amendment that is not germane to the subject matter of the said bill shall be received: *And provided further*, That debate upon the bill itself shall be limited to not exceeding 1 hour, to be equally divided and controlled, respectively, by the Senator from Connecticut [Mr. BUSH] and the Senator from Texas [Mr. JOHNSON]. (July 10, 1954.)

ORDER FOR RECESS TO MONDAY

During the delivery of Mr. MORSE'S remarks—

Mr. KNOWLAND. Mr. President, will the Senator from Oregon yield, to permit me to submit a proposed unanimous-consent agreement relating to another matter?

Mr. MORSE. I yield.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that when the Senate completes its labors today, it stand in recess until Monday next, at 12 o'clock noon.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

DEVELOPMENT OF THE PRIEST RAPIDS SITE ON THE COLUMBIA RIVER, WASH.

The Senate resumed the consideration of the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

Mr. MAGNUSON. Mr. President, I shall speak only about 2 minutes, because I know it is desired to have the Senate recess, now that an agreement has been entered into.

Mr. President, I know that it is desired to recess at this time, now that an agreement to vote on the bill on Monday has been reached. However, I think the record should show—and I invite this to the attention of the Senator from Oregon—that he said we cannot get away from certain fundamentals. I think the Senator from Oregon very seldom does. I usually am in entire agreement with his fundamentals. I, too, think that in these cases we should not get away from the fundamentals. I do not particularly care who builds a dam, whether it is the A. B. C. power company, a public utility company, or the Federal Government, so long as the people get the cheapest possible power. I think that is fundamental.

The commissioners of the different public utility districts are elected by the people and if in the particular case before the Senate the commissioners were not going to give the people cheap power, they would not last in their offices one term, if I know the temper of my people.

Secondly, I have told different persons with whom I have worked together in public power development for years, when they have come to me, "I think you are going to be badly mistaken about what you think you can build the dam for; however, I cannot deny you the right to try." I think the fundamental objective should be kept in mind.

Another point I wish to make for the record is that there has been some suggestion to the effect that the public power advocates in the State are against the bill. I have before me a letter from the Washington State Grange, an organization which has always been a strong public power advocate. I have a communication from the Columbia Basin Commission, which handles the whole Grand Coulee development. I have communications also from the Washington State Power Commission; the Public Utility District No. 1, Grays Harbor County; the Public Utility District No. 1, of the Kittitas County; the Public Utility District of Big Bend Electric Cooperative; the Public Utility District of Cowlitz County; and the Public Utility District of Mason County; and others.

With the indulgence of the Senator from Connecticut, I should like to say I think the communication from the last-named organization pretty well sums up the positions of the organizations I have named. In its letter, Public Utility District No. 3, of Mason County, Wash., states:

> We are one of the counties which has joined with Grant County in this proposed project simply because we realize fully the urgent need for additional generation and transmission in the Northwest.
>
> We would much prefer that the Federal Government continue to build these large dams, which would further increase the income they now receive from their existing Northwest grid system, and permit them to adequately supply the impartial service regionwide which only the Federal Government can do.
>
> As a user of federally generated power, upon which we are entirely dependent in our county, we urge that if the Federal Government plans to continue to build these large dams that they quit dragging their feet and make another new start this year.

I have in my hand many other communications, which are in agreement in their sentiments. The problem has been discussed with representatives from all the organizations. I have not had a single protest from any organization in my State, though I have had some from individuals.

I did not have my file with me in the Senate and the communications to which I referred are all addressed to my colleague the junior Senator from Washington [Mr. JACKSON], but I have received similar communications.

Mr. President, I ask unanimous consent to have the communications to which I have referred printed in the RECORD at this point in my remarks.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

WASHINGTON STATE GRANGE,
Seattle, Wash., June 16, 1954.

Mr. GLEN SMOTHERS,
Washington, D. C.

DEAR MR. SMOTHERS: At the request of Ken Billington, we are airmailing you herewith copy of resolution in support of Priest Rapids Dam legislation as passed by the delegate of the Washington State Grange in session last week.

Sincerely,

MARGARET VAN ETTEN,
Secretary to Mr. Nelson.

SUPPORT OF PRIEST RAPIDS DAM LEGISLATION

Whereas the House of Representatives of the Congress of the United States has passed House bill H. R. 7664 extending authorization for the construction of Priest Rapids Dam on the Columbia River to local public agencies of the State of Washington, and such legislation is now under consideration in the Senate; and

Whereas the legislation passed by the House calls for maximum development of the water resources at the site within the comprehensive plan for development of the Columbia River system; and

Whereas initiation of construction of at least one major hydroelectric project is needed in the region as soon as possible in order to avert a power shortage after 1960: Therefore be it

Resolved by the Washington State Grange, That we endorse H. R. 7664, the Priest Rapids Dam legislation, as passed by the House of Representatives; and make the further recommendation that amending improvement be made as follows: (a) limit the license to local public distributing agencies having a direct customer utility responsibility; (b) make inclusion of navigation features mandatory in the license; (c) provide adequate facilities for the protection of the fish reserve; and (d) provide inclusion of the present Federal power preference and priority policies in sale or disposal of the power.

DAVENPORT, WASH., *May 26, 1954.*

Hon. HENRY JACKSON,
United States Senator,
Washington, D. C.:

We urge your full support of Senate bill 1793, vital to this area.

BOARD OF TRUSTEES, LINCOLN COUNTY COOPERATIVE, INC.

RESOLUTION BY THE WASHINGTON PUBLIC UTILITY DISTRICTS ASSOCIATION IN SUPPORT OF PRIEST RAPIDS DAM LEGISLATION

This association urges early passage by the Congress of Priest Rapids legislation and endorses H. R. 7664 as passed by the House of Representatives, which provides for the extension of authorization for construction of the Priest Rapids project by local public agencies; and, furthermore, we recommend improvement in the legislation by the addition of an amendment which will maintain the preference and priority policies as provided by present Federal power laws.

Adopted June 5, 1954, Olympia, Wash.

EPHRATA, WASH., *June 17, 1954.*

Senator HENRY M. JACKSON,
Senate Office Building,
Washington, D. C.:

Columbia Basin Commission yesterday passed resolution urging passage of Priest Rapids Dam authorization either with or without amendments.

HUBER H. WALTER,
Columbia Basin Commission.

SEATTLE, WASH., *May 20, 1954.*
Hon. HENRY JACKSON,
United States Senator,
Senate Office Building,
Washington, D. C.:

Understand that Priest Rapids bill has come before Senate and that public hearings may be held regarding it. We are very much interested in seeing this bill acted upon favorably, and if there is an opportunity for us to appear regarding it we would appreciate your making arrangements for our appearance. Please wire collect.

J. FRANK WARD,
Washington State Power Commission.

PUBLIC UTILITY DISTRICT NO. 1,
GRAYS HARBOR COUNTY,
Aberdeen, Wash., June 1, 1954.

Subject: Priest Rapids Dam bill
Hon. HENRY M. JACKSON,
United States Senate Building,
Washington, D. C.

DEAR SENATOR JACKSON: The board of commissioners has requested that I write you relative to the subject matter. They would like you to use your influence to get this bill out of committee before the end of session in order that those public utility districts involved might know whether or not they can proceed to make the necessary engineering investigation and thereby expedite the building of Priest Rapids Dam or dams, whichever might be most feasible.

In other words, it is action we want because at best it will take some time, as you know, to build this dam or dams, and anything that you can do will be very much appreciated.

Yours very truly,
F. J. ROBBINS, *Manager.*

BRIDGEPORT, WASH., *May 27, 1954.*
HENRY M. JACKSON,
United States Senate:

Continuous growth of our area makes it imperative we have a new start on a power project, so please use your influence to pass Senate bill 1793 this session of Congress.

DON B. THOMPSON,
Manager, Public Utility District No. 1 of Douglas County.

ELLENSBURG, WASH., *May 26, 1954.*
Senator HENRY M. JACKSON,
Senate Office Building,
Washington, D. C.:

We urge your full support of the Priest Rapids bill permitting local public power bodies to proceed with construction plans.

PUBLIC UTILITY DISTRICT NO. 1,
KITTITAS COUNTY,
CECIL H. JOHNSON, *President.*

RITZVILLE, WASH., *May 26, 1954.*
Hon. HENRY M. JACKSON,
United States Senator,
Washington, D. C.:

We urge you to vigorously support Senate bill 1793. We feel that an adequate supply of power in this area is vital especially when we are in keeping with the comprehensive river development plan already established.

BIG BEND ELECTRIC COOPERATIVE, INC.,
ROBERT G. KLATT, *Manager.*

LONGVIEW, WASH., *June 15, 1954.*
Hon. HENRY M. JACKSON,
Senate Office Building:

We understand that legislation respecting Priest Rapids Dam now before the Senate committee for action by tomorrow. We urge your continued active support of this legislation. If we can assist, please advise.

PUBLIC UTILITY DISTRICT NO. 1
OF COWLITZ COUNTY WASH.,
EARL J. COLE, *President,*
Board of Commissioners.

PUBLIC UTILITY DISTRICT NO. 3,
MASON COUNTY, WASH.,
Shelton, Wash., May 26, 1954.

Hon. HENRY JACKSON,
United States Senate,
Washington, D. C.

DEAR MR. JACKSON: We notice a recent news release indicates that you have about decided to withdraw your support permitting Grant County Public Utility District, along with several other public utility districts, to develop the Priest Rapids power project.

We are one of the counties which has joined with Grant County in this proposed project simply because we realize fully the urgent need for additional generation and transmission in the Northwest.

We would much prefer that the Federal Government continue to build these large dams, which would further increase the income they now receive from their existing Northwest grid system, and permit them to adequately supply the impartial service regionwide which only the Federal Government can do.

As a user of federally generated power, upon which we are entirely dependent in our county, we urge that if the Federal Government plans to continue to build these large dams that they quit dragging their feet and make another new start this year.

Very truly yours,
C. M. DANIELSON, *Manager.*
EARL A. CARR, *President.*
JACK A. COLE, *Vice President.*
T. W. WEBB, *Secretary.*

Whereas the power situation in the Pacific Northwest is critical and will remain so for several years to come unless new hydro projects can be gotten underway soon; and

Whereas demands on Congress for funds for national defense and for other matters of extreme national emergency so that continued Federal appropriations for such Northwest hydro projects are not available in sufficient amounts to meet all area needs; and

Whereas local undertaking of such projects is desirable and is consistent with announced Federal administration policies and partnerships; and

Whereas the Senate has before it a bill, H. R. 7664, to deauthorize the Priest Rapids project so that it might be built by public agencies within the State of Washington; and

Whereas the said bill has been passed by the House and further action by the Senate is necessary to avoid a delay of a year or more, if not acted upon during this session of Congress: Now, therefore, be it

Resolved by the Town Council of the Town of Cashmere, That the recent action of the Association of Washington Cities be approved, and that we urge the Senators of the State of Washington and the United States Senate to expedite in every way possible favorable action on the deauthorization of the Priest Rapids project located on the Columbia River in Grant County, Wash.

TOWN OF CASHMERE,
EARL BARNES, *Acting Clerk.*

Mr. MORSE. Mr. President, will the Senator from Washington yield?

Mr. MAGNUSON. I yield to the Senator from Oregon.

Mr. MORSE. I am glad the Senator from Washington has put the communications into the RECORD. Representations were made before the Public Works Committee that similar communications existed. However, that does not surprise me. I only ask the question, What does it prove? It does not prove that what is proposed is best for the country or for the area; it only proves that a job has been done by way of convincing these people that it is the only way in which they are going to get additional power. I say what we ought to do is point out the disadvantages of getting power in that manner, and hold fast to the Federal power program.

Mr. MAGNUSON. I shall finish my remarks with a brief statement. The Senator from Oregon has sat with me in meeting after meeting when we agreed with the sentiment expressed by him. If cheap power cannot be produced in the manner being proposed, the facility will not be built. If it can be done, I say more power to them, to use a common expression. I care not whether the Federal Government, or public power utilities, or private utilities, build the dams, so long as the people get cheap power. If cheap power is not obtained by that method, I suppose that the Senator from Oregon and I can tell the persons interested that what we have said to them on many occasions turned out to be right. However, they want the opportunity to construct the project. Perhaps they may surprise us; maybe we are wrong and they are right with regard to their ability to do what they propose to do.

Mr. MORSE. I say most respectfully that what I think they are buying is delay, and that eventually it will result in high-cost power.

Mr. MAGNUSON. I am convinced that we are going to have the delay anyway.

RECESS

Mr. BUSH. Mr. President, pursuant to the order previously entered, I now move that the Senate stand in recess until Monday next at 12 o'clock noon.

The motion was agreed to; and (at 3 o'clock and 5 minutes p. m.) the Senate took a recess, the recess being, under the order previously entered, until Monday, July 12, 1954, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate July 10 (legislative day of July 2), 1954:

UNITED STATES ATTORNEY

Paul W. Cress, of Oklahoma, to be United States attorney for the western district of Oklahoma, vice Robert E. Shelton, resigned.

SENATE

MONDAY, JULY 12, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Rev. Ernest T. Blau, pastor, Gage Park Evangelical Lutheran Church, Chicago, Ill., offered the following prayer:

Almighty and everlasting God, Thou mighty ruler of nations, who dost fashion the hearts of men, and who by Thy teachings hast instilled in us, Thy children, a willingness to follow Thy word: Bless, we beseech Thee, those who guide the destinies of our beloved country in these troublous times; sit in the councils

of our Nation, guide our President and his Cabinet, the Members of the Congress, and all others in authority in their deliberations that they may devise and execute such measures as will serve the restoration and preservation of peace for our land. Grant our leaders strength, wisdom, and courage to do those things which will serve the best interest of the entire Nation and its people.

Make Thy light to shine out into the darkness. Take all Thy children into Thy fatherly care. Graciously protect Thy people and defenders everywhere whose possessions and lives may be endangered.

Almighty God, we make our earnest requests known unto Thee that Thou wilt keep our beloved country in Thy holy protection, that Thou wilt incline the hearts of the citizens to cultivate a spirit of obedience to government, to entertain brotherly affection and love of their fellow citizens of the United States.

Hear these petitions and all that we may ask of Thee, Heavenly Father, in Jesus name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Saturday, July 10, 1954, was dispensed with.

LEAVE OF ABSENCE

On request of Mr. JOHNSON of Texas, and by unanimous consent, Mr. DANIEL was excused from attendance on the session of the Senate today.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following the quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Ervin	Neely
Barrett	Gillette	Payne
Bowring	Gore	Robertson
Bridges	Green	Saltonstall
Bush	Hayden	Schoeppel
Butler	Hickenlooper	Smith, N. J.
Carlson	Ives	Sparkman
Chavez	Johnson, Tex.	Upton
Clements	Kilgore	Watkins
Cordon	Knowland	Wiley
Crippa	Langer	Young
Dirksen	Lehman	
Dworshak	Mansfield	

Mr. SALTONSTALL. I announce that the Senator from Minnesota [Mr. THYE] is absent on official business. The Senator from Maryland [Mr. BEALL], the Senator from Ohio [Mr. BRICKER], the Senator from New Jersey [Mr. HENDRICKSON], and the Senator from Indiana [Mr. JENNER] are necessarily absent.

Mr. CLEMENTS. I announce that the Senator from Ohio [Mr. BURKE], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Misssouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Montana [Mr. MURRAY], and the Senator from Rhode Island [Mr. PASTORE] are absent on official business.

The Senator from Texas [Mr. DANIEL] is absent by leave of the Senate.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan American Highway Congress at Caracas, Venezuela.

The PRESIDENT pro tempore. A quorum is not present.

Mr. KNOWLAND. I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The PRESIDENT pro tempore. The Sergeant at Arms will execute the order of the Senate.

After a little delay, Mr. ANDERSON, Mr. BENNETT, Mr. BYRD, Mr. CAPEHART, Mr. CASE, Mr. COOPER, Mr. DUFF, Mr. FERGUSON, Mr. FLANDERS, Mr. FREAR, Mr. FULBRIGHT, Mr. GEORGE, Mr. GOLDWATER, Mr. JACKSON, Mr. JOHNSON of Colorado, Mr. JOHNSTON of South Carolina, Mr. KENNEDY, Mr. KUCHEL, Mr. LENNON, Mr. LONG, Mr. MAGNUSON, Mr. MALONE, Mr. MARTIN, Mr. MCCARRAN, Mr. MCCARTHY, Mr. MILLIKIN, Mr. MONRONEY, Mr. MORSE, Mr. MUNDT, Mr. POTTER, Mr. PURTELL, Mr. REYNOLDS, Mr. RUSSELL, Mr. SMATHERS, Mrs. SMITH of Maine, Mr. STENNIS, Mr. SYMINGTON, Mr. WELKER, and Mr. WILLIAMS entered the Chamber and answered to their names.

The PRESIDENT pro tempore. A quorum is present.

Routine business is now in order.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following communications and letters, which were referred as indicated:

PROPOSED DEFICIENCY APPROPRIATIONS, LEGISLATIVE BRANCH (S. DOC. NO. 133)

A communication from the President of the United States, transmitting proposed deficiency appropriations, in the amount of $105,000, for the legislative branch, fiscal year 1954 (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

PROPOSED SUPPLEMENTAL APPROPRIATION, FEDERAL POWER COMMISSION (S. DOC. NO. 132)

A communication from the President of the United States, transmitting a proposed supplemental appropriation for the fiscal year 1955, in the amount of $300,000, for the Federal Power Commission (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

REPORTS ON OVEROBLIGATION OF APPROPRIATIONS

A letter from the Acting Secretary of Defense, transmitting, pursuant to law, copies of 17 separate reports relating to overobligation of appropriations in the Department of Defense (with accompanying papers); to the Committee on Appropriations.

PROTECTION OF NAME OF FEDERAL BUREAU OF INVESTIGATION FROM COMMERCIAL EXPLOITATION

A letter from the Attorney General, transmitting a draft of proposed legislation to amend section 709 of title 18, United States Code, so as to protect the name of the Federal Bureau of Investigation from commercial exploitation (with an accompanying paper); to the Committee on the Judiciary.

REPRESENTATIONAL ACTIVITIES OF FORMER FEDERAL EMPLOYEES

A letter from the Attorney General, transmitting a draft of proposed legislation to amend section 284 of title 18 of the United States Code relating to representational activities of former employees (with accompanying papers); to the Committee on the Judiciary.

REPORT ON BACKLOG OF PENDING APPLICATIONS AND HEARING CASES, FEDERAL COMMUNICATIONS COMMISSION

A letter from the Chairman, Federal Communications Commission, Washington, D. C., transmitting, pursuant to law, a report on backlog of pending applications and hearing cases in that Commission as of May 31, 1954 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

AUDIT REPORT ON PANAMA CANAL COMPANY AND CANAL ZONE GOVERNMENT

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Panama Canal Company and the Canal Zone Government, for the year ended June 30, 1953 (with an accompanying report); to the Committee on Government Operations.

PETITIONS

Petitions, etc., were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Southern Oregon Chapter, No. 134, National Association of Retired Civil Employees, at Medford, Oreg., relating to increased annuities of retired civil employees; to the Committee on Post Office and Civil Service.

Resolution adopted by the Black Hawk County CIO Industrial Union Council, Waterloo, Iowa, favoring the enactment of Senate bill 3553 and House bill 9430, relating to Federal unemployment-compensation standards; to the Committee on Finance.

IMPLEMENTATION OF UNIVERSAL COPYRIGHT CONVENTION

Mr. WILEY. Mr. President, I earnestly trust that this week Senate bill 2559, to implement the Universal Copyright Convention, will be reported favorably from the Senate Judiciary Committee.

The overwhelming ratification by the Senate of the convention itself has come as good news to the people of the United States and of foreign lands. It is essential that the enabling bill now be enacted to bring the convention into force.

I have received messages from a great variety of distinguished Americans and organizations urging enactment of the bill. I send to the desk a sample of the

many messages, as well as a favorable Milwaukee Journal editorial, which I have noted. These communications come from a variety of sources, including Mr. Phillips Temple, of Georgetown University Library; the director of the international editions of the Reader's Digest; the Christian Science Committee on Publication; the Protestant Church-Owned Publishers' Association; the New York Times; and the McGraw-Hill Book Co.

I ask unanimous consent that they be printed at this point in the body of the RECORD and thereafter be appropriately referred to the Senate Judiciary Committee.

There being no objection, the messages and editorial were referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

MUSIC PUBLISHERS' ASSOCIATION
OF THE UNITED STATES,
Boston, Mass., June 30, 1954.

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: We know that the members of our Music Publishers' Association, which includes nearly all the standard music publishers of America, will be delighted to learn that the Senate has now ratified the Universal Copyright Convention.

In view of the almost unanimous vote in favor of ratification, it would seem likely that despite the last month rush, the Senate will find time to give favorable action to the implementing bill (S. 2559). We certainly hope that the ratification will be given the necessary legislative support.

On behalf of the members of our association I should like to express to you our gratitude for your favorable consideration which has helped to bring about the ratification.

Cordially,

DONALD F. MALIN,
Secretary.

WASHINGTON, D. C., *July 1, 1954.*

Senator ALEXANDER WILEY,
Senate Office Building:

Gratified by Senate action on Universal Copyright Convention. Urge early action in Senate Judiciary Committee on Langer implementing bill. Appreciate your leadership on these important measures.

PHILLIPS TEMPLE,
Georgetown University Library
(For Catholic Library Association).

PLEASANTVILLE, N. Y., *July 1, 1954.*

Senator ALEXANDER WILEY,
Senate Office Building:

The speedy action which was taken by the Senate earlier this week in ratifying the Universal Copyright Convention makes me hope your committee will report favorably on S. 2559. At the April 8 hearings I testified on behalf of Reader's Digest in favor of the Universal Copyright Convention and implementing legislation. May I now reaffirm to you Reader's Digest's strong support of the convention and implementing legislation. This convention will significantly improve international copyright protection. Thereby it will aid all American publications with international circulations in their efforts to spread a better understanding abroad of American ideals and way of life. Your personal efforts on behalf of the convention and your vote in favor of S. 2559 will be a great aid to all American authors and publishers.

BARCLAY ACHESON,
Director of International Editions,
Reader's Digest.

CHRISTIAN SCIENCE COMMITTEE
ON PUBLICATION OF THE FIRST
CHURCH OF CHRIST, SCIENTIST,
IN BOSTON, MASS.,
Washington, D. C., June 30, 1954.

Hon. ALEXANDER WILEY,
Judiciary Committee,
United States Senate,
Washington, D. C.

MY DEAR SENATOR WILEY: We continue to strongly support the Universal Copyright Convention and the enabling legislation, S. 2559.

In view of the discussion which took place in the Senate yesterday we wish to reaffirm our position and again express our hope that S. 2559 will be reported out favorably by the committee in time for action to be taken by both the Senate and the House during the present session of Congress.

We shall be grateful for whatever help you can give in this matter.

Sincerely yours,

JAMES WATT,
Manager, Washington, D. C., Office.

PROTESTANT CHURCH-OWNED
PUBLISHERS' ASSOCIATION,
Philadelphia, Pa., July 1, 1954.

The Honorable ALEXANDER WILEY,
Senate Office Building,
Washington, D. C

DEAR SENATOR WILEY: On behalf of the members of this association I ask your support of the Langer bill, S. 2559, providing for a universal copyright convention.

Our industry feels that the adoption of a universal copyright convention is long overdue; that better international relations will be brought about by the passage of the measure and that certainly no disadvantage can accrue to any segment of the American people by such action.

Your past interest in this matter is much appreciated. If now you exert your leadership to pass this legislation, we believe only good should come of it.

Respectfully yours,

GORDON A. GRANT,
Executive Secretary.

THE NEW YORK TIMES,
New York, July 1, 1954.

Senator ALEXANDER WILEY,
United States Senate,
Washington, D. C.

DEAR SENATOR WILEY: As a member of the national committee for the universal copyright convention, I am taking the liberty of writing to you, urging you to take favorable action on the Langer bill (S. 2559), the purpose of which is to implement the universal copyright convention.

I am sure that you realize how important the convention and its implementation are to the welfare of American writers, publishers, and broadcasters.

Sincerely yours,

ELLIOTT M. SANGER.

NEW YORK, N. Y., *July 2, 1954.*

Senator ALEXANDER WILEY, *of Wisconsin,*
Senate Office Building,
Washington, D. C.:

Urge favorable action on Langer bill to implement universal copyright convention. Bill does not discriminate against American authors, publishers, and printing trades' workers and permits larger international exchange of advanced texts and treaties that are of great importance to American science and technology.

CURTIS G. BENJAMIN,
President, McGraw-Hill Book Co.

UNITED STATES LAGS IN COPYRIGHT TERMS

Surprisingly, the world's greatest nation has never set its international house in order in one presumably routine but important respect—reciprocal copyright protection. The administration is now urging Congress to tidy up.

Not approving its terms, the United States does not belong to the existing world copyright union, the so-called Berne Union of 1886. A complex network of treaties with individual countries only partially fills the gap in protecting the property rights of our writers, composers, and artists in their works wherever published.

American publishers must additionally protect themselves in Berne Union countries by a device most unflattering to this Nation. They put a book, for example, on sale in Canada, a union member, at the same time as in the States, and then claim protection for it elsewhere as a Canadian publication. This is a precarious reliance, for it is only by courtesy that the device is recognized, and the recognition could be withdrawn overnight.

A new universal copyright convention, primarily designed to meet United States objections, has finally been negotiated by 40 countries. President Eisenhower submitted it to the Senate for ratification last June, and it now resides in the Foreign Relations Committee, headed by Wisconsin's Senator WILEY.

The treaty naturally requires domestic laws to harmonize with its terms. Bills to accomplish this have been in both the Senate and House Judiciary Committees since last summer, and hearings have just been held this month on the Senate bill, before a subcommittee also headed by WILEY.

The treaty and implementing legislation have overwhelming support. Even the Book Manufacturers' Institute, which formerly feared a flood of foreign-made books, has come around. But the value of the measures must still be pressed over the opposition of one group—the AFL typographical unions.

Prior to the last two decades the United States was a larger book importer than exporter. Since 1891 it has denied copyright protection here to foreign books printed in English unless wholly manufactured here. Not only is this provision obsolete and a mere irritation, but also it obviously bars the way to complying with the treaty. The pending bills would remove it.

The printing trade unions profess to see a threat to the jobs of some of their members if books in English can be printed abroad and still get copyright protection here. It seems clear, however, that this could not conceivably involve more than half of 1 percent of our bookmaking industry, and a far tinier fraction of our total printing industry.

Actually, American efficiency makes it cheaper to print books here anyway, as most foreign publishers now do with Bibles and classics even though they are not subject to copyright. Also, it is impracticable to wait for additional print orders from abroad to meet American market demands.

The fast-growing American printing industry will speedily absorb any possible impact, imperceptible at most, from the treaty and the change in the law. And the United States, as a huge exporter of creative works, has everything to gain from putting its world copyright affairs in order.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BARRETT, from the Committee on Interior and Insular Affairs:

H. R. 4721. A bill to provide that the excess-land provisions of the Federal reclamation laws shall not apply to lands in the Owl Creek unit of the Missouri Basin project; without amendment (Rept. No. 1790).

By Mr. CORDON, from the Committee on Interior and Insular Affairs, without amendment:

H. R. 7466. A bill to authorize the Secretary of the Interior to execute an amendatory repayment contract with the Pine River Irrigation District, Colo., and for other purposes (Rept. No. 1796); and

H. R. 8027. A bill to amend the act of March 6, 1952 (66 Stat. 16), to extend the time during which the Secretary of the Interior may enter into mandatory repayment contracts under the Federal reclamation laws, and for other purposes (Rept. No. 1795).

By Mr. WATKINS, from the Committee on Interior and Insular Affairs:

H. R. 8026. A bill to provide for transfer of title to movable property to irrigation districts or water users' organizations under the Federal reclamation laws; without amendment (Rept. No. 1791).

By Mr. DWORSHAK, from the Committee on Interior and Insular Affairs:

H. R. 6786. A bill authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho; without amendment (Rept. No. 1797).

By Mr. MILLIKIN, from the Committee on Finance, without amendment:

H. R. 8983. A bill to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla. (Rept. No. 1792); and

H. R. 9709. A bill to extend and improve the unemployment-compensation program (Rept. No. 1794).

By Mr. BENNETT, from the Committee on Finance:

S. 3561. A bill authorizing the Administrator of Veterans' Affairs to convey certain property to the armory board, State of Utah; with an amendment (Rept. No. 1793).

VOLUNTARY PREPAYMENT METHOD IN PROVISION OF PERSONAL HEALTH SERVICES—REPORT OF A COMMITTEE

Mr. PURTELL. Mr. President, from the Committee on Labor and Public Welfare, I report favorably, with amendments, the bill (S. 3114) to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal-health services, and I submit a report (No. 1798) thereon.

This bill provides for the establishment of a Federal reinsurance service to encourage voluntary prepayment health-insurance plans to offer broader protection to more people. The establishment of such a reinsurance program was recommended by President Eisenhower in his special health message on January 18, 1954. This was one of several recommendations intended to foster improvement in the health facilities and services available to the American people. The Committee on Labor and Public Welfare previously has reported, and the Senate has approved, H. R. 8149, which broadens the Hospital Survey and Construction Act, and S. 2759, which expands and improves our rehabilitation services for the disabled, both of which were also recommended by the President.

In regard to the bill, S. 3114, which I am reporting today, I am advised that certain Committee members who desired to submit supplemental views have not completed their statements. Accordingly, I ask unanimous consent that permission be granted for submitting of such supplemental views not later than tomorrow, Tuesday, July 13, 1954, and that such views be printed as a part of the report.

The PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar, and, without objection, the supplemental views will be received and printed as requested by the Senator from Connecticut.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of New Jersey:

S. 3730. A bill for the relief of the Geo. D. Emery Co.; to the Committee on the Judiciary.

By Mr. IVES:

S. 3731. A bill to establish a Commission on Programs for the Aging; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. IVES when he introduced the above bill, which appear under a separate heading.)

By Mr. BUTLER (for himself and Mr. MAGNUSON) (by request):

S. 3732. A bill to amend the Merchant Ship Sales Act of 1946 in order to authorize the chartering for domestic trade under section 5 (e) of war-built passenger vessels; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. BUTLER when he introduced the above bill, which appear under a separate heading.)

By Mr. BYRD:

S. 3733. A bill for the relief of Miss Young Hi Yun; and

S. 3734. A bill for the relief of Tai Sung Chung; to the Committee on the Judiciary.

By Mr. MORSE:

S. 3735. A bill for the relief of Tomas Gumtang Subia; to the Committee on the Judiciary.

COMMISSION ON PROGRAMS FOR THE AGING

Mr. IVES. Mr. President, I introduce for appropriate reference a bill to establish a Commission on Programs for the Aging. The bill would authorize the establishment of a Commission to study and investigate the serious problems stemming from the increased proportion of aging persons in the Nation's population. Today a large segment of our population consists of individuals who have reached retirement age and who are in dire need of assistance to insure their continued physical and mental well-being. The mere increase in custodial facilities is not a final solution except for those of the aged who, by reason of physical and mental infirmity, require institutional care. The greater number of aging persons need programs which will assure their continued interest and participation in the life of the community in which they live.

The Commission, which would be established by this bill, would be required to submit to the President for transmittal to the Congress its findings and recommendations for legislative action based upon its study and investigation of the efforts now being made through various programs to resolve the problems of aging persons. The Commission would be required to submit its final report to the President not later than July 1, 1955.

Mr. President, I ask unanimous consent that the bill be printed in the body of the RECORD following these remarks.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, it will be printed in the RECORD, as requested by the Senator from New York.

The bill (S. 3731) to establish a Commission on Programs for the Aging, introduced by Mr. IVES, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc.—

DECLARATION OF FINDINGS

SECTION 1. The Congress hereby finds that one of the Nation's great domestic problems is that of its rapidly growing aging population. The increasing proportion of aging people in the population has overtaxed facilities and resources, adequate when created, but now outmoded. Because of arbitrary retirement ages in industry many able-bodied men and women are thrown suddenly upon their own financial and mental resources which too often prove to be insufficient for their needs in daily life. A large segment of the population consists of persons subject to rapid physical and mental deterioration, feelings of loneliness, uselessness, frustration, and detachment from community life. There is overcrowding of institutions, clinics, and general and mental hospitals. There is an ever-increasing number of persons seeking care in such facilities.

The Nation's aging are entitled not only to support and care in their declining years but to a well-rounded and satisfying life as members of their communities. The mere increase in custodial facilities is not a final solution, except for those of the aged who, by reason of chronic physical or mental infirmity, require institutional care. A more practical as well as a more constructive approach to the problems of the aging requires the creation and expansion of facilities for their care and supervision outside of institutions and, as far as possible, in a normal community environment designed to encourage their continued interest and participation in the life of the community. Such programs are required to replace outmoded custodial methods of caring for the elderly. Such programs would include provision for medical and nursing care in the home, foster family home facilities, and recreation centers, with institutional facilities reserved for those who are, or become, chronically ill. In view of the rapidly mounting costs of institutional care, such home care and recreational programs would also afford a means of providing more appropriate and more desirable care at lower cost.

There is need for a coordinated study of the problems of the aging to the end that these problems may be clearly defined and suitable programs developed.

COMMISSION ON PROGRAMS FOR THE AGING

SEC. 2. (a) There is hereby established a commission to be known as the Commission on Programs for the Aging, hereinafter referred to as the "Commission."

(b) The Commission shall be composed of 25 members, as follows:

(1) The Secretary of Health, Education, and Welfare, or his designee;

(2) Fourteen members appointed by the President of the United States, from among whom the President shall designate the Chairman and the Vice Chairman of the Commission: *Provided*, That not more than

eight of the members appointed by the President shall be members of the same political party;

(3) Five members appointed by the President of the Senate, three from the majority party, and two from the minority party; and

(4) Five members appointed by the Speaker of the House of Representatives, three from the majority party, and two from the minority party.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(d) Thirteen members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

(e) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of sections 281, 283, 284, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U. S. C. 99).

DUTIES OF THE COMMISSION

SEC. 3. (a) In view of the findings expressed in section 1 of this act the Commission shall study and investigate problems stemming from the increasing proportion of aging persons in the Nation's population, and remedial measures including but not restricted to care and services in the home, use of foster home facilities, recreation centers, and provision of institutional facilities for the chronically ill.

(b) The Commission, not later than July 1, 1955, shall submit to the President for transmittal to Congress its final report, including recommendations for legislative action; and the Commission may also from time to time make to the President such earlier reports as the President may request or as the Commission deems appropriate.

HEARINGS; OBTAINING INFORMATION

SEC. 4. (a) The Commission, or, on the authorization of the Commission, any subcommittee or member thereof, may, for the purpose of carrying out the provisions of this act, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as the Commission or such subcommittee or member may deem advisable. Subpenas may be issued under the signature of the Chairman of the Commission, of such subcommittee, or any duly designated member, and may be served by any persons designated by such Chairman or member. The provisions of sections 102 to 104, inclusive, of the Revised Statutes (U. S. C., title 2, secs. 192–194), shall apply in the case of any failure of any witness to comply with any subpena or to testify when summoned under authority of this section.

(b) The Commission is authorized to secure from any department, agency, or independent instrumentality of the executive branch of the Government any information it deems necessary to carry out its functions under this act; and each such department, agency, and instrumentality is authorized and directed to furnish such information to the Commission, upon request made by the Chairman or by the Vice Chairman when acting as Chairman.

APPROPRIATIONS, EXPENSES, AND PERSONNEL

SEC. 5. (a) There is hereby authorized to be appropriated for the use of the Commission such sums, not to exceed $250,000 as may be necessary to carry out the provisions of this act.

(b) Each member of the Commission shall receive $50 per diem when engaged in the performance of duties vested in the Commission such sums, not to exceed $250,000, as paid by the United States, by reason of service as a member, to any member who is receiving other compensation from the Federal Government, or to any member who is receiving compensation from any State or local government.

(c) Each member of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by him in the performance of duties vested in the Commission.

(d) The Commission may appoint and fix the compensation of such employees as it deems advisable without regard to the provisions of the civil-service laws and the Classification Act of 1949, as amended.

(e) The Commission may procure, without regard to the civil-service laws and the classification laws, temporary and intermittent services to the same extent as is authorized for the departments by section 15 of the act of August 2, 1946 (60 Stat. 810), but at rates not to exceed $50 per diem for individuals.

(f) Without regard to the civil-service and classification laws, the Commission may appoint and fix the compensation at not to exceed $15,000 per annum of a Director, who shall perform such duties as the Commission shall prescribe.

TERMINATION OF THE COMMISSION

SEC. 6. Six months after the transmittal to the Congress of the final report provided for in section 3 of this act, the Commission shall cease to exist.

CHARTER OF GOVERNMENT-OWNED PASSENGER VESSELS FOR DOMESTIC TRADE

Mr. BUTLER. Mr. President, at the request of representatives of the Hawaiian Steamship Co., on behalf of myself and the Senator from Washington [Mr. MAGNUSON], I introduce for appropriate reference a bill which would authorize the Secretary of Commerce to charter Government-owned passenger vessels for use in the domestic trade.

I ask unanimous consent that a statement by me, together with a memorandum submitted by the Hawaiian Steamship Co. be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement and memorandum will be printed in the RECORD.

The bill (S. 3732) to amend the Merchant Ship Sales Act of 1946 in order to authorize the chartering for domestic trade under section 5 (e) of war-built passenger vessels, introduced by Mr. BUTLER (for himself and Mr. MAGNUSON), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The statement by Mr. BUTLER is as follows:

STATEMENT BY SENATOR BUTLER

The Hawaiian Steamship Co. desires to charter the *La Guardia* for tourist-type passenger trade between San Francisco and Hawaii.

Representatives of the Hawaiian Steamship Co. have assured me that they already have obtained informal approval and clearance of this bill from all potentially interested parties and Government agencies.

On that basis, and in spite of the session's late hour, I have agreed to introduce the bill. Furthermore, in the assumption that the bill will be referred to our Water Transportation Subcommittee, I have scheduled a public hearing for Friday, July 16, in room G–16 at 10:30 a. m. All known interested parties and Government agencies will today be sent copies of the bill, my present remarks and invitations to attend and testify or to submit written statements for the record.

In addition to the usual public notice, the following are being sent individual invitations:

1. The Secretary of Commerce.
2. The Under Secretary of Commerce for Transportation.
3. The Maritime Administrator.
4. The Secretary of Defense.
5. The Secretary of the Navy.
6. The Comptroller General.
7. The Attorney General.
8. Directors, Bureau of the Budget.
9. The Shipbuilders Council of America.
10. Conference of American Maritime Unions.
11. CIO, Industrial Union of Marine and Shipbuilding Workers of America.
12. Metal Trades Department, American Federation of Labor.
13. Matson Navigation Co.
14. American President Lines.
15. American Merchant Marine Institute.
16. Committee of American Steamship Lines.
17. Pacific American Steamship Association.
18. Association of American Shipowners.
19. American Tramp Shipowners Association.

Perhaps those who testify on the bill would like to comment on it.

The memorandum referred to is as follows:

MEMORANDUM SUBMITTED BY HAWAIIAN STEAMSHIP CO.

The present bill would amend section 5 (e) (1), Merchant Ship Sales Act, 1946, as amended to make clear the authority of the Secretary of Commerce, after hearing and recommendation by the Federal Maritime Board, to charter passenger vessels on bareboat terms in the domestic trades.

As section 5 read, before it was amended by Public Law 591, 81st Congress, it clearly permitted such charters of passenger vessels in the foreign and domestic trades. Section 5 (a) reads:

"Any citizen of the United States * * * may make application to the Commission to charter a war-built dry-cargo vessel, under the jurisdiction and control of the Commission, for bareboat use."

The expression "war-built dry-cargo vessel" clearly included passenger vessels, since section 5 (b), which fixes the rate of charter hire for vessels that may be chartered under the act, had a special provision fixing the rate "in the case of vessels having passenger accommodations for not less than 80 passengers." Furthermore, the expression dry-cargo vessel as used in section 3 (d) of the act plainly included passenger vessels, because in providing for adjustments in the statutory sales price of vessels sold under the act, the section read:

"No adjustment, except in respect to passenger vessels constructed before January 1, 1941, shall be made under this act which will result in a statutory sales price which (1) in the case of dry-cargo vessels (except Liberty-type vessels) will be less than 35 percent of the domestic war cost of vessels of the same type, (2) in the case of any Liberty-type vessel will be less than 31½ percent of the domestic war cost of the vessels of such type, or (3) in the case of a tanker will be less than 50 percent of the domestic war cost of tankers of the same type."

The price of passenger vessels was thus to be calculated as for other dry-cargo vessels.

Section 5 (d) of the act indicated that vessels chartered under the section could

engage either in the foreign trade or in the domestic trade.

Thus until 1950, there was no doubt that passenger ships could have been chartered for the domestic trade as well as the foreign. The act of June 30, 1950 (Public Law 591, 81st Cong., 63 Stat. 308), provided for the further chartering of war-built dry-cargo vessels on or after June 30, 1950, for bareboat use in any service which in the opinion of the Federal Maritime Board is required for the public interest and is not adequately served, and for which privately owned American flag vessels are not available for charter by private operators on reasonable conditions and at reasonable rates for use in such service. However, by the same act, subsection (f) was added to section 5:

"(1) Notwithstanding the provisions of sections 11 and 14 of this act, as amended, the Secretary of Commerce may charter any passenger vessel, whether or not war-built, owned by the United States on or after June 30, 1950, pursuant to title VII of the Merchant Marine Act, as amended."

The chartering provisions of title VII of the Merchant Marine Act are limited to essential trade routes determined in accordance with section 211 of the act, and all of these are of course in foreign commerce.

It does not appear from the legislative history of section 5 (f) (1) that Congress deliberately intended to exclude the chartering of passenger vessels in domestic trade. The problem was simply not before the legislative committees. The Maritime Commission report shows that at the time four passenger vessels were being operated under the Ships Sales Act in the Trans-Pacific Service, and the *La Guardia* in the Mediterranean service. Four prewar-built vessels were being chartered under other authority (probably Public Law 101, 77th Cong.). Since the Commission had already decided that the good neighbor ships, *Argentina, Brazil* and *Uruguay*, should be advertised under title VII, the Commission believes that authority should be granted it to charter war-built passenger vessels as well as prewar-built vessels under the terms and conditions of title VII of the 1936 act. (House hearings on H. R. 491, 81st Cong., p. 7.)

The Acting Maritime Administrator in a memorandum dated June 1, 1950 (id., pp. 3 and 4), said:

"The Commission stated on March 15, 1950, that the only authority to charter cargo vessel ships necessary at this time is the very limited authority * * * to charter war-built cargo vessels to meet special needs in foreign and domestic trades which may continue to rise and to charter passenger vessels whether war built or not under title VII of the Merchant Marine Act, 1936. As to charter of passenger vessels (whether war built or not), the Commission believed that it was desirable to handle such operations under the 1936 act inasmuch as it is anticipated that further chartering would be predominantly to provide vessels pending arrangements for placing passenger vessels in permanent service."

The Senate report on the bill S. 3571 said (S. Rept. No. 1783, 81st Cong., p. 5):

"It was further developed that our merchant fleet is drastically short of passenger tonnage. In fact we are far below our prewar position in this important segment of the shipping industry. Four passenger ships are being chartered under the Ship Sales Act of 1946. Four others are being chartered under other authority of law. Although there are six new passenger ships under construction, the testimony indicated we should continue to charter passenger vessels even after the new ships are completed. The demand for passenger accommodations, particularly the large actual and potential demand from the middle-income group, is evidence of this conclusion. The bill (sec. 3) provides that any passenger vessel, war built or nonwar built, may be chartered pursuant to title VII, Merchant Marine Act, 1936, as amended. Title VII requires that the ships be chartered on competitive bids under restrictions which protect the interests of the Government."

The House report dated June 27, 1950, said (H. Rept. No. 2363, 81st Cong., pp. 6 and 7):

"The shortage of passenger vessels in our American-flag merchant marine as commercial adjuncts and suitable for use as military auxiliaries is such that it scarcely needs comment in addition to that stated in the section-by-section analysis of the bill. The United States is far below its prewar position in this important segment of the shipping industry, and, until this portion of our fleet can be substantially built up, it is evident that chartering should continue. Under section 3, it is provided that existing charters of passenger vessels may be continued until December 31, 1951, or until expiration thereof by the terms of their provisions. With respect to new charters, title VII of the Merchant Marine Act of 1936 provides the most suitable standards. Title VII requires that ships be chartered on competitive bids under restrictions which would both fully protect the interest of the Government and prevent competition of Government-owned vessels with privately owned vessels."

It is the general consensus of opinion that it was not intended to exclude domestic chartering of passenger vessels but that it merely appeared at the time that the problem was essentially one concerning the foreign trade.

It is possible to read the statute even as it stands as continuing to permit such charters under section 5 (e). So read, that section would allow domestic chartering after public hearing and would reserve chartering in the foreign trade for proceedings under title VII, including competitive bidding.

The Maritime Legal Office, however, does not feel that such a construction is justified and it has been felt desirable by all parties to seek legislative clarification.

The proposed amendment of section 5 of the Ship Sales Act would do not more than the suggested construction above. The original legislative plan would be restored, still leaving the provisions of the Merchant Marine Act to govern essential trade routes in foreign commerce, but permitting the Secretary of Commerce, after hearing the recommendation by the Federal Maritime Board, to arrange for bareboat charters in domestic commerce in accordance with the provisions of section 5 (e).

The immediate occasion for the amendment is a proposal by the Hawaiian Steamship Co. to charter the steamship *La Guardia* for service in a proposed run between San Francisco and Hawaii. The vessel has been in layup for almost 2 years. The charterers would convert the vessel from a dormitory-type to a superior tourist class with cabins for 2 and 3, such as are thought suitable for the trade. A substantial fixed hire would accrue to the Government as well as a much improved vessel at the end of the charter, which is estimated to run 3 years. The charterer would of course be obliged to qualify in all material respects and there has been no commitment by the Maritime Administrator that the particular application would be approved. A full public hearing would intervene before the Federal Maritime Board. All interested maritime organizations have been consulted and have indicated that they do not oppose the proposed amendment.

The conversion of the vessel will involve substantial expenditures in American shipyards, which are at present short of work.

The operation will involve the employment of more than 300 crew members, and is therefore valuable in that direction.

Finally, an important passenger unit will be added to the operating merchant marine, readily available for military use in the event of an emergency and maintained at a high level of current efficiency.

The legislation is needed for immediate use since it is not foreseeable that the project can be left open for an indefinite term of months pending the return of Congress in the next session.

PRINTING OF ADDITIONAL COPIES OF SENATE REPORT NO. 1627, RELATING TO ACCESSIBILITY OF STRATEGIC AND CRITICAL MATERIALS

Mr. MALONE submitted the following resolution (S. Res. 277), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Committee on Interior and Insular Affairs 3,000 additional copies of Senate Report No. 1627, 83d Congress, relative to accessibility of strategic and critical materials to the United States in time of war and for our expanding economy.

EXTENSION OF COVERAGE UNDER OLD-AGE AND SURVIVORS INSURANCE PROGRAM—AMENDMENTS

Mr. BENNETT submitted amendments, intended to be proposed by him to the bill (H. R. 9366) to amend the Social Security Act and the Internal Revenue Code so as to extend coverage under the old-age and survivors insurance program, increase the benefits payable thereunder, preserve the insurance rights of disabled individuals, and increase the amount of earnings permitted without loss of benefits, and for other purposes, which were referred to the Committee on Finance, and ordered to be printed.

AMENDMENT OF SUBVERSIVE ACTIVITIES CONTROL ACT OF 1950—ADDITIONAL COSPONSORS AND REPRINTING OF BILL

Mr. BUTLER. Mr. President, on July 6, I reported a bill from the Committee on the Judiciary, the Senate bill (S. 3706) to amend the Subversive Activities Control Act of 1950, to provide for the determination of the identity of certain Communist-infiltrated organizations, and for other purposes, and asked unanimous consent that the bill bear the names of certain other Senators, in addition to my own, as cosponsors.

The Senators whose names I desired to have included as cosponsors of the bill are the Senator from Nevada [Mr. McCARRAN], the Senator from Arizona [Mr. GOLDWATER], the Senator from Michigan [Mr. FERGUSON], and the Senator from Idaho [Mr. WELKER]. My unanimous consent request was granted, and it was ordered that the names of those Senators be added to the bill, as cosponsors, as I had requested.

I knew at the time that only one Senator may report a bill from committee, I did not ask that the names of additional Senators be added as having reported the bill. I asked that they be added, with my own name, as cosponsors of the bill. The way to do that, of course, is to show the bill as having been introduced by the various cosponsors,

and then reported from committee by me. I thought all that was comprehended in my unanimous consent request.

I was greatly surprised this morning to see that the bill had been printed without the names of the Senators, whose names the Senate had ordered added.

In order to carry out the intent of my original unanimous consent request and the Senate order which resulted, I now ask unanimous consent that the bill (S. 3706) be treated as though it had been introduced by me on July 6 on behalf of myself, the Senator from Nevada [Mr. McCARRAN], the Senator from Arizona [Mr. GOLDWATER], the Senator from Michigan [Mr. FERGUSON], and the Senator from Idaho [Mr. WELKER], and subsequently reported by me from the Committee on the Judiciary; and that the bill be reprinted accordingly, in a star print, bearing the names of these other Senators as well as my own name.

The PRESIDENT pro tempore. Without objection, it is so ordered.

HEARINGS ON INTERNATIONAL OPIUM TREATY

Mr. WILEY. Mr. President, on Saturday morning, July 17, there will be a brief hearing in the United States Courthouse Building, room 110, in New York, on the subject of international opium control through the protocol now pending before the Senate Foreign Relations Committee.

The hearing will be confined to the morning, in order to permit us to return to the Senate in the afternoon.

I send to the desk the text of a release describing the hearing. I ask unanimous consent that it be printed at this point in the body of the RECORD.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

SENATOR WILEY ANNOUNCES HEARING ON NARCOTICS PROTOCOL IN NEW YORK, JULY 17

A hearing on an international protocol to curb opium production will be held in New York City in the Federal Building on Saturday morning, July 17, by a three-man Senate Foreign Relations Subcommittee.

Senator ALEXANDER WILEY, Republican, of Wisconsin, chairman of the full Senate Foreign Relations Committee and of the subcommittee, stated, "This protocol is regarded as an important instrument to reduce the cultivation of the poppy plant and wholesale trade in and use of opium. The United States and 35 other nations have signed the protocol. It is the purpose of our subcommittee to consider the background of this and other efforts at international control of dope and to evaluate the specific provisions of this particular agreement."

In forwarding the protocol for Senate ratification, Secretary of State John Foster Dulles had pointed out that, "There is now no legal obligation under (existing) narcotic conventions to * * * limit production of opium. This represents a serious gap in the system of international control since the world's medical and scientific needs for opium could be supplied by approximately 500 tons a year, while present world production of opium is approximately 2,000 tons a year, a considerable part of the excess production of opium flowing into the illicit trade. The present protocol would close this gap with respect to opium."

Testimony on the preparation of the protocol will be submitted by the Honorable Harry J. Anslinger, Commissioner of the United States Narcotics Bureau and United States member on the United Nations Narcotics Commission, and by Assistant Secretary of State for United Nations Affairs, David McKey.

"I believe," continued Senator WILEY, "that in addition to the international aspects, it is important that the American people get further insight into the end results of the dope traffic. It is important that our people be further educated on what it will mean to us unless the traffic is cut off right at the foreign sources. In order to get a brief picture of the dope problem as it is encountered in the United States itself, I have invited certain well-qualified law enforcement officials to testify on this phase. Thus, we will hear short testimony from New York City's commissioner of police, F. H. Adams; from Chief Inspector Stephan P. Kennedy; and from Inspector Peter Terranova, in charge of the narcotics squad. It should be noted that it is in New York that the largest volume of illicit dope in the Nation is encountered, and the New York port is the principal entry point of illicit dope. We will also hear from the Honorable William Tompkins, United States attorney in New Jersey, who is the newly designated assistant attorney general in charge of internal security.

Mr. Rodney Gilbert, former editorial writer for the New York Herald Tribune, who had made a study of Chinese Communist opium production and distribution, will also testify.

The subcommittee's hearing will be confined to the morning hours between 9 a. m. and noon in order that the members, Senator HOMER FERGUSON, Republican, of Michigan; Senator MIKE MANSFIELD, Democrat, of Montana; and Chairman WILEY can return to Washington for work on the Senate floor that afternoon.

The Wisconsin Senator, who is incidentally a former member of the Kefauver Crime Committee, concluded, "Our Foreign Relations Committee is, of course, concerned basically with the international aspects, as such, of the dope traffic. I know, however, that my colleagues feel as I do, that as individual Members of the Senate we should leave no stone unturned in doing whatever we can by way of education and information to help reduce to an absolute minimum United States narcotics addiction. Thanks to the United States Narcotics Bureau, and to State and local officers, a great deal of progress has already been made. America can make still more progress if our people are further apprised of the facts in a sound, unsensational manner. Moreover, on the world scene, the conscience of all free peoples must be further aroused against Communist China's vicious dumping of dope into the world market in seeking to undermine the free nations."

ECHO PARK DAM—RESOLUTION AND EDITORIAL

Mr. WILEY. Mr. President, I was pleased to receive from Mr. Lyle H. Kingston, secretary of the Wisconsin Conservation Congress, an important resolution expressing opposition to the proposed Echo Park Dam. I have previously commented against proposed legislation for such a dam, which would dispoil the Dinosaur National Monument area.

I send to the desk the resolution which expresses the position of delegates from the 71 counties of Wisconsin interested in conservation affairs. I append to it the text of an editorial, which appeared in the Milwaukee Journal, along the same line. I ask unanimous consent that both these items be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the resolution and editorial were ordered to be printed in the RECORD, as follows:

Whereas the United States Department of the Interior has authorized a series of dams in the upper Colorado Basin to create large and extensive reservoirs of water for hydroelectric and irrigation purposes, and the United States Congress is presently considering this project in bill H. R. 4449; and

Whereas the location for one of these dams, known as Echo Park site, will back water into the Dinosaur National Monument in such a way as to destroy the scenic beauty and basic value of this national park; and

Whereas there are alternative available locations as adequate and economical which can be substituted for the Echo Park site, thereby preserving this valuable national resource for the inspiration of future generations and without upsetting the long-established precept of not permitting such destructive developments in any of the national parks: Now, therefore, be it

Resolved by the 19th Conservation Congress of Wisconsin in convention assembled at Madison this 7th day of June 1954, That the Conservation Congress urge its Representatives in Congress to oppose bill H. R. 4449 so long as the Echo Park dam site is included and to do everything in their power to amend this bill so as to prevent the unnecessary destruction of the Dinosaur National Monument which is a sacred heritage to all citizens of the United States.

RESOLUTIONS COMMITTEE,
LARRY WHIFFEN,
Chairman.

[From the Milwaukee Journal of July 3, 1954]

NO CASE HAS BEEN MADE FOR BUILDING ECHO PARK DAM NOW

The fight over the proposed Echo Park dam, that would flood the scenic canyons which are the chief attraction of 200,000-acre Dinosaur national monument, has reached a showdown on the floor of Congress. Advocates of the vast Federal power and irrigation development in the upper Colorado River Basin, of which Echo Park Dam would be a part, are confident.

The Secretary of the Interior, the President and now the House Interior Committee have all indicated approval of bill H. R. 4449 authorizing the Bureau of Reclamation to spend nearly a billion to get the development started, and to include Echo Park Dam as one of the first units.

Various organizations and interests from all over the country have raised their voices in opposition, or expressed serious doubts that the economics and engineering are sound. Still others insist that a dam at that particular site, to which so many persuasive objections have been raised, isn't essential to the whole project; that dam sites outside the monument would be as good or better.

Former Interior Secretary Chapman said that the Echo Park Dam was one that wasn't necessary. Interior Secretary McKay's own conservation advisory committee named Echo Park Dam as one that should be dropped from the project.

Gen. U. S. Grant III, with 42 years of big dam experience with the Corps of Engineers, strongly supported alternate sites so that magnificent scenic attractions in Dinosaur National Monument could be saved. The National Park Service said that unique natural wonders there would be irreparably impaired by the dam.

Conservationists and many others see Echo Park Dam not only as a threat to those wonders. They fear a foot in the door that

could set a precedent and imperil other national parks.

The case for the upper Colorado project as a whole has appeared to rest almost solely on desires of the thinly scattered population in the immediate area, people who stand to profit from expenditures which may ultimately reach 3 or 4 billions and who won't have to pay but a very tiny part of the cost. The data to support the project has been open to question and has been flatly challenged by men with reputations and data deserving respect.

The case for Echo Park Dam itself has been on still shakier ground. For the Interior Department argument for the dam there, rather than on alternate sites outside the monument, first rested on a prediction that the annual evaporation loss on the Echo Park flowage would be 165,000 acre-feet less. Then the Department red-faced, corrected the estimate to 70,000 acre-feet annually, and finally to 25,000 acre-feet annually. Other testimony, however, indicated one alternative plan would actually save up to 20,000 acre-feet of water annually.

There is certainly no urgent need for irrigation projects that step up agricultural production when farm surpluses are such a problem. Nor has it been shown that there is any urgent need for power from this source—there are others—that justifies haste.

More important, no solid, uncontrovertible justification has been offered for destroying outstanding natural wonders such as found in Dinosaur National Monument, wonders that belong to the people of the Nation as a whole and have been set aside for their perpetual enjoyment.

Those who are urging their Congressmen to vote against H. R. 4449 or similar legislation at this session can be confident they are on solid ground.

CONSTRUCTION OF CERTAIN NAVAL VESSELS

Mr. BUTLER. Mr. President, on June 9 the Senate passed, with amendments, the bill (H. R. 8571) to facilitate the construction of certain naval vessels. This bill, now pending in conference, conforms in every degree with the vital program of ship construction which I have advocated as strenuously as possible. As an illustration of the preparations which have been completed by the Department of the Navy to effectuate the construction of these vessels with an absolute minimum of delay, I ask unanimous consent to have included in the body of the RECORD a letter, dated June 4, 1954, from Rear Adm. W. D. Leggett, Jr., Chief, Bureau of Ships.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE NAVY,
BUREAU OF SHIPS,
Washington, D. C., June 4, 1954.

The Honorable JOHN M. BUTLER,
United States Senate,
Washington, D. C.

MY DEAR SENATOR BUTLER: In a telephone conversation of June 2, 1954, Mr. August J. Bourbon of your office, referred to the act under consideration by the Senate to authorize the Navy to construct mine warfare and patrol vessels (H. R. 8571, passed by the House on May 20, 1954) and requested an estimate of the time that would be required to start construction of these vessels should this bill be approved by the Congress.

As you know, funds must be appropriated by the Congress before this work can be undertaken. The Department of Defense appropriation bill for fiscal 1955 has already passed the House and action by the Senate is expected in the near future. In anticipation of the fiscal appropriation and the vessel authorization, preliminary preparations have been accomplished by the Bureau. A tentative request for apportionment of funds for construction of the mine and patrol craft has already been made. Contract plans and specifications have been prepared. Upon receipt of authority, the Bureau, with a minimum of delay, can negotiate and award the contracts. After award, the contractors can immediately increase their employment to take care of the preliminary planning and material ordering and the actual production work can be started soon thereafter.

Under the foregoing conditions, I believe that it would not be too optimistic to estimate that the mine warfare and escort vessels can be under construction by early fall.

With kindest regards,

Sincerely yours,

W. D. LEGGETT, Jr.,
Rear Admiral, U. S. N. Chief of Bureau.

AGRICULTURAL POLICY

Mr. JOHNSTON of South Carolina. Mr. President, I hold in my hand a copy of a statement made by President Eisenhower at Ottawa, Ill., on September 15, 1952. It reads:

Unless we return these economic responsibilities and activities to the people who have made our country, our citizens, we are going to become more and more dependent upon the will of a bureaucrat in Washington. We will become more and more dependent upon the regulations they issue as to wages, place of work, the kind of crops that the farmer will plant, when he will plant them, and how he will rotate them. If I know anything about the farmers of the United States—and, after all, I was one of them myself—it is that they prize above all else their independence of action.

In the Wall Street Journal of July 9, 1954, there appeared an article entitled "Farm Kibitzing." The subheads read: "Federal Advisers Will Offer Individual Farmer Master Plan for Living—They'll Cover Fertilizer Use, Pest Killing, Bookkeeping, Even Raising Children—One Aim: Curb Overplanting."

The article goes on to say:

Sometime this summer Mr. Benson will pass the word for hundreds of Agriculture Department agents to set out in scattered parts of the country, spreading the gospel of planned farming. Precise details haven't been worked out. But the outlines of the scheme—billed as a "dynamic new program"—are contained in a confidential document currently circulating in upper echelons of the Agriculture Department. Officials say the idea is this:

A Government man will call on farmers at their homes and offer to work out a carefully planned system of farming for the entire farm unit. The whole idea is voluntary; if farmers accept, they will start, with the help of the Government agent, to make a complete inventory of their resources—land, money, and manpower.

They will consider, too, all the off-farm influences, such as national-price programs, the economic outlook in the United States and abroad, export trends. Then they will make up a plan, setting goals not only for farm output, but also for "family satisfactions."

The plan will aim to include answers to questions like these: What crops to plant and in what quantity; what fertilizer to use; how to deal with farm pests; what repairs to make on farm buildings or machinery and how to raise the necessary money; how to keep books and pay taxes; how much profit a farmer should make to be able to afford to redecorate the front parlor or buy a television set or a new refrigerator.

Mr. President, I ask that this article be printed in the body of the RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FARM KIBITZING—FEDERAL ADVISERS WILL OFFER INDIVIDUAL FARMER MASTER PLAN FOR LIVING—THEY'LL COVER FERTILIZER USE, PEST KILLING, BOOKKEEPING, EVEN RAISING CHILDREN—ONE AIM: CURB OVERPLANTING

(By Lester Tanzer)

WASHINGTON.—Federal farm boss Benson has whipped up a new kind of Federal aid program for farmers. The key ingredient is not taxpayers' dollars but advice—on every subject from irrigation to raising children.

The Republican Secretary of Agriculture thinks mechanical contraptions, soil conservation, insecticides, Federal price supports and planting restrictions have overly complicated rural living. What the modern-day farmer needs, he figures, is a complete master plan, worked out down to the last detail for each farmer with the help of a Government agent dispatched to his doorstep.

SPREADING THE GOSPEL

Sometime this summer Mr. Benson will pass the word for hundreds of Agriculture Department agents to set out in scattered parts of the country, spreading the gospel of planned farming. Precise details haven't been worked out. But the outlines of the scheme—billed as a dynamic new program—are contained in a confidential document currently circulating in upper echelons of the Agriculture Department. Officials say the idea is this:

A Government man will call on farmers at their homes, and offer to work out a carefully planned system of farming for the entire farm unit. The whole idea is voluntary; if farmers accept, they'll start, with the help of the Government agent, to make a complete inventory of their resources—land, money, and manpower.

They'll consider, too, all the off-farm influences, such as national price support programs, the economic outlook in the United States and abroad, export trends. Then they'll make up a plan, setting goals not only for farm output but also for family satisfactions.

REDECORATING ANSWERS

The plan will aim to include answers to questions like these: What crops to plant and in what quantity; what fertilizer to use; how to deal with farm pests; what repairs to make on farm buildings or machinery and how to raise the necessary money; to keep books and pay taxes; how much profit a farmer should make to be able to afford to redecorate the front parlor or buy a television set or a new refrigerator.

The aim, according to the outline drawn up by Mr. Benson's aides, is a plan "through which the farm family can coordinate the use of various farm and home practices to achieve efficient production, high net income, the improvement of soil productivity, and better living condition for the entire farm family."

If this sounds like more Federal meddling in rural affairs, the aim is professed to be just the opposite. Mr. Benson's real objective is to hasten the day when farmers will be able to get along without so much Federal price-support aid and without stringent planting curbs. He favors a gradual trimming of price-support levels and increasingly tighter planting controls until record farm gluts have begun to shrink. Meantime, the idea is that if farmers do their planning with a Government expert looking over their

shoulder they'll be less likely to overplan crops already in abundance.

The basic aim, officials argue, requires broader planning than it implies. Thus an agent might advise a farmer to shift land from barley to tomatoes, if he wants to make enough money to buy the freezer his wife is pleading for. Raising tomatoes, the agent might add, might mean making Junior work on the farm in the summer instead of taking a job in town.

Going a bit further, some of the new agents will be women, who are expected to give tips on latest developments in child psychology. They'll also encourage participation in 4–H Club activities.

A MODEST START

The program will begin an a modest scale. To finance it for the fiscal year that started last week, Mr. Benson wrung an extra $8.3 million from Congress in appropriations for the Agricultural Extension Service, a farmer education program run jointly by the Federal Government and the State farm agencies. Working through the extension setup, Mr. Benson will use the extra money to hire 1,000 new county agents and about two dozen Washington policymakers to push the planned farming scheme.

With this task force, Mr. Benson guesses he'll reach only a fraction of the farming population. But if the plan is successful, he's prepared to ask Congress next year for more money to expand his efforts. Also, the 1,000 new agents will be busy indoctrinating the 12,500 county agents now on the Federal-State payroll so that they, too, can push farm planning.

The new agents will be divided up among the States. It will be up to each State to decide how they'll be used. Some States may decide to blanket a couple of pilot counties with enough agents to reach every farmer that's interested in farm planning. Others may decide to distribute a few farm plan salesmen in each county to work with a handful of farmers.

PAMPHLETS, RADIO, TV

Dispensing advice to farmers is not, of course, a new chore for the Agriculture Department. The Extension Service uses pamphlets, radio and television, and group meetings to bring to rural folk all kinds of information on farm matters, most of it gathered by Agriculture Department researchers and experts at land grant colleges throughout the country. This service is paid for partly by the Federal Government, partly by the States, and partly by counties.

The trouble with all this, as Mr. Benson sees it, is that it's too indirect and impersonal. He argues, too, that the present setup covers only special topics, without attempting to wrap up all the problems of running a farm into one neat package. That's the aim of the new program for "complete farm and home development," as it's referred to in the policy document now making the rounds of Agriculture Department offices.

The Department plans to go right on for a while "educating" farmers through mass media like radio and group discussions. But after a year of so, the idea is to shift toward ever-greater emphasis on the personal approach now about to begin.

FAMILY FARM THE TARGET

The Department's new program is designed primarily for family farms, those on which the family does the major share of work. Family farms make up the big majority of the 5.5 million farms in the country and turn out over 70 percent of all the agricultural goods sold. The outline of the new program notes:

"On a family farm, the farm business and the home are inseparable. Decisions made on the farm must consider both the effect on the farm operations and on the farm family. This is not true for most other types of business. It is for this reason that the farmer and his family must plan together."

Mr. Benson's aides are sure their scheme will work. It's been tried experimentally in a couple of States with success. A study made in Vermont, according to the Department, showed the income of a dozen farms with intensive Government planning aid was triple that of 12 farms that operated without "master plans."

Will farmers accept Mr. Benson's offer? The Department expects a heap of resistance from individual farmers. One farm expert claims the people who have usually gone in for Federal help in a big way are those who have been most amenable to Government suggestions. It's the more conservative rural citizens the Department hopes to reach with its new project.

Mr. Benson isn't inclined to force any scheme down farmers' throats. So his minions have orders to go about their business with some degree of subtlety. The Federal planners offer this advice to the agents: "Stress in all activities the relationship of what is being presented to the other decisions and activities relating to the individual farm and home situation, and the interdependence of each decision and action on all the others."

Mr. JOHNSTON of South Carolina. Mr. President, the foregoing news release stating how Secretary Benson intends to regiment the farmers of this Nation in my opinion clearly contradicts what President Eisenhower had to say at Ottawa, Ill., on September 15, 1952, when he warned against just the thing that Mr. Benson is doing at the present time. The question is "Does President Eisenhower know what his Secretary, Mr. Benson, is doing?"

CONCERT ON CAPITOL STEPS BY HIGH SCHOOL BAND OF BREAUX BRIDGE, LA.

Mr. LONG. Mr. President, I wish to record my gratification and pleasure upon the splendid performance on the steps and grounds of the Capitol earlier today by the excellent band from the high school at Breaux Bridge, La.

This band is a superb example of the widespread growth throughout the country of the instruction of our youth, through actual participation in musical organizations.

This band in particular has an outstanding record of achievement. For the past 4 years it has been rated superior in marching by the annual Louisiana State Music Festival, and for the past 3 years has been rated superior in concert playing and sight reading.

Although Breaux Bridge has a population of only approximately 2,500 people, the community support of this band is strikingly illustrated by the fact that $12,000 was raised through contributions to support the trip, which made it possible for the band to be here in Washington.

The primary purpose of the current trip was to respond to an invitation to appear and to perform in New York at the annual convention of Lions International. It was given the special distinction of being invited to open the convention program at Madison Square Garden on Wednesday, July 7.

Not only has the band, as an organization, received wide recognition and popular acclaim, but many of its individual members have received well-deserved recognition as soloists and instrumentalists. Each year for the past several years about 20 of its 67 members have received the rating of superior as soloists and for ensemble work at the annual Louisiana State Music Festival.

Especially in southwest Louisiana this organization contributes regularly to the success of many important public occasions. It plays regularly at the Shrimp, and Sugarcane, the Rice, the Dairy, and the Yambilee Festivals. Quite recently, also it was one of the outstanding organizations which participated in the Sesquirama in New Orleans, celebrating the 150th anniversary of the Louisiana Purchase.

Although this fine organization could not exist without the support and assistance of virtually the entire community, special credit is due to the principal of the Breaux Bridge High School, Mr. Leo Delahousaye, and Mr. Harry Greig, the director of the music department of the high school. Both of these fine gentlemen are accompanying the band on its present tour.

The personnel of the band and those accompanying it are as follows:

The band members are Betty Delhomme, Patricia Balch, Roberta Webre, Jeanelle Gauthier, Shirley Guidry, Beverly Hebert, Jean Nell Broussard, Rebecca Cormier, Joan Guidry, Jo Ann Ketelers, Elaine Pellerin, Patricia Patin, Barbara Broussard, Edward Domingue, Glenda Landry, Gloria Patin, Elizabeth Latiolais, Joy Conrad, Gaynell Guidry, Lydia Rose Guidry, Elaine Mason, Dolores Barnes, Tommy Balch, June Cormier, Mike Morrogh, Emily Hebert, Kerny Broussard, Dickie Hebert, Jeanette Pellerin, Larry Thibodeaux, James Domingue, Donna Melancon, Dorsy Brasseaux, Dalton Broussard, Roland Guidry, Vienna Mae Marks, Horace Guidry, Ray Pellerin, A. P. Dupuis, Dianna Melancon, Curtis Guidry, Betty Jo Young, Jo Jo Guidry, Yvonne Thibodeaux, Jerome Mouton, J. C. Tabor, Burnell Martin, Clifford Hebert, Jason Dupuis, Rufus Hebert, Clifford Mouton, Edwin Hebert, Patsy Green, Faye Guidry, Richard Broussard, Charlene Theriot, P. J. Hebert, Janice Nepveu, Erline Begnaud, Arthur Broussard, Rose Angelle, Irene Delhomme, Judy Thibodeaux, Joan LaRue Hebert, Rochelle Roberts, Dianne Domingue, Russel Peltier.

The chaperones are Mrs. Harry Greig; John Breaux; Earl Hollier; Mr. and Mrs. Frank Guidry; Mrs. Percy Broussard; Mrs. Claude Guidry; Mrs. Felix Pellerin; Mrs. Dalton Broussard, registered nurse.

Others in the group include Miss Julie Cormier, Mrs. B. D. Champagne, Marine Guidry, Mrs. Leo Delahoussaye, Miss Louise Castille, Miss Simone Castille, Mrs. Francis Broussard, Miss Linda Conrad, Hemby Morgan, Mrs. Odile B. Clause, Miss Mary K. Clause, Miss Carolyn Clause, Mrs. Whitney Hebert, Mrs. James Thevenet, Mrs. Chester Broussard, Mr. and Mrs. Sanders Delhomme, Jerry Delhomme, Leon Breaux, Miss Laure Lee Dauterive, Mr. and Mrs. Randall Bulliard, Miss Jacqueline Ann Tabor, Mrs. Roger Ketelers, Mrs. H. Guillory, Miss Marry Louise Hebert, Mrs. Percy Cormier, Ricky Cormier, Mrs. Frank Patin, Mr. and Mrs. Harris Pellerin and son Junior, Mrs. Maude D. Dupuis, Mrs. Claude J. Dauterive, all of Breaux Bridge, La.

Mr. and Mrs. J. J. Arceneaux, Opelousas, La.

Mrs. J. E. Narreau, Mrs. James Gauthier, Mrs. Willie Fournet, all of St. Martinville, La.

Miss Isabelle Guidry of New Iberia, La.

Miss Mary Ann Domingue and Miss Louise Sonnier, both of Scott, La.

Jimmy Benoit of Welsh, La.

Mr. and Mrs. Lionel Thibodeaux and Mrs. John Gorr, all of Lafayette, La.

Mr. and Mrs. Terrel Thibodeaux, Lake Charles, La.

Texas is also represented in the group by Mrs. Victor Bush, Miss Patsy Bush, and Robert Bush of Brownwood.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had agreed to the amendment of the Senate to each of the following bills of the House:

H. R. 5158. An act for the relief of Sgt. Welch Sanders; and

H. R. 5433. An act for the relief of the estates of Opal Perkins, and Kenneth Ross, deceased.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3378) to revise the Organic Act of the Virgin Islands of the United States.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ARENDS, Mr. SHAFER, Mr. JOHNSON of California, Mr. VAN ZANDT, Mr. VINSON, Mr. KILDAY, and Mr. RIVERS were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. ARENDS, Mr. SHAFER, Mr. JOHNSON of California, Mr. VAN ZANDT, Mr. VINSON, Mr. KILDAY, and Mr. RIVERS were appointed managers on the part of the House at the conference.

The message further announced the House had disagreed to the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. TOLLEFSON, Mr. ALLEN of California, Mr. RAY, Mr. BONNER, and Mr. SHELLEY were appointed managers on the part of the House at the conference.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the President pro tempore:

H. R. 733. An act for the relief of Hildegard H. Nelson;

H. R. 734. An act for the relief of Mihai Handrabura;

H. R. 944. An act for the relief of Mr. and Mrs. Zygmaunt Sowinski;

H. R. 1115. An act for the relief of Mrs. Suhula Adata;

H. R. 1762. An act for the relief of Sugako Nakai;

H. R. 2899. An act for the relief of Igor Shwabe;

H. R. 3333. An act for the relief of Julia N. Emmanuel;

H. R. 3624. An act for the relief of Peter M. Leaming;

H. R. 4496. An act to authorize and direct the conveyance of certain lands to the Board of Education of Prince Georges County, Upper Marlboro, Md., so as to permit the construction of public educational facilities urgently required as a result of increased defense and other essential Federal activities in the District of Columbia and its environs;

H. R. 6342. An act to amend the Public Buildings Act of 1949 to authorize the Administrator of General Services to acquire title to real property and to provide for the construction of certain public buildings thereon by executing purchase contracts; to extend the authority of the Postmaster General to lease quarters for postoffice purposes; and for other purposes;

H. R. 6422. An act to authorize the Secretary of the Army to convey to the Government's grantors certain lands erroneously conveyed by them to the United States;

H. R. 6650. An act for the relief of Joseph Gerny;

H. R. 6998. An act for the relief of Erna White;

H. R. 7125. An act to amend the Federal Food, Drug, and Cosmetic Act with respect to residues of pesticide chemicals in or on raw agricultural commodities;

H. R. 7132. An act to exempt from taxation certain property of the Veterans of Foreign Wars of the United States in the District of Columbia;

H. R. 7158. An act authorizing the United States Government to reconvey certain lands to S. J. Carver;

H. R. 7468. An act to amend certain provisions of part II of the Interstate Commerce Act so as to authorize regulation, for purposes of safety and protection of the public, of certain motor-carrier transportation between points in foreign countries, insofar as such transportation takes place within the United States;

H. R. 7500. An act for the relief of Kurt Forsell;

H. R. 7802. An act for the relief of Hanna Werner and her child, Hanna Elizabeth Werner;

H. R. 8247. An act to provide for the restoration and maintenance of the United States ship *Constitution* and to authorize the disposition of the United States ship *Constellation*, United States ship *Hartford*, United States ship *Olympia*, and United States ship *Oregon*, and for other purposes;

H. R. 8692. An act to permit the payment of certain trust accounts to the beneficiary on the death of the trustees by savings and loan, and similar associations in the District of Columbia;

H. R. 8973. An act to amend paragraph 31 of section 7 of the act entitled "An act making appropriations to provide for the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902, as amended;

H. R. 8974. An act to permit investment of funds of insurance companies organized within the District of Columbia in obligations of the International Bank for Reconstruction and Development;

H. R. 9143. An act to repeal the provisions of section 16 of the Federal Reserve Act which prohibits a Federal Reserve bank from paying out notes of another Federal Reserve bank;

H. R. 9561. An act to correct typographical errors in Public Law 368, 83d Congress; and

H. J. Res. 459. Joint resolution to designate the lake to be formed by the completion of the Texarkana Dam and Reservoir on Sulphur River, about 9 miles southwest from Texarkana, Tex., as Lake Texarkana.

DEVELOPMENT OF THE PRIEST RAPIDS SITE ON THE COLUMBIA RIVER, WASH.

The PRESIDING OFFICER (Mr. CRIPPA in the chair). If there be no further routine business, the Chair lays before the Senate the unfinished business, which will be stated by title.

The CHIEF CLERK. A bill (H. R. 7654) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

OUTSTANDING INVESTMENT OPPORTUNITY FOR THE UNITED STATES

Mr. WATKINS. Mr. President, the Congress recently has been asked to appropriate some $3½ billion to aid deserving friendly countries in various parts of the world.

Today, I would like to direct the attention of this body to a meritorious project in an area not embraced in this projected program of international aid to social and economic development. In my opinion, it is eminently deserving of support by the Government, and I hope that this body will act favorably upon it when the project comes before it in the near future.

The area involved is semi-arid, with many sections of it receiving less rainfall in a whole year than this eastern seaboard area receives in a couple of heavy storms. Agriculture is confined largely to irrigated farming, which provides 71 percent of the area's total agricultural income, and to livestock raising. The area is rich in natural resources, and many processing and fabricating industries have recently been established there to supplement the older extractive industries. Residents of the area are frugal and hard-working, and the local governments are eminently sound and financially solvent. An insular location, behind encircling mountains, gives the area a high degree of geographic security in the event of a major international disturbance.

The growth and development of this potentially rich area is limited by the availability of one great natural resource—water. It needs water not only for irrigation, but also for power, for municipal purposes, and for industrial use. This area already has invested heavily in water utilization facilities. Small reservoirs dot the watersheds accessible to communities and valley farmlands, and canals lace across valley floors, some of them tying into tunnels drilled through mountains.

However, the major source of water in this 110,000-square-mile area is a large river system, which flows through deeply eroded canyons some distance from population and agricultural centers. Residents of the area have a clear proprietary interest to half the water in that river—around 7,500,000 acre-feet annually. Yet at the present time, the area is able to put to use only about one-third of that assigned water supply, in spite of its heavy local investment in water utilization facilities.

To utilize additional water, the area is obliged to build some tremendous storage dams on the main stem of that river and supplement them with smaller reservoirs and diversion works on the high watersheds.

The project plan was conceived by some of the world's foremost water resource engineers, who have been engaged in engineering investigations in this area for a half century. These experts have studied more than 250 reservoir sites, and produced reports on all phases of an overall program to develop the water resources of the area. Probably no river system in the world has had such a thorough-going engineering study by internationally recognized experts.

Unlike some of our foreign neighbors, these people do not expect Uncle Sam to finance this development program and pick up the check. They are injecting a new, independent note in aid programs. They ask assistance only in the financing and have very adequate plans to repay Uncle Sam in full before the project facilities have been in use slightly more than half their estimated life.

This repayment program is made possible by utilizing the large water storage dams for the production not only of water for irrigation, but for hydropower. The power generated is required to meet population and industrial growth in the area, and, by its use, the people who will benefit from the water also will pay for both the water and the power. Furthermore, engineering estimates show that after the project is completely paid for, the facilities, which will remain in the ownership of the Federal Government, will be capable of producing a revenue of 15 to 20 million dollars a year for many years.

This land of which I speak—an area roughly the size of New York, Pennsylvania, and New Jersey combined—is not in some faroff place, subject to revolutionary strife or subversion by enemies of this country. It is here in the United States. The project described is—if you have not already guessed it—the upper Colorado River storage project.

In addition to these attractive financial aspects, I must point out that the project itself would produce billions of dollars in new property and wealth, most of which would be subject to Federal taxes. This project therefore, is a real investment in national development—one of the soundest that any of us will see during our terms in the Senate.

This project is currently under review in the Senate Committee on Interior and Insular Affairs. It also has been subjected to 2 weeks of hearings by the comparable committee in the House. Hence, when the measure comes before this body, it will have been subjected to the most intensive study and close congressional scrutiny.

However, the project is huge and complex, and some aspects of it have been clouded by misinformation and controversy. For that reason, I and other Senators from Upper Basin States plan to come before this body with several statements describing the project in nontechnical terms.

USE OF WATER FROM SANTA MARGARITA RIVER, CALIF.—CONFERENCE REPORT

Mr. SALTONSTALL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SALTONSTALL. What is the business now pending before the Senate?

The PRESIDING OFFICER. House bill 7664, to provide for the development of the Priest Rapids site.

Mr. SALTONSTALL. I understand there is now ready for action by the Senate a conference report, as to which all parties are in agreement. The majority leader with the approval of the minority leader, is desirous of having the report submitted and considered at this time. The distinguished junior Senator from California [Mr. KUCHEL] is in charge of the report.

Mr. KUCHEL. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5731) to authorize the Secretary of the Interior to construct, operate, and maintain certain facilities to provide water for irrigation and domestic use from the Santa Margarita River, California, and the joint utilization of a dam and reservoir and other waterwork facilities by the Department of the Interior and the Department of the Navy, and for other purposes.

I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. (Mr. CRIPPA in the chair). The report will be read for the information of the Senate.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5731) to authorize the Secretary of the Interior to construct, operate, and maintain certain facilities to provide water for irrigation and domestic use from the Santa Margarita River, California, and the joint utilization of a dam and reservoir and other waterwork facilities by the Department of the Interior and the Department of the Navy, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 1.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate amendment insert the following:

"That the Secretary of the Interior, acting pursuant to the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388), and Acts amendatory thereof or supplementary thereto, as far as those laws are not inconsistent with the provisions of this Act, is authorized to construct, operate, and maintain such dam and other facilities as may be required to make available for irrigation, municipal, domestic, military, and other uses the yield of the reservoir created by De Luz Dam to be located immediately below the confluence of De Luz Creek with Santa Margarita River on Camp Joseph H. Pendleton, San Diego, California, for the Fallbrook Public Utility District and such other users as herein provided. The authority of the Secretary to construct said facilities is contingent upon a determination by him that—

"(a) the Fallbrook Public Utility District shall have entered into a contract under subsection (d), section 9, of the Reclamation Project Act of 1939 undertaking to repay to the United States of America appropriate portions, as determined by the Secretary, of the actual costs of constructing, operating, and maintaining such dam and other facilities, together with interest as hereinafter provided; and under no circumstances shall the Department of the Navy be subject to any charges or costs except on the basis of its proportional use, if any, of such dam and other facilities, as determined pursuant to section 2 (b) of this Act;

"(b) the officer or agency of the State of California authorized by law to grant permits for the appropriation of water shall have granted such permits to the United States of America and shall have granted permits to the Fallbrook Public Utility District for rights to the use of water for storage and diversion as provided in this Act; including, as to the Fallbrook Public Utility District, approval of all requisite changes in points of diversion and storage, and purposes and places of use;

"(c) The Fallbrook Public Utility District shall have agreed that it will not assert against the United States of America any prior appropriative right it may have to water in excess of that quantity deliverable to it under the provisions of this Act, and will share in the use of the waters impounded by the De Luz Dam on the basis of equal priority and in accordance with the ratio prescribed in section 3 (a) of this Act; this agreement and waiver and the changes in points of diversion and storage, required by the preceding paragraph, shall become effective and binding only when the dam and other facilities herein provided for shall have been completed and put into operation: *Provided, however,* That the enactment of this legislation does not constitute a recognition of, or an admission that, the Fallbrook Public Utility District has any rights to the use of water in the Santa Margarita River, which rights, if any, exist only by virtue of the laws of the State of California; and

"(d) the De Luz Dam and other facilities herein authorized have economic and engineering feasibility.

"SEC. 2. (a) In the interest of comity between the United States of America and the State of California and consistent with the historic policy of the United States of America of Federal noninterference with State water law, the Secretary of the Navy shall promptly comply with the procedures for the acquisition of appropriative water rights required under the laws of the State of California as soon as he is satisfied, with the advice of the Attorney General of the United States, that such action will not adversely affect the rights of the United States of America under the laws of the State of California.

"(b) The Department of the Navy will not be subject to any charges or costs in connection with the De Luz Dam or its facilities, except upon completion and then shall be charged in reasonable proportion to its use of the facilities under regulations agreed upon by the Secretary of the Navy and Secretary of the Interior.

"SEC. (3) (a) The operation of the dam and other facilities herein provided shall be by the Secretary of the Interior, under regulations satisfactory to the Secretary of the Navy with respect to the Navy's share of the impounded water and National Security. In that operation, 60 per centum of the water impounded by De Luz Dam is hereby allotted to the Secretary of the Navy, 40 per centum of the water impounded by De Luz Dam is hereby allotted to the Fallbrook Public Utility District. The Department of the Navy and the Fallbrook Public Utility District will participate in the water impounded by De Luz Dam on the basis of equal priority and in accordance with the ratio prescribed in the preceding sentence: *Provided, however*, That at any time the Secretary of the Navy certifies that he does not have immediate need for any portion of the aforesaid 60 per centum of the water, the official agreed upon to administer the dam and facilities is empowered to enter into temporary contracts for the delivery of water subject, however, to the first right of the Secretary of the Navy to demand that water without charge and without obligation on the part of the United States of America upon 30 day's notice as set forth in any such contract with the approval of the Secretary of the Navy: *Provided, further*, That all moneys paid in to the United States of America under any such contract shall be covered into the general fund of the Treasury, and shall not be applied against the indebtedness of the Fallbrook Public Utility District to the United States of America. In making any such temporary contracts for water not immediately needed by the Navy, the first right thereto, if otherwise consistent with the laws of the State of California, shall be given the Fallbrook Public Utility District.

"(b) The general repayment obligation of the Fallbrook Public Utility District (which shall include interest on the unamortized balance of construction costs of the project allocated to municipal and domestic waters at a rate equal to the average rate, which rate shall be certified by the Secretary of the Treasury, on the long-term loans of the United States outstanding on the date of this Act) to be undertaken pursuant to section 1 of this Act shall be spread in annual installments, which need not be equal, over a period of not more than 56 years, exclusive of a development period, or as near thereto as is consistent with the operation of a formula, mutually agreeable to the parties, under which the payments are varied in the light of factors pertinent to the irrigators' ability to pay. The development period shall begin in the year in which water for use by the district is first available, as announced by the Secretary, and shall end in the year in which the conservation storage space in De Luz Reservoir first fills but shall, in no event, exceed 17 years. During the development period water shall be delivered to the district under annual water rental notices at rates fixed by the Secretary and payable in advance, and any moneys collected in excess of operation and maintenace costs shall be credited to repayment of the capital costs chargeable to the district and the repayment period fixed herein shall be reduced proportionately. The Secretary may transfer to the district the care, operation, and maintenance of the facilities constructed by him under conditions satisfactory to him and to the district and, with respect to such of the facilities as are located within the boundaries of Camp Pendleton, satisfactory also to the Secretary of the Navy.

"(c) For the purposes of this Act the basis, measure, and limit of all rights of the United States of America pertaining to the use of water shall be the laws of the State of California: *Provided*, That nothing in this Act shall be construed as a grant or a relinquishment by the United States of America of any of its rights to the use of water which it acquired according to the laws of the State of California either as a result of its acquisition of the lands comprising Camp Joseph H. Pendleton and adjoining naval installations, and the rights to the use of water as a part of said acquisition, or through actual use or prescription or both since the date of that acquisition, if any, or to create any legal obligation to store any water in De Luz Reservoir, to the use of which it has such rights, or to require the division under this Act of water to which it has such rights.

"(d) Unless otherwise agreed by the Secretary of the Navy, De Luz Dam as herein provided shall at all times be operated in a manner which will permit the free passage of all of the water to the use of which the United States of America is entitled according to the laws of the State of California either as a result of its acquisition of the lands comprising Camp Joseph H. Pendleton and adjoining naval installations, and the rights to the use of water as a part of said acquisitions, or through actual use or prescription or both since the date of that acquisition, if any, and will not be administered or operated in any way which will impair or deplete the quantities of water to the use of which the United States of America would be entitled under the laws of the State of California had that structure not been built.

"SEC. 4. After the construction of the De Luz Dam, the official operating the reservoir shall deliver water to the Fallbrook Public Utility District, pursuant to regulations issued by the Secretary of the Interior, as follows:

"(1) One thousand eight hundred acre-feet in any year until the reservoir attains an active content of sixty-three thousand acre-feet;

"(2) Not in excess of four thousand eight hundred acre-feet in any year after the reservoir attains an active content of sixty-three thousand acre-feet and until said reservoir attains an active content of ninety-eight thousand acre-feet; and

"(3) Not in excess of eight thousand acre-feet in any year after the reservoir attains an active content of ninety-eight thousand acre-feet and until the conservation storage space of the reservoir has been filled.

"SEC. 5. The Secretary of the Army through the Chief of Engineers, acting in accordance with section 7 of the Flood Control Act of 1944 (58 Stat. 887) is authorized to utilize for purposes of flood control such portion of the capacity of De Luz Reservoir as may be available therefor.

"SEC. 6. There are hereby authorized to be appropriated, out of any money in the Treasury of the United States not otherwise appropriated, $22,636,000, the current estimated construction cost of the Santa Margarita River project, plus or minus such amounts as may be indicated by the engineering cost indices for this type of construction, and, in addition thereto, such sums as may be required to operate and maintain the said project.

"SEC. 7. From time to time the Attorney General, the Secretary of the Interior, and the Secretary of the Navy shall report to the Congress concerning the conditions specified in section 1 of this Act, and the first report thereon shall be submitted to the Congress no later than one year from the date of enactment of this Act."

And the Senate agree to the same.

Amend the title so as to read: "An Act to authorize the Secretary of the Interior to construct facilities to provide water for irrigation, municipal, domestic, military, and other uses from the Santa Margarita River, California, and for other purposes."

EUGENE D. MILLIKIN,
ARTHUR V. WATKINS,
THOMAS H. KUCHEL,
JAMES E. MURRAY,
CLINTON P. ANDERSON,
Managers on the Part of the Senate.

A. L. MILLER,
WESLEY A. D'EWART,
JOHN P. SAYLOR,
CLAIR ENGLE,
WAYNE N. ASPINALL,
Managers on the Part of the House.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KUCHEL. Mr. President, I am delighted to be able to present to the Senate the conference report on H. R. 5731 which has been agreed to unanimously by the members of the conference from the Senate and the House of Representatives. Senators may recall that this is the bill which authorizes the erection and the building of a dam at De Luz on the Santa Margarita River in California, under specific conditions.

This will bring to a happy and agreeable conclusion the long-drawn out and, at times, unfortunately violent controversy, known in my State as the Fallbrook controversy.

As the conferees were able to resolve the differences between the two Houses, I am glad to say that the bill preserves inviolate all the rights which the Government of the United States may have with respect to water in the area. At the same time the bill preserves to the citizens of my State who live in that area such rights to water as they have. Of great importance is the fact that the provisions of the conference report make crystal clear that the laws of the State of California shall determine the question of rights to water and the use of water.

On that score, I am most happy to say that in all of the deliberations which the committee of conference held, my friend, the able and distinguished junior Senator from New Mexico [Mr. ANDERSON] and I were able to come into complete agreement with respect to all questions which were raised. Therefore, I can truly say that the report represents an honorable means of legislating upon and, at long last, resolving an extremely controversial subject. I urge that the Senate approve and confirm the conference report.

Mr. ANDERSON. Mr. President, will the Senator from California yield?

Mr. KUCHEL. I yield to the Senator from New Mexico.

Mr. ANDERSON. I appreciate the kind words of the Senator from California. In turn, I wish to congratulate him especially upon one fact, namely, that when we entered into the final conference, every time an effort was made which, I thought, would have jeopardized the rights of the United States, he stood for those things which, it seemed to me, were fair to all parties and essential in the bill.

We did not agree upon the general premise in the beginning, but I must say

that I believe the final solution of the bill is a good one. So I am happy to have participated with the Senator from California, and other Members of Congress, in reaching the solution which has been achieved.

This was a difficult matter to resolve. There are many of us who think we must be extremely careful never to jeopardize the water rights throughout the West, and we examine proposed legislation with a very careful look when it involves long-time water rights.

I must say that I started with the conviction that it would not be possible to harmonize the views of the departments of the Government and my own individual views with the views of the State of California, but I am happy to say that that result finally was achieved. I want the Senator from California [Mr. KUCHEL] to know that his attitude in the matter was appreciated.

This is a report which the Senate can accept, and which the people of the United States can be certain adequately protects the needs of the United States, while at the same time it assures some rights to the people who felt they had very substantial rights in the area, and who wanted their rights preserved.

Mr. KUCHEL. I sincerely thank the able Senator from New Mexico for his statement, and I am deeply appreciative of his personal comments.

The PRESIDING OFFICER (Mrs. BOWRING in the chair). The question is on agreeing to the conference report.

The report was agreed to.

REIMBURSEMENT OF POSTMASTERS OF DISCONTINUED POST OFFICES

Mr. SALTONSTALL. Madam President, I ask unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to the consideration of Calendar 1758, Senate bill 3028, for the reimbursement of postmasters of discontinued post offices.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 3028) to require the Postmaster General to reimburse postmasters of discontinued post offices for equipment owned by the postmaster.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Massachusetts?

There being no objection, the Senate proceeded to the consideration of the bill (S. 3028) to require the Postmaster General to reimburse postmasters of discontinued post offices for equipment owned by the postmaster.

COMMERCIALIZATION OF CERTAIN MILITARY BANDS

Mr. WILLIAMS. Madam President, several months ago there came to the attention of the Senator from New Mexico [Mr. ANDERSON] and myself a situation wherein it appeared that certain of our military bands were being commercialized.

We reported this situation along with the documents supporting the allegation to the Armed Services Committee of the United States Senate, and it was in turn forwarded to the Comptroller General.

UNITED STATES MARINE BAND

In checking the procedure followed by the United States Marine Band we found that the leader of the band had been given full authority to negotiate with an outside promoter a contract wherein that promoter would have jurisdiction and authority to negotiate and fix the charges for all appearances of the marine band on its annual 9-week tour.

Under this authority a contract was negotiated by Lieutenant Colonel Santelmann, leader of the band, with Mr. O. W. Trapp, 1507 M Street NW., Washington, D. C., and it provided that Mr. Trapp as the tour manager was to receive a management fee while the band was on tour of $875 per week plus travel expenses, and then upon completion of the tour Mr. Trapp was to receive one-half of the profit left after expenses had been paid.

Lieutenant Colonel Santelmann, under the same contract, as the leader of the band, was to receive $632 per week and travel expenses plus a portion of the other half of the profit of the trip. Under the terms of the contract the remaining one-half profit was to be divided between the leader of the band and the members.

In addition the other members of the band while on tour were paid as follows: 22 bandsmen at $87 per week, 12 bandsmen at $92 per week, 7 bandsmen at $97 per week, 5 bandsmen at $107 per week, 3 soloists at $127 per week, 1 soloist at $147 per week, 1 soloist at $182 per week.

All of these payments were made each week during the 9-week tour. Transportation of the band members while on tour, including the costs of transporting their persons and baggage from one location to another, was paid by the tour manager and deducted from the gross income of the tour; however, each band member paid out of the money allotted to him his own expenses for hotels, meals, and laundry.

All these salaries of the tour manager, the band leader, and the members of the band were paid from the income received on the tour, or from charges made to the various civic organizations before which they appeared.

In addition to these extra payments the members of the band, including the leader, continued during the actual tour to receive regular military pay and the usual allowances.

The contract as negotiated by the bandleader, Lieutenant Colonel Santelmann, and the tour manager, Mr. O. W. Trapp, provided that upon the conclusion of the tour the gross income be computed, the expenses of the tour, including the salaries referred to above, deducted, the resulting net profit distributed equally between Mr. Trapp and Lieutenant Colonel Santelmann. Lieutenant Colonel Santelmann took his proportionate share of this net profit and then distributed the balance as bonuses to each member of the band who accompanied him on the tour.

In 1951 Lieutenant Colonel Santelmann's share of this bonus was $1,018.45. Other members of the band participated in the bonus, as follows: 22 bandsmen at $140.25, 12 bandsmen at $148.30, 7 bandsmen at $156.40, 5 bandsmen at $172.50, 1 bandsman at $204.75, 1 bandsman at $237, 1 bandsman at $293.40.

In 1951 the payments received by Lieutenant Colonel Santelmann as band leader was for 9 weeks, at $632 per week, a total of $5,688, plus $1,018.45 representing his proportionate share of the profits, making a total of $6,706.45 for the 9 weeks. As mentioned before, during this same 9-week period he and the other members of the band received their regular military pay and allowances.

I do not have a breakdown for the 1952 earnings; however, it should be noted that the net profit was about 20 percent higher than in 1951.

During each of the years 1951 and 1952 Mr. Trapp received as management fees for the 9-week tour a salary of $7,875. In addition, his one-half of the net profits in 1951 was $8,577.25, and in 1952, $10,732.69, bringing his total earnings for the 2 years under this arrangement to $16,452.25 and $18,607.69, respectively.

All other general expenses, including office salaries, payroll taxes, publicity, booking costs, transportation, band salaries, and so forth, were all paid out of the gross income before the division of the net profits referred to above.

Thus we have the highly questionable situation where an officer of the United States Government has been given the instructions and the authority to negotiate a contract with an outside individual wherein under the terms of that contract his own salary and the salary of the other members of the service can be greatly enhanced. This practice, if carried to an extreme, could result in a complete breakdown of the contractural responsibility of the United States Government, and it represents a condition which should be corrected immediately.

To show the details of how this arrangement was inaugurated and how it operates, I ask unanimous consent to have incorporated in the RECORD at this point a report prepared by the Comptroller General of the United States.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

MARINE CORPS BAND

Information concerning the Marine Corps Band was obtained from Lt. Col. James C. Short, Office of the Commandant, United States Marine Corps, Room 2004, Navy Annex, Arlington, Va.

The Marine Corps Band is comprised of approximately 80 to 85 musicians, primarily enlisted men, with 2 or 3 officers. One of these officers is Lt. Col. William F. H. Santelmann, the leader of the band.

Lieutenant Colonel Short stated that the Marine Corps Band operates under the authority of title 34, United States Code, section 702, which reads: "A member of the said band shall not, as an individual, furnish music, or accept an engagement to furnish music, when such furnishing of music places him in competition with any civilian musician or musicians, and shall not accept or receive remuneration for furnishing music except, under special circumstances when authorized by the President (Aug. 29, 1916, ch. 417, 39 Stat. 612)."

Although Lieutenant Colonel Short felt that this section did not specifically state that they could accept remuneration for

tours and outside performances, he did feel that the legislative history indicated that the band could accept such remuneration. Lieutenant Colonel Short said that, in fact, this legislation was intended to remove a previously existing evil.

Lieutenant Colonel Short agreed that this was an exception to the general practice concerning service bands and, to his knowledge, no other bands could accept remuneration. He advised that each year a tour is arranged for the band. Also, all members of the band continue to receive pay and allowances during the actual tour even though the cost of the tours are at no expense to the United States and no appropriated funds are involved. All of the expenses are paid from the income received from the tour.

Lieutenant Colonel Short advised that at the present time a civilian tour director named Mr. O. W. Trapp, 1507 M Street NW., Washington, D. C., arranges the bookings 1 year in advance and has been booking the band since about 1949. The usual procedure in connection with a tour is the preparation of a letter requesting authority for the tour, outlining the various points at which the band will play. This letter is forwarded by the Secretary of the Navy to the President of the United States for his approval. When the approval is granted, which is invariable, a tour contract is negotiated between Mr. Trapp and Lieutenant Colonel Santelmann, acting as the band representative. In addition to Lieutenant Colonel Santelmann's approval, and prior to acceptance by the Marine Corps, this contract must be approved by the Commandant's Office and by the Office of the Judge Advocate General of the Navy. During the period of the tour, the band is under the control and command of Lieutenant Colonel Santelmann. Escape clauses are contained in the contract so that at any point within the course of the tour Lieutenant Colonel Santelmann could order the band back to Washington, D. C., and Mr. Trapp would have no recourse for breach of contract. Mr. Trapp is required to be bonded in a stated amount, usually $7,500, to cover the transportation of the personnel and their baggage back to Washington, D. C., in the event the tour is terminated.

After approval of the contract between Lieutenant Colonel Santelmann and Mr. Trapp, contracts are then negotiated between Mr. Trapp as tour director and supporters of various charitable and civic organizations. After arrangements have been agreed upon by Mr. Trapp and the other parties, the contracts are then submitted to Lieutenant Colonel Short and to the Commandant's Office of the Marine Corps for final acceptance. These contracts are also reviewed by the Office of Judge Advocate General of the Navy. The Commandant's Office gives the final decision for the actual itinerary of the band. In order that the majority of the areas of the United States might benefit from the band's performances, the Commandant's Office avoids returning to areas in which the band has played during the past several years. For this reason, it frequently happens that areas which have proved very beneficial to the band are not acceptable to the Commandant's Office.

Lieutenant Colonel Short stated that no sponsor could make any profit from the appearances of the band and that all profits, after the guarantee to the band has been paid, must be turned over to a charity or for some civic purpose. No individual sponsoring the band's performance can benefit from the tour. Lieutenant Colonel Short advised that the Marine Corps and the other armed services clear with each other prior to the initiation of a tour of the areas in which they propose to appear so that the activities of the band would be spread as far apart as geographically possible.

According to the contract entered into between Mr. Trapp and the band, he must pay to the band leader the sum of $5,320 per week. This amount is shown on their profit-and-loss statement as weekly salaries. For the years 1951 and 1952, this amount is broken down into certain payments allowed to each member of the band and is scheduled in the following manner: 22 bandsmen at $87 per week, 12 bandsmen at $92 per week, 7 bandsmen at $97 per week, 5 bandsmen at $107 per week, 3 soloists at $127 per week, 1 soloist at $147 per week, 1 soloist at $182 per week.

In addition, the band leader, Lieutenant Colonel Santelmann, is paid $632 per week. All these payments are made each week during the 9-week tour. Since the band operates at no expense to the United States insofar as travel money is concerned, each band member must pay his own expenses for hotels, meals, laundry, etc., out of the money allotted to him. The only reimbursement they receive other than this amount is the cost of transporting their persons and baggage from one location to another, which is paid for by the tour director and is deducted from the gross income of the tour. Federal and old-age tax deductions are made for each member of the band who accompanies the tour. Only 1 tour a year is made and approximately 48 to 50 men go on the tour.

For his performance in arranging the tour, accompanying the band, and other activities, Mr. Trapp received a weekly allotment of $875, under a controlling clause in the contract, which is shown on the profit and loss statement as a management fee. For each of the 9-week periods in 1951 and 1952, Mr. Trapp received a total amount of $7,875 as management fee. Upon conclusion of the tour, the gross income is computed, the expenses of the tour deducted and the resulting net profit is distributed equally between Mr. Trapp and the leader, Lieutenant Colonel Santelmann. After Lieutenant Colonel Santelmann deducts his proportionate share of the net profit, he distributes the balance, pro rata, to each of the band members who accompany him on the tour. The distribution of this bonus for the 1951 tour was as follows: 22 bandsmen at $140.25, 12 bandsmen at $148.30, 7 bandsmen at $156.40, 5 bandsmen at $172.50, 1 bandsman at $204.75, 1 bandsman at $237, 1 bandsman at $293.40. Lieutenant Colonel Santelmann's share was $1,018.45.

During the progress of the tour, no outside musicians are allowed to play in or with the band so that there is no complaint of local musicians. The only exception to this procedure, according to Lieutenant Colonel Short, is that occasionally Lieutenant Colonel Santelmann will, out of courtesy, allow a band leader living in the area where the band is playing to conduct the band. This is a matter of professional courtesy that usually extends to only one person during the program of the band and has never, to Lieutenant Colonel Short's knowledge, been objected to by the Musicians' Union.

No specific amount is requested from appropriations on an annual basis for the band. The budget of the band is prepared as a part of the Commandant's Office of the Marine Corps and an amount is inserted for equipage. This is the only reference made in the budget to the band. The pay and allowances of the personnel of the band are shown with the overall pay of enlisted personnel and do not appear on the budget allotment of the Commandant's Office or of the band. For the purpose of computing the cost of the band, it would be necessary to audit the salary, pay and allowances of each individual, which information is being prepared by Lieutenant Colonel Short for this office.

In addition to this band, the Marine Corps has nine other bands located in posts throughout the world. All of these bands perform on a divisional or post basis for military activities within the area to which they are assigned. They are comprised of full-time bandsmen with the exception of the band located at Pearl Harbor which performs its band activities on a collateral basis. The number of personnel engaged in all of these bands totals approximately 400 men.

Mr. WILLIAMS. Madam President, I now ask unanimous consent to have incorporated in the RECORD the profit and loss statement of the Marine Corps Band for the 1951 and 1952 tours.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Income and expenses of Marine Corps band tours, O. W. Trapp, tour manager, from profit and loss statements prepared by John A. Herl, certified public accountant, 507 M Street, NW., Washington, D. C.

	1951 tour	1952 tour
1. Gross income	$118,174.24	$119,622.63
2. Less expenses:		
General expense	892.56	1,106.11
Band salary	47,880.00	47,880.00
Band transportation	12,840.41	10,467.16
Baggage transportation	5,008.17	4,689.73
Booking costs	12,938.38	12,373.73
Publicity	10,124.85	10,174.92
Management fee	7,875.00	7,875.00
Insurance	182.32	212.76
Office salaries	3,190.00	3,437.50
Taxes, payroll	88.05	54.40
Total expenses	101,019.74	98,271.31
Gross income less expenses	17,154.50	21,351.32
Add refund 1951 taxes		114.06
Net profit	17,154.50	21,465.38
3. Distributive shares:		
O. W. Trapp, tour manager	8,577.25	10,732.69
Santelmann, band director	8,577.25	10,732.69

UNITED STATES NAVY BAND

Mr. WILLIAMS. Madam President, in reviewing the procedure followed by other service bands, we found that, with the exception of the United States Navy Band, the tours are arranged by officials connected with the service, and when charges are made they are strictly on an expense basis, with no profit resulting either to the service or to the members of the band.

The Navy Band, while not permitting the members of the band to receive any remuneration other than their regular military pay, does, however, contract with a civilian tour manager to make arrangements and to determine the charges for their annual tours.

The Navy negotiated their contract with Mr. G. B. Sandefer, 1092 National Press Building, Washington, D. C. The 1952 contract—the one which was examined—provided for a maximum profit of $20,000 which could be retained by Mr. Sandefer. In that year his net profit as the tour director was $19,994.37.

Under the terms of the contract, while receiving no extra pay, the members of the band received an expense allowance covering hotel, meals, laundry, and so forth, which were paid by Mr. Sandefer out of the gross receipts as collected from the various sponsors.

The net profit to Mr. Sandefer as the tour director over the past 5 years is as follows:

1948:	
Spring tour	$13,882.00
Fall tour	6,441.00
1949	16,874.00
1950	19,919.00
1951	18,659.00
1952	19,994.37

Under the terms of the same contract, while Mr. Sandefer accompanies the band on the tours he obtains, in addition, $25 per diem.

I ask unanimous consent to have incorporated in the RECORD a complete report on the United States Navy Band as compiled by the Comptroller General.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

UNITED STATES NAVY BAND

Information pertaining to the United States Navy Band was obtained from Capt. E. M. Brown, Bureau of Personnel, Department of the Navy.

The Navy Band is quartered at the Naval Gun Factory which is under the Potomac River Command, Washington, D. C. This band engages in spring and fall tours. In addition to this main band, there are divisional or unit bands; however, their activities are limited to playing for military affairs of each unit. When a tour is arranged, a civilian tour manager, Mr. G. B. Sandefer, 1092 National Press Building, Washington, D. C., enters into a contract with the Navy to arrange and manage the tour. Presidential authority is obtained for each tour. Pay and allowances of the members of this band continue under title 34, United States Code, section 596, which states "That hereafter during concert tours approved by the President members of the United States Navy Band shall suffer no loss of allowance." The trips are made at no cost to the Government as all expenses are paid by the concert manager. The members of the band allegedly obtain no money from these tours; however, for each day of the tour they submit an expense voucher indicating their costs of hotel, meals, laundry, and so forth, during the day. At regular periods, either weekly or biweekly, the men are reimbursed by the tour manager for these expenses. The submission of the vouchers is made to the tour manager and the canceled expense vouchers are not available through Captain Brown's office. Mr. Sandefer was on tour and will not return to Washington, D. C., until November 15, 1953, therefore, no vouchers could be obtained for review. There is no check on the amount that the bandsmen submit as having expended on the tours, but within reason, all such vouchers are paid. The use of the word "reason" by Captain Brown, is, of course, very flexible and could serve as a basis for granting large weekly salaries in proportion to the services rendered by the band members.

The members of the band do not receive Government subsistence during the trip, although their pay and allowances continue. According to Captain Brown, the failure of military personnel to successfully arrange and manage tours leads to the contractual arrangement with Mr. Sandefer. Mr. Sandefer has been acting as tour manager since 1948. Under the terms of the contract with Mr. Sandefer, an amount is established as a maximum profit which can be earned by him. Since 1948 there has been no overage beyond the amount stipulated in the contract as a maximum net proceeds to accrue to the contractor's income and consequently, no money has been turned over to the United States Treasury.

The band has 116 musicians of which approximately 50 tour with the band.

An audit was made by Mayer D. Weinstein, certified public accountant, at the conclusion of the 1952 tour, and the figures reported by him are set forth below:

Spring and fall tours, 1592—audit by Mayer Weinstein, certified public accountant, Washington, D. C.

Receipts	$109,517.51
Less expenses:	
Advertising	16,208.28
Hotel, food, laundry, etc	51,270.58
Auditing	723.63
Transportation	18,825.91
Per diem to tour director	1,900.00
Total	89,523.14
Net profit	19,994.37

The stated profit to the tour director from these tours over the past 5 years is as follows:

1948:	
Spring tour	$13,882.00
Fall tour	6,441.00
1949	16,874.00
1950	19,919.00
1951	18,659.00
1952	19,994.37

The contract entered into for the spring and fall tours of 1952, provided for a maximum profit of $20,000 which could be retained by Mr. Sandefer. After expenses had been deducted from the gross income, it will be noted that the net profit to the tour director was $19,994.37.

While Mr. Sandefer accompanies the band on tours, he obtains $25 per diem and that amount is represented by the figure of $1,900 set forth in the Weinstein audit. Contracts between Mr. Sandefer and the sponsors of each appearance of the band are approved by the Office of the Judge Advocate General, Department of the Navy, as shown by the attached copy of a blank contract.

Mr. WILLIAMS. Madam President, I see no objection to the principle that the communities and organizations requesting the attendance of these military bands should pay the expenses; however, surely in the personnel of each of these military organizations there are qualified men who can handle the necessary arrangements for these annual tours without the employment of an outside promoter.

The principle that an official of the United States Government be authorized to negotiate a contract with an outside promoter whereby charges can be fixed for the appearances of the band at a level which will reflect a substantial profit both to the official and to the outside promoter is unsound, to say the least.

I am glad to join the Senator from New Mexico [Mr. ANDERSON] in urging the Armed Services Committee of the United States Senate to consider the necessary steps which should be taken to put a stop to this questionable procedure.

Mr. ANDERSON. Madam President, I wish to say to the Senator from Delaware that I appreciate very much the zeal and the energy which he has devoted to this matter. I know that he made a very sincere and a very fine effort to stop what looked like a very questionable practice. At the same time, I wish to say that the able Senator from Massachusetts, the chairman of the Armed Services Committee, is also, in my opinion, entitled to credit because, as I understand and believe, he tried to follow the suggestions made by the Senator from Delaware and to work out a procedure which would stop the practice complained of.

I desire to explain that my interest in the matter began when certain persons came into Santa Fe, N. Mex., and made a contract for the appearance of one of the Government bands. They made that contract with the Boys Club of Santa Fe, which had a few hundred dollars in its treasury, and which was trying to obtain a few hundred dollars more, so it would have a decent budget. Instead of making money out of the concert, the actual result was that the appearance of the band drained the treasury of practically every dollar which was on hand. It took more than $600 away from the Boys Club at Santa Fe. That incident aroused my interest in what was going on.

I have been told there are other communities in the United States which had similar experiences. They had invited the bands to their communities, the bands had gone there, and instead of the organizations in the communities making a profit, their treasuries had been drained, in order to pay additional salaries to the members of the band, an additional salary to the director of the band, and a handsome profit to the contractor who arranged the tours.

I do not think official bands of the United States Government should be used to take away money which was to have been used for charitable purposes in particular communities throughout the country. I do not believe such tours should be used as a means of making additional money for the leaders of the bands. I do not believe that was one of the purposes for which the bands were established.

Because of these conditions, I desire to commend not only the work which the diligent and able Senator from Delaware did in digging up the facts, but also that of the chairman of the Armed Services Committee, who, when the facts were presented to him by me and by the Senator from Delaware, went to work to cause a change in the procedure so that such a thing could not be repeated.

I would not want to leave the impression that every community in which the bands played lost money by reason of the appearances of the bands. Some communities actually made money, and that is fine. But I believe there ought to have been a proper procedure devised so that as a result of the appearance of the bands in certain communities money which certain local organizations had previously collected by charitable drives could not be taken away from them and put into the pocket of a tour manager who happened to have brought the band to such communities. I think the present practice is bad. Therefore, I thank the able chairman of the Armed Services Committee for correcting what I think was an extremely bad practice.

I again wish to pay tribute to the Senator from Delaware for working on a matter of this nature in an attempt to straighten it out. I appreciate his efforts very much, indeed.

Mr. WILLIAMS. Madam President, I wish to join in what the Senator from New Mexico said with reference to the chairman of the Armed Services Committee, and to make it clear that I am not criticizing the committee; in fact, it should be said that largely we were able to gather the facts, as I am sure the Senator from New Mexico will agree, only with the cooperation of the committee.

Mr. ANDERSON. I do agree with the statement of the Senator from Delaware. The purpose was accomplished with the cooperation of the Senator from Massachusetts, the chairman of the Armed Services Committee.

Mr. WILLIAMS. Likewise, I do not wish the record to show any undue criticism of the bands. I have a high regard for both as I know the people of the country generally have. It is in order to maintain this high respect for the bands which exists in the minds of the American people that I think it is essential that we change the practice by which these bands can be unduly commercialized. There are men in both services who I am sure could handle the arrangements, and I am hoping that a change in procedure will be made. As one who worked on this problem, I certainly wish to emphasize the cooperation we have received from the chairman of the Armed Services Committee.

Mr. SALTONSTALL. Madam President, I appreciate the kind remarks of the Senator from New Mexico and the Senator from Delaware. I feel very sorry that this matter comes up at this time. I do not have my file before me, so what I say may be somewhat inaccurate, but I believe it will be in substance correct.

The Senator from New Mexico wrote me, as chairman of the Armed Services Committee, concerning the case in Santa Fe, N. Mex., where the Marine Band had appeared. On that occasion money was lost, and there was insistence that the contract be lived up to, which meant that the charitable organization concerned had to go around and dig up about six or eight hundred dollars.

I turned the matter over to the Preparedness Subcommittee, and I myself went into the case. The then Secretary of the Navy, Mr. Anderson, now the Deputy Secretary of Defense, came to see me regarding it. He, too, was surprised about the situation. I had two visits from General Shepherd, Commandant of the Marine Corps.

The methods by which the service bands make contracts are entirely different as between the four services. As I recall, the Air Force and the Army Bands make no contracts by which they make either profits or losses. As I recall, the Navy has a different arrangement, but no question arises concerning it. The only question arises in connection with the Marine Band. The Marine Band, which makes tours for educational or recruiting purposes or to be helpful to citizens of the country, has found that the best method is to operate by means of a travel agency or a contracting agency in Washington. That practice has been followed for a number of years. So far as has been called to my attention, the case in New Mexico is the only 1 in the past year or perhaps the last 2 years that involved any loss to the community. There may have been other cases of that sort, but it was the only one about which there was considerable discussion.

General Shepherd and Mr. Anderson, the then Secretary of the Navy, suggested a method by which they believe this situation can be prevented in the future. What they told me satisfied me at the time; it seemed to be a good arrangement, and one which would be satisfactory. I thought that the report which had been prepared had been furnished the Senator from New Mexico [Mr. ANDERSON]. If it has not been, it certainly should be and will be. I shall also see that a copy of it is sent to the Senator from Delaware [Mr. WILLIAMS].

To the best of my knowledge and belief, this situation was cleared up several months ago. Certainly it was one of the first matters I took up on my return to Washington in January.

The services are alert to the situation. The Secretary of the Navy was as surprised as I was that such a thing could happen. I hope and trust that henceforth such a procedure will be followed and the contracts so arranged as to prevent any complaint.

Mr. ANDERSON. Madam President, will the Senator from Massachusetts yield to me?

Mr. SALTONSTALL. I yield.

Mr. ANDERSON. I know the Senator from Massachusetts worked very diligently on the matter, as I have said. The item which was sent to me on April 30 stated that a solution was under way. But I am informed that the solution does not offer complete assurance that such an incident as the one which occurred in New Mexico will not occur again, though it is believed that it will minimize the possibility of such a development.

All I am saying is that I do not believe it is proper for a band operating under the Government of the United States to be used as a money-making device by having an agent go into a community and say to the people of the community, "Oh, you will have a wonderful crowd when the Marine Band"—or the "Army Band"—"plays here, and you will make a fortune for your Boys Club" or "your Boy Scouts," or whatever the organization might be; but thereafter, if a loss occurs, say, "I am very sorry you have had a loss, but nothing can be done about it." Furthermore, although the people of the community had been given to understand they would be provided with assistance in connection with the sale of tickets, promotion, and so forth, nothing of the sort was done.

So, Madam President, when a Government band is involved, I think there should be some control, so that a community will not experience a loss just because of poor salesmanship.

I hope this situation will not recur, but I wish to point out that this is not the only incident of the sort. I checked at every city where concerts were held, and I asked every community to tell me what its experience had been. This situation has developed in many places in the United States. Therefore, I think the arrangement is a bad one.

Mr. SALTONSTALL. Madam President, let me say to the Senator from New Mexico that I think this is the only case where a substantial loss occurred, and a complaint was made, although there may have been others.

Question arises as to how such tours are to be arranged. They must be arranged by a professional. It is my recollection that the contractor or travel agent does not receive his fee until it is known whether there was a loss or a profit; and if there was a loss, certain other conditions would prevail. I speak now from memory, after the passage of several months. However, at the time I was satisfied that the proposed method was a reasonable way to solve the problem.

Mr. ANDERSON. Madam President, my point is that I do not believe it is proper for members of the band to have additional compensation, over and above their regular Government salaries. I do not believe it is proper for the director to receive thousands of dollars a year for taking the band around the country, in addition to his regular Federal salary as leader of the band. I hope such a procedure will be effectively stopped. I believe it should be stopped.

Mr. SALTONSTALL. I questioned that, too, let me say to the Senator from New Mexico. But a number of factors enter into the situation. On the other hand, when the Senator from New Mexico speaks of "thousands of dollars," that is not correct.

Mr. ANDERSON. That is the testimony; and I think the Senator from Delaware will confirm its truth.

Mr. SALTONSTALL. I do not think the Senator from New Mexico will find that it runs into many thousands of dollars. I know it runs into several thousand dollars. But I would not have the Senator from New Mexico give the impression that the leader of the band is earning more than $15,000.

Mr. SALTONSTALL subsequently said: Madam President, in order to complete the record with regard to the Marine Band situation, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a letter which has just come to me, dated July 2, 1954, from the present Secretary of the Navy, Mr. C. S. Thomas, in which he refers to previous correspondence which I had with his predecessor, the present Deputy Secretary of Defense, with respect to certain tours by the Marine Band and the Navy Band. I read the letter for the information of the Senator from New Mexico [Mr. ANDERSON] and the Senator from Delaware [Mr. WILLIAMS]:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, July 2, 1954.

Hon. LEVERETT SALTONSTALL,
United States Senate,
Washington, D. C.

MY DEAR SENATOR SALTONSTALL: I am pleased to inform you that it has been decided to adopt your suggestion, as set forth in your letter of May 17, 1954, to the Honorable Robert B. Anderson, Deputy Secretary of Defense, with respect to concert tours by the Marine and Navy Bands.

Hereafter, within 60 days after the completion of the annual concert tour by each of these bands a report will be submitted to the Secretary of the Navy by the Commandant of the Marine Corps and the Chief of Navy Personnel, respectively. Complete financial details of the tours will be furnished in the form of a report by a certified public accountant, based upon an audit of the books and records of the concert tour manager. In the past, such a report by a certified public accountant has been submitted to the Commandant of the Marine Corps by the leader of the Marine Band and to the Navy Department by the civilian tour manager for concert tours by the Navy Band.

The reports to the Secretary of the Navy will show the amounts paid to the individual members of the bands for personal expenses and the amounts paid to members of the Marine Band over and above their expenses. They will also contain information with respect to the success or failure of each individual sponsor in meeting expenses, including the guaranty to the tour manager, the amount of money derived for charitable or civic purposes, and any special incidents which occur during the tour which reflect either favorably or unfavorably upon the appearances of the bands in the various communities during the concert tours.

I wish to again thank you for your interest in this matter and for your very helpful suggestions.

Sincerely yours,

C. S. THOMAS.

Mr. ANDERSON subsequently said: Madam President, at the conclusion of the remarks which I previously made, I should like to have inserted in the RECORD two letters. The first is from Mr. L. T. Konopak, president of the Santa Fe Boys Club. Mr. Konopak is a very able businessman. He spends only a part of his time in Santa Fe. He is a resident of the State of Ohio, and comes to Santa Fe from time to time. He is very much interested in the Boys' Club.

In a six-page letter he explains exactly how the Boys' Club got into these difficulties, and why he thinks the Government owes the club money. He submits a bill against the Treasury of the United States for $676.05 for services rendered to the Government of the United States. I ask unanimous consent to have his letter and a copy of his claim printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SANTA FE BOYS' CLUB,
Santa Fe, N. Mex., July 8, 1954.

The Honorable CLINTON P. ANDERSON,
Senate Office Building,
Washington, D. C.

DEAR SIR: On December 16, 1952, we wrote to you asking if you could arrange a settlement of a claim which we think that we have against the Government of the United States.

Prior thereto, we had been approached by Mr. George Quaal, as a representative of Mr. O. W. Trapp, tour manager of the United States Marine Band, about a concert by the band to be given in Santa Fe.

We were assured that if we would distribute in store windows the photographs and other advertising matter which would be furnished us, the concert would produce a profit of between one and two thousand dollars for us.

We agreed to do that and we did that, and we secured very good newspaper publicity, but in the preliminary discussion, we emphasized that we were interested only if we would not not be expected to beg for the United States Marine Band in the name of the Santa Fe Boys' Club.

The proposition was that the band would be doing something for us, and not that we were merely to guarantee a profit to Mr. Trapp and those he favored with a participation.

We did arrange for advance ticket sales, and the concert was given on a purely commercial basis. If we had begged Santa Feans to buy tickets for the benefit of Santa Fe Boys' Club, we may have collected enough money to cover Mr. Trapp's profit in addition to the expenses.

However, it seemed to us that to give money to the United States Marine Band for the benefit of a small group of promoters, which had been raised through the sale of tickets ostensibly for the benefit of the Boys' Club, would have violated the intent of the donors. Therefore, we refused to beg people to buy tickets, and we handled the sale on the basis of the band's public appeal.

The popularity of the band, with all the advertising that we gave it, failed to draw an audience of sufficient size to pay the expenses and the profit guaranteed for the tour manager and those favored by him. Therefore, we had to pay $676.05 to the band in addition to all of the net proceeds from the concert.

On December 24, 1952, you wrote us:

"I do, however, think it is pretty poor policy for the band to go running around the country causing a loss to the various communities where it performs. I intend to find out by what authority these Government bands tour the country. I intend to check that as quickly as I can."

On January 23, 1953, you wrote that you were getting a list of the 63 cities where the band played, and stated:

"I intend to circularize each community asking them how much they paid for the concert; what their other expenses were; and what their receipts were. Also what particular charity benefited if there was a profit.

"I have learned that Mr. Trapp has an agreement with the band by which he guarantees the expenses of the tour and that he personally gets a profit for a percentage of what he makes above the expenses."

What expenses does he guarantee? The men are paid and are given food and lodging by the United States Government, and it therefore appears that Mr. Trapp guarantees to pay only the transportation costs.

On July 11, 1953, you wrote:

"I turned the file over to Senator WILLIAMS and I have made a reinvestigation of it and we are turning it over to the Military Affairs Committee of the Senate in the hope that we can make a recovery for all the communities across the country that were hurt."

On September 30, 1953, we were advised that the Military Affairs Committee had a man working on the matter with the General Accounting Office and expected to make a report within the next 10 days.

On March 11, 1954, I received copies of two letters from Senator SALTONSTALL: One addressed to the Honorable Robert B. Anderson, Secretary of the Navy, suggesting a revision of the type of the contract under which the Marine Band operates to preclude a repetition of the practice which, in effect, guarantees Mr. Trapp his profit at the expense of charities sponsoring the concerts.

The other letter from Senator SALTONSTALL was addressed to you and refers to a legal opinion from the Department of Defense indicating that the arrangement under which the Marine Band operates in giving its concerts is legally sound.

We have no doubt as to that conclusion—and we know that we have no legal claim against Mr. Trapp—but, we still have not received payment of $676.05 for the services which we rendered in connection with that concert of the United States Marine Band—"the President's own band."

The facts still remain as they were. The Marine Band wanted to give a concert in Santa Fe. We believe that this was not sanctioned by Congress merely for the purpose of permitting Mr. Trapp to make a profit.

It was done with the thought, in our humble opinion, that the United States Government would reap some benefit, and certainly it was not the intent of Congress to obtain such benefit at the expense of charitable organizations in the United States.

We all know Robin Hood and his exploits in robbing the rich for the poor—but, whoever thought that the United States Government would be a party to legalize robbing charities to assure profits to an individual and his associates?

Unless it is admitted that the concert tours are purely for the purpose of creating gain for favored individuals, then it must be conceded that they are (1) to educate the American public in music, (2) to provide enjoyment for the American public, and (3) to advertise the Marine Corps and increase enlistment in the Marine Corps.

Those are commendable reasons for the tour, and we believe that all three benefits have been achieved by the public and the Government from that tour in 1952. That being so, is there any reason why the Government of the United States should not pay for them?

Those losses, like ours, should be paid for by the tour promoters. However, if the promoters are to be protected because the arrangement was legally sound, is there any reason why the Government of the United States should not pay in dollars for the value of the benefits which it has received?

The Government of the United States sent "the President's own band" on a tour to educate the American public in music, to provide enjoyment for its citizens and to increase the enlistment in the United States Marine Corps by displaying the perfection of its band and by inspiring every one with pride in the Corps. The concert was thrilling.

The Santa Fe Boys' Club rendered services in accomplishing those benefits for the Government of the United States, and while our services were worth considerably more, we are billing you only our out-of-pocket costs in the amount of $676.05.

May we be favored with a warrant of the Treasury of the United States in full settlement of our charges for services rendered to the Government?

Respectfully submitted.

THE SANTA FE BOYS' CLUB,
By L. T. KONOPAK, *President.*

SANTA FE BOYS' CLUB, SANTA FE, NEW MEX.

INVOICE NO. 245

DEPARTMENT OF DEFENSE,
United States Government,
Washington, D. C.:

Services rendered by members of the Santa Fe Boys' Club re concert by the United States Marine Band on October 5, 1952, in Seth Hall in Santa Fe: Imprinting posters; distributing and posting advertising matter; securing publicity on radio and in newspaper; renting and supplying hall; setting seats and arranging stage of hall; selling tickets; ushering; cleaning hall, and cash paid to tour manager, $676.05.

Mr. ANDERSON. Because there has been an implication that other communities did not suffer losses, I thought it would be proper to have in the RECORD a letter from Marion, Ind., Junior Association of Commerce, which booked the Marine Band for a concert. When the promoter went there to sell the community on this get-rich-quick scheme he told them that they ought to make about

$7,000 by bringing the Marine Band to Marion, Ind. He said that no other concert would be given anywhere near Marion, in northern Indiana.

The Association proceeded to advertise, and do extra work. Then it was learned that the promoter had made a contract for a concert at Fort Wayne, Ind., and that a good deal of the advertising done by the Marion Junior Association of Commerce was for the benefit of the Fort Wayne concert. The association called the promoter, and he came there and said, "I am still sure that you will make $7,000." The members of Junior Association of Commerce worked very hard. They sold about 3,000 tickets, when they expected to sell around 12,000. The association sustained a loss of $474.23.

Just before the performance members of the association tried to get the management to trim down the guarantee to the amount the association had been able to take in. The representatives of the promotor, who, as I understand, made nearly $20,000 from the tour, said, "We are going to have our pound of flesh. You give us the full $2,500 you guaranteed. We will not cut a nickel off the bill."

The letter to which I refer was written to me by Mr. Richard L. Dilts, president of the Junior Association of Commerce of Marion, Ind. I ask unanimous consent to have the letter printed in the RECORD at this point as a part of my remarks. If necessary I can supplement it with additional letters from other communities across the country which were sold a bill of goods by tour promoters. I think this is a very bad activity for the Government to be engaged in.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARION JUNIOR
ASSOCIATION OF COMMERCE,
Marion, Ind., February 10, 1953.

DEAR SENATOR: It is a pleasure to answer your inquiry and to relate our experience with the Marine Band.

We were first contacted by a Mr. George Quaal who came to Marion and presented a prospectus which he claimed was based on Marion's population of approximately 30,000 people.

1. Mr. Quaal stated Marion would have the only concert in northern Indiana, there to be only one other concert in the State and that to be in the south.

2. Mr. Quaal told us we would receive advance publicity pertaining to members of the band who lived near our community.

3. He recommended two performances, one a matinee, tickets selling for 60 cents for students, $1.25 for adults, and an evening performance, general admission to be $1.25 and reserved sections at $1.80.

4. Mr. Quaal told us only of organizations making profit on the project and forecast our profit to be $7,000.

5. O. W. Trapp to furnish billboard and display advertising.

On the basis of these statements and the prospectus we agreed to sponsor and signed the contract for a guaranty of $2,500.

We were greatly disappointed, not only with the results of this program but also in the way Mr. Quaal let us down.

1. At an expense to ourselves, we advertised in northern Indiana newspapers and by direct mail. We were greatly shocked when we learned that Fort Wayne, a much larger city, located 49 miles north of us, was sponsoring this concert on the day before our concert. As a result of this, we had to refund several mail-order tickets because we had advertised that Marion was to have the only performance in northern Indiana. In brief, Mr. Quaal did not keep his word on this point. We attempted to break the contract because of this breach of faith, and we received a letter from O. W. Trapp informing us that we had an airtight contract and he was going to hold us to it.

Mr. Quaal definitely had not kept his word regarding the contract.

We contacted our attorney, who advised us the contract was valid. Based on this, we agreed to fulfill our part of the program.

Mr. Quaal again returned to Marion and assured us that we would make our $7,000. He avoided telling us about the Fort Wayne concert. He listened to our reports which told of our advertising in the Fort Wayne area and of sending letters to schools in Fort Wayne. Never once did he tell us that Fort Wayne was to have this project, and we found it out through the Fort Wayne newspapers and over radio.

2. We received no information pertaining to members of the band living in the Marion area.

3. We followed Quaal's prospectus as near to the detail as we possibly could. Our entire membership was supplied with tickets and, in addition, there were tickets made available to schools and various downtown retail establishments in the business area.

4. Our results were a loss to our organization of $474.23 in cash, many hours of the time of our members, and a great loss of face to our local organization. We feel that this loss was due to the failure of Mr. Quaal and Mr. Trapp in fulfilling Mr. Quaal's statements.

We sold approximately 3,000 tickets to the concert; we had hoped to sell 12,000. This represented approximately $3,500 income and approximately $4,000 in expense, a net loss of $474.23. Just before the performance we informed Mr. Quaal that there would be a loss and requested an adjustment on the guaranty. Mr. Quaal demanded and received the full $2,500 guaranty.

In defense of the Marine Band, we would like to say this: The concert was well received by those who attended the performance and the band was excellent in its part of the program.

We are very anxious to learn what steps are taken concerning this matter and would appreciate any information.

Respectfully yours,

RICHARD L. DILTS,
President.

Mr. SALTONSTALL. To conclude the discussion I should like to say, as chairman of the Committee on Armed Services, that I believe there is much in what the two Senators have said. If the matter is not satisfactorily cleared up, I hope they will look into it further and make further suggestions to me, so that I may take it up again. I thought the matter had been cleared up. I know I spent a great deal of time on it.

AMENDMENT OF CIVIL SERVICE RETIREMENT ACT—RECOMMITTAL OF BILL

Mr. JOHNSTON of South Carolina. Madam President, I ask unanimous consent that Senate bill 1688, Calendar 681, a bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, be recommitted to the Committee on Post Office and Civil Service. The purpose of recommitting the bill to the committee is that it is necessary to amend it.

Mr. SALTONSTALL. Madam President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. SALTONSTALL. The Senator from South Carolina has informed me, as acting majority leader, that the Senator from Kansas [Mr. CARLSON] approves his request to recommit the bill to which he has referred to the Committee on Post Office and Civil Service. There is no objection to having that done at this time.

Mr. JOHNSTON of South Carolina. I should like to add that the chairman of the committee has discussed this subject with me. I am the author of the bill. We have already enacted into law a part of the bill, and it must be amended.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 1688) to amend the Civil Service Retirement Act of May 29, 1930, as amended.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Carolina to recommit the bill to the Committee on Post Office and Civil Service?

Mr. CARLSON. Reserving the right to object—and I assure the distinguished Senator that I shall not object—I concur in the statement just made by the Senator from South Carolina. I think it would be well to send the bill back to the committee in view of the fact that a part of the bill has already been enacted into law; also there are other phases of the question to be studied.

The PRESIDING OFFICER. Is there objection to the request of the Senator from South Carolina? The Chair hears none, and the bill is recommitted to the Committee on Post Office and Civil Service.

REIMBURSEMENT OF POSTMASTERS OF DISCONTINUED POST OFFICES

The Senate resumed the consideration of the bill (S. 3028) to require the Postmaster General to reimburse postmasters of discontinued post offices for equipment owned by the postmaster.

Mr. CARLSON. Madam President, the purpose of the bill which is now before the Senate is to require the Postmaster General, upon the discontinuance of any post office, to reimburse the postmaster of such discontinued post office, on a fair and equitable basis, for any of the fixtures or equipment in such office owned by the postmaster. At the present time there is no provision for reimbursing the postmaster of first-, second-, and third-class offices. Of course, postmasters of fourth-class post offices are paid an allowance for rent, fuel, light, and equipment, in an amount equal to 15 percent of the compensation earned in each quarter. I wish to offer an amendment which eliminates fourth-class offices from the bill, in view of the statutory provisions on the subject. I have discussed this question with the distinguished senior Senator from South Carolina [Mr. JOHNSTON], and I offer the amendment at this time.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, at the end of line 4, it is proposed to strike out the period, insert a comma, and the words "except a post office of the fourth-class."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kansas [Mr. CARLSON].

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That whenever a post office is discontinued, the Postmaster General shall reimburse the postmaster of such discontinued post office, on a fair and equitable basis, for any fixtures and equipment in use in such post office at the time of discontinuance, which were furnished by such postmaster out of personal funds and which were necessary to the efficient operation of such post office.

SEC. 2. That there is hereby authorized to be appropiated such amount each year as may be necessary to enable the Postmaster General to make reimbursement to postmasters of discontinued post offices under the provisions of this act, except a post office of the fourth class.

ADMINISTRATIVE WORKWEEK AND PAY PERIODS FOR EMPLOYEES IN THE POSTAL FIELD SERVICES

Mr. SALTONSTALL. Madam President, I ask unanimous consent that the Senate proceed to the consideration of Calendar 1757, Senate bill 190.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 190) to establish a basic administrative workweek and pay periods of two administrative workweeks for postmasters, officers, and employees in the postal field service, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts?

There being no objection, the Senate proceeded to consider the bill.

Mr. CARLSON. Madam President, the purpose of the bill is to establish a basic administrative workweek of 40 hours for all postmasters, officers, and employees in the postal field services whose compensation is on an annual basis; to provide that each pay period for such persons shall cover two administrative workweeks, and to establish a formula for converting the basic annual rate of compensation to basic biweekly, weekly, daily, and hourly rates.

The bill was introduced by the distinguished Senator from South Carolina [Mr. JOHNSTON], and it was reported unanimously by the committee.

Mr. GORE. Madam President, will the Senator yield?

Mr. CARLSON. The Senator from South Carolina is on the floor at the present time. We discussed the bill previously. There can be no question that when we write postal pay legislation at this session this provision or a somewhat similar provision will be written into the law.

The PRESIDING OFFICER (Mrs. BOWRING in the chair). The bill is open to amendment.

Mr. GORE. Madam President, will the Senator yield?

Mr. CARLSON. I am happy to yield.

Mr. GORE. Does the bill mean that if postmasters work in excess of 40 hours a week they will receive additional compensation?

Mr. CARLSON. I would say to the distinguished Senator from Tennessee that that was not the understanding we had in committee. The author of the bill is on the floor.

Mr. JOHNSTON of South Carolina. It is my understanding that the bill will not affect the present law with regard to postmasters.

Mr. GORE. What is the meaning of the bill?

Mr. JOHNSTON of South Carolina. The meaning of the bill is to have postmasters, officers, and employees, like other Federal employees, receive their pay every 2 weeks instead of on a semimonthly basis.

Mr. GORE. What about postmasters?

Mr. JOHNSTON of South Carolina. They will be paid every 2 weeks.

Mr. GORE. On page 2, in section 7 (b), the bill provides:

(b) Where the compensation of any postmaster, officer, or employee is on an annual basis, such compensation shall be regarded as payment for employment during 52 basic administrative workweeks of 40 hours. Each pay period shall cover 2 administrative workweeks.

Does that mean that if a postmaster works for more than 40 hours, he will receive additional pay?

Mr. JOHNSTON of South Carolina. It is my understanding that that provision will not affect postmasters so far as overtime pay is concerned. Postmasters do not receive such overtime pay now. As undoubtedly the Senator from Tennessee knows, a postmaster is paid according to the amount of income in his particular postoffice. The law will be continued in that respect. There will be no additional pay for overtime for postmasters.

I should like to state also that the Comptroller General recommends the bill and that the Post Office Department favors it.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 7 of the act entitled "An act to reclassify the salaries of postmasters, officers, and employees of the Postal Service; to establish uniform procedures for computing compensation; and for other purposes," approved July 6, 1945 (Public Law 134, 79th Cong.), as amended, is amended to read as follows:

"BASIC ADMINISTRATIVE WORKWEEK AND METHOD OF PAYMENT

"SEC. 7. (a) The Postmaster General shall establish, as of the effective date of this amendatory section, for all postmasters, officers, and employees in the postal field service whose compensation is on an annual basis a basic administrative workweek of 40 hours.

"(b) Where the compensation of any postmaster, officer, or employee is on an annual basis, such compensation shall be regarded as payment for employment during 52 basic administrative workweeks of 40 hours. Each pay period shall cover 2 administrative workweeks.

"(c) Whenever for pay computation purposes it is necessary to convert a basic annual rate to a basic biweekly, weekly, daily, or hourly rate, the following rules shall govern:

"(1) An annual rate shall be divided by 52 or 26, as the case may be, to derive a weekly or biweekly rate.

"(2) A weekly or biweekly rate shall be divided by 40 or 80, as the case may be, to derive an hourly rate.

"(3) A daily rate shall be derived by multiplying an hourly rate by the number of daily hours of service required.

"(d) All rates shall be computed to the nearest cent, counting one-half cent and over as a whole cent."

SEC. 2. The amendment made by this act shall take effect on the first day of the second calendar month following the calendar month in which it is enacted.

PUBLIC INSPECTION OF OPEN ARREST BOOKS KEPT BY THE METROPOLITAN WASHINGTON POLICE

Mr. SALTONSTALL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar 1782, Senate bill 3655.

The PRESIDING OFFICER (Mr. BARRETT in the chair). The Secretary will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 3655) providing that the Metropolitan Police Force shall keep arrest books which are open to public inspection.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. JOHNSTON of South Carolina. Mr. President, I should like to make it clear that I asked that the bill be objected to on the call of the calendar when it was first called up. Since then I have discussed the bill with some persons downtown, particularly with the chief of police. He has no objection to the bill. The bill does not change the present act. It provides that the records shall be kept open. For that reason I am not objecting to its consideration at this time.

As I understand, the bill does not affect juvenile court records. I have been so informed. Am I correct in my understanding?

Mr. CASE. Mr. President, in response to the question which the distinguished Senator from South Carolina has raised, I may say that the proposed legislation does not open the juvenile court records as such. However, if a juvenile is arrested and charged with a crime and that fact appears on the books of the police department, that record would be open to public inspection, as it is now. The bill would not change the law in that respect.

Mr. JOHNSTON of South Carolina. It does not change the law one iota, as I understand.

Mr. CASE. Not in that respect. The reason for the bill is that Corporation

Council West wrote an opinion recently in which he held that the arrest book as of today is not open to public inspection as a matter of law, but only through the discretion of the chief of police. The present chief of police, Mr. Murray, testified before the subcommittee on the pending bill. I may say that the distinguished junior Senator from Wyoming [Mr. CRIPPA] conducted the hearing, during his brief service on our committee, and I may say that he conducted a very fine hearing. He developed in the testimony the following statement from the chief of police:

Mr. Chairman, I am familiar with the provisions of the proposed bill, and I very much favor the bill.

Under the present setup I do not want the discretion, nor the responsibility of saying which arrests shall be made public and which shall be confidential.

I feel that our present system, where we have an arrest book, the names are entered on that, it is open to inspection of the public, is a very good one, and I feel that it should be that way.

I don't think that myself, or any other chief of police, should have the authority and discretion to say that some arrests should be public records and some should be confidential. I don't want that discretion.

The subcommittee reported the bill favorably, and the full Committee on the District of Columbia reported the bill favorably.

The principal testimony on behalf of the bill was given by Mr. J. R. Wiggins, managing editor of the Washington Post and Times Herald. He appeared before the subcommittee not merely in his capacity as a newspaper publisher and an individual citizen of the District of Columbia, but also as the chairman of the Freedom of Information Committee of the American Society of Newspaper Editors. His statement is well worth reading, and it is available at the office of the committee to anyone who is interested in reading his statement in detail.

Mr. President, in conclusion, I wish to say that the occasion of the bill was not the fact that in practice these books have not been open, because they have been open, but the corporation counsel held that they were open merely as a matter of discretion on the part of the chief of police. The bill will keep them open as a matter of law.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed as follows:

Be it enacted, etc., That section 386 of the Revised Statutes, relating to the District of Columbia, as amended (D. C. Code, sec. 4–134), is amended by striking out the word "and" at the end of paragraph (3); by renumbering paragraph (4) as paragraph (5), and by inserting between paragraphs (4) and (5) the following new paragraph:

"(4) Arrest books, which shall contain the following information:

"(a) Case number, date of arrest, and time of recording arrest in arrest book;

"(b) Name, address, date of birth, color, birthplace, occupation, and marital status of person arrested;

"(c) Offense with which person arrested was charged and place where person was arrested;

"(d) Name and address of complainant;

"(e) Name of arresting officer; and

"(f) Disposition of case; and."

SEC. 2. Section 389 of the Revised Statutes, relating to the District of Columbia, as amended (D. C. Code, sec. 4–135), is amended to read as follows:

"SEC. 389. The records to be kept by paragraphs (1), (2), (3), and (4) of section 386 shall be open to public inspection when not in actual use, and this requirement shall be enforceable by mandatory injunction issued by the United States District Court for the District of Columbia on the application of any person."

EXECUTIVE SESSION

Mr KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. WILEY, from the Committee on Foreign Relations:

Clement D. Johnston, of Virginia, to be a member of the Public Advisory Board, Foreign Operations Administration;

Mrs. Helen Chapman, of Illinois, to be a member of the Public Advisory Board, Foreign Operations Administration;

Harold C. McClellan, of California, to be a member of the Public Advisory Board, Foreign Operations Administration; and

Mrs. Percy Maxim Lee, of Connecticut, to be a member of the Public Advisory Board, Foreign Operations Administration.

By Mr. MILLIKIN, from the Committee on Finance:

Merrill D. White, of Florida, to be collector of customs for customs collection district No. 18, with headquarters at Tampa, Fla.

By Mr. HICKENLOOPER, from the members on the part of the Senate of the Joint Committee on Atomic Energy:

Herbert Bernard Loper, of Nebraska, to be chairman of the Military Liaison Committee to the Atomic Energy Commission, vice Robert LeBaron, resigned.

The PRESIDING OFFICER. If there be no further reports of committees, the clerk will state the nomination on the Executive Calendar.

POSTMASTER

The Chief Clerk read the nomination of William P. Gray to be postmaster at Pleasant Hill, Mo.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

Without objection, the legislative session will be resumed.

LEGISLATIVE SESSION—RECESS TO 2:45 P. M. TODAY

The Senate resumed the consideration of legislative business.

Mr. KNOWLAND. Mr. President, I move that the Senate stand in recess until 2:45 o'clock p. m., this day.

The motion was agreed to and (at 1 o'clock and 47 minutes p. m.) the Senate took a recess until 2:45 o'clock p. m. the same day.

On the expiration of the recess, the Senate reassembled and was called to order by the Presiding Officer (Mr. SCHOEPPEL in the chair).

DEVELOPMENT OF THE PRIEST RAPIDS SITE ON THE COLUMBIA RIVER

The Senate resumed the consideration of the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GOLDWATER in the chair). Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KNOWLAND. Is my understanding correct that beginning at 3 o'clock the Senate will be operating under a unanimous-consent agreement relative to the unfinished business, H. R. 7664?

The PRESIDING OFFICER. That is correct.

Mr. CORDON. Mr. President, I call up my motion to reconsider the vote by which the amendment on pages 4 and 5 of the bill was agreed to.

The PRESIDING OFFICER. The clerk will state the motion.

The LEGISLATIVE CLERK. A motion by Mr. CORDON to reconsider the vote by which the committee amendment to the bill (H. R. 7664) appearing on page 4, beginning on line 12, was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion of the senior Senator from Oregon.

Mr. CORDON. Mr. President, I have been engaged in other matters off the floor. I had the understanding that no amendments were to be considered until 3 o'clock today. That was my mistake; it is the fault of no one else. It is one of those things which happen in the last period of any session, when we are trying to handle, in 1 hour, matters which

I believe, might well take a day or two, and the country would be better off.

For several reasons, I have moved to reconsider the vote by which this amendment was agreed to. If the motion to reconsider be agreed to, I shall move to amend the amendment by an insertion and a deletion.

I call attention, first, to the language of the amendment, beginning on page 4, line 12:

> Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system, may be made available to and may be purchased by the Bonneville Power Administration at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior.

I end the quotation without reading the entire amendment, because the first matter to which I desire to call attention is included within that sentence. I call attention now to the first clause:

> Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area.

Above that language there appear, in connection with a proviso, in line 8, after the words "power marketing agencies," and in parentheses, the words "public or private."

That parenthetical explanation does not appear in line 13; consequently, power which might be made available for purchase by Bonneville might be surplus solely because private agencies cannot purchase it.

Mr. President, I wish to say, first, that I am in favor of the Priest Rapids bill. I want to see it passed. But I desire to be sure that those who are going into a partnership with the Federal Government will have an opportunity to make this project work. If they are to have that opportunity, and if they are to secure the necessary financing, it will be necessary for them to seek any and every marketing agency that can be found.

It is estimated that the Priest Rapids plant will cost $364 million and will initially consist of 23 53,000-kilowatt generators, which initially will provide 1,219,000 kilowatts of power. It is proposed to ultimately increase that amount to a total of 1,590,000 kilowatts of power. There will have to be a tremendous market for power if that amount of power is to be sold within any given marketing area by a local agency. Consequently, that agency cannot be denied any outlet, anywhere, and at the same time hope to have the operation financially successful.

The PRESIDING OFFICER. If the Senator from Oregon will suspend his statement, the Chair desires to inform the Senator that the hour of 3 o'clock having arrived, the unanimous-consent agreement is in effect, and the time is now controlled.

The senior Senator from Oregon has 15 minutes on his motion, and the Senator from Connecticut [Mr. BUSH] will control 15 minutes.

Mr. CORDON. How much time does the Senator from Oregon now have?

Mr. BUSH. Fifteen minutes.

Mr. CORDON. Very well.

The PRESIDING OFFICER. How much time does the Senator from Oregon yield to himself?

Mr. CORDON. The Senator from Oregon yields to himself whatever time he needs up to 15 minutes, Mr. President.

The PRESIDING OFFICER. The Senator from Oregon may proceed.

Mr. CORDON. In view of the fact that an extremely large amount of power is to be generated, in view of the fact that the necessity exists to furnish the widest possible market outlet, in view of the fact that in the division of power generated at Bonneville it is distributed on the basis of 70 percent in Washington and 30 percent in Oregon, although the population ratio as between the 2 States is 60–40 in favor of Washington, and in view of the further fact that studies with reference to current contracts indicate that in 12 years Washington will be receiving 83 percent of the power and Oregon 17 percent, it becomes a matter of very grave importance to the State of Oregon that some equitable arrangement be worked out for the distribution of hydroelectric power, which generally in that area is known as a very low-cost product, and which is essential to the economic development of the whole Pacific Northwest.

Mr. President, in the first place, if my motion prevails, with respect to the non-Federal marketing agencies described in lines 13 and 14 of page 4 of the bill, I shall propose to add after the word "agencies" in line 14, the words "public or private," in order that there can be no question about the agencies being exactly the same as those mentioned earlier on the same page.

Mr. President, I now go to the next question. The committee amendment contains a provision that if power is surplus to the requirements of the licensee—which in this case would be a public body in the area—and is not needed by other marketing agencies, which, if my amendment were adopted, might be either public or private in either State, it will be available for purchase "by the Bonneville Power Administration at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior."

Then follows a provision which puts into the bill the same principle of operation which was in effect in the Southwestern Power Administration's operation, and which the Congress has refused to approve time after time after time. That provision is:

> The Administrator may use funds in the continuing fund, established under the provisions of section 11 of the Bonneville Project Act of August 27, 1937, as amended, to purchase such power. Such power may be co-mingled with power from Federal dams—

And so forth. The continuing fund was created for the purpose of permitting the Administrator of the Bonneville Power Administration to defray emergency expenses and to insure continuous operation, and for no other purpose.

I now read the language which authorizes the creation of a continuing fund.

> All receipts from transmission and sale of electric energy generated at the Bonneville project shall be covered into the Treasury of the United States to the credit of miscellaneous receipts, save and except that the Treasury shall set up and maintain from such receipts a continuing fund of $500,000 to the credit of the Administrator and subject to check by him, to defray emergency expenses and to insure continuous operation.

That is all of the particular paragraph which is pertinent to this discussion. A fund has been established by statute. The act has fixed the amount as $500,000, but it might just as well be $5 million or $50 million. It is in reality unlimited in amount, and may be used, according to the language of the committee amendment now under discussion to whatever extent the Bonneville Power Administrtator may want to use it to buy power from the Priest Rapids project. Under this language, the fund could be used to purchase the total output of the Priest Rapids dam. The fact is that the output from the dam will probably cost substantially more than the output being sold from Bonneville. Under the amendment, a public or private agency could build a dam, sell the entire output to Bonneville, and then buy it back from Bonneville to its own profit. That sort of thing could happen under the terms of the committee amendment.

I have no objection to the purchase by Bonneville of excess power from the generation at Priest Rapids or anywhere else, so long as the particular transaction is handled after careful consideration. I say that my statement cannot be controverted, that at the present time there is no provision in any law which permits Bonneville Power Administration to do anything but sell power generated by the Federal Government. Under its general business authority, it is entitled to deal with other electric generation plants and through exchange accounts to effect a Federal and non-Federal pool, as it does. Thence the power can flow to marketing centers. That is the reason why today the Northwest Power Pool has come to be the outstandingly successful example of cooperative voluntary pooling and distribution of power in the country. But here for the first time is a proposal to authorize the Bonneville Power Administration to go into the business of wholesale purchase and resale of power, purchasing it at a higher price for a very considerable time to come than the price at which it will resell the power.

Whatever is done, the continuing fund should be left inviolate for the purposes for which it was created. Being a continuing fund, and being replenished from receipts just as rapidly as money is expended for any purpose, more money is poured in to keep the level always at $500,000. If $1 is spent, $1 is put back. If $500,000 is spent, $500,000 is immediately returned. The only limit on the continuing fund, as a basic proposition, is the gross receipts of the Bonneville

Power Administration. That is not true so far as the pending amendment is concerned, because the bill provides authority for the purchase of the particular power from the specified installation. A sound appropriative procedure would require that appropriations be made for the purchase of this or any other power, or any other thing, or the doing of any other act by Bonneville Power Administration, or by any other agency of Government whatsoever. This is not a question of public versus private power. It is a question of sound law and sound business administration in Government.

For that reason, Mr. President, I offer my motion to reconsider the vote by which the amendment was agreed to; and I offer the motion with a view to correcting the amendment in the two particulars I have mentioned.

Mr. BUSH. Mr. President, will the Senator from Oregon yield for a question?

Mr. CORDON. I am glad to yield.

Mr. BUSH. First, Mr. President, I desire to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Connecticut will state it.

Mr. BUSH. The Chair stated that the Senator from Oregon was in control of 15 minutes and that I was in control of the other 15 minutes. However, I am in support of the motion of the Senator from Oregon to reconsider the vote by which the committee amendment was agreed to. So I wish to inquire in whose time I may make a few remarks.

The PRESIDING OFFICER. The time on the other side will then revert to the minority leader.

Mr. BUSH. I see that my distinguished friend, the Senator from Washington [Mr. MAGNUSON], is acting in behalf of the minority leader. So if it is agreeable, I ask unanimous consent that he have control of the other 15 minutes.

Mr. MAGNUSON. Mr. President, I am glad to yield to the Senator from Connecticut as much time as he wishes, for I desire to speak for only 3 or 4 minutes.

Mr. BUSH. Mr. President, will the Senator from Washington yield several minutes to me?

Mr. MAGNUSON. I yield.

Mr. BUSH. I simply wish to say that I am in support of the motion to reconsider, as offered by the Senator from Oregon [Mr. CORDON]. I was never in favor of the amendment in the committee, even though the committee approved the amendment by a good majority. I certainly urge all Senators who now are within range of my voice, or all Senators to whom I may be quoted, to vote in favor of the motion to reconsider.

Mr. KUCHEL. Mr. President, will the Senator from Oregon yield to me?

Mr. CORDON. I yield.

Mr. KUCHEL. Do I correctly understand that the intention of the Senator from Oregon is to eliminate from the bill the language appearing on page 4, beginning in line 12? I refer to the language there appearing in italics.

Mr. CORDON. No. If the pending motion to reconsider prevails, I intend to offer first, an amendment to the committee amendment on page 4, namely, in line 14, on page 4, after the word "agencies", to add, in parentheses, the words "public or private." I think there is no objection to such an amendment to the committee amendment.

My next amendment to the committee amendment is, on page 4, beginning in line 20, with the word "The," to strike out the remainder of the page, ending in line 23 with the words "to purchase such power."

As thus amended, the committee amendment will require that an appropriation be made for this purpose, as is required for all other purposes in connection with Government administration.

Mr. KUCHEL. However, as the committee amendment would thus be amended, the remaining language of the amendment would be in the nature of a permissive right for Priest Rapids Dam to sell and for Bonneville to buy, if mutually agreeable, any surplus power; is that correct?

Mr. CORDON. That is correct, except I intend to discuss with the Senator from Connecticut [Mr. BUSH], what is meant by the term "power surplus to the requirements of the licensee." But I am quite sure that the committee intended that term to mean such power as remains after the licensee has used all of the power from these sources, as may be needed for its own use. If that is what that term means, I have no objection whatever to it. However, I think that explanation should appear in the RECORD, as a result of statements made on the floor, in view of the possibility of subsequent judicial consideration, if the matter ever comes to that point.

Mr. KUCHEL. I cannot state the reasons which impelled the committee to adopt that portion of the amendment, as offered by the Senator from Washington. But speaking for myself, I can say I have a distinct recollection that the Senator from Washington suggested to the committee that at the present time there is no authority of law for Bonneville to make such a purchase, and he wished to have the bill provide permissive authority for Bonneville to make the purchase, if it were entirely agreeable to the Administrator of the Priest Rapids Dam or Authority to sell the power. In other words, the question was entirely one of providing a right which might be used on a permissive basis, if both parties so desired.

Mr. CORDON. Mr. President, I yield the floor.

Mr. MAGNUSON. Mr. President, I wish to say to the Senator from California that what he has stated is exactly the purpose of the language. The amendment suggested by the Senator from Oregon goes to the committee amendment which would amend the Bonneville Act.

The reason for the inclusion of this part of the committee amendment is that if there is available power, we desire to have the entire Pacific Northwest have an opportunity to use the power, if it wishes to do so. It may be it will not wish to use it, or it may be that the licensee and the Bonneville Authority would not wish to take it; but that is the purpose of this language.

I do not understand the purpose of the proposed inclusion of the words "public or private." We say it is permissive, if Bonneville wishes to buy it. If Bonneville buys it, Bonneville can sell it either publicly or privately, as it may wish.

Mr. CORDON. Then does the Senator from Washington have any objection to including the words "public or private"?

Mr. MAGNUSON. I always object to including unnecessary words, if their purpose is not understood. All too often in the past we have found that wording of that sort may eventually be found to mean what we do not wish it to mean. So I see no reason for including those words.

Furthermore, all the committee amendment does, by means of the last 3½ lines on page 4 of the bill, is to amend for this purpose section 11 of the Bonneville Project Act, and thus to give the Administrator the right to use funds in the continuing fund established under that section of the Bonneville Project Act. I see no reason for changing that part of the committee amendment.

I cannot quite understand why at the last moment the Senator from Oregon wishes to make these changes in the committee amendment. Even his explanation is incomprehensible to me. Perhaps I am not as well versed on power problems in our area or on the Bonneville Act as is the Senator from Oregon.

So far as opposition to the purpose of the amendment is concerned, that is an entirely different matter. There is no question that some of the members of the committee were opposed.

Offhand, I see no objection to adding the words "public or private," because those who will constitute the management of the project will wish to sell the power wherever they can. But they would have that right now, anyway.

Mr. JACKSON. Mr. President, am I to understand that the purpose of the amendment the senior Senator from Oregon intends to offer to the committee amendment, if the motion to reconsider is agreed to—namely, to add the words "public or private"—is to define more carefully non-Federal marketing agencies?

Mr. CORDON. Certainly.

Mr. JACKSON. And nothing else?

Mr. CORDON. Nothing else.

Mr. JACKSON. And non-Federal marketing agencies are both public and private, of course; I think there can be no question about that.

Mr. CORDON. I noticed in line 8, on page 4, the words, in parentheses, "public or private"; and since it was felt necessary to make that provision at that point, I wished to have it made below, at the point to which I have referred.

Mr. JACKSON. If that is the purpose, I see no objection.

Mr. MAGNUSON. The purpose of the Senator from Oregon is to add those words in line 13, on page 4; is that correct?

Mr. CORDON. No; in line 14, on page 4.

Mr. MAGNUSON. After the word "agencies"?

Mr. CORDON. Yes.

Mr. MAGNUSON. I see no objection to that.

Mr. CORDON. I did not believe the Senator from Washington would see any objection to it, and I so suggested in the course of my argument.

Mr. MAGNUSON. But I still cannot understand why it is necessary to add those words.

Mr. CORDON. I have already stated why it is necessary.

The PRESIDING OFFICER. If no further time is desired, the question is on agreeing to the motion of the Senator from Oregon to reconsider the vote by which the committee amendment was agreed to.

Mr. MAGNUSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Washington will state it.

Mr. MAGNUSON. I understand that the Senator from Oregon has moved to reconsider only for the purpose of subsequently offering to the committee amendment the two amendments he has suggested.

Mr. CORDON. I have made a perfectly clear statement of my purpose, and that is the purpose.

I also added that I intended to make certain inquiries; and what I do thereafter will depend upon the answers to the inquiries.

Mr. MAGNUSON. Inquiries about the committee amendment?

Mr. CORDON. Yes.

Mr. MAGNUSON. I understand that the motion is limited to the so-called committee amendment which was adopted on Saturday.

Mr. President, I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon [Mr. CORDON] to reconsider the vote by which the committee amendment beginning on line 12, page 4, was agreed to.

The motion to reconsider was agreed to.

Mr. CORDON. Mr. President, I now move that the committee amendment, as it appears on pages 4 and 5 of the bill, be amended in the following respects:

After the word "agencies," in line 4, to include in parentheses the words "public or private."

Mr. BUSH. Mr. President, would the Senator from Oregon care to state his amendments one at a time?

Mr. CORDON. That is what I was about to do.

The second amendment has to do with the same committee amendment. I ask unanimous consent to offer them separately.

The PRESIDING OFFICER. The Senator does not need unanimous consent.

Mr. CORDON. Very well. I offer the first amendment, which is the addition, in parentheses, after the word "agencies", in line 14, of the words "public or private."

Mr. BUSH. Mr. President, I hope that amendment will be accepted without objection.

Mr. CORDON. If there be no further argument on either side, I am prepared to yield back the remainder of my time.

Mr. MAGNUSON. I am willing to accept the "public or private" revision.

Mr. BUSH. That is the pending question.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oregon [Mr. CORDON] to the committee amendment on page 4, line 14.

The amendment to the amendment was agreed to.

Mr. CORDON. Mr. President, I move that the same committee amendment be further amended by striking out the sentence beginning in line 20, on page 4, with the word "The", and ending at the end of line 23, on page 4, striking out the following language:

> The Administrator may use funds in the continuing fund, established under the provisions of section 11 of the Bonneville Project Act of August 27, 1937 (50 Stat. 731), as amended, to purchase such power.

This is the provision which permits the Administrator of the Bonneville Power Administration to use funds in the continuing fund to purchase power. I am opposed to that sort of provision anywhere in any of the activities of the Government. It is a power without limit, so far as the Congress is concerned.

I now invite attention to 1 or 2 things which might happen. I wish particularly to emphasize to the Members of this body that when we test the language of a statute we test it by a consideration of what may be done under it, not what should be done, or even what is being done. If there is any canon of statutory construction that is sounder or more accurate than that, I do not know what it is. Consequently, when I look at this language I test it by the rule of what could be done under the language.

Mr. President, what could be done were this language to remain in the bill? Among other things, at any time after the dam were constructed and in operation in charge of the licensee, if the licensee so desired it might offer any or all of its power to anyone; and after such offers were accepted it might then make a contract for any period of time with the Bonneville Administration for the remainder of such power, at a price then to be determined; and thereafter neither public nor private agency would have any opportunity to purchase such power.

Let me make an answer to my own argument, for a moment, because I want the entire picture to be before us. For a very considerable period of time the contingency which I have mentioned is meaningless, because until such time as the Bonneville rates reach the point where they are equal to the rates which would have to be charged for the power generated at Priest Rapids, no one would want to buy the Priest Rapids power if he could buy Bonneville power.

However, it will not be long before the rates of Bonneville will have to go up, step by step, because from now on every multiple-purpose project in the Pacific Northwest that I know anything about will cost far more than did either Grand Coulee or Bonneville. The result will be that the rates for Bonneville power must go up if there is to be repayment to the Federal Treasury. I, for one, so long as I can speak or act, will do everything within my power to keep the Bonneville Power Administration solvent, so far as repayment to the Federal Treasury is concerned.

Therefore the time may come when it may be feasible to do the thing I have suggested, namely, make this sale to the Bonneville Power Administration for a long period of time, and in so doing, cut off any possibility of any other sale to any other body. That is one thing. The other I have already discussed.

In my opinion there should never be granted to any Federal agency or any officer of Government unlimited power to spend money without accountability. In my opinion, if we are to establish any agency we should require the agency to come to the Congress and justify its expenses and have those expenses appropriated for, as every other item of expense is appropriated for. The Senate operates on that basis. The President's Office operates on that basis. Every other agency of Government that I know anything about operates on that basis, with a rare exception such as Bonneville, with respect to which a fund is established, but with specific yardsticks which limit the purpose for which expenditures may be made. That is the case with the Bonneville continuing fund. It may be used for emergency repairs to insure continuous operation. It may be used for no other purpose.

When I move to strike this particular sentence, I move simply to make the committee amendment come within generally established rules of Government operation in the appropriative process.

Mr. MAGNUSON rose.

Mr. BUSH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUSH. Again, I think the acting minority leader [Mr. MAGNUSON] should control the time of the opposition, because I stand in support of the amendment of the Senator from Oregon.

The PRESIDING OFFICER. The acting minority leader will control the time in opposition.

How much time does the Senator from Washington yield to himself?

Mr. MAGNUSON. I yield myself 10 minutes.

Mr. President, in drafting this amendment we tried to word it so that its effect would be exactly the same as that suggested by the Senator from Oregon. I think we are all in agreement. We want as businesslike an operation as we can get. In drafting the amendment we deliberately included the words "Power surplus to the requirements of the licensee and other non-Federal marketing agencies within the economic marketing area, as may be economically usable to the Federal system."

If this power is to cost too much, it will not be economically usable in the Federal system. As I understand the Bonneville Act, a section of which is incorporated in this bill, contracts are made only from year to year.

Mr. CORDON. Mr. President, will the Senator yield?

Mr. MAGNUSON. What I mean is that private utilities make contracts on only a year-to-year basis. Some of them are continued if it is economically wise to continue them. All we are trying to say is that the pool may get the benefit of some of the surplus power in Oregon, Washington, or wherever the pool goes, if it is economically wise.

I think the Bonneville Administration would be somewhat hamstrung, if it deemed it wise to purchase this power, unless it could do so under the provisions of section 11 of the Bonneville Act, which we incorporate in the bill. Its purposes would be hamstrung. I do not believe that the Bonneville Administration will buy power at rates very far out of line with what its postage-stamp rate is to be throughout the area. The bill merely provides that it may or may not purchase such power, according to its needs and what it wishes to do.

Mr. JACKSON. Mr. President, will the Senator yield for a question?

Mr. MAGNUSON. I yield.

Mr. JACKSON. Is it not true that this particular provision of the amendment would have the effect of aiding the local public-utility district to dispose of their revenue bonds by providing a firm method of marketing the power? The committee amendment, which has been approved, would have the further purpose of making it possible for Bonneville to enter into long-term contracts, rather than contracts on a year-to-year basis. If the Bonneville Administration is compelled to come to Congress each year in order to dispose of the power, the people who are buying revenue bonds will not be very happy.

On the other hand, this provision in the amendment will firm up the salability of the revenue bonds. It will make it possible for the power to be sold in accordance with the provisions of the Bonneville Act. I think that is a wise provision in the bill.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. BUSH. My observation, in reply to the Senator's statement, is that the amendment is purely permissive, anyway. Certainly no one will buy the revenue bonds unless he believes that the area in which the power is generated will take the power. I cannot believe that anyone would buy a bond dependent upon the possibility that the Bonneville Administration might take some power. Therefore, I do not believe that argument is valid.

Mr. JACKSON. The distinguished senior Senator from Connecticut is very well experienced in this field. I should like to ask him this question: Would he like to sell some revenue bonds in connection with which he was advised in advance that the developers of the project would have a long-term Federal contract for the sale of power, or would he prefer to be advised that the developers had a contract with the Federal Government but that the contract could be terminated each year? How would he advise his clients?

Mr. BUSH. I think a Federal contract would make a very good basis for the sale of revenue bonds, but it is not the only basis on which revenue bonds are sold.

Mr. JACKSON. Would not that basis greatly increase the marketability of the bonds?

Mr. BUSH. A permissive clause in the bill allowing the sale of surplus power will have no effect whatever on the value the market will place on these revenue bonds. The market will judge the bonds and price them on the basis of what they are worth in the area involved, assuming that all the power will be used in that area. A permissive amendment will not hurt the bonds, and neither will it help them.

Mr. JACKSON. Is it not true that with a permissive provision the people who would sell the bonds would probably suggest that perhaps a contract should be entered into with Bonneville, and might even require that the contract be entered into prior to the marketing of the bonds? Therefore, if there has been entered into between the licensee and the Bonneville Power Administration a contract, which is on a long-term basis, not limited to a year-to-year basis, the marketability of the bonds will have been enhanced substantially?

Mr. BUSH. My only observation in reply is that the amendment offered by the senior Senator from Oregon will not involve the marketing of power.

Mr. JACKSON. But the developers would have to come to Congress each year for an appropriation, and it would mean that the contract would contain a sort of condition subsequent, in that it could, in effect, be terminated by lack of appropriations. Certainly, if I were counsel for the banking house issuing the bonds I would not place too much value on a provision in a contract which would make the developer go back to Congress each year.

Mr. BUSH. I am sure that neither counsel nor the bank would place too much confidence in a permissive provision such as this.

Mr. CORDON. Mr. President, will the Senator yield?

Mr. MAGNUSON. I believe the Senator is correct. The reason for the whole section was to firm this matter up, in case Bonneville could use the power and could purchase it and place it in the pool. The second reason for the amendment was to make certain that there would be distribution of the power in Oregon, Idaho, and throughout the whole Bonneville pool area. What we are doing is incorporating section 11 of the Bonneville Act of 1937, as amended.

I believe, if long-term contracts can be made and are desirable—whether they would be desirable in this case, I do not know—it is advisable to have them made. Bonneville has entered into 20-year contracts with private utilities in our area. I believe the effect of the amendment offered by the senior Senator from Oregon would seriously hamstring the ability of the public utility district to finance the project. I would like them to be successful. I am afraid the amendment would hamstring them in trying to finance the project.

Mr. BUSH. I observe in that connection that that fact did not influence the public utility district. The district did not ask for this amendment. The Secretary of the Army, the Corps of Army Engineers, the Bureau of the Budget, the Federal Power Commission, and the House of Representatives all felt that this amendment was unnecessary. Therefore I am not impressed, frankly, with the thought that the amendment of the Senator from Oregon to the amendment would greatly imperil this project. I do not understand how it would imperil it at all.

Mr. MAGNUSON. Mr. President, I have discussed this amendment at great length with the people who are involved in this project. They agree that it would make the bill a much better bill and give them a much better opportunity. I suppose that in the House the amendment was not thought of, but it was discussed and approved and recommended by those who are interested in trying to build the project.

Mr. MORSE. I should like to speak for 2 or 3 minutes.

Mr. MARTIN. Mr. President, how much time is available?

The PRESIDING OFFICER. The senior Senator from Oregon has 9 minutes remaining, and the senior Senator from Washington has 5 minutes remaining.

Mr. MAGNUSON. Mr. President, I yield such time as the junior Senator from Oregon may require.

Mr. MORSE. I shall take only a few minutes. I wish to say that I made my argument against this bill on Saturday at some length. I closed my argument by saying that in my judgment we have before us a hodgepodge bill. What we are doing on the floor of the Senate today is further evidence of it.

I opposed the amendment in committee, Mr. President because I felt then it was an exceedingly poor bill. My votes were first cast by proxy and for the amendments. Later, after the proxy votes had been cast, I arrived in the committee room before the final votes were cast on the amendments. I then voted against all amendments to the bill. No amendment could make this a good bill.

I wish to say most respectfully that in my judgment this bill marks the beginning of the end of public preference if it becomes the pattern. I believe in the end, if the project is built at all, it will be built not by the Grant County PUD for its purposes but by another agency for the benefit of private utilities. I say that because I do not believe that the Grant County Public Utility District will ever be able to sell the revenue bonds to finance this project unless the Bonneville Authority has the right to buy the surplus power. If the Bonneville Authority is to have that right then we should provide it with the authority to contract for surplus power without coming to Congress on each purchase.

My colleague [Mr. CORDON] is quite right. I know of no act in which this particular preference language is used, but neither do I know of any situation comparable to this one. Priest Rapids Dam as provided in this bill as I pointed out Saturday, is an exception to the whole Federal development program in the Pacific Northwest.

If preference is to mean anything, or if the Bonneville Power Administration is to have any authority to purchase surplus power for the benefit of the region and the Bonneville system, we provide for a continuing fund, which Bonneville can use for the purchase of power. As I understand it, the two Senators from Washington seek by the language of their amendment to provide Bonneville with such authority.

Therefore, we come to grips with the question whether it will be necessary for Bonneville to come back each year to Congress for an appropriation to buy surplus power from this dam. If we subject Bonneville to that political requirement each year, then we might as well turn over this dam to the private utilities now. In my judgment, the opposition to this amendment is part of the private utilities program. It is an attempt on the part of private utilities to put themselves in a position to buy the power at dump prices. I believe that is what will happen. We shall end up with a great block of power which will be surplus power. That will pave the way for an intensive drive by private utilities to buy the power at dump prices, and the blocking of the Federal Government, by political votes within the Congress, to the purchase of the power by Bonneville. Unless we agree now as a matter of policy that Bonneville shall have a continuing fund from which surplus power from this dam can be bought for the benefit of the Bonneville system, in my judgment, the situation will be such that there will be another handout to the private utilities.

I believe the Senator from Washington [Mr. MAGNUSON] is right when he points out that the purpose of the amendment is to put Bonneville in such a position that it will be on a competitive level with private utilities and in a position to buy power at reasonable costs for the use of the Bonneville system. There is no question about the fact that my colleague is right when he points out that the bill contains language which inaugurates a new policy, as, indeed, the whole bill does. That is why I am against the whole bill. The new policy is bad.

Mr. CORDON. Mr. President, I invite attention to the fact that while the language of this amendment provides for the sale only of power surplus to the licensee and surplus to other agencies who might buy for resale, they expect to have the contract with Bonneville made before either has an opportunity to purchase anything, because there must be a contract in being if we are going to finance a project running into hundreds of millions of dollars. Consequently, the purpose of the committee amendment is to permit the licensee to take a license from the Federal Government, get a contract for the sale of the power to Bonneville, and use that as security for the bond sale. Yet the language provides for power surplus to the licensee and other agencies, public or private.

That indicates the basic purpose of the amendment. I have said, Mr. President, that I shall not oppose the amendment. I had no idea that it was going that far, but I shall not oppose it. I urge, again, the adoption of the amendment which I have offered to take out the continuing funds. Senators talk about the sale of power to Bonneville at a reasonable price. Anyone knows that the power must be sold to Bonneville at a rate which will permit the retirement of the bonds. That means that when we talk about the price being not more than the price at which the licensee will sell to other marketing agencies, it means at that price. This is true because if they did not get that amount, the amortization, maintenance, and depreciation could not be met. Consequently, there can be no diminution in price, and Bonneville will be paying as much for the power as will the marketing agencies who are brokers of power.

The only way Bonneville can sell the power is to pay a premium when it buys the power and lower the price by spreading it among other agencies. That is what is intended to be done under the amendment as it stands. The continuing fund, Mr. President, was not intended for this purpose, and it should not be used for this purpose.

Mr. President, I submit the balance of my time.

Mr. MAGNUSON. Mr. President, I yield a minute to the Senator from Oregon [Mr. MORSE].

Mr. MORSE. Mr. President, I believe the difference between the two Senators from Oregon is over the question of the power of the licensee. I think I understand the bill. I hope my understanding of the power of the licensee is correct. If it is not, then the bill is even worse than I thought it was, and it is bad enough. As I look upon the power of the licensee, it will be not only for the needs of its immediate consumers of the Grant County Public Utility District, but also those with whom it makes contracts for the sale of power. If it does not mean that, then the bill is even worse and even more confused than I thought. The licensee who builds the dam may find itself with a considerable block of dump power. I think that it what it will have for a good many years. It will have quite a bit of dump power.

I raise the question as to what is to be done with the dump power. I wish to see Bonneville placed in such a position that it can get that dump power for the benefit of the whole Pacific Northwest, and throw it into the Bonneville pool. I wish to see it in a position where it can protect the purposes of the Bonneville act and take the power for regional integration purposes.

If we do not place Bonneville in the position to use continuing funds for that purpose, then it will have to come back to Congress where, by political juggling, the decision will have to be made whether funds shall be available for that purpose. But, in the meantime, the private utilities will demand an opportunity to take the power, and the argument will be, "Here are the private utilities; they are perfectly willing to take the power." The argument will run about like this: "They want the power, and they should be allowed to take it at the dump price." In my judgment, the people of the Northwest will suffer as a result of that kind of a program because the private utilities will buy the power cheap and sell it dear. Bonneville will lose it for pooling purpose. I think this bill is a blow to cheap power.

Mr. MAGNUSON. Mr. President, I think I have a minute left.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MAGNUSON. I gave it all to the Senators who are in opposition.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon [Mr. CORDON]. [Putting the question.]

Mr. MORSE. I ask for a division, Mr. President.

The PRESIDING OFFICER. A division has been requested.

Mr. MORSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Had the Senator from Oregon yielded his time?

Mr. CORDON. Yes, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MORSE. Mr. President, reserving the right to object—and I shall not object—on this quorum call I understand that the Senator from Washington [Mr. MAGNUSON]——

The PRESIDING OFFICER. The Chair advises the junior Senator from Oregon that the question is not debatable.

Mr. MORSE. A unanimous-consent request was made, to which I reserved the right to object. Certainly I can speak under that reservation.

The PRESIDING OFFICER. The Senator can again suggest the absence of a quorum, but he cannot debate this question.

Without objection, the unanimous-consent request is agreed to.

Mr. McCARRAN. Mr. President, the Senator from Oregon reserved the right to object.

The PRESIDING OFFICER. The question is not debatable.

Mr. McCARRAN. I object to the rescission of the order for a quorum call.

The PRESIDING OFFICER. The clerk will proceed with the call of the roll.

The Chief Clerk resumed and concluded the call of the roll, and the following Senators answered to their names:

Aiken	George	Millikin
Anderson	Gillette	Monroney
Barrett	Goldwater	Morse
Beall	Gore	Mundt
Bennett	Green	Neely
Bowring	Hayden	Payne
Bridges	Hickenlooper	Potter
Bush	Ives	Purtell
Butler	Jackson	Reynolds
Byrd	Johnson, Colo.	Robertson
Carlson	Johnson, Tex.	Russell
Case	Johnston, S. C.	Saltonstall
Chavez	Kennedy	Schoeppel
Clements	Kilgore	Smathers
Cooper	Knowland	Smith, Maine
Cordon	Kuchel	Smith, N. J.
Crippa	Langer	Sparkman
Dirksen	Lehman	Stennis
Duff	Lennon	Symington
Dworshak	Long	Upton
Ervin	Magnuson	Watkins
Ferguson	Malone	Welker
Flanders	Mansfield	Williams
Frear	Martin	Young
Fulbright	McCarran	

The PRESIDING OFFICER. A quorum is present.

The question is on agreeing to the amendment of the Senator from Oregon [Mr. CORDON].

The amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment, as amended.

The amendment, as amended, was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MAGNUSON. Mr. President, I have an amendment at the desk, identified as 7-10-54-B, which I now call up. It is offered by me for myself and my colleague [Mr. JACKSON].

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 4, beginning in line 5 with the word "and", it is proposed to strike all down through line 12, ending with the word "thereto;" and insert the following:

Upon the same terms and conditions as power is offered for sale by the licensee in the State of Washington except that all such interstate sales shall be made in accordance with the preference requirements of section 5 of the Flood Control Act of December 22, 1944 (58 Stat. 887). The licensee shall cooperate with agencies in such States to insure compliance with such terms, conditions, and requirements. In the event of disagreement between the licensee and the power marketing agencies (public or private) in any of such neighboring States, the Federal Power Commission may determine and fix the power capacity and power output which shall be offered for sale to such agencies in accordance with the provisions of this subsection.

Mr. MAGNUSON. Mr. President, I yield myself 2 minutes.

My proposed amendment, which is known as the preference clause, was submitted to the committee by my colleague, the junior Senator from Washington [Mr. JACKSON], and myself, and was voted on by the committee. The committee was quite sharply divided on the question of whether or not the preference clause should be placed in the bill. All the amendment proposes to do is incorporate into the bill a preference clause similar to that which has been a part of the Flood Control Acts passed by Congress on many occasions, and specifically in this case, the Federal Control Act of 1950.

I personally believe the bill would be a much better bill if the preference clause were added. My colleague and I feel quite keenly about it, as do several of the persons involved in the proposal. We discussed the matter with representatives of the Grant County Public Utility District and other districts concerned, and they, too, felt that the preference clause would be satisfactory, as far as the bill is concerned.

I wish to be fair. As I have told members of the committee, I think, as a practical matter, probably the power will be sold in accordance with the practice now in vogue in the sale of power by public-utility districts in our State, which pretty much follow the preference clause. I would say the importance of the preference clause in the pending bill is that if the power were sold outside the State of Washington and became involved in interstate commerce, as it undoubtedly will be, it would be desirable to have a preference clause in the law.

The question was discussed at great length on Saturday; it was discussed in committee, and I have nothing further to say with regard to it. I hope the amendment will be agreed to.

Mr. CORDON. Mr. President, I rise in opposition to the amendment offered by the Senator from Washington.

The PRESIDING OFFICER. The Senator from Connecticut controls the time.

Mr. BUSH. How much time does the Senator from Oregon desire? I wish to hear him.

Mr. CORDON. I apologize to the Senator who is in control of the time, and ask that he yield me 5 minutes.

Mr. BUSH. I yield 5 minutes to the Senator, or longer, if necessary.

Mr. CORDON. Mr. President, I rise in opposition to the amendment, and call the Senate's attention to the fact that the preference clause has already been conferred upon the public-utility district. The license to general power will, in its entirety, go to a public body. Now it is desired to add to the provisions of the bill a second preference, and hogtie the licensee so it cannot do the job which we are offering it a legal opportunity to do.

In the Senator's own State of Washington exist 2 of the outstanding municipal electric-utility concerns in the United States, 1 at Tacoma and 1 at Seattle. Neither of those utilities are tied by any such clause.

Mr. President, in those areas private industry uses the power generated and sold by those utilities, and as a result of that situation there exist the large payrolls in the city of Tacoma, the city of Seattle, and the rest of the vast area around Puget Sound. I am pleading in the Senate today that the licensee be given an opportunity to make good. It must have the right to sell its power wherever it can sell it, to whosoever can be found to purchase the power.

If the artificial issue of public power versus private power is again mentioned, which is a shibboleth which is kicked around here, I call attention to the fact that in my own State 85 percent of the power is distributed by private utilities, and only 15 percent by public bodies. How will the State of Oregon share in any of the power to be generated, if the preference clause is made a part of the bill, remembering that Bonneville has that preference, and that the industries, the people, the city of Portland, and the vast metropolitan area, extending through my hometown of Roseburg, through Klamath Falls, Medford, wherever industries are located, get their power through private utilities. It is immaterial to me whether they get the power through public or through private utilities, but I do not want any selling agency hamstrung, so that it cannot sell power to the industries that furnish employment to the people of Oregon and to the marketing agencies which furnish the power to the great majority of the rural and domestic consumers of my State.

Mr. JACKSON. Mr. President, will the Senator from Oregon yield to me?

Mr. CORDON. I yield.

Mr. JACKSON. Is it not true that today the Portland Electric Power Co., a private utility, obtains two-thirds of all its power from Bonneville? The truth is that the preference clause has not hurt the private utilities of the area in Oregon.

Mr. CORDON. The Portland General Electric Co. also is handcuffed, and there is no opportunity for that company to do much, because it does not have a contract which guarantees that it will have power long enough to enable it to finance anything. Until contracts can be let for a period of time sufficient to enable the company to guarantee power to its customers, the company will not have customers of the kind to which I have referred.

Mr. JACKSON. Is it not true that the Portland Electric Power Co. is obtaining from the Bonneville Power Administration two-thirds of all the power it is selling?

Mr. CORDON. In my opinion it is more than that; it is getting most of it from the Bonneville Power Administration.

Mr. BUSH. Mr. President, how much time remains to me?

The PRESIDING OFFICER. The Senator from Connecticut has 12 minutes remaining.

The Senator from Washington has 2 minutes remaining.

Mr. BUSH. Mr. President, I yield myself up to 5 minutes, if I need it. I wish to reserve some time.

Mr. President, I desire to support very strongly what the senior Senator from Oregon [Mr. CORDON] has said about the pending amendment, and to urge the Senate very strongly to vote it down.

The amendment refers to the Flood Control Act of December 22, 1944. If I am not incorrect, I believe it applies to federally owned and operated dams. The dam at the Priest Rapids site will not be federally owned and operated, but it will be operated by a public utilities district created by law in the State of Washington. Our good friends on the other side of the aisle have assured us that the law is a good one and that there is good administration of the public utilities there. Certainly that is all to the good, Mr. President. But under those circumstances, for the Federal Government to have anything to say about the handling of the power and where it will be sold, would seem to me to be an absolutely unwarranted intrusion of the worst kind.

So I certainly hope the Senate of the United States will not permit a provision for anything of the sort to get into the bill.

Mr. President, I reserve the remainder of my time.

Mr. MAGNUSON. Mr. President, I yield 2 minutes, or whatever time remains to me, to the junior Senator from Oregon [Mr. MORSE].

Mr. MORSE. Mr. President, I need only a few minutes.

As I pointed out on Saturday, I think several serious problems are raised by this particular preference clause. As stated by the Senator from Connecticut [Mr. BUSH] this dam is to be built by private dollars, not public dollars. This dam is not to be financed by the taxpayers and when self-liquidated be owned by the people, the United States. This dam involves a private investment. As I said last Saturday I think that fact creates many problems and handicaps that will result in a tremendous amount of litigation.

Nevertheless, the matter of public preference is, in my opinion, so vital to the development of private industry in the Pacific Northwest that I shall vote for the amendment, here on the floor of the Senate.

I desire to take a minute or two to discuss the so-called "shibboleth" of the public preference referred to in the argument of my senior colleague. Instead of public preference being a shibboleth, it has been a great protection to the people in the development of the great multipurpose dams in the Pacific Northwest. In my judgment, it has been the greatest guaranty of any feature of the whole Government-power program, for the expansion of private enterprise in the Pacific Northwest. As I have pointed out, our private utilities in the Pacific Northwest distribute the power which they obtain from Bonneville.

I agree—and I have said this for years—that within the public-preference pattern, our private utilities ought to be given reasonable contracts for a reasonable period of time for the purchase of power; but I certainly do not go along—and although this is not the time to discuss it, yet I shall always be willing to discuss it—with the McKay 20-year contracts that were negotiated with five private utilities.

In my judgment, private utilities are not hurt by a public-preference clause; but the people are greatly benefited by the public-preference clause. When public dollars are being invested in the power program, in my judgment, the contracts certainly should contain public-preference clauses. That point goes back for a great many years, in the power program of this country.

As I said on Saturday, I think a legal problem is involved in this case. That is another reason why I think the bill is a hodgepodge. Nevertheless, I believe that the principle of public preference should be written into the bill for the protection, through the public-power yardstick of the industry and consumers of the region.

Mr. President, under the bill we have no assurance that the dam will be controlled by a public body. It is quite possible that the public-utility district may not be capable of financing the dam. But it does not follow that a private agency may not be able to do so in a manner which meets the loose requirements of the bill under which the private utility could control disposition of the power.

What disturbs me is that we are proceeding with a bill for the construction of a dam, in order that a great power resource may be developed at the site, but the language of the bill is ambiguous in many respects. I should like to have the power available for integration and pooling, and I should like to have us write public preference into the bill so that this bill cannot be used as a precedent for undermining the first claim of public bodies to so-called partnership dams. Do not forget that all of the people own the water in the first instance that makes these dams possible.

I think the amendment of the Senator from Washington makes clear the intent of Congress to continue the objective of public preference, and I shall vote for it.

Mr. CORDON. Mr. President, will the Senator from Connecticut yield several minutes to me?

Mr. BUSH. I yield 2 or 3 minutes, if needed, to the senior Senator from Oregon [Mr. CORDON].

Mr. CORDON. Mr. President, reference has been made to the matter of contracts in the Pacific Northwest between the Bonneville Power Administration and private power companies. I call attention to the fact that while contracts have been made with Bonneville for 20 years, yet they carry a 5-year adjustment provision, and therefore no sales contract can be made by the private utilities for more than 5 years.

Mr. President, it is immaterial to me whether power is generated by a private or by a public body, so long as it is generated on a basis of reasonable cost from the standpoint of capital structure and is sold at reasonable rates, considering the cost of operation and the other factors involved in making up the rate structure. There is no sanctity to public power, in my opinion; and, equally, there is none to private power. I am looking to the outlet, to the use of power by people; and it is immaterial to me who does the job of producing the power.

I have worked for 10 years on the Appropriations Committee, and I know what it means to try to obtain funds to construct these projects. We in the Pacific Northwest have been reasonably successful, and I am most grateful to my colleagues on the Appropriations Committee for the way they have loyally assisted. But I also know we have never been able to keep up with our growing needs with appropriated funds from the Government, and I sadly fear we never shall be.

In my judgment we should be glad to accept with open arms any source to which we can turn to obtain money with which to construct power projects and put power on the line.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Washington [Mr. MAGNUSON] for himself and his colleague [Mr. JACKSON].

Mr. MORSE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MARTIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment offered by the senior Senator from Washington [Mr. MAGNUSON] for himself and the junior Senator from Washington [Mr. JACKSON].

Mr. CASE. Mr. President, is there time remaining?

The PRESIDING OFFICER. The time has been yielded back. The Senator may ask unanimous consent for further time if he cares to do so.

Mr. BUSH. Mr. President, having had some time left, and not realizing that I was yielding it because of the quorum call, I ask unanimous consent that the Senator from South Dakota may have 3 minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. CASE. Mr. President, I think the average Member of the Senate is a little handicapped in dealing with a question like this unless it is possible for him to know something about the laws which apply in the States concerned. In this case we have a public-utility district created in the State of Washington. What are its powers, or the limitations under which it operates, I do not know, and I doubt if the average Member of the Senate, aside from the Senators from Washington or members of the subcommittee who worked on the bill, would know.

It seems to me that we are here presented with exactly the same kind of issue as was presented in connection with the Niagara power bill a short time ago. The question is, Shall we attach a preference clause to a license for the development of hydroelectric power granted by the Federal Power Commission to a local body? In the case of the Niagara bill, it is assumed that the Power Authority of the State of New York will be the authority which will seek the license, and which, under the Federal Power Commission law, will receive the license. In this case, as I understand the bill, the license would probably be obtained, and would be granted by this bill, if enacted, to a public-utility district operating in the State of Washington, under the laws of the State of Washington. I would assume that both a public-utility district in the State of Washington and the Power Authority of the State of New York would be friendly toward disposing of their power through public bodies and cooperatives.

Whether that be so or not, the particular body, the Power Authority of New York or the Public Utility District in the State of Washington, has the responsibility of financing and managing the project. It seems to me, then, that it is unfair for the Congress to attempt to dictate to a public body within a State how it shall dispose of the power it generates, particularly as this amendment proposes to dictate to the public utility district how it shall operate in the sale of power beyond the boundaries of the State of Washington.

I do not know whether the Public Utility District of the State of Washington has authority which permits it to go outside the State of Washington and there discriminate in the sale of power.

In any event, it definitely seems to me that administrative problems would be presented. When it comes to the preference clause, I am in favor of the preference clause when the project is developed and financed by the Federal Government.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. CASE. I should like to yield, but I have only 3 minutes.

Mr. MAGNUSON. I will give the Senator some of my time.

The PRESIDING OFFICER. The Chair is informed that the Senator from Washington has no time left.

Mr. MAGNUSON. I spoke for only about 2 minutes.

The PRESIDING OFFICER. The Chair is informed that the time was yielded back when the quorum call was made.

Mr. BUSH. Mr. President, I ask unanimous consent that 5 minutes additional time be granted, to be divided equally between the Senator from Washington [Mr. MAGNUSON] and myself.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the Senator from South Dakota may proceed.

Mr. MAGNUSON. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE. I yield.

Mr. MAGNUSON. Let me say to the Senator from South Dakota that this is an unusual situation. We have in my State public-utility districts which more or less accord preference to public bodies. Other States where the power might be sold do not have such a condition. We were only trying to protect the sale of power in those other States. That was the only purpose of the amendment. If the operation were confined only to the State of Washington, there would be no problem whatsoever.

Mr. CASE. The Senator says that the public-utility district, operating under the laws of the State of Washington, would give preference to other public bodies. I do not know why any amendment would be necessary.

Mr. MAGNUSON. It is necessary because other States may not have such preference protection.

Mr. CASE. But the power would be sold by the public-utility district of Washington, would it not?

Mr. MAGNUSON. That is correct.

Mr. CASE. I should think, then, that whatever principles and practices the State of Washington prescribes for the public-utility district would guide it in its operations. It seems to me that it is fundamentally bad principle——

Mr. MAGNUSON. Normally it would be so guided, but there have been too many instances of such bodies not having been so guided. In this particular case the power question in the area has become so important that we do not know just what the public-utility district would do. We wanted the power spread out, so that everyone would have equal opportunity.

Mr. CASE. It seems to me to be fundamentally bad principle for the Congress of the United States to say that when a public body organized under the laws of any one State is granted a license for the development of hydroelectric power, and is left with the responsibility, the obligations, and the risks of financing and then administering a power project, the Federal Government should then step in and attempt to prescribe for that public body to whom it may sell the power.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. CASE. I yield.

Mr. KNOWLAND. I merely wish to have the Senator yield to me long enough to ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. The yeas and nays are demanded on the pending amendment.

The yeas and nays were ordered.

Mr. CASE. When the Federal Government finances and develops a project I favor the Federal preference clause, as set forth in the Flood Control Act of 1944.

If the situation were applied to my State, and my State created an agency which was to develop hydroelectric power under a license granted by the Federal Power Commission, I would not want Congress to come into the picture and tell the power body of my State to whom it should sell the power, or prescribe any other conditions, other than with respect to the conservation of resources, as set forth in the Federal Power Act.

Mr. President, I yield back the remainder of my time.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER (Mr. SCHOEPPEL in the chair). The question is on agreeing to the amendment offered by the senior Senator from Washington [Mr. MAGNUSON] on behalf of himself and the junior Senator from Washington [Mr. JACKSON].

The yeas and nays have been ordered, and the Secretary will call the roll.

The legislative clerk called the roll.

Mr. SALTONSTALL. I announce that the Senator from Minnesota [Mr. THYE] and the senior Senator from Wisconsin [Mr. WILEY] are absent on official business. The Senator from Ohio [Mr. BRICKER], the senior Senator from Indiana [Mr. CAPEHART], the Senator from New Jersey [Mr. HENDRICKSON], the junior Senator from Indiana [Mr. JENNER], and the junior Senator from Wisconsin [Mr. MCCARTHY] are necessarily absent.

Mr. CLEMENTS. I announce that the Senator from Ohio [Mr. BURKE], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Montana [Mr. MURRAY], and the Senator from Rhode Island [Mr. PASTORE] are absent on official business.

The Senator from Texas [Mr. DANIEL] is absent by leave of the Senate.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan-American Highway Congress at Caracas, Venezuela.

I announce further that on this vote the Senator from Missouri [Mr. HENNINGS] is paired with the Senator from Florida [Mr. HOLLAND]. If present and voting, the Senator from Missouri would vote "yea," and the Senator from Florida would vote "nay."

I announce also that on this vote the Senator from Illinois [Mr. DOUGLAS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], and the Senator from Montana [Mr. MURRAY] would each vote "yea."

The result was announced—yeas 29, nays 45, as follows:

YEAS—29

Anderson	Hayden	Magnuson
Chavez	Jackson	Mansfield
Clements	Johnson, Colo.	Monroney
Ervin	Johnson, Tex.	Morse
Frear	Johnston, S. C.	Neely
Fulbright	Kennedy	Russell
George	Kilgore	Smathers
Gillette	Langer	Sparkman
Gore	Lehman	Symington
Green	Long	

NAYS—45

Aiken	Duff	Payne
Barrett	Dworshak	Potter
Beall	Ferguson	Purtell
Bennett	Flanders	Reynolds
Bowring	Goldwater	Robertson
Bridges	Hickenlooper	Saltonstall
Bush	Ives	Schoeppel
Butler	Knowland	Smith, Maine
Byrd	Kuchel	Smith, N. J.
Carlson	Lennon	Stennis

So the amendment offered by Mr. MAGNUSON on behalf of himself and Mr. JACKSON was rejected.

Mr. CORDON. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. KNOWLAND. Mr. President, I move to lay on the table the motion of the Senator from Oregon.

The PRESIDING OFFICER. The question is on the motion of the Senator from California [Mr. KNOWLAND] to lay on the table the motion of the Senator from Oregon [Mr. CORDON] that the Senate reconsider the vote by which the amendment of the Senator from Washington [Mr. MAGNUSON] was rejected.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. MORSE. Mr. President, I move to recommit the bill.

The PRESIDING OFFICER. How much time does the Senator require?

Mr. MORSE. Two minutes, Mr. President.

I have no intention of repeating the long argument I made on Saturday afternoon. In my judgment, the bill should be recommitted because I think it is only

one of a series of bills which have many common principles which should be considered carefully and exhaustively during the congressional recess. They require hearings in the field, because the hearings on this bill were exceedingly brief. All that Senators have to do is to consult the RECORD in front of them, and they will find that a great many organizations and a great many experts who should have been heard by the committee were not heard. In my judgment, the bill has so much in common with other bills which involve the so-called partnership principle, a principle which, in my judgment, jeopardizes a Federal power program of this country of many years' standing, that I think we should go slowly and should act only after we have a composite record of hearings involving all the so-called partnership bills. I think the only sensible thing to do is to send the bill back to the committee and let it rest there until Congress reconvenes in January, after we have been able to conduct comprehensive hearings on this bill and the other partnership bills.

Mr. KILGORE. Mr. President, will the Senator from Oregon yield for a question?

Mr. MORSE. I wish to summarize my argument against the bill, and then I shall be glad to yield to the Senator from West Virginia.

In my judgment, Mr. President, the Federal Government should build this dam. The dam should be built and made an integral part of the great multipurpose-dam system of the Pacific Northwest. It should be built with its flood control storage facilities included at the time it is built. As I pointed out on Saturday, General Itschner, of the Corps of Engineers, testified in such brief hearings as were had on the bill that the total cost of flood control would be greater as a result of building this dam on the installment basis. Flood control is of vital importance to the entire area of the Pacific Northwest. The flood-control potentialities of this dam are very important and should be developed now.

Furthermore, Mr. President, I think the bill in its present form will undermine a great principle of power development in the Pacific Northwest, namely, the principle of public preference. I think it will add to the administrative complexity in the administration of our power resources which will eventually result in higher cost power.

I do not think this is the way to get cheap power into the Pacific Northwest. I think the proper way to get cheap power into the Pacific Northwest is for the Federal Government to continue with the comprehensive multi-purpose-dam system, built by the Federal Government in keeping with the objectives of the so-called comprehensive report 308. I see in this bill, and in similar partnership bills, the beginning of the undermining of the great comprehensive program on which I thought we had unanimity in our area of the country. I look upon this bill, as I said on Saturday, as a legislative stick of dynamite, which, when the fuse goes off, will do great destructive damage to a Federal power program of many years standing.

Mr. President, I ask unanimous consent to have an additional minute in order to answer a question of the Senator from West Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KILGORE. Mr. President, I should like to ask the Senator this question: While the bill affects the Pacific Northwest, is it not a fact that due to droughts and changing weather conditions, the same situation could affect the entire United States of America?

Mr. MORSE. There is no question about that. The position I take with reference to this bill is the same position I take on the development of power anywhere in the United States. We living in the Pacific Northwest do not own those rivers in the Northwest. They do not belong to the Pacific Northwest or to any State in the Pacific Northwest. They belong to all the people of the United States, just as other rivers do. When we are urging, as we have been for so many years past, the building of a comprehensive program such as is advocated by comprehensive report 308, we are really urging the development of economic potentialities of tremendous value to every citizen of the State of West Virginia or of any other State represented in this body. I have no illusions, Mr. President. I am perfectly aware of the position in which those of us who are fighting for Federal development of power find ourselves in the Senate of the United States today. But there will be another day, and I raise my voice in warning today only to make the record; and I make my record by moving that the bill be recommitted.

Mr. KILGORE. Mr. President, I had not finished.

Mr. MORSE. Mr. President, I withhold my motion not only to give the Senator from West Virginia an opportunity to ask a question, but to welcome debate by the majority leader, or any other Senator who wishes to comment. I shall make my motion when the debate is concluded.

Mr. KILGORE. Mr. President, will the Senator from Oregon yield to me for a question?

Mr. MORSE. I yield.

Mr. KILGORE. The question of multiple-purpose dams goes to such matters as, for instance, flood control and irrigation. It goes to everything from which power might be produced, and to the surplus water which might be either impounded or utilized for other purposes. Is not that correct?

Mr. MORSE. That is correct.

Mr. KILGORE. Inasmuch as all the people of the United States are subscribers, shall we say, to the basic common stock of the power developments, by reason of the fact that the basic capital, even though it be repaid later, is purchased by all the people, a comprehensive study should be made before bills are passed which would deprive the people of their rights, or which would reduce the number of activities in which, if proper study were given, the people might become interested.

Mr. MORSE. I wish to say in complete fairness and to make it very clear to the Senator from West Virginia that this project differs somewhat from the type of program to which he alludes, because the project which is proposed in the bill will not be constructed by the taxpayers of the United States through the Federal Government. It will be built by a separate entity, not representing the Government of the United States. That is one of my objections to the bill, but it illustrates the Senator's point. I agree with him that a very thorough study should be made of all the so-called partnership bills before any vote is taken in the Senate.

Mr. KILGORE. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. KILGORE. The point I was leading to is this: Water rights and power and conservation rights in water are not limited to individual States. In practically all cases they cover many States; and the effect of an abridgment of such rights or a granting of them to any select group takes away from the citizens of not only the area affected but also of other areas which might be served by the products of the immediate area their rights to such development, which, by reason of the natural formation of this continent, accrue to all the people. Is not that correct?

Mr. MORSE. I completely agree with the Senator from West Virginia. That is why, on Saturday, I said a policy question is concerned which involves all the people of the United States. This is a regional problem, so far as the direct need for the power is concerned, and the direct need for the flood-control benefits which should be built but in all probability will not be built under this bill. But the public policy issues are, of course, national in scope and interest, and I think the whole question must be examined from the national standpoint. That is why I urge that this bill go back to committee and that hearings be held in the field this fall on all of the partnership bills such as Cougar, Green Peter, John Day, and this Priest Rapids bill.

Mr. KILGORE. I know of cases in my own State in which private power companies have developed dams which can be used only for peaking power. Not only are the dams not susceptible of flood control but they have made the rest of the river unusable and, incidentally, have created, at times, periods of drought, when manufacturing plants have been shut down by reason of a lack of water.

The only hope we have, as has been well demonstrated in the case of a dam in West Virginia, is to provide for Federal control, which will allow for a constant flow beyond a designated point.

That is one reason why, despite the fact that in West Virginia power is developed completely by private sources, with no public power being produced in the State, I am very much interested in seeing that the people retain their rights to the power accrued by the streams, so that the streams may be properly developed for the greatest benefit of all the people.

That is why I join with the Senator from Oregon in his thinking with respect to this subject. Although West Virginia is not affected, at least at present, the policy might affect the State very disastrously in the future.

Mr. MORSE. I thank the Senator from West Virginia. I reserve the rest of my time.

Mr. BUSH. Mr. President, I am strongly opposed to the motion to recommit, but I am glad to yield the remainder of my time to the distinguished majority leader, the Senator from California.

Mr. KNOWLAND. Mr. President, I do not wish to cut off the distinguished Senator from Oregon, but in view of the fact that 1 hour has been allotted to general debate on the bill itself, it is my intention to move to lay on the table the motion to recommit. If the Senator from Oregon is prepared to yield back the remainder of his time, perhaps we might have a vote on the motion to lay on the table.

Mr. MORSE. I am prepared to yield back the remainder of my time.

Mr. KNOWLAND. Then, having been yielded the time of the Senator from Connecticut [Mr. BUSH], I now move that the motion of the Senator from Oregon [Mr. MORSE] to recommit be laid on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from Oregon to recommit the bill.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

Mr. MAGNUSON. Mr. President, I do not wish to detain the Senate on the final vote, but I desire to speak for about 1 minute.

I rise to repeat what I said to the junior Senator from Oregon [Mr. MORSE] on three or four occasions on Saturday. I am in complete agreement with the junior Senator from Oregon in the view that it would have been much better to have gone ahead with the Federal program, as has been done in the past. But, in view of the great need for kilowatts in the area, and because the dam will not be built unless the kilowatts can be provided at a cheap enough rate to be used successfully, I felt that those who were seeking the right to construct the Priest Rapids Dam should be allowed to build the project. I hope they will succeed, because the kilowatts are needed. I hope the power will be distributed as I think it will be. I do not believe that some of the dire results suggested by the Senator from Oregon will happen.

I hope the bill will be passed, because I have been moved by the fact that for almost 2 years, despite the need for kilowatts in the Pacific Northwest, there have been no new starts and no new construction programs at all. I have not abandoned the idea that we should not go ahead with the multiple-purpose dams, but, at least somewhat reluctantly, I have said to those who intend to build the Priest Rapids Dam, "We are going to help you to try to do the job yourselves, if you can."

Mr. BUSH. Mr. President, I hope very much that the bill will be passed. I think it is a good bill, and that it establishes a good principle.

I am ready to yield back the remainder of my time if the Senator from Washington will yield the remainder of his time.

Mr. MAGNUSON. I yield back the remainder of my time.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H. R. 7664) was passed.

CONSTRUCTION AT CERTAIN MILITARY AND NAVAL INSTALLATIONS

The PRESIDING OFFICER (Mr. SCHOEPPEL in the chair) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SALTONSTALL. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. SALTONSTALL, Mr. CASE, Mr. DUFF, Mr. BYRD, and Mr. STENNIS conferees on the part of the Senate.

APPOINTMENT OF CERTAIN OFFICERS OF THE REGULAR NAVY AND MARINE CORPS

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendments of the Senate to the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SALTONSTALL. I move that the Senate insist upon its amendments, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. SALTONSTALL, Mr. CASE, Mr. DUFF, Mr. BYRD, and Mr. STENNIS conferees on the part of the Senate.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of Calendar 1634, H. R. 5173, the Employment Security Administrative Financing Act of 1954.

The PRESIDING OFFICER. The clerk will state the bill by title.

The CHIEF CLERK. A bill (H. R. 5173) to provide that the excess of collections from the Federal unemployment tax over unemployment-compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to, and the Senate proceeded to consider the bill to provide that the excess of collections from the Federal unemployment tax over unemployment-compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes, which had been reported from the Committee on Finance with amendments.

Mr. MILLIKIN. Mr. President, the Committee on Finance received the bill, took action on it, made some amendments, and reported it to the Senate. I shall discuss all of them, but I should like to point out now that the principal feature of H. R. 5173 is that it would strengthen the Federal-State employment-security program by providing that all taxes collected under the Federal Unemployment Tax Act shall be devoted exclusively to the basic purposes of this program. To achieve this objective, H. R. 5173 provides as follows:

First. Beginning on July 1, 1953—and for each fiscal year thereafter—an amount equal to the excess of taxes collected under the Federal Unemployment Tax Act over the cost of administering the Federal and State operations of the employment-security program, including unemployment insurance and public employment offices, will be earmarked and placed in the Federal unemployment account. This account is already established under existing law and is a subsidiary account in the unemployment trust fund.

Second. At the end of each fiscal year the amount equal to the excess tax collections—if any—is to be earmarked and placed in the Federal unemployment account until that account reaches a balance of $200 million and thereafter in such years as may be necessary to maintain this balance. The estimated excess tax collections for fiscal year 1954 are approximately $75 million. The annual excess tax collections for the next fiscal year are estimated at approximately $60 million to $65 million.

Third. Any such excess not required to either achieve the original $200 million balance or to maintain the balance will be allocated to the trust accounts—in the unemployment trust fund—of the various States in the proportion that

their covered payrolls bear to the aggregate of all States.

The sums allocated to States' trust accounts are to be generally available for benefit payments. A State may, however, through a special appropriation act of its legislature, utilize the allocated sums—not to exceed amounts deposited in its trust fund in the previous 5 fiscal years—to supplement Federal administrative grants in financing its administrative operations.

Fourth. The $200 million balance—or any lesser balance—in the Federal unemployment account will be available to States with depleted reserve accounts for the purpose of assisting them in the financing of their unemployment benefit payments. Any State whose reserve account at the end of any quarter is less than the amount of benefits paid in such quarter and in the preceding three quarters may apply, through its governor, for advance from the $200 million account to its own trust fund. The largest advance which a State may receive in any quarter is the largest amount of benefits paid by it in any one of the last four preceding quarters.

Fifth. Repayment of the advances obtained by States in accordance with the above conditions are to be made by either (a) transfer of funds from the trust account of the borrowing State—at the direction of its governor—to the Federal unemployment account, or (b) a decrease in the 90 percent allowable credit against the 3 percent Federal unemployment tax. This decrease in allowable tax credits will begin after the second January 1 on which outstanding advances have not been repaid by transfer of funds from the State's trust fund. The decrease in the 90 percent allowable credit against the 3 percent Federal unemployment tax will be at the cumulative rate of 5 percent—5 percent of 3 percent—for each year in which the advance is still outstanding until the resulting additional Federal taxes collected have been sufficient to repay the advance.

The Federal unemployment tax is a 3-percent tax levied upon the payrolls—up to the first $3,000 of annual income of workers—of all employers of 8 or more workers during 20 weeks in the year in all but certain specified categories of employment. The employer is permitted to offset up to 90 percent of the Federal tax—2.7 percent of taxable payrolls—with any taxes paid to an unemployment-insurance system under the laws of the State in which he does business. The Federal law also permits the employer to include in his offset any State tax savings that are allowed him under the laws of his State.

When the Congress passed the unemployment-taxing provisions of the Social Security Act of 1935 it was believed that 10 percent of the total cost of the unemployment-compensation program would be needed for administrative expenses. For this reason the law provided the maximum offset of 90 percent—2.7 percent of taxable wages—and reserved 10 percent of the tax for the Federal Government. Federal tax collections from this source are not earmarked for employment-security purposes under existing law but go instead into the general fund of the Treasury. Each year Congress appropriates money for grants to the States to cover the administrative expenses of this program. The amount of the appropriation is determined by the administrative needs of the States and not by the estimated collections of the Federal unemployment tax.

Contrary to the original intent and expectation of the Congress, the three-tenths of 1 percent tax has proved to be excessive and, depending upon the basis of calculation, has yielded between $700 million to $1 billion in excess of the funds that have been disbursed to meet the Federal-State administrative costs of the program. This amount has been used to meet the general expenses of other activities of the Federal Government.

In the opinion of the committee, the full amount of the tax collections from the Federal unemployment tax should be used exclusively for strengthening and improving the Nation's employment security program as originally contemplated.

It is further agreed that the two basic needs to which these excess tax collections should be devoted are for the protection of State trust accounts against the contingency of insolvency and the provision for greater flexibility in administrative operations. Your committee believes that these two agreed needs can best be met through the methods provided in H. R. 5173.

The provision of a loan account, as established under H. R. 5173, from which States with depleted accounts may secure repayable advances, recognizes the Federal interest in protecting the solvency of State trust accounts in a manner consistent with the original intent that States be charged with ultimate responsibility in financing the benefits which they elect to provide.

The provision contained in H. R. 5173 that States may utilize for administrative cost purposes—under appropriate safeguards—that portion of tax collections credited to their accounts will serve to make more flexible and will better adapt the administrative structure of the Federal-State system to the varying needs and conditions of the country.

Attention is invited by your committee to the fact that the principle that the Federal unemployment tax collections should not be regarded as available for general expenditures has been recognized by the Congress in the enactment of the so-called George loan fund provisions (secs. 904 (h) and 1201 of the Social Security Act). Under these provisions the excess of the Federal unemployment tax collections over the amount of disbursements for administrative costs since the initiation of the Federal-State employment security program was to be available to States with depleted reserve accounts. Under the George loan fund it was left largely to the discretion of the States as to whether they would revise their tax structures so as to make any advances in fact repayable. The conference of State officials administering State operations of this program recommended the strengthening of the repayable loan provision by the method of reducing the allowable offset against the Federal tax, as is provided in H. R. 5173.

In regard to the second basic need—greater flexibility and adaptability in administration—your committee believes that this can best be met by leaving to the province of the States the use of allocated excess collections to supplement Federal grants.

Under H. R. 5173 the excess over the $200 million balance—or the amount necessary to maintain this balance—can be used only for benefit purposes unless a State legislature appropriates these funds for administrative purposes.

Mr. KNOWLAND. Mr. President, I send to the desk a proposed unanimous-consent agreement, which I ask to have read for the information of the Senate. First, let me say that the proposed agreement was discussed with the minority leader and with a number of Senators who have amendments to offer, some of those Senators having found it inconvenient either to be here last week, when it was suggested that the bill be brought up, or to be here for voting purposes today.

It was suggested on last Saturday, when we expected to complete action on the bill relating to the Priest Rapids Dam, that this proposed agreement be submitted to the Senate at that time; but I did not wish to have the proposed agreement submitted until action on the measure then pending had been concluded.

Mr. President, if the proposed agreement is entered into, the Senate will continue in session today until 6:30 or 7 p. m., or for as long as may be necessary to permit the completion of any remarks Senators may wish to make on the busines now pending.

The PRESIDING OFFICER. The proposed unanimous-consent agreement will be read.

The Chief Clerk read as follows:

Ordered, That following the morning business on Tuesday, July 13, during the further consideration of H. R. 5173, to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States to provide that the remainder of such excess shall be returned to the States, and for other purposes, debate on any amendment or motion (including appeals) shall be limited to not exceeding 2 hours, to be equally divided and controlled respectively, by the mover of any such amendment or motion and the Senator from Colorado [Mr. MILLIKIN] in the event he is opposed to such amendment or motion; otherwise, by the mover and the minority leader or some Senator designated by him: *Provided*, That no amendment that is not germane to the subject matter of the said bill shall be received: *And provided further*, That debate upon the bill itself shall be limited to not exceeding 2 hours, to be equally divided and controlled, respectively, by the Senator from Colorado [Mr. MILLIKIN] and the Senator from Texas [Mr. JOHNSON].

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Mr. President, reserving the right to object——

Mr. MORSE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will state the amendments of the committee.

The Chief Clerk stated the amendments reported by the Committee on Finance, which were, on page 1, line 4, after the word "of", to strike out "1953" and insert "1954"; on page 2, line 13, after the word "the", where it occurs the second time, to strike out "unemployment" and insert "employment security"; on page 3, line 3, after the word "those", to strike out "unemployment" and insert "employment security"; at the beginning of line 8, to strike out "unemployment" and insert "employment security"; after line 9, to strike out:

(1) the aggregate of the amounts expended during the fiscal year for—

(A) the purpose of assisting the States in (i) the administration of their unemployment compensation laws (including administration pursuant to agreements under title IV of the Veterans' Readjustment Assistance Act of 1952), (ii) the establishment and maintenance of systems of public employment offices in accordance with the act of June 6, 1933, as amended (29 U. S. C., sec. 49–49n), and (iii) carrying into effect section 602 of the Servicemen's Readjustment Act of 1944; and

(B) the performance by the Department of Labor of its functions (except its functions with respect to Puerto Rico and the Virgin Islands) under (i) this title and titles III and XII of this act, (ii) the Federal Unemployment Tax Act, (iii) the provisions of the act of June 6, 1933, as amended, (iv) title IV (except section 602) of the Servicemen's Readjustment Act of 1944, and (v) title IV of the Veterans' Readjustment Assistance Act of 1952; and.

And in lieu thereof to insert:

(1) the aggregate of the amounts expended during the fiscal year for the purpose of assisting the States in (A) the administration of their unemployment compensation laws (including administration pursuant to agreements under title IV of the Veterans' Readjustment Assistance Act of 1952), (B) the establishment and maintenance of systems of public employment offices in accordance with the act of June 6, 1933, as amended (29 U. S. C., sec. 49–49n), and (C) carrying into effect section 602 of the Servicemen's Readjustment Act of 1944, as amended; and

(2) the amount estimated by the Secretary of Labor as equal to the necessary expenses incurred during the fiscal year for the performance by the Department of Labor of its functions (except its functions with respect to Puerto Rico and the Virgin Islands) under (i) this title and titles III and XII of this act, (ii) the Federal Unemployment Tax Act, (iii) the provisions of the act of June 6, 1933, as amended, (iv) title IV (except sec. 602) of the Servicemen's Readjustment Act of 1944, as amended, and (v) title IV of the Veterans' Readjustment Act of 1952; and.

On page 5, line 4, to change the subsection number from "(2)" to "(3)"; after line 9, to strike out:

For the purposes of paragraph (1), payments before July 1 for any period on or after such July 1 shall be considered as expended during the fiscal year which begins on such July 1.

On page 6, line 15, after the word "Labor", to insert "and certified by him to the Secretary of the Treasury on or before that date"; in line 17, after the word " States", to insert "to the Secretary af Labor by June 1"; at the beginning of line 22, to strike out "June 1" and insert "May 1"; in line 24, after the word "such", to strike out "June 1" and insert "May 1"; on page 9, line 13, after the words "in the", to strike out "account" and insert "unemployment fund"; in line 22, after the word "subsection'" to insert "and"; after line 22, to strike out:

"(3) the Governor certifies that the contribution rate or rates in effect for the quarter in which he applies will yield an amount which he estimates will equal or exceed 2.7 percent of the total remuneration which he estimates will constitute wages subject to contributions for such quarter under the law of such State; and.

On page 10, line 5, to change the subsection number from "(4)" to "(3)"; in line 6, after the word "paragraphs", to strike out "(1), (2), and (3)" and insert "(1) and (2)"; in line 8, after the word "Labor", to strike out "shall, from time to time, certify" and insert "shall certify"; on page 11, line 16, after the numerals "1201", to strike out "(a)"; in line 19, after the word "shall", to insert "promptly"; in the same line, after the word "amount", to strike out "as of the close of the calendar month in which the Governor makes such request"; in line 22, after the word "the", to insert "Unemployment Trust Fund for credit to the"; on page 12, line 7, after the word "under", to strike out "subsection (a)" and insert "section 1201"; at the beginning of line 11 to "received, and covered into the Treasury"; in line 12, after the word "under", to strike out "subsection (a)" and insert "section 1201"; in line 13, after the word "the", where it occurs the second time, to insert "Unemployment Trust Fund for credit to the"; in line 18, after the word "transferred", to strike out "from time to time from the general fund in" and insert "at the close of the month in which the moneys were covered into"; in line 20, after the words "to the", to insert "Unemployment Trust Fund for credit to the"; in line 22, after the word "be", to insert "as of the first day of the succeeding month"; at the beginning of line 25, to strike out "from time to time"; on page 13, line 2, after the period, to strike out the quotation marks ("), and after line 2, to insert:

SEC. 1203. When used in this title, the term "Governor" shall include the Commissioners of the District of Columbia.

Mr. KENNEDY. Mr. President, with respect to the committee amendment on page 10, ending in line 4, I wish to state that the Senator from Rhode Island [Mr. PASTORE] has an amendment dealing with the rate of repayment, based on the so-called George loan fund, in connection with the section having to do with advances to State unemployment funds. I wonder whether the Senator from Colorado can inform me whether acceptance of the committee amendments will prejudice in any way the right of the Senator from Rhode Island to submit his amendment.

Mr. MILLIKIN. I would have no objection to having all the committee amendments agreed to en bloc, and having the bill as thus amended regarded as a new bill, subject to amendment.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the committee amendments be adopted en bloc, with the understanding that the adoption of the committee amendments in toto will result in having the bill as thus amended considered as a new bill, for purposes of amendment, so that any Senator may submit amendments to the bill as amended.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, the amendments of the committee are considered and agreed to en bloc; and, without objection, the further request of the Senator from California is agreed to.

Mr. KENNEDY. Mr. President, tomorrow I intend to call up an amendment intended to be proposed by me, on behalf of myself and various other Senators, to this bill; but I have no intention of doing so today.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

Mr. MORSE. Mr. President, if the bill is read the third time, that will preclude the Senator from Massachusetts from offering his amendment.

I suggest to my friend, the Senator from Massachusetts, that he call up his amendment, so that it will be before the Senate, inasmuch as the amendment is in the form of a substitute. So he had better have it before the Senate before the bill is read the third time.

Mr. KNOWLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from California will state it.

Mr. KNOWLAND. Has the third reading of the bill been ordered?

The PRESIDING OFFICER. Not yet.

Mr. KNOWLAND. Then I suggest that the Senator from Massachusetts submit his amendment and speak upon it, for otherwise it will be necessary to vote on the question of the engrossment of the committee amendments and the third reading of the bill. Inasmuch as we have not been able to have the proposed unanimous-consent agreement entered, I hope that as many speeches as possible will be made between now and 6:30 p. m.

Mr. KENNEDY. Very well.

Mr. President, I submit, on behalf of myself and sundry other Senators, the amendment which I send to the desk and ask to have stated. The amendment is identified as "7–7–54–B."

The PRESIDING OFFICER. Does the Senator from Massachusetts wish to have the amendment read?

Mr. KENNEDY. That will not be necessary, Mr. President.

The PRESIDING OFFICER. Will it be sufficient to have the amendment printed in the RECORD?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. Then, without objection——

Mr. MORSE. Mr. President, I object; I should like to have the amendment read.

The PRESIDING OFFICER. Objection being heard, the amendment will be read.

The amendment submitted by Mr. KENNEDY, for himself, Mr. DOUGLAS, Mr. MANSFIELD, Mr. JACKSON, Mr. PASTORE, Mr. SYMINGTON, Mr. GREEN, Mr. HUMPHREY, Mr. MAGNUSON, Mr. GILLETTE, Mr. KEFAUVER, Mr. ANDERSON, Mr. LEHMAN, Mr. NEELY, Mr. MORSE, Mr. MURRAY, and Mr. HENNINGS, was read by the Chief Clerk, as follows:

At the end of the bill, add a new section, as follows:

"SEC. 6. Section 1603 (a) of the Internal Revenue Code is amended by redesignating paragraph (6) as paragraph (9), and by adding after paragraph (5) the following new paragraphs:

"'(6) The maximum weekly compensation payable under such law shall be an amount equal to at least two-thirds of the average weekly wage earned by employees within such State, such average to be computed by the State agency of such State on July 1, 1955, and on July 1 of each succeeding year on the basis of the wages, including amounts excluded therefrom under section 1607 (b) (1), paid during the last full year for which necessary figures are available.

"'(7) The weekly compensation payable to any individual shall be (A) the maximum weekly compensation payable under such law, or (B) an amount (exclusive of any compensation payable with respect to dependents) equal to at least one-half of such individual's average weekly wage as determined by the State agency, whichever is the lesser.

"'(8) Compensation shall not be denied to any eligible individual for any week of total unemployment during his benefit year by reason of exhaustion or reduction of benefit rights or cancellation of his wage credit until he has been paid unemployment compensation for not less than 26 weeks during such year.'"

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts on behalf of himself and other Senators.

Mr. KENNEDY. Mr. President, this amendment is offered on behalf of the Senator from Illinois [Mr. DOUGLAS], the Senator from Montana [Mr. MANSFIELD], the Senator from Missouri [Mr. SYMINGTON], the Senator from Washington [Mr. JACKSON], the Senator from New Mexico [Mr. ANDERSON], the junior Senator from Rhode Island [Mr. PASTORE], the senior Senator from Rhode Island [Mr. GREEN], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Iowa [Mr. GILLETTE], the Senator from New York [Mr. LEHMAN], the Senator from West Virginia [Mr. NEELY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Oregon [Mr. MORSE], the Senator from Montana [Mr. MURRAY], the Senator from Missouri [Mr. HENNINGS], and myself.

Approximately the same list of sponsors has introduced a more comprehensive substitute for H. R. 5173, No. 7–1–54–B, which substitute would implement the standards contained in this amendment, establish a contingency fund for administrative expenses, and provide for a program of reinsurance for depleted State reserves. Even this substitute, which I shall offer if we are successful in obtaining passage of the pending measure, represents a considerable modification of S. 3553, a bill introduced on June 3 by approximately the same sponsors. Those sections establishing nationwide standards of disqualifications, broadening coverage, and permitting uniform employer tax reductions, have been removed from that bill in the presentation of this substitute. In short, this substitute does not make all necessary improvements in our Federal-State unemployment compensation system. But it does represent a fundamental strengthening of the program in sharp contrast to the weaknesses introduced by H. R. 5173.

However, in order to clarify the issue, in order to make certain that there is no misunderstanding as to the purpose or effect of this first vote, the amendment we are offering at this time seeks only to add to H. R. 5173 the 3 brief and comparatively simple sections which appear on page 2 of the substitute. These sections, which I shall discuss in a moment, establish nationwide standards for the amount and duration of unemployment-compensation benefits at levels recommended by President Eisenhower, Secretary of Labor Mitchell, and the tripartite Federal Advisory Council. The only issue presented to the Senate by this amendment is whether it favors better unemployment-compensation benefits, or whether it is opposed to such benefits.

This issue, particularly when our amendment is contrasted with the other provisions of H. R. 5173, presents in my opinion the most fundamental issue concerning the basic structure of our economic and social-security legislation to be considered by this Congress. It is particularly unfortunate that, during a time when the rate of unemployment covered by this program has doubled from its level of 1 year ago, and the rate of new claims under the program has similarly increased, Congress should be considering legislation which would weaken instead of strengthen this vital law.

Unemployment compensation is, as President Eisenhower described it in his economic report, "a valuable first line of defense against economic recession." During the downturn of 1949, $1.7 billion—more than twice the 1948 level—was paid to maintain the purchasing power of unemployed workers. In the fiscal year which has just been completed, I understand benefits again exceeded well over $1 billion. The importance of this program, not only to the worker but to the economy as a whole, has been repeatedly demonstrated in my own State of Massachusetts. Business Week on May 7, 1949, for example, stated that the paradox of excessively high unemployment rates in Lawrence, Mass., but without a simultaneous business depression was due, according to Lawrence businessmen, to unemployment compensation, which they said "had proved to be an effective cushion for business—as well as workers—against the impact of layoffs."

But unemployment compensation has been sadly weakened by time and State inaction. Although in 1939, the ratio of benefit ceilings to average weekly earnings for all 51 State laws was 67 percent, the figure for December 1953 was only 41 percent. Six States have benefit ceilings only 30 to 35 percent of average weekly earnings. Particularly tragic is the problem of benefit exhaustions. In 1953, in the State of Alabama, for example, over 40 percent of unemployed workers received benefits up to the maximum period of 20 weeks and then were forced on the relief rolls. In 1949, nearly 2 million unemployed workers in this country exhausted their benefits. Inadequate amounts and duration of unemployment benefits hurt not only the worker but his community and Nation.

Mr. LEHMAN. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. LEHMAN. Is it not a fact that under the present law there is no uniformity at all with regard to the maximum weekly compensation paid, and also with regard to the minimum compensation paid to workers in the various States?

Mr. KENNEDY. The Senator from New York is quite correct. It is for that reason that President Eisenhower in his economic report made the recommendation that the States place in effect certain minimum standards, for the duration of 26 weeks, and, with respect to the amount of benefit, that the maximum be two-thirds of the average wage or 50 percent of the worker's wage, whichever is the lesser. The President has recommended that State governments take action on both those standards.

Nineteen States have had an opportunity to act. Their State legislatures have met since the President made his recommendation in February. The fact is that not one of the States has acted. As the Senator knows, the great variation in standards among the various States puts a State which places its standards on the highest level at an economic disadvantage in competing with States whose standards are at a lower level. Therefore, a premium is placed upon maintaining extremely low standards for amount of benefit and duration of benefit.

Mr. LEHMAN. Mr. President, will the Senator yield for a further question?

Mr. KENNEDY. I yield.

Mr. LEHMAN. There is no doubt in my mind—and I ask the Senator whether or not he agrees with me—that the question of the maximum and minimum rates of compensation in the various States is of paramount importance. Of even greater importance, it seems to me, is the matter of lack of uniformity of the period for which compensation is paid in the various States.

In my State of New York we are paying, and have paid for a considerable period of time, compensation for 26 weeks, but I understand that in a great many other States the number of weeks of compensation authorized is consider-

ably less than 26, and in some States, I believe, it is even below 20 weeks.

Mr. KENNEDY. The Senator is quite correct. In the State of Arizona the duration of benefits is as low as 12 weeks. Thus, an unemployed man in Arizona is entitled to receive unemployment compensation benefits for 12 weeks. Then he goes on public subsistence, or relief. In New York he is entitled to benefits for 26 weeks. The figure varies all the way from the low of 12 weeks in Arizona to the high of 26 weeks in New York.

Moreover, there is a corresponding difference in the amount of benefits, and therefore a corresponding difference in the amount of taxes paid by the employer. Thus, in States with lower standards, as compared to a State like New York, the employers are required to pay a correspondingly greater tax for this purpose. It seems to me that the whole purpose of the 0.3 percent offset when the Social Security Act was passed in 1935 was to provide a degree of uniformity among all the States and that the tremendous spread in benefits and duration which has been permitted to occur in the past 15 years has penalized States which have had a progressive, advanced system.

Mr. LEHMAN. I compliment the Senator from Massachusetts for pointing out the great variations in the period during which compensation is paid. The maximum weekly compensation and the minimum weekly compensation are, of course, of very great importance. Will not the Senator agree with me that where a State pays compensation for only 20 or 16 or, in the case of Arizona, 12 weeks, the impact on the employment situation and on the economic situation of the State is vastly increased; because if a man is thrown out on his own resources after only 12 or 14 or 16 weeks of compensation, he almost inevitably becomes a drain on the economy of the State?

Mr. KENNEDY. That is correct. I should also like to point out to the Senator from New York that this is not a matter between the North and the South. The State of Mississippi, which is frequently regarded as a low-income State, pays a higher ratio of benefit, using the average wage in the State, than any other State in the Union. Therefore, if the amendment which I propose should be adopted, it would probably cost employers in Mississippi less than it would cost employers in any other State. Mississippi's level has kept up higher in proportion to the average wage in the State since 1938 than has the level in all the other States, North or South.

Therefore, it is not a regional matter or a matter between regional economies; it is a matter of what is in the best interest of the economy of the country as a whole.

My amendment, as the Senator from New York knows, because he is a cosponsor of it, would merely provide for the acceptance of the standards recommended by the President in the belief that it is in the best interest of the Nation that all the States adopt these standards, and in that way strengthen the economic welfare of the entire country. Therefore, we should adopt those standards.

Mr. LEHMAN. Is that not clearly demonstrative of the fact that many of us on this side of the aisle are eager to support the President's programs when they are sound, although we do not receive very much encouragement?

Mr. KENNEDY. Exactly. The President, in his economic report, at page 98, states:

> It is urged, therefore, that all of the States raise the potential duration of unemployment benefits to 26 weeks, and that they make the benefits available to all persons who have had a specified amount of covered employment or earnings.

That is exactly what this amendment does.

In addition, the report states:

> Originally, upon the recommendation of the President's Committee on Economic Security in 1935, the States set benefits generally at 50 percent of weekly wages. However, they also fixed dollar maximums which have since significantly curtailed the benefits.

Then the report goes on to show how the effect of the ratio between the benefits and average wages has fallen from 50 percent to 33 percent. Therefore, he suggests that the maximums be raised so that they will equal at least half of the regular earnings.

I wish to emphasize that this is not a regional matter between the North and the South, and it is not a matter between Republicans and Democrats. After all, we are seeking to put into effect only what the President has recommended.

In the light of this need for strengthening our unemployment compensation program, what does the Reed bill do? It does nothing to increase the level or duration of benefits paid to unemployed workers. The Senator from New York [Mr. LEHMAN] and I were discussing the fact that there should be at least a minimum period for the duration of benefits. The pending bill as now written does nothing about it. It does nothing to safeguard effectively the unemployment compensation reserves of those States hit hardest by chronic and excessive unemployment. It does nothing to protect employers in such States from excessive tax rates. It does nothing to spread the risk of unemployment—a national problem—more evenly throughout the Nation. It does nothing to prevent the dissipation in an administrative pork barrel of those Federal unemployment compensation funds which should be used for benefits where needed most.

As the Senate knows, the purpose of the original 0.3 percent offset provision was not only to provide for a system of unemployment compensation in all the States, but it was also to provide for the cost of administration. Since that time, over 13 of our States have received a substantially greater sum for administration than they have paid in. Yet under the bill which is before us in the Senate each State would receive back, to be available for both administration and unemployment compensation benefits, the percentage that their wages bear to the total national payroll. This will mean that there will be dissipated in administrative costs some money which should be going into the reserve fund for unemployment compensation benefits.

The pending bill does nothing to protect the taxpayers from making additional appropriations for unemployment compensation administration in years of heavy unemployment, even though Federal funds collected for this purpose in previous years would—if preserved—be sufficient for such purposes. It does nothing to prevent unfair competition among States and employers through the undercutting of jobless benefit standards. It does nothing to bolster the purchasing-power potential of unemployment compensation during a serious economic decline. It does nothing to further President Eisenhower's recommendation of higher benefits and longer periods of payment.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. MORSE. The Senator has been talking about the fact that this problem is not between the North and the South, or between the East and the West, or a partisan problem. I completely agree. My question is this: Is it a States rights problem? Does the Senator from Massachusetts agree with me that there is no problem of States rights involved? There is only a problem of the Federal Government laying down reasonable standards—which we have a right to expect the States to comply with if they seek to have the benefit funds contributed by all the taxpayers of the United States—for the use of Federal funds for the relief of an unemployment problem no matter where it exists, because no matter where it exists, it is a national problem. Does the Senator agree with that?

Mr. KENNEDY. The Senator is absolutely right. It is not an intrusion into the rights of States to set minimum standards. We do it with respect to minimum wage laws, and in many other fields, for example, public assistance. The real question is what is in the best interests of the country. Is it in the best interests of the country to permit competition among the various States to provide for the lowest possible protection, because it gives the employers within a State a temporary advantage in paying a lower tax? Is it in the best interests of the country, therefore, to permit that situation to go on, or is it in the best interests of the country to provide for minimum standards which will maintain consumer purchasing power and provide protection for those States which give an adequate return in both amount and duration to their employees who are thrown out of work?

It seems to me it is in the best interests of the States, particularly those States which are trying to do a good job, that we provide reasonable minimum standards.

Mr. MORSE. If the Senator will yield I should like to ask him a few questions.

Mr. KENNEDY. I am glad to yield.

Mr. MORSE. I should like to ask the Senator some questions bearing upon the philosophy of the bill, because whenever

we have before us a major piece of legislation—and this is very important legislation—I always seek to determine to my satisfaction what the underlying legislative philosophy of the bill is.

I should like to ask the Senator from Massachusetts if it is his opinion that in this dynamic capitalistic system of ours we have been seeing evolving for some time, and for several years past, a growing recognition on the part of the people of the country, the people as a whole have very definite moral responsibilities in connection with alleviating grave hardships of unemployment.

Mr. KENNEDY. I certainly agree.

Mr. MORSE. Does the Senator from Massachusetts share my view that if we accept that as a major premise, then we must look at legislation such as a means of implementing the Full Employment Act of 1946? When Congress passed that act it recognized the fact that there is an obligation on the part of our Government to do what it can, within reason and in keeping with sound public policy, to bring about an economic condition in the country that makes it possible for all who are well and able to work to have full employment. Does the Senator agree with me?

Mr. KENNEDY. Yes. I think it is obvious that the individual employer is not really in position, in most instances, to affect very much the employment level in his company, and is dependent upon the flow and ebb of the economy of the Nation as a whole. Therefore, it seems to me that the Federal Government has a definite responsibility, and, as the Senator says, it has recognized its responsibility in the Full Employment Act of 1946 to intervene in an effective manner in this field and not merely to leave the States and individual employers to cope with the problem.

Mr. MORSE. I doubt if a more important point can be made in this discussion than is the point which the Senator from Massachusetts has just made, namely, that we must recognize that as the result of a gradual change in the nature of our economic system, the individual employer can no longer be looked to as the one who has the primary responsibility of taking care of the unemployment needs of his employees. It is a difficult point to get people to see at first glance, but I think what we need to recognize is that this economy of ours has become so complex and so interrelated that employers A, B, and C, and on down through the rest of the alphabet, multiplied many times throughout this country, irrespective of the State in which their operations exist, cannot be looked to by the people of the United States to take care of unemployment on a plant-by-plant basis. After all, they are not the determiners of cause to effect and effect to cause in the whole matter of employment and unemployment in the United States.

There are so many factors completely beyond the control of employers which determine unemployment, that if we really believe in this capitalistic system of ours—and I happen to be one who does believe in it—we must recognize a national obligation to relieve unemployment. The preservation of the economic freedom of choice for the individual calls upon all of us, as a society of free people acting through our Government, to see to it that the unemployment needs of our people are taken care of through such an amendment as we propose, or else the Full Employment Act of 1946 becomes just so many empty words.

Does the Senator find himself in any strong disagreement with that general point of view?

Mr. KENNEDY. No, I do not. I must also say I do not quite understand why whoever drew the act was so insistent on prohibiting a State from instituting a uniform tax reduction below the 2.7 level. It seems to me it is based to a substantial degree on a fallacious theory that an employer, if he takes proper precautions, can prevent widespread unemployment in his particular industry. I think time has proved that to be incorrect. I should like to have seen the bill reported out by the Finance Committee permit a State to reduce its rate to less than 2.7 on a uniform basis, because I think the theory behind the experience rating is not completely borne out by our actual experience.

Mr. MORSE. I think the Senator is absolutely correct. If the Senator will permit this observation, let me supplement the approach which the Senator is making to the question.

I wish to join with the Senator from New York [Mr. LEHMAN] in highly commending the Senator from Massachusetts for his suggestion that the act needs to be amended in accordance with the provisions of the amendment which the Senator is offering in behalf of the rest of us who are cosponsors. I commend the Senator from Massachusetts for the leadership he is extending to the Senate and to the country in reference to this matter. He is correct in pointing out today that, after all, this problem of unemployment cannot be solved on the basis of any individual employer plan.

Let us consider a specific example. I become a little bit amused sometimes when I listen to some of the reactionary business leaders of the country who talk about a return to laissez faire and to the economic jungle law of unfettered supply and demand. We usually find them talking in those terms when their business is prosperous, but they talk a different tune if we run into them a few months later and find that economic forces over which they have no control at all are playing havoc with economic conditions in their industry. Then they do not talk about laissez faire or about the operation of the unfettered law of supply and demand. When unemployment hits their business they want the Government to do something immediately.

Then they are strong for the assumption on the part of the Government of some of its responsibility in keeping with the spirit of the Full Employment Act of 1946 by way of Government aid in the direction of Federal assistance to the States through unemployment insurance compensation.

Let us take a situation such as exists in the manufacture of television sets, of automobiles, farm machinery, or a great many of the other durable goods which for the past year have been suffering from a recession, so far as employment is concerned and so far as purchasing power of potential customers is concerned.

Does the Senator from Massachusetts agree with me that there really was not very much, for example, that the television industry or the farm-machinery industry or the automobile industry could do about the growing unemployment, because of the fact that the forces causing it were far beyond any forces operating within the industry, so far as causal forces were concerned?

Mr. KENNEDY. Yes; I agree with the Senator. I have some figures which show a higher tax rate on textile producers, located in all parts of the country, as compared with the rate the service industries and insurance companies, which are not subject to the same fluctuations in supply and demand, have to pay. Some persons have the idea that employers should be penalized for having a streak of unemployment. It is obviously not their responsibility. It is the economy as a whole which affects them, and they have no control over it.

The Senator is perfectly correct in his point of view.

Mr. MORSE. It is certainly not fair, in such circumstances, to have unemployed individuals suffer losses which, after all, were caused by economic forces in this country over which neither they nor the employer had any control.

Mr. KENNEDY. That is correct. It seems to me, as the Senator from Oregon points out, that the question is broader than that of employer and employee; it is larger than a State problem. We have come a long way since 1935. While the system was put into effect as far as it could have gone in 1935, it seems to me that to consider the question as a State problem, and to permit the duration of a wide disparity of benefits after 18 or 19 years of experience under the act, is simply to fly in the face of all the facts which have become known throughout the country.

Mr. MORSE. I have only 1 or 2 more points I wish to raise at this time, but they deal with hypotheticals which we have been discussing.

Let us consider textiles, automobiles, television, farm machinery, or any other product manufactured in the durable goods industry, in which there has been so much unemployment during the last year. Does the Senator from Massachusetts agree with me that there has been a need for the goods produced by those manufacturers? Does he agree that there has been a need for the farm machinery; that there has been a need, so far as the replacement of cars is concerned, for considerable quantities of automobiles, for which the prospective consumers have not been able to find the purchasing power? Certainly there has been a need for textiles, but the fact is that there has not been the purchasing power in the consuming public as a whole which would be sufficient to justify employers, if they are to operate at a profit, and not at a loss, to operate their plants at that capacity which would keep their

regular staffs employed. Is not that correct?

Mr. KENNEDY. That is correct.

Mr. MORSE. So, again, we are confronted with the old problem of maintaining a relatively high purchasing power on the part of the masses of all our people, if the capitalistic system is to be kept functioning in a healthy state. Is not that true?

Mr. KENNEDY. Yes; that is correct.

Mr. MORSE. Therefore, if the laissez faire doctrine is accepted, or if it is said that the law of supply and demand should be allowed to rule, with all the human suffering that goes along with it, we are simply inviting a further reduction in the purchasing power; and if that reduction develops, the Nation will find itself in what is called a cycle of recession or depression. Is not that true?

Mr. KENNEDY. That is correct. Therefore, I think, as the Senator from Oregon has said, it is of immense concern to all of us, in all parts of the country, that several States are operating with inadequate standards. In those cases the people who receive unemployment compensation, or who should get the benefit of it, will not receive a sufficient amount of money with which to maintain consumer purchasing power. So this is not a matter from which we should be removed; it is a matter which is of direct concern to all of us.

Mr. MORSE. That is why, in my judgment, the Federal Government has, at least, the responsibility of saying that it recognizes a national interest in maintaining a fund for unemployment benefits to the States. But, in return, the States have an obligation to the Federal Government to make certain that they maintain what we are now talking about, namely, a level of decent State standards, so that the State policies do not lead to such a loss in purchasing power that the loss in State X can have a very detrimental effect, as the waves of causation of economic disaster spread across the country. Those waves spreading across the country would not have such a serious detrimental effect if all States maintained high standards of unemployment benefits. As a result of the low standards in State X a great many thousands of persons would lose their purchasing power. Their unemployment benefits would run out at a very early date, and that would begin to set in motion, of course, an economic wave which is bound to result in economic losses in other States. Does the Senator from Massachusetts disagree with that?

Mr. KENNEDY. That is quite true. What is really objectionable is if the inadequate benefits in State X are kept inadequate simply because the State desires to enjoy a competitive advantage over another State, which is maintaining its standards high, and is imposing a far higher tax on its employers. It seems to me that States which provide inadequate benefits are working against the general interest.

Mr. MORSE. The last question I wish to ask, at least at this time, deals with the point which the Senator from Massachusetts has heard me discuss at some of the conferences of a group of Senators of whom the junior Senator from Massachusetts has been a very helpful member. It is the point involving the so-called low-income producers in America, especially the mass of people throughout the country who gross $3,500 a year or less.

As the Senator knows, the number of persons in that class is so large that if they should be taken out of production, across the country, they would bring the whole economic system to a complete standstill in a very, very short period of time. Some economists say it would result in the economic collapse of the United States in 6 months. Whatever the period of time may be—let us call it X period of time—the fact is that those low-income producers are so vital to the operation of the economy that if there should be taken away from them even the low purchasing power which they have our economy would collapse. Is not that true?

Mr. KENNEDY. That certainly is true. The Senator from Oregon was earlier talking about the problem of employment in the Pacific coast industries. It was pointed out in the hearings that in the jewelry and textile industries, in which there has been very chronic unemployment, the average tax rate for those industries was 5.31 percent. This indicates a tremendous disadvantage to the States which suffer from chronic unemployment, particularly in those with less stable industries. As the rates go up, other employers have to bear some of the load, or else have to move out of the State. That is why there is the migration of industry to other areas. The reason why some States maintain lower standards is that they feel it is an attraction for industry. I believe such action is against the whole spirit of the act and the reason for its original passage. Certainly it should be against the public interests at the present time to allow such practices to continue.

As the Senator from Oregon has stated, the people who are denied adequate benefits are those who play a very important role in maintaining a pliable economy.

Mr. MORSE. If the Senator from Massachusetts will permit me to do so, and if there is no objection, I wish to summarize the point of view I have sought to express in the RECORD in my colloquy with the Senator, because I believe it involves a principle which I find so many people overlook when they approach the problem of unemployment compensation.

As the Senator from Massachusetts knows, we are meeting people all the time who say, "Why are you voting for funds to pay people for not working?" I usually laugh, and say, "I am doing it to help you."

It is important to get the average citizen to understand the vested interest he has in unemployment benefits; that it is to the benefit of every citizen in the country that unemployment benefits be paid. The Government should not be parsimonious about it, either, because of the point I have made, namely, that the whole economy benefits from unemployment benefits. The money the doctor collects, the fees which the lawyer takes into his office, the earnings of the retail merchant, the income received in any trade and profession is dependent upon the purchasing power of all the people. I do not care what individual in the economy is selected, his economic well being is dependent, after all, upon the so-called great mass of producers in the low-income brackets at least being able to maintain a standard of living of health and decency. Too many of them receive wages so low that they cannot maintain a minimum standard of living, of health, and decency. I am not talking about the substandard wage group at this particular moment. As to those, I simply say we have a tremendous obligation in this country to see to it that legislative assistance is given to them so that their standard of living can be raised, by making it very clear to the industries in which they work that those industries have no right to operate unless they are willing to pay a wage which permit their workers to enjoy a standard of living of health and decency.

In a great many arbitration decisions, I have put it this way: There is no industry in this country which has the right to expect the rest of the population to subsidize its employees for what is needed over and above the substandard wages that the industry pays. Every industry should be expected to pay wages high enough to give its employees a wage of health and decency. I have heard much criticism of that point of view but more and more people are coming to recognize its soundness. Under our capitalistic system no industry has a right to operate on a substandard wage. That is not free competition. That is not free enterprise. That is exploitation of the economically weak.

I say, ignoring the substandard wage group, there are many, many millions of men and women working in American industry today and receiving wages so low that they gross $3,500 a year or less. They are the ones to whom we need to give particular concern in connection with this matter of unemployment benefits. When unemployment benefits to persons in that group are considered, and the suggestion is made that the unemployment benefits for whatever period of weeks unemployment insurance is going to be paid those persons should approximate their weekly wages, we find uninformed individuals saying, "Why, it is better if that fellow does not work. He is better off if he does not work at all."

The answer to that argument is that the rest of us in this country are not better off at all if he does not work. We are not better off if economic conditions have closed down the industry in which he was employed, and there is no job available to him. We are not better off if the unemployment benefits he receives are so small that he cannot purchase the necessities of life. Most of these workers have a hard time making both ends meet on the pay they get for full-time employment.

That is particularly true, Mr. President, of the millions who receive a gross income of $2,500 or less a year. Individuals who gross $2,500 or less a year today, if they have any family at all, just cannot make ends meet and give their

families that minimum standard of living which we call the standard of living of health and decency.

So I happen to be one who says that my confidence in our free enterprise system is such that I am satisfied that if we look at the question from the standpoint of our national obligations, we should do what we can to see to it that an employee in that group receives unemployment compensation which would come pretty close to his take-home pay if employed. When that much is given to him, we are not giving him very much.

Mr. President, those persons are so vital to the continuation of our economic system that, without their production, it would break down completely. If that premise is true—and one cannot find a reputable economist in this country who would deny it—then I say that the Congress, when it comes to the consideration of legislation such as that now before the Senate, should ask itself this question: What is the legislative philosophy behind this bill? What is it we are seeking to do?

Let me say, Mr. President, we not only are seeking to be of humane help to unemployed persons, but we are seeking also to help ourselves, each and every one of us, be we doctors, lawyers, manufacturers, businessmen, or candlestick makers. We all have a vital interest in seeing to it that a person in the low-income group in this country is able to maintain a purchasing power which will permit him to live in health and decency, because if we do not, then I respectfully submit serious economic trouble will confront us. Unchecked unemployment always creates the danger of a serious recession which may develop into a runaway depression.

I thank the Senator from Massachusetts for answering the questions I asked, and for engaging me in this discussion. I am sure at least the consponsors of the amendment are of one mind as to the philosophy of the substitute amendment offered.

REVISION OF ORGANIC ACT OF VIRGIN ISLANDS — CONFERENCE REPORT

Mr. CORDON. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3378) to revise the Organic Act of the Virgin Islands of the United States. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see RECORD of House proceedings of today.)

Mr. CORDON. Mr. President, I send to the desk, and ask to have printed in the RECORD a statement with respect to the report, chiefly because it refers to the late Senator Butler, of Nebraska, the distinguished former chairman of the Committee on Interior and Insular Affairs, under whose direction the bill was prepared, and who directed the proceedings during conference.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The other body today unanimously adopted the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill, S. 3378, to revise the Organic Act of the Virgin Islands of the United States.

This report is signed by all of the conferees of both Houses. The conferees have reported a clean bill, the substance of which is the Senate measure with certain features approved by the House. The Members of the Senate will recall that the Senate bill was introduced and reported by the late distinguished chairman of the committee, the Honorable Hugh Butler of Nebraska. The former chairman of the committee was greatly interested in trying to improve conditions for our 25,000 fellow American citizens in the Virgin Islands, and in many ways this legislation is a memorial to him.

In substance, enactment of the conferees' bill would be a long step forward in making the people of the Virgin Islands self-sufficient economically. It provides for a grant out of the internal revenue taxes on Virgin Islands products of a sum equal to the amount of revenue collected by the government of the Virgin Islands. This is a "matching funds"' grant, dollar for dollar.

The conferees' bill also makes possible the establishment of a "free port" in the Virgin Islands which the committee was assured would enable these American possessions to compete on a basis of equality with the neighboring British, French, and Dutch Caribbean Islands for the so vital tourist business in the area.

Politically, the conferees' bill would modernize and streamline the present archaic local governmental structure in the Virgin Islands. Thus, by providing better government, it provides more true local self-government.

The present Organic Act of the Virgin Islands dates from 1936. Many of its provisions are characteristic of the extreme paternalism that dominated much of the legislative thinking of the mid-1930's. It also borrowed much from the old Danish colonial system that had been in effect in the islands in one form or another for some two and one-half centuries.

For example, for the mere 25,000 people, with an electorate of less than 10,000, three separate and distinct local governments—three legislative bodies—were set up. The members, elected by popular vote, were left free to determine the length of their sessions and the amount of their compensation. As a result they are in more or less continuous session and have voted themselves annual salaries of up to $2,300. And many of them represent less than 2,000 voters. Last year, legislative costs for the 25,000 persons in the islands approximated $100,000.

One of the worst features of the present act is the absolute veto, in substance, that the legislatures have over the Governor. The Governor, a Presidential appointee, cannot hire a man to sweep the floor of the executive office without obtaining the prior approval of the legislature.

This inevitably has made local government subject to a great deal of petty politicking and has not always led to the appointment of the right man to the right job.

The conferees' bill would change all of this and establish a single popularly elected legislature of 11 members, more directly responsible to the majority of the voters. At the same time it would untie the hands of the Governor.

The present Governor, Hon. Archie A. Alexander of Iowa, was a highly successful businessman and leader before his selection by President Eisenhower. He is capable of bringing honest, efficient, responsible government to the Virgin Islands. But he cannot do so unless we untie his hands, as does this bill.

Therefore I urge adoption of the conference report on S. 3378.

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. LENNON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LENNON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the conference report.

Mr. MORSE. Mr. President, I should like to ask just one question with regard to the conference report. From what my colleague said, I think it is perfectly clear that the report limits itself entirely to the bill on the Virgin Islands. Is that correct?

Mr. CORDON. Yes.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

ORDER FOR RECESS TO 11 A. M. TOMORROW

Mr. KNOWLAND. Mr. President, I ask unanimous consent that when the Senate completes its labors this evening it stand in recess until 11 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954

The Senate resumed the consideration of the bill (H. R. 5173) to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes.

Mr. KENNEDY. Mr. President, I desire to express to the Senator from Oregon my appreciation for his comments. As he stated in his last comment, no employer should have the right to pay substandard wages. Certainly, it seems to me, to be true also that no State should feel satisfied if it maintains payment benefits for a substantially shorter period of time than the period during which other States maintain such benefits, since that simply means that other States and their citizens would be maintaining the general

economy. In addition, those States which make payments for a shorter period of time than their sister States would be exploiting the other States; and in granting to their citizens less than standard minimum benefits, they would be obtaining benefits from the other States for which they were not paying.

So, just as it follows that all employers should maintain the minimum standards, so I believe it follows that all States should maintain the minimum standards. That is the purpose of this amendment, which does no more than put into effect President Eisenhower's recommendation of minimum standards.

Therefore, we come to the question of whether President Eisenhower's recommendation should be translated into action by the States. As I have already stated, none of the 19 State legislatures which have met since then, with the possible exception of the Michigan Legislature, have taken affirmative action to meet the definite minimum standards the President has recommended. Therefore, it seems to me it is up to Congress to put those standards into effect

Mr. President, it can be stated flatly that this bill is not in conformance with the views of the Bureau of the Budget, which represents the views of the President; or with the views of the Department of Labor, which administers this program on the Federal level; or with the views of the Department of the Treasury, which is charged with the responsibility of collecting the unemployment tax.

What this bill does do, as I shall outline in more detail in contrasting its provisions with those of the substitute amendment I have submitted, is to permit an unjustifiable raid on our unemployment compensation benefits, making impossible the necessary Federal aid to the States hardest hit by unemployment, making impossible nationwide standards or adequate levels of unemployment benefits, and in general weakening our jobless-insurance program at a time when it is in critical need of improvement.

The bill grants money to the States, regardless of need, without requiring that such funds be used to increase benefits, instead of reducing taxes, building huge idle reserves, or permitting administrative luxuries over the level regarded by Congress to be proper and efficient. It takes money which thousands of unemployed workers who have exhausted their benefits in the State of Rhode Island could use to bolster their living standards and their purchasing power, and permits it to be used for the construction of a new State employment security bureau building in any State. The Federal Government, which collects that tax, would be given no opportunity to say whether the building was excessively luxurious, and it would be unable to protest the fact that it had already given to the same State all money necessary for administrative expenses, even in excess of the moneys collected within that State by the Federal tax. In short, the Reed bill undermines the basic premises of our unemployment compensation system, and wastes these valuable funds at the very time when they are most in need of preservation.

THE PENDING AMENDMENT

Thus, it is particularly important that the Senate add to this bill the sections contained in the pending amendment, which, by establishing the benefit standards recommended by the administration, strengthen the fundamental structure of this program, and improve the protection it offers to jobless individuals. I particularly want to emphasize the point that these sections establish nationwide standards for the amount and duration of unemployment compensation benefits at levels recommended by President Eisenhower, Secretary of Labor Mitchell, and the Tripartite Federal Advisory Council.

Under these standards, an individual would receive a benefit equal to at least 50 percent of his own weekly wage, except that this is reduced in the case of higher paid employees to a maximum not greater than two-thirds of the State's average weekly wage. This was the maximum recommended by the Department and the Council, although experience may demonstrate that an even higher maximum is necessary in order to carry out the President's request that most individuals receive 50 percent of their own wage.

As President Eisenhower pointed out, this was the level originally intended by the authors of the Social Security Act. The report to the President of the Committee on Economic Security, in 1935, stated that it was basing its cost assumptions upon a benefit rate in all States of 50 percent of wages; that it was including such a provision in its model bill recommended to State legislatures; and that it was setting its maximum benefits at $15 or more which, in those times, was in practically every State 60 percent to 90 percent of average weekly wages.

Mr. JACKSON. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. KENNEDY. I yield.

Mr. JACKSON. First, I should like to commend the distinguished Senator from Massachusetts for the outstanding contribution he has made in an effort to bring the Unemployment Compensation Act up to date. As I understand, his amendment in the nature of a substitute, of which I am happy to be one of the sponsors, in effect carries out the recommendation made some time ago by the President of the United States in urging the States to make these changes. Is that correct?

Mr. KENNEDY. That is quite correct. In its report to the President, the Committee on Economic Security stated, in 1953:

> It is urged, therefore, that all of the States raise the potential duration of unemployment benefits to 26 weeks.

It was also suggested that the States put into effect the same standards of benefits contained in this amendment.

So, in substance, by means of the amendment it is proposed to put into effect the benefits the President recommended that the States put into effect. Since the President made his recommendation, the legislatures of approximately 19 States have met and could have done something about the matter, but they failed to do so.

Therefore, the question is whether the President's recommendation is sound, wisely conceived, and in the best interests of the country. I believe it is. I believe it should be adopted as an amendment to the pending bill.

Mr. JACKSON. The President made that suggestion and recommendation some time ago; did he not?

Mr. KENNEDY. Yes; last February.

Mr. JACKSON. And the President gave the State legislatures an opportunity to meet. I am informed that approximately 19 State legislatures have met, but that no action on this subject has been taken by them.

It seems to me that if the President's recommendation was sound in the beginning—and I believe it was—there is no reason in the world why Congress should not at this time carry out his recommendation, by adopting the amendment in the nature of a substitute which has been offered by the distinguished junior Senator from Massachusetts, on behalf of himself and other Senators.

Mr. KENNEDY. Mr. President, I appreciate the fact that the Senator from Washington is a cosponsor of the amendment and I am grateful for his remarks. As the President pointed out in his report:

> The report to the President of the Committee on Economic Security, in 1935, which led to the adoption of the Unemployment Compensation Act, stated:
>
> "In our calculations a 50-percent compensation rate and a maximum of $15 per week were assumed."

In other words, in figuring out the tables the Committee on Economic Security proceeded on the assumption that benefits would be about 50 percent of wages. The President made an allusion to this report, and since that time, of course, wages have increased substantially and benefits have declined, until now they are less than 33 or 32 percent. Therefore we have fallen behind to a great extent, which fact has had a substantial effect on our economy, with respect to the benefits which were in effect when the Unemployment Compensation Act was passed in 1935.

Mr. JACKSON. Is it not true that certain areas of the United States have been harder hit, and have had to carry a heavier load in this particular area of compensation than have other sections of the United States?

Mr. KENNEDY. Yes; but as I pointed out earlier, this is not a North-South issue, because the State of Mississippi has kept its benefits, in relation to the average wage in that State, higher than has any other State of the Union. Therefore, it would cost the State of Mississippi less to increase its employers' tax than it would cost any other State if the President's standards were met. So this is a matter which affects both North and South. It would cost my State substantially more than it would cost certain other States.

Mr. JACKSON. I understand that; but the substitute has as its objective insuring certain national standards; does it not?

Mr. KENNEDY. That is correct.

Mr. JACKSON. Standards which represent an absolute minimum so far as the carrying on of an adequate program of unemployment compensation insurance is concerned.

Mr. KENNEDY. That is correct. I think the important point for the Senate to realize is that the standards vary greatly. As I pointed out, the State of Arizona pays unemployment compensation for a duration of only 12 weeks. The State of New York pays for 26 weeks. There is a great difference in the duration of the benefits and in the amount of the benefits. In many States, particularly during the 1949 recession, hundreds of thousands of people exhausted their benefits and went on public relief. They were no longer making a contribution toward a strong economy. Therefore, it seems to me that the President's recommendations were most valid and timely, and it seems to me that we can take a long step forward toward putting them in effect.

When Senator Wagner made his speech in 1935 proposing the amendment, he stated that it was based on the assumption that unemployment compensation benefits would be "at a rate equal to about 50 percent of the working wage."

As the President pointed out, that rate has now fallen to 33 percent. So as wages have gone up, it seems to me that it becomes high time for us to do something about unemployment compensation benefits.

Mr. JACKSON. Is it not true that unemployment, when it occurs, is a national problem? The whole philosophy of our unemployment-insurance program in the past has been to recognize unemployment as a national problem, but leaving to the States the opportunity of administering the program in the various communities, subject to Federal standards, because they know best the problems in their own areas, so far as administration is concerned.

Mr. KENNEDY. That is correct.

Mr. JACKSON. The substitute merely pursues that philosophy to its logical conclusion, and strengthens the whole unemployment-insurance program by establishing certain minimum national standards for all 48 States to follow, so as to have a public program administered on a national level, as well as local administration in the States.

Mr. KENNEDY. The Senator from Washington is correct. As he knows, the reason why the unemployment compensation tax was devised was that in 1935 there was a feeling that no one State could afford to put into effect an unemployment-compensation system while other States did not. The manufacturers of the other States would have an unfair competitive advantage over the manufacturers of the State with the high standard. The State with the adequate unemployment-compensation system would be at a distinct disadvantage. Therefore, it was felt that uniformity was desirable.

The same is true today. No State can afford to put into effect ideal benefits if the program costs its manufacturers an excessive amount. Particularly is that true where its competitive position with similar business in other States is adversely affected. Therefore, by providing for a certain platform below which benefits may not go, we would prevent a situation in which industry would flow to the State which pays the least benefits and would reward the State which maintains the lowest benefits. This principle is contained in the minimum wage and many other laws.

Mr. JACKSON. Recognizing unemployment as a national problem, the substitute proposal, it seems to me, pursues that philosophy very effectively in providing certain minimum national standards.

Mr. KENNEDY. That is correct.

Mr. JACKSON. There is nothing in the substitute proposal which does violence to the basic philosophy behind the Unemployment Insurance Act, as provided in the Social Security Act of 1935. Is that correct?

Mr. KENNEDY. That is correct. The program would be administered at the State level. The amendment would permit the States to set the standards of eligibility, the rules for disqualification, and other details. All we seek to do is to set the duration and the payment benefits.

I thank the Senator from Washington for his contribution to the discussion of my amendment.

The report to the President of the Committee on Economic Security in 1935 stated that it was basing its cost assumptions upon a benefit rate in all States of 50 percent of wages; that it was including such a provision in its model bill recommended to State legislatures; and that it was setting its maximum benefits at $15 or more which, in those times, was from 60 to 90 percent of average weekly wages in practically every State.

Unfortunately, State inaction and lack of congressional action has permitted existing standards to fall below that level; and the time has come when the attempt by the Committee on Economic Security to maintain standards at the State level—a plan which they described as "frankly experimental" and which they anticipated would "require numerous changes with experience"—must be amended by Congress in the fashion presented by this amendment, in keeping with their proviso that "the Congress can at any time increase the requirements which State laws must fulfill."

Under this amendment, the maximum primary benefit without dependent allowances would have to be raised in Mississippi only from $30 to $32, and in North Carolina from $30 to $35; but benefit levels in other States have not similarly kept pace with wages; and thus in most States maximum primary benefits would be raised $15, $20, or $25 over their present levels.

The duration of benefits under our amendment is set at 26 weeks, which is the amount recommended by the President and the Secretary of Labor "in order to assure that even in a minor business downturn most workers would remain protected by the program until they could find other jobs." About one-half of our State programs already meet this standard. The Assistant Secretary of Labor in a recent letter to unemployment compensation directors pointed out that "by providing all eligible workers with 26 weeks of benefits, the effectiveness of the program in relieving unemployment distress and as a counterrecessionary device will be greatly strengthened."

The Reed bill, H. R. 5173, contains no standards whatsoever, even in the distribution of Federal funds to the States; and it would negate any possibility of standards by granting States funds above and beyond their needs.

This responsibility for adequate improvements in Federal-State unemployment compensation programs in order to meet the national problems of unemployment and business adjustment cannot be accomplished by urging States to take action individually, when such action may impair their competitive position, vis-a-vis, States which fail to take such action. Moreover, in the 18 years that this law has been on the books, the States have failed to maintain standards adequate to meet the problem. The result has been a burden to the taxpayers by increases in the relief rolls, the exhaustion of the savings and assets of individual employees, and the lowering of individual living standards and purchasing power. About 40,000 workers a week are exhausting their rights under inadequate duration of benefit payments today. In some States, the period is only 16 weeks. In 1949, almost 2 million persons exhausted their rights in a short time, according to the President. Even while benefit payments continue, the average payment is less than $25 a week, which replaces only about $1 out of each $5 in lost wages and salaries, and is not sufficient to permit the unemployed worker to meet his immediate expenses and to pay his bills to the business community.

These inadequacies are not the result of a shortage of funds, inasmuch as large reserve funds have been accumulated to a total of almost $9 billion. It is not a result of the 2.7-percent limit on employer taxation provided by the law; for the average tax paid by employers now is less than half of that level. Whatever the cause of State inaction has been, this experience indicates that Congress can no longer ignore its responsibilities in the field of unemployment insurance. The best and probably the only hope that workers will receive adequate protection during extended periods of unemployment—and no worker prefers an unemployment benefit to wages even if that benefit is two-thirds of his wages—is for Congress to act now to establish standards for payments and payment durations. Unemployment is governed by nationwide economic forces and should be dealt with on a nationwide basis.

Establishment of nationwide standards does not mean complete federalization of unemployment compensation. On the contrary, it stabilizes the program, in contrast to the degree of federalization which would result from the Reed bill. That bill would require State legislatures to appropriate funds raised by Federal tax. It encourages State employment agencies to expand their various administrative services to be subsidized by Federal funds. Its lending provisions require a change in the constitutional structure of many States. Its harsh provisions for repayment would keep some States continually dependent upon Federal loans to replenish the State reserves they are unable to build up. And, finally, those States whose reserves are not adequately aided by this bill, whose benefits may have to be sharply reduced and taxes sharply raised in order to prevent a collapse during heavy unemployment, will certainly demand complete federalization of the entire unemployment-compensation system.

In summarizing the need for more adequate standards of unemployment-compensation benefits, permit me to point out the two primary results of adequate levels cited by President Eisenhower: First, such benefits "can sustain to some degree the earner's way of life as well as his demand for commodities"; and, secondly, they "can help to curb economic decline during an interval of time that allows other stabilizing measures to become effective." These same objectives were endorsed by the Joint Committee on the Economic Report in pointing out the necessity of such action "to relieve individual distress" and "to minimize the loss in consumer demand," regardless of whether the current trend in unemployment improves in the near future.

COST OF THE EISENHOWER STANDARDS

Inasmuch as several Senators have raised questions concerning the cost of these standards, some discussion of this problem is necessary. First, permit me to stress again that these are the recommendations of the administration, which I am confident would not impair the solvency of any State fund or impose a heavy tax burden on any employer. Second, these standards would raise benefits to the same proportionate level at which they were maintained during the 1930's at which time the costs of the program were certainly manageable. Third, it should be remembered that the Reed bill provides that employers in those States which have not repaid their loans in that brief period which the President has deemed excessively harsh would be subject to an annual increase in their tax of 5 percent. Thus, an employer now paying to the Federal Government three-tenths of 1 percent in unemployment tax would find after 4 such years that he was paying 3 times that amount, an increase which the standards contained in this amendment could not possibly bring about. Fourth, I again remind the Senate that if this amendment is adopted, it is my hope that the Senate will also adopt all or part of the larger substitute we have offered, which would provide adequate protection for State reserves through a system of nationwide reinsurance.

Finally, I have been able to obtain rough estimates of the costs of the administration standards to the United States as a whole and to the 10 States which include two-thirds of the employees covered under this law. For the United States as a whole, assuming claim loads and economic conditions to be comparable to those prevailing in 1952, the increase in present costs due to the higher benefit amounts and longer benefit duration recommended by President Eisenhower would total no more than 40 percent. Inasmuch as State reserves are today more than 6 times as high as the average annual benefit payments, a 40-percent increase in cost would not require any increase in the tax rate, at least in the foreseeable future, assuming that the average rate of unemployment fluctuates in a manner similar to that of the last 8 years, during which those reserves have been building up as the result of tax collections greater than expenditures. Indeed, the Reed bill—in section 1201 (A) (1)—does not consider a State fund to be in any serious difficulty unless it is less than the amount of benefits paid out during the previous year. Thus, even if 10 years of the Eisenhower standards reduced the size of State reserves to a level 4 times—instead of 6 times—as much as the amount paid out in benefits in an average year, such State reserves would still be more than adequate and tax levels would not have to be increased.

Moreover, if the maximum 60-percent increase in cost was to be paid for entirely by tax increases, it would mean an increase in the average contribution rate from its present level of 1.3 percent to approximately 2 percent, still well below the normal rate of 2.7 percent.

Similar figures are available on a State-by-State basis. Of course in those 22 or so States that already have the 26 weeks duration, that particular standard will cost nothing; and in a State such as Mississippi where the maximum benefit is already approximately two-thirds of average weekly wages, the cost of that provision would be little, if anything. In those 10 States which constitute 63 percent of covered employment, the range in the total increase in present costs caused by the Eisenhower standards is from 20 percent to 55 percent, except for 1 State where the increase would be 83 percent—and inasmuch as the reserve in that State is nearly 25 times as high as average annual costs, such an increase will hardly make a dent. With but a few exceptions—and admittedly a few States might in a serious recession need assistance through reinsurance—State reserves are at least 4 times as high as average annual costs since World War II, and most of them are 10 or 20 times as high. Moreover, only Rhode Island is maintaining the full 2.7 percent tax rate, with a large proportion of the rest of the States maintaining an average tax rate of less than 1 percent, on which a 40-percent or even an 80-percent increase in cost would have little effect.

CONCLUSION

Our concern, therefore, should not be over the cost of such standards to our State systems, but over the cost of unemployment and inadequate unemployment benefits. These are costly, and dearly so, in terms of living standards, purchasing power, relief rolls, productivity, and community morale and security.

The Senate is to be given the opportunity to vote on whether it favors improved benefits to our unemployed workers, or whether it is opposed to such benefits. The issue is clear, the standards are reasonable, the times critical. Let us demonstrate to the unemployed and to the Nation that we have not forgotten these basic principles of our society.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the junior Senator from Massachusetts [Mr. KENNEDY] for himself and other Senators.

Mr. SALTONSTALL. Mr. President, I understand my colleague has finished his prepared speech on the subject. However, I understand he may wish to summarize his remarks a little tomorrow morning and to answer any question that may be asked of him. Inasmuch as the session of the Senate will begin at 11 o'clock tomorrow morning, I hope my colleague will be on the floor promptly at that time, in order that he may be available to continue his remarks as soon as the morning business has been completed.

Mr. KENNEDY. Mr. President, I shall accompany my colleague to the floor.

AUTHORITY FOR COMMITTEE ON FOREIGN RELATIONS TO FILE REPORT DURING RECESS OF THE SENATE

Mr. SALTONSTALL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be given permission until midnight to file its report on the mutual security authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS TO 11 O'CLOCK A. M. TOMORROW

Mr. SALTONSTALL. Mr. President, in accordance with the order previously entered, I move that the Senate stand in recess until 11 o'clock tomorrow morning.

The motion was agreed to; and (at 6 o'clock and 35 minutes p. m.) the Senate took a recess, the recess being, under the order previously entered, until tomorrow, Tuesday, July 13, 1954, at 11 o'clock a. m.

CONFIRMATION

Executive nomination confirmed by the Senate July 12 (legislative day of July 2), 1954:

POSTMASTER

William P. Gray, to be postmaster at Pleasant Hill, Mo.

HOUSE OF REPRESENTATIVES

MONDAY, JULY 12, 1954

The House met at 12 o'clock noon.

Rev. Benjamin J. Talledge, Congregational Church, Bloomer, Wis., offered the following prayer:

Let us pray.

Our Father God, Thou who art the author and sustainer of life, we thank Thee for this beautiful summer day, also for our Nation and all the rights and privileges we enjoy under our Government. Grant all of us knowledge and wisdom to make possible the best utilization of that with which we are surrounded, that as individuals we may grow and develop physically, socially, mentally, and spiritually.

Help us all to do our tasks well, and to be loyal to Thee as our God, and in our stewardship of life manifest a concern for our fellow men. Amen.

The Journal of the proceedings of Thursday, July 8, 1954, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H. R. 733. An act for the relief of Hildegard H. Nelson;

H. R. 734. An act for the relief of Mihai Handrabura;

H. R. 944. An act for the relief of Mr. and Mrs. Zygmunt Sowinski;

H. R. 1115. An act for the relief of Mrs. Suhula Adata;

H. R. 1762. An act for the relief of Sugako Nakai;

H. R. 2899. An act for the relief of Igor Shwabe;

H. R. 3333. An act for the relief of Julia N. Emmanuel;

H. R. 3624. An act for the relief of Peter M. Leaming;

H. R. 6422. An act to authorize the Secretary of the Army to convey to the Government's grantors certain lands erroneously conveyed by them to the United States;

H. R. 6650. An act for the relief of Joseph Gerny;

H. R. 6998. An act for the relief of Erna White;

H. R. 7132. An act to exempt from taxation certain property of the Veterans of Foreign Wars of the United States in the District of Columbia;

H. R. 7158. An act authorizing the United States Government to reconvey certain lands to S. J. Carver;

H. R. 7500. An act for the relief of Kurt Forsell;

H. R. 7802. An act for the relief of Hanna Werner and her child, Hanna Elizabeth Werner;

H. R. 8692. An act to permit the payment of certain trust accounts to the beneficiary on the death of the trustee by savings and loan, and similar associations in the District of Columbia;

H. R. 8973. An act to amend paragraph 31 of section 7 of the act entitled "An act making appropriations to provide for the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902, as amended;

H. R. 8974. An act to permit investment of funds of insurance companies organized within the District of Columbia in obligations of the International Bank for Reconstruction and Development;

H. R. 9143. An act to repeal the provisions of section 16 of the Federal Reserve Act which prohibits a Federal Reserve bank from paying out notes of another Federal Reserve bank;

H. R. 9561. An act to correct typographical errors in Public Law 368, 83d Congress; and

H. J. Res. 459. Joint resolution to designate the lake to be formed by the completion of the Texarkana Dam and Reservoir on Sulphur River, about 9 miles southwest from Texarkana, Tex., as Lake Texarkana.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills and a joint resolution of the House of the following titles:

H. R. 1673. An act for the relief of James I. Smith;

H. R. 2763. An act to amend the Tariff Act of 1930, so as to modify the duty on the importation of wood dowels, and for other purposes;

H. R. 6080. An act to authorize the appropriation of funds for the construction of certain highway-railroad grade separations in the District of Columbia, and for other purposes;

H. R. 6725. An act to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps;

H. R. 7128. An act to amend the act entitled "An act to provide an immediate revision and equalization of real-estate values in the District of Columbia; also to provide an assessment of real estate in said District in the year 1896 and every third year thereafter, and for other purposes," approved August 14, 1894, as amended;

H. R. 8713. An act to amend section 1 (d) of the Helium Act (50 U. S. C., sec. 161 (d)), and to repeal section 3 (13) of the act entitled "An act to amend or repeal certain Government property laws, and for other purposes," approved October 31, 1951 (65 Stat. 701);

H. R. 9006. An act to amend the act of May 22, 1896, as amended, concerning the loan or gift of works of art and other material;

H. R. 9077. An act to amend section 405 of the District of Columbia Law Enforcement Act of 1953, to make available to the judges of such District the psychiatric and psychological services provided for in such section;

H. R. 9242. An act to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes; and

H. J. Res. 534. Joint resolution to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 120. An act for the relief of Gerasimos Giannatos;

S. 231. An act for the relief of Otmar Sprah;

S. 232. An act for the relief of Hugo Kern;

S. 328. An act for the relief of Casimero Rivera Gutierrez, Teresa Gutierrez, Susana Rivera Gutierrez, Martha Augilera Gutierrez, and Armando Casimero Gutierrez;

S. 673. An act for the relief of Urho Paavo Patoski and his family;

S. 771. An act for the relief of Anni Wolf and her minor son;

S. 808. An act for the relief of Frederick Wiesinger;

S. 810. An act for the relief of Jan E. Tomczycki;

S. 964. An act to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado;

S. 966. An act for the relief of Demitrious Vasililous Karavogeorge;

S. 1212. An act for the relief of Alice Masaryk;

S. 1585. An act to amend the District of Columbia Traffic Act, 1925, as amended;

S. 1611. An act to regulate the election of delegates representing the District of Columbia to national political conventions, and for other purposes;

S. 2380. An act to amend the Mineral Leasing Act of February 25, 1920, as amended;

S. 2381. An act to amend section 27 of the Mineral Leasing Act of February 25, 1920, as amended, in order to promote the development of oil and gas on the public domain;

S. 2387. An act for the relief of Willy Voos and his wife, Alma Voos;

S. 2389. An act to amend the act of December 3, 1942;

S. 2456. An act for the relief of Martin Genuth;

S. 2504. An act for the relief of Elisa Albertina Cioccio Rigazzi or Elisa Cioccio;

S. 2510. An act for the relief of Paul Lewerenz and Margareta Ehrhard Lewerenz;

S. 2512. An act for the relief of Jeannette Kalker and Abraham Benjamin Kalker;

S. 2542. An act for the relief of Glicerio M. Ebuna;

S. 2587. An act for the relief of Domenico Peri;

S. 2635. An act for the relief of Nadeem Tannous and Mrs. Jamile Tannous;

S. 2655. An act to amend the District of Columbia Teachers' Salary Act of 1947, as amended;

S. 2686. An act to amend the act entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia, to provide penalties, to prescribe rules of evidence, and for other purposes," approved July 8, 1932;

S. 2687. An act to authorize the Commissioners of the District of Columbia to designate employees of the District to protect life and property in and on the buildings and grounds of any institution located upon property outside of the District of Columbia acquired by the United States for District sanitoriums, hospitals, training schools, and other institutions;

S. 2798. An act for the relief of Azizollah Azordegan;

S. 2958. An act for the relief of Ida Reissmuller and Johnny Damon Eugene Reissmuller;

S. 3085. An act for the relief of Mrs. Helen Stryk;

S. 3306. An act for the relief of Kang Chay Won;

S. 3329. An act to amend the District of Columbia Police and Firemen's Salary Act of 1953, to correct certain inequities;

S. 3344. An act to amend the mineral leasing laws and the mining laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes;

S. 3464. An act to amend the Communications Act of 1934 in order to make certain provision for the carrying out of the agreement for the Promotion of Safety on the Great Lakes by Means of Radio;

S. 3482. An act to amend the District of Columbia Unemployment Compensation Act, and for other purposes;

S. 3506. An act to repeal the act approved September 25, 1914, and to amend the act approved June 12, 1934, both relating to alley dwellings in the District of Columbia;

S. 3518. An act to amend the laws relating to fees charged for services rendered by the office of the Recorder of Deeds for the District of Columbia and the laws relating to appointment of personnel in such office, and for other purposes;

S. 3546. An act to provide an immediate program for the modernization and improve-

ment of such merchant-type vessels in the reserve fleet as are necessary for national defense;

S. 3558. An act to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," approved March 1, 1907;

S. 3589. An act to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the Bank on the National Advisory Council on International Monetary and Financial Problems and to increase the bank's lending authority;

S. 3681. An act to authorize the Civil Service Commission to make available group life insurance for civilian officers and employees in the Federal service, and for other purposes;

S. 3683. An act to amend the District of Columbia Credit Unions Act;

S. 3697. An act to amend the act of April 6, 1937, as amended, to include cooperation with the Governments of Canada or Mexico or local Canadian or Mexican authorities for the control of incipient or emergency outbreaks of insect pests or plant diseases; and

S. 3699. An act granting the consent of Congress to a compact entered into by the States of Louisiana and Texas relating to the waters of the Sabine River.

The message also announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following title:

S. Con. Res. 75. Concurrent resolution favoring the suspension of deportation of certain aliens.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 2236) entitled "An act for the establishment of a Commission on Area Problems of the Greater Washington Metropolitan Area," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SCHOEPPEL, Mr. BUTLER, and Mr. JOHNSON of Colorado to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 2759) entitled "An act to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes"; requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SMITH of New Jersey, Mr. PURTELL, Mr. GOLDWATER, Mr. HILL, and Mr. LEHMAN to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5731) entitled "An act to authorize the Secretary of the Interior to construct, operate, and maintain certain facilities to provide water for irrigation and domestic use from the Santa Margarita River, Calif., and the joint utilization of a dam and reservoir and other waterwork facilities by the Department of the Interior and the Department of the Navy, and for other purposes."

SPECIAL ORDERS GRANTED

Mr. BROWN of Georgia asked and was given permission to address the House for 15 minutes today, following the legislative program and any special orders heretofore entered.

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 20 minutes today, following the legislative program and any special orders heretofore entered.

AMENDMENT TO ATOMIC ENERGY ACT OF 1946

Mr. COLE of New York. Mr. Speaker, I ask unanimous consent that I may have until midnight tonight to file a report and additional views on the bill, H. R. 9757.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

TIGHTENING LABOR MARKET

Mr. O'HARA of Illinois. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend his remarks, and to include a newspaper article.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. O'HARA of Illinois. Mr. Speaker, I am distressed to hear of the tightening labor market in Chicago. The reports that come to me do not jibe with the rose-colored words of the administration.

The Members of this body, regardless of political affiliation, desire to be accurately informed in order that proper measures may be taken in time to ward off a serious recession. We do not want a repetition of 1929 when in July the Republicans met at Jackson, Mich., to celebrate the achievement of a permanent prosperity and a few months later came the economic explosion plunging the Nation into the darkest years of its history.

This is no time for us to be lulled to quiet slumbers by excessive optimism. If we do nothing and adjourn, hoping that all will be well, complacency later may come to plague us.

The Chicago Sun-Times of this morning carries the news that due to diminishing employment only half as many high school students have succeeded in finding summer jobs as in the summer of 1953 and that college enrollments for this fall have taken a 4 percent drop.

The Sun-Times article follows:

FEWER TEEN-AGERS ABLE TO FIND SUMMER JOBS

(By Ruth Dunbar)

The teen-ager who hoped to earn spending money during summer is having a tough time. A tightening labor market is blamed.

The board of education has issued only half as many work certificates to public and parochial high-school students as it had at this time last year. Certificates are granted after the student has lined up a job.

In June of this year, 3,204 certificates were issued. In the previous June there were 6,143.

NINE THOUSAND THREE HUNDRED FIFTEEN GET JOBS

During the first 6 months of 1954, only 9,315 teen-agers were given certificates, compared with 18,330 for the same period last year.

The Illinois State Employment Service reports that students from practically every high school in Chicago still are seeking summer jobs. Although the agency has done all it can to stir up employment, it is unable to place the youngsters.

The Chicago Park District, which employs many teen-agers as lifeguards and laborers reported it had far more applications than last year.

Kenneth W. Lund, director of child study for public schools, predicted the labor shortage would encourage more students to stay in school until graduation, rather than dropping out to earn easy money.

SEE COLLEGE DROP

The prediction seems to be borne out by summer enrollment in public high schools, which increased from 5,538 last year to 5,630 this term.

However, fewer June high-school graduates are planning to go to college in fall.

A survey shows that 37.7 percent of this year's graduates will enroll in full-time colleges and universities next fall. Last year, the percentage was 41.3. The number who plan to attend part-time has dropped from 11.6 percent last year to 8.9 percent.

WAR-BUILT PASSENGER-CARGO VESSELS

Mr. TOLLEFSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Washington? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. TOLLEFSON, ALLEN of California, RAY, BONNER, and SHELLEY.

SGT. WELCH SANDERS

Mr. JONAS of Illinois. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 5158) for the relief of Sgt. Welch Sanders, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 3, strike out "in excess of 10 percent thereof."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

ESTATES OF OPAL PERKINS AND KENNETH ROSS

Mr. JONAS of Illinois. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 5433) for the relief of the estates of Opal Perkins,

and Kenneth Ross, deceased, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, line 13, strike out "in excess of 10 percent thereof."

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

IMMIGRATION AND NATIONALITY POLICY

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, several days ago an application for a visa by a Greek girl was refused on the ground that at some time or other she had done some illustrating work for a Communist magazine. This, Mr. Speaker, is an example of the kind of sabotage that is taking place every day in an attempt to discredit what is truly a liberal immigration and nationality policy. How a visa could be refused that girl last week, when 3 weeks ago 5 Russian chess players were permitted to come to the United States accompanied by a goon squad of 16 strong-arm police to prevent their defection, certainly indicates to me that an investigation should be made in order to determine who it is in a place of responsibility who is a party to this scheme to sabotage the Immigration and Nationality Act.

HOUSECLEANING IN THE EXECUTIVE DEPARTMENTS

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, what the gentleman from Pennsylvania [Mr. WALTER] said, is unfortunately, all too true. But every time you start to clean house in any of these executive departments, they jump all over you.

I notice in this week's Collier's there is a long, long article about the attempted housecleaning in the Department of State. Apparently the President put someone in down there to clean the rascals out, to use an old expression. But right away along comes this New Deal writer and she just gives them hallelujah—the other way, in reverse.

What I would like to ask the gentleman from Pennsylvania [Mr. WALTER] is, how many of these people, who are doing this dirty work that he is talking about, are holdovers, and why all this kicking every time the administration tries to oust one of them? That is a question that somebody ought to answer.

Mr. WALTER. Does the gentleman want me to answer the question?

Mr. HOFFMAN of Michigan. Yes.

Mr. WALTER. The Republican Party has no corner on virtue and Americanism.

Mr. HOFFMAN of Michigan. That is right.

Mr. WALTER. These people owe no allegiance to either political party.

Mr. HOFFMAN of Michigan. That is right; but every time we try to fire one of them, you find a New Deal writer helping them out and covering up for them.

MILITARY CONSTRUCTION

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 9242) to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. ARENDS, SHAFER, JOHNSON of California, VAN ZANDT, VINSON, KILDAY, and RIVERS.

REENACT AUTHORITY FOR APPOINTMENT OF CERTAIN OFFICERS OF REGULAR NAVY AND MARINE CORPS

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the regular Navy and Marine Corps, with Senate amendments thereto, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. ARENDS, SHAFER, JOHNSON of California, VAN ZANDT, VINSON, KILDAY, and RIVERS.

TWO ADDITIONAL ASSISTANT SECRETARIES OF THE ARMY, NAVY, AND AIR FORCE

Mr. ARENDS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3466) to provide for two additional assistant secretaries of the Army, Navy, and Air Force, respectively.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. VINSON. Mr. Speaker, reserving the right to object, will the gentleman from Illinois [Mr. ARENDS] explain to the committee the purpose of the bill.

Mr. ARENDS. Mr. Speaker, I shall be glad to.

The purpose of S. 3466 is to authorize the appointment of two additional Assistant Secretaries for each of the military departments. If the bill becomes law, each of the military departments will then have a Secretary, an Under Secretary, and four Assistant Secretaries. The Secretary of Defense, Mr. Wilson, specifically requested this legislation and I think he is to be commended for his efforts to bring about greater efficiency in the military departments and the Department of Defense. He is of the opinion that the present organization of the military departments fails to provide for the current organizational needs of these departments and does not permit the military secretaries to divide properly the responsibilities among their civilian assistants.

Secretary Wilson is also of the opinion that two additional secretaries in each of the military departments will do much toward improving the civilian control of each of the military departments as well as increase the efficiency of each of the military departments.

And of probably greater significance is the fact that the additional Assistant Secretaries in each of the military departments will strengthen the operational and functional control of each of the military departments and will permit the Department of Defense to concentrate its activities on the question of overall policy control as originally contemplated by the National Security Act.

One of the new Assistant Secretaries in each of the Departments will be an Assistant Secretary for Financial Management. This Assistant Secretary may also act as comptroller for his department if so designated by the Secretary.

The Committee on Armed Services strongly recommends that in the title of one of the Assistant Secretaries the words "Research and Development" be inserted by administrative action so as to place proper emphasis on the importance of this activity. We recognize, of course, the desirability of flexibility in these matters and have therefore not attempted to designate by law the titles of all of the Assistant Secretaries except that for Financial Management, but we do think each of the military departments should have an Assistant Secretary not only charged with the responsibility for research and development but who also will have within his title the words "Research and Development." This can be done administratively and can be changed if for some reason or other it is desired to place this responsibility in another Assistant Secretary. It is for the latter reason that we have not attempted to tie the hands of the Secretary by designating the title by law, but we do want to emphasize the importance of research and development.

If the proposed legislation becomes law there will be for the Army a Secretary of the Army, an Under Secretary, an Assistant Secretary for Financial Management, an Assistant Secretary for Manpower and Reserve Forces, an Assistant Secretary for Civil-Military Affairs, and an Assistant Secretary for Logistics who will also have the responsibility for

research and development. We recommend to the Secretary that this Assistant Secretary be known as the Assistant Secretary for Logistics and Research and Development.

In the Navy there will be a Secretary, an Under Secretary, and an Assistant Secretary for Financial Management who will also act as comptroller. There will also be an Assistant Secretary for Personnel and Reserve Forces, an Assistant Secretary for Materiel, and an Assistant Secretary for Air, a title already designated by previous law. We recommend to the Secretary that this title be augmented to that of Assistant Secretary for Air and Research and Development.

In the Air Force there will be a Secretary, an Under Secretary, an Assistant Secretary for Financial Management, an Assistant Secretary for Manpower, Personnel, and Reserve Forces, and an Assistant Secretary for Materiel. The fourth Assistant Secretary will be designated as the Assistant Secretary for Research and Development.

The Armed Services Committee thinks this legislation will do much to improve the efficiency of our military departments. We were particularly impressed with the statement made by Mr. Wilson that 20 years ago the total appropriation for the Army and Navy which included the Air Force, was approximately $650 million. Twenty years ago each department had a Secretary, an Under Secretary and two Assistant Secretaries. Today those departments are spending 75 times that amount of money but still only have a Secretary, an Under Secretary, and two Assistant Secretaries. It is obvious that there is considerable justification for the proposed legislation which would authorize the appointment of two additional Assistant Secretaries for each of the military departments.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present. There is no report on this bill here at the desk and no copies of the bill itself.

The SPEAKER. The Chair will count. [After counting.] Eighty-four Members are present, not a quorum.

Mr. HALLECK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 101]

Abbitt	Condon	Frazier
Angell	Cooley	Frelinghuysen
Barden	Coon	Fulton
Barrett	Corbett	Gamble
Becker	Cotton	Gavin
Bender	Coudert	Granahan
Berry	Curtis, Nebr.	Green
Betts	Davis, Ga.	Gwinn
Boland	Dawson, Ill.	Hand
Bonin	Derounian	Harris
Bosch	Dingell	Harrison, Wyo.
Bowler	Dodd	Hart
Bramblett	Dollinger	Harvey
Brooks, La.	Donohue	Hays, Ohio
Buckley	Donovan	Heller
Byrne, Pa.	Fallon	Hillings
Byrnes, Wis.	Feighan	Hinshaw
Camp	Fine	Holtzman
Celler	Fino	Howell
Chatham	Fisher	Hruska
Chudoff	Fogarty	Hunter
Jackson	Miller, Md.	Rooney
Javits	Miller, N. Y.	Roosevelt
Judd	Morgan	Scott
Keating	Morrison	Seely-Brown
Kelley, Pa.	Moulder	Shafer
Kelly, N. Y.	Multer	Sheehan
Keogh	Nelson	Short
Kersten, Wis.	Norblad	Sikes
Kilday	O'Brien, N. Y.	Taylor
King, Pa.	O'Neill	Thompson, Tex.
Klein	Osmers	Tuck
Landrum	Ostertag	Vorys
Lane	Patman	Wainwright
Latham	Patterson	Watts
Lesinski	Perkins	Weichel
Long	Philbin	Wheeler
Lucas	Pillion	Widnall
Lyle	Powell	Wier
McConnell	Preston	Willis
McGregor	Prouty	Wilson, Tex.
Machrowicz	Radwan	Yorty
Meader	Regan	Zablocki
Merrow	Richards	
Metcalf	Riehlman	

The SPEAKER. On this rollcall, 298 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PROVIDING TWO ADDITIONAL ASSISTANT SECRETARIES OF ARMY, NAVY, AND AIR FORCE

The SPEAKER. At the time the point of order of no quorum was made, the gentleman from Georgia [Mr. VINSON] had the floor under a reservation of objection.

Mr. VINSON. Mr. Speaker, I withdraw my reservation of objection to the present consideration of the bill.

Mr. GROSS. Mr. Speaker, reserving the right to object, I should like the answers to a few questions concerning this bill. I do not know that I am going to object to the present consideration of the bill, if I can get a satisfactory explanation. As I understand it, this bill provides for six Assistant Secretaries, is that correct?

Mr. ARENDS. That is correct.

Mr. GROSS. How many Assistant Secretaries does the Department of the Navy now have? How many in other departments of the Military Establishment?

Mr. ARENDS. Two. If the gentleman would like, I have them right here and I can read them off for him. In the Office of the Secretary of Defense, we have the Secretary of Defense, the Deputy and 9 Assistant Secretaries. In the Navy, we have the Secretary, an Under Secretary and two Assistant Secretaries. In the Army, we have a Secretary, 1 Under Secretary, and 2 Assistant Secretaries. In the Air Force, we have a Secretary, 1 Under Secretary, and 2 Assistant Secretaries. In sum total, that means 23 in the regular establishment and adding these 6, we will have 29.

Mr. GROSS. That makes 29 Assistant Secretaries?

Mr. ARENDS. That is Under Secretaries and Assistant Secretaries all told.

Mr. GROSS. How in the world did we get through the Korean war without these additional secretaries? Can the gentleman or someone tell me when we are going to stop this empire building?

Mr. ARENDS. It just seems to me that the operations with the Department of Defense have become so huge that they simply have to have more personnel, if we are going to have efficiency in operation there. Here we are spending approximately $40 billion for the Department of Defense today, and I see no way out of it except to do some of these things if we expect to get a dollar's worth of defense for every dollar we spend. I know no other approach to the problem.

Mr. GROSS. Do we have less or more personnel in the Military Establishment than we had during the Korean war?

Mr. ARENDS. We have less now than we had at that time.

Mr. GROSS. Then why do we have to have these additional Assistant Secretaries?

Mr. ARENDS. They found them necessary. They feel they have to have them. They can do a better job. They want to put them in certain categories where a particular man is fitted into a particular job.

Mr. GROSS. What will be the salary of these Assistant Secretaries?

Mr. ARENDS. Approximately $15,000.

Mr. GROSS. What will be the upkeep of the offices of each of the new Assistant Secretaries, does the gentleman know?

Mr. ARENDS. I think the testimony revealed there will be no additional requirements as far as offices, and so forth and so on, are concerned.

Mr. GROSS. Each one of these new Assistant Secretaries will have to have a secretary, and each one will have to have a certain number of other people working in his office.

Mr. ARENDS. I think they have enough individuals who can take over these positions without having to go into the proposition of more offices and more secretaries and clerks and what have you. I think they can absorb all of this within the organization they now have.

Mr. GROSS. The gentleman is not going to tell me that each of these new Assistant Secretaries is not going to have a secretary and other employees in his office?

Mr. ARENDS. The people down there who are doing that kind of job now are available. We are hopeful, and on the testimony they gave us, we believe they have the help down there which is now available except for these Assistant Secretaries whom they would like to have appointed to head up these various organizations.

Mr. GROSS. I am convinced that these officers and their offices in addition to the salaries of $15,000 for each Assistant Secretary would cost many more thousands of dollars to maintain.

Mr. ARENDS. May I say one thing to the gentleman from Iowa, if he will permit: the gentleman from Iowa is in favor of economy, and so is every other Member of the House of Representatives. I am convinced, and sincerely believe, that the passing of this piece of legislation to permit the additional Assistant Secretaries will result in more efficiency and rather substantial savings to the taxpayers of this country, and, therefore, that is why I support this legislation.

Mr. GROSS. May I point out to the gentleman that I have opposed every

bill to add under secretaries and assistant secretaries to the Government departments since the beginning of last year, because I campaigned in 1952 for a program of economy, for cleaning out superfluous personnel in Government rather than creating new top-bracket offices and adding personnel. That is the reason I cannot understand why this administration would want to add six more assistant secretaries in the Department of Defense.

Somewhat more than a year ago—I believe it was February 1953—a bill was brought here and approved creating a new Under Secretary or Assistant Secretary of State. The sales talk we got at that time was that this new Secretary, if we would just put him on the payroll, would cut down on personnel in the State Department.

Mr. ARENDS. Will the gentleman permit me to make one short statement?

Mr. GROSS. Just let me finish, and then I will be happy to yield.

It is my understanding, as of less than a month ago, that the net reduction in personnel in the State Department, since this new Secretary took office has been 169 people. You cannot very well justify the creation of an Assistant Secretary, and the attendant expense that goes with such an office, to get rid of only 169 people. Certainly it was not necessary to employ a $17,500 official to slice that number from the payroll, especially in the State Department.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. ARENDS. This statement I have here is signed by Mr. Richard A. Buddeke, Assistant Secretary, and the letter says:

> This legislation will not involve additonal fiscal expenditures. It is believed that the efficiency that will result from the more effective organization of the Military Departments along functional lines will not only result in sufficient economies to underwrite the cost of this legislation, but will in the long run save substantial appropriated moneys.

Mr. GROSS. With all due respect to the gentleman from Illinois, and I have great respect for him, this is the same argument we get every time some department wants more Assistant Secretaries.

Mr. TEAGUE. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Texas.

Mr. TEAGUE. I want to congratulate the gentleman from Iowa on the questions he has asked. This bill is certainly too important to be passed by unanimous consent. I am not sure that I would be against it but I think I would; at least it should be debated. Certainly civilians should be in control of our Armed Forces but it seems to me that the trend since the Unification Act has been for civilians to completely take over our Armed Forces. We now have 23 Under and Assistant Secretaries in the Defense Department. I believe the time will come when this Congress will regret having passed the Unification Act. It has brought a shift of power that should be very carefully watched. The gentleman from Iowa is doing his country a service by questioning this bill.

Mr. GROSS. I appreciate the gentleman's contribution.

Mr. MILLER of California. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. MILLER of California. One of these Secretaries in each department will be put in charge of its research and development. That is where we are spending a great deal of money, and that is where we must coordinate if we are going to save money. In my estimation the money that can be saved by having the lines of these rather intangible research and development expenditures coordinated through one Secretary will more than justify the establishment of that office. I congratulate the gentleman, but let me say that the committee went into this very thoroughly, and I feel that it is quite justified.

Mr. GROSS. I yield to the gentleman from Texas [Mr. DOWDY].

Mr. DOWDY. Last year was there not created six new Assistant Secretaries in the Department of Defense under the Reorganization Act?

Mr. GROSS. I do not recall.

Mr. DOWDY. I believe that is right.

Mr. GROSS. I would not be surprised, and the observation by the gentleman from Texas [Mr. DOWDY], is another excellent reason why this proposal should not be hastily considered.

Mr. MARSHALL. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Minnesota.

Mr. MARSHALL. The gentleman realizes that we increased the Assistant Secretaries for the Department of Agriculture. In increasing the Assistant Secretaries for the Department of Agriculture I could not help but note a week ago how active one of those assistants was on the floor of the House. I presume the Defense Department also needs some people to take an active part.

Mr. GROSS. I appreciate the gentleman's observation.

I will say to the gentleman that I voted against the Assistant Secretaries for the Department of Agriculture, just as I will vote against this bill today unless complete justification is shown.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. ARENDS. On the question which the gentleman asked about the reduction in personnel, from 1952 up to the present time there has been a reduction in civilian personnel within the Secretary's Office itself of approximately 500 individuals.

Mr. GROSS. I appreciate that. Then why back-track and add highly paid personnel rather than try to further reduce the expenditures of Government?

The SPEAKER. Is there objection to the request of the gentleman from Illinois [Mr. ARENDS]?

Mr. TEAGUE and Mr. CHELF objected.

Mr. McCORMACK. Mr. Speaker, I know it is not necessary for me to argue to or convince the members of this committee with the importance of military research in all of its aspects—basic, applied, development, and so forth, in our system of national defense.

Without minimizing in the slightest manner any activity of our military organizations I think it can be said that in the world of today and the foreseeable future, military research and the results thereof is of primary importance. Its value cannot be underestimated or undervalued with safety for our country. Research is of such importance that the very safety and future of our country may depend upon the brains and the ability of our scientists in the field of basic research and in the other vitally important fields of research.

There are some persons who honestly feel that military research should be completely divorced from the military. I respect their views and they may be right—but I am not prepared to go so far—and on the facts I have I am not of that school.

Several years ago I became disturbed over the relationship that existed in the field of military research. In this field we have two groups—the military and the scientists and technical—well meaning, but in many respects the opposite of each other—but each necessary to the other, and both as a real team vitally important to the defense and the national interest of our country. One is of necessity a disciplined group, subject to command—the other individualists searching for new discoveries.

Then when new discoveries are made those who pass upon their practicability, and those who develop new discoveries into practical and effective use.

These are very important persons.

It is vitally important that these two groups be developed into a real team in order that the maximum be obtained.

I was so disturbed by the relationship, that existed—of the domination of the scientist by the military, and the results thereof, that on several occasions I spoke to President Truman about it—as well as some members of this committee. Action was slowly taken as a result of which improvement occurred.

For the past several weeks the Riehlman subcommittee of the Committee on Government Operations has been looking into this matter, doing so in executive session and in a most constructive manner. Upon invitation, I have sat in with this subcommittee. It will make its report in the near future.

While progress in this delicate and highly technical and complex field has taken place in the past 2 years, there is room for more improvement.

It is generally recognized that a qualified civilian high in the line of command is of importance and value from an organizational angle in creating the partnership and teamwork necessary to get the maximum result.

We now have an Assistant Secretary of Defense for Research and Development. This only came after opposition from the military, honest, but wrong. I take some pleasure and I hope I am not wrong or presumptious in feeling the unpublicized fight I have been making for the past 4 years, at least I played some part in the establishment of this position.

The creation of this position is due more to congressional leadership than executive leadership.

The establishment of an Assistant Secretary of the Army, of the Navy, and of the Air Force for Research and Development would have a marked influence in cementing the military and the scientists and technical groups into a more effective team; would enable better and more effective coordination, reduce unnecessary and duplicating activities; save money, and with qualified men in those positions have an overall favorable effect that cannot be too strongly emphasized.

The mere fact that the services may not favor my bill or such actions is no justification for failure to act favorably.

In no way criticizing, progress of this kind is invariably made against honest but wrong thinking.

How often has it been that this committee had to use the judgment of its members against the recommendations of a department of our armed services, and in the great majority of such cases experience showed the judgment of the committee was right.

This, I respectfully submit, is another such case. It is another case where congressional leadership and action is necessary and should be taken.

First. Research is a field of vital importance to our national interest.

Second. Every effort should be made to have our military and scientists work as a team with and under the military, not military domination, but understanding leadership and guidance.

Third. The establishment of such positions in itself would remove from this important group the present feeling that as a group they are under suspicion. The other values I have ennumerated would follow.

Mr. Speaker and members of the committee, I feel very strongly on this matter. If what I have said appeals to your judgment I then ask you as a matter of conscience to include in any bill reported out provisions for the establishment of the position of Assistant Secretaries of the Army, Navy, and Air Force for Research and Development.

Such action will be further evidence of leadership on the part of your committee for greater military power. It will be in our national interest.

If what I propose and have said in support of my proposal appeals to your judgment, the failure of favorable recommendations, or even opposition on the part of the Department of Defense, or any of its component departments or services, should not deter you from taking favorable actions.

EXTENSION OF REMARKS

Mr. JONAS of North Carolina. Mr. Speaker, I ask unanimous consent to extend my remarks and include an analysis made at my request by the Bureau of the Budget of the basis upon which the President issued his instruction to the Atomic Energy Commission. I am informed that the material will occupy 4⅔ pages of the RECORD, and the total printing cost would be $396.67. Notwithstanding that, because of the general interest in this subject, I believe the material should be in the RECORD and I ask unanimous consent that it be included notwithstanding the additional cost.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that immediately succeeding the objection made by the gentleman from Texas [Mr. TEAGUE], I be permitted to insert a statement I made before the House Committee on the Armed Services in support of an Assistant Secretary for the Army, Navy, and Air Force, for research and development.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

SPECIAL ORDERS GRANTED

Mr. ABERNETHY asked and was given permission to address the House for 45 minutes tomorrow, following any special orders heretofore entered.

Mr. PHILLIPS asked and was given permission to address the House for 45 minutes on Wednesday next, following any special orders heretofore entered.

Mr. JONAS of North Carolina asked and was given permission to address the House for 30 minutes tomorrow, following any special orders heretofore entered.

COMMITTEE ON RULES

Mr. NICHOLSON. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file reports.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE TEXAS CITY TIN SMELTER

Mr. NICHOLSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 615 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of Senate Concurrent Resolution 79, to express the sense of the Senate on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin. After general debate, which shall be confined to the concurrent resolution, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the concurrent resolution shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the concurrent resolution for amendment, the Committee shall rise and report the concurrent resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the concurrent resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Massachusetts is recognized for 1 hour.

Mr. NICHOLSON. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi [Mr. COLMER], and yield myself such time as I may use.

Mr. Speaker, I rise to urge the adoption of House Resolution 615 which will make in order the consideration of the concurrent resolution Senate Concurrent Resolution 79, to express the sense of the Senate on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin.

Senate Concurrent Resolution 615 provides for an open rule with 1 hour of general debate.

Mr. Speaker, this concurrent resolution would provide that the Government-owned tin smelter at Texas City, Tex., should continue in operation until June 30, 1955, and that the production of tin by the smelter during fiscal year 1955 may be transferred to the national stockpile.

This legislation would also provide, Mr. Speaker, that the President should under authority contained in existing legislation, transfer from the Reconstruction Finance Corporation to another Government agency of his choice the functions, powers, duties, and authority necessary to operate the Texas City tin smelter, because of the expected dissolution of the Reconstruction Finance Corporation.

Finally, Mr. Speaker, this resolution would provide that Congress through an appropriate committee conduct a study and investigation of the advisability of maintaining on a permanent basis a domestic tin industry and the availability of supplies of tin to meet all requirements in times of emergency. Congress would be instructed in this legislation to adopt not later than April 30, 1955, appropriate legislation on the subject.

Mr. Speaker, it seems to me that while this study of just what our long-range policy with regard to tin smelting should be, is being made, that the extension of the authority to continue the smelting facilities in Texas City for another year, is a good plan. It would be foolish to decide what our policy shall be in haste, for we may thus make a wrong decision which would cost us dearly in times of emergency.

I hope that in view of these facts that the Congress will adopt the rule so that we may consider Senate Concurrent Resolution 79.

Mr. COLMER. Mr. Speaker, I have no requests for time on this side.

Mr. NICHOLSON. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent that Senate Concurrent Resolution 79 be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. WOLCOTT]?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the Government tin smelter at Texas City, Tex., should be continued in operation at least until June 30, 1955, under the provisions of section 2 of Public Law 125, 80th Congress.

SEC. 2. It is the further sense of the Congress that the President, pursuant to the authority contained in Public Law 125, 80th Congress, and Public Law 163, 83d Congress, should transfer at the earliest practicable date all functions, powers, duties, and authority under Public Law 125, 80th Congress, as amended (the tin program), from the Reconstruction Finance Corporation to such officer, agency, or instrumentality of the United States as the President may designate.

SEC. 3. It is the further sense of the Congress that pursuant to section 1 (c) of Public Law 125, 80th Congress, an appropriate committee or committees of the Congress shall be designated pursuant to a subsequent resolution to conduct the study and investigation of the matters with respect to tin which were determined by section 1 (c) to be required in the public interest and in promotion of the common defense. Such study shall be concluded and a report with respect thereto filed with each House of Congress no later than March 15, 1955.

SEC. 4. It is the further sense of the Congress that the Congress should, after consideration of the reports filed pursuant to section 3 of this resolution, but not later than April 30, 1955, adopt appropriate legislation with respect to the tin program of the United States.

With the following committee amendment:

Page 1, line 6, after the word "Congress", insert "and the tin produced may be transferred to the national stockpile."

The committee amendment was agreed to.

The Senate concurrent resolution was agreed to.

The title was amended so as to read: "To express the sense of the Congress on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin."

A motion to reconsider was laid on the table.

STRENGTHENING THE BOND WITH OUR WESTERN HEMISPHERE ALLIES

Mr. MULTER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MULTER. Mr. Speaker, it is most gratifying to note the action of this Congress in the adoption of Senate Concurrent Resolution 79, providing for the continuance of the Government tin smelter at Texas City, Tex., and requiring a further study of the entire subject.

The CONGRESSIONAL RECORD and the daily press are filled with words on the subject of how our country can gain friends and keep its allies. In this field of foreign affairs more than anywhere else, actions speak louder than words.

It is the kind of action called for by this resolution that will make friends for us. I agree with our South American friends who urge that this country must do more to back its protestations of friendship.

The continuance of the purchase of tin ore from Bolivia is a positive demonstration of our desire to help our allies in the Western Hemisphere. Such conduct on our part, however, is more than just aid to a neighbor. It is a necessary part of our own defense and our national security. The cost of this program should not be charged to any foreign-aid program. It is an integral part of our own defense program and should be treated as such. At the same time, it helps build up and make stronger our friendly neighbors.

SPECIAL ORDER GRANTED

Mr. JONES of Alabama asked and was given permission to address the House for 15 minutes on tomorrow, following the legislative program and any special orders heretofore entered.

FEDERAL RESERVE ACT

Mr. NICHOLSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 618 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9144) to amend section 24 of the Federal Reserve Act, as amended. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. NICHOLSON. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH], and yield myself such time as I may desire.

Mr. Speaker, I rise to urge the adoption of House Resolution 618 which will make in order the consideration of the bill (H. R. 9144) to amend section 24 of the Federal Reserve Act, as amended.

House Resolution 618 provides for an open rule with 1 hour of general debate on the bill itself.

Mr. Speaker, H. R. 9144 proposes to correct an omission made last year when the Small Business Act of 1953 was enacted. The Small Business Act authorized national banks, as well as State-chartered banks, to participate in loans made by the Small Business Administration.

Section 24 of the Federal Reserve Act imposes certain restrictions on loans secured by real estate which may be made by national banks. However, the limitations of section 24 with respect to real-estate loans made by national banks are not applicable with respect to loans in which the Reconstruction Finance Corporation or the Housing and Home Finance Administrator cooperates.

H. R. 9144 would merely place real-estate loans in which the Small Business Administration cooperates in the same status as similar loans made by the Reconstruction Finance Corporation and the Housing and Home Finance Administrator.

Mr. Speaker, this bill was originally proposed by the Treasury Department in order that maximum participation by national banks in carrying out the purposes of the Small Business Act of 1953 might be achieved.

The Bureau of the Budget has voiced no objection to the provisions contained in the bill, and I hope that the House membership will adopt the rule which will make possible the consideration of this bill.

Mr. SMITH of Virginia. Mr. Speaker, I yield back my time.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the fourth paragraph of section 24 of the Federal Reserve Act, as amended (U. S. C., 1952 edition, title 12, sec. 371), is amended by adding in clause (d) the words "or the Small Business Administration" after the words "the Housing and Home Finance Administrator" and by adding the words "or of the Small Business Act of 1953," after the words "Housing Act of 1948, as amended."

Mr. WOLCOTT. Mr. Speaker, this bill would bring within the purview of the Federal Reserve Act as amended the authority on the part of national banks to participate in real-estate loans to small business. As is recited in the report, this is brought about because of an inadvertence when we passed the small business bill. It merely brings the Small Business Administration in line with the Housing and Home Finance Agency and the other agencies mentioned in the report. It makes it a little easier for small business to make and participate in loans by national banks.

Mr. Speaker, I have no further requests for time on this side.

Mr. SPENCE. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I voted in the committee to report this bill and I am for it, but my vote for it cannot be construed as an approval of the record of the Small Business Administration.

The Small Business Administration was organized in June 1953. It was open for applications in September of that year. I am reliably informed that

up to June 17, this year, there have been 2,146 applications for loans; 39 direct loans have been granted, which totaled $2,180,210. I think it is reasonable to assume that out of those more than 2,000 applications a good many of them complied with the requirements and were entitled to some assistance. I voted for this bill because I hoped it might stimulate this organization to do better in the future than it has in the past. Certainly this record on the face of these figures is not a record to commend them and I hope there will be something of repentance and reform in the future.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. SPENCE. I yield.

Mr. SMITH of Virginia. I was interested in the statement that only 39 loans had been made since this organization was formed and that they had loaned out $2 million. I should like to ask the gentleman, what was the administrative cost of lending the $2 million; how much has it cost to operate that agency?

Mr. SPENCE. I do not have that figure, but I am confident it cost the Small Business Administration more to administer its affairs up to June 17 than it has loaned. They were authorized to lend $250 million.

Mr. SMITH of Virginia. And they loaned $2 million.

Mr. SPENCE. So far by direct loans. There were deferred participations in 45 loans. They have not been serviced yet. The amount there is $1,978,200. There were immediate participations in 9 loans in the amount of $415,550. But added all together, it makes a miserable record for an organization that was created to render a service to the business people of the country that we thought was necessary at that time and is still necessary.

The Reconstruction Finance Corporation might have been maintained as a standby organization. It had a wide experience and a good record in assisting small business. It was discontinued. All of its powers were transferred to the Small Business Administration and this is the record that they have made since September 1953.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield further?

Mr. SPENCE. I yield.

Mr. SMITH of Virginia. Since propounding my question to the gentleman, I am reliably informed that it has cost more in administrative expenses to make the $2 million worth of loans than the total of the loans made. In other words, we have sent more than $2 million to make $2 million worth of loans.

Mr. SPENCE. I think that is obvious.

Mr. SMITH of Virginia. If that is correct—and I am informed that it is—it seems to me that it is about time that we put a stop to this absurdity.

Mr. SPENCE. Mr. Speaker, you must consider this bill as an incentive to the Small Business Administration for repentance and reform. They could do better, and I hope they will. That is the reason I voted to report this bill.

Mr. WOLCOTT. Mr. Speaker, I rise in opposition to the pro forma amendment, in order to clear up the situation. I do not think we should have to be repentant with respect to what the Small Business Administration has been doing. Their activity is not confined to making loans solely. They do a world of good among small business organizations which come to them for help and technical advice, such as is available to most big businesses which have their own research organizations. They spend hundreds of millions of dollars to maintain themselves in a position where, through research and development, they can compete one with the other. The Government has set up the Small Business Administration more to put small business in a position where, through development practices, small business can better compete with big business. So we should not say that the cost of operating the Small Business Administration is more than the amount of the loans.

I might mention also that this Congress has two Select Committees on Small Business. We might as well charge off all of the expense of operating the Select Committees on Small Business of both the Senate and the House against this, to be logical, if that is the guide that we must follow, although it is not the guide and should not be the guide. I do not think anyone in this House would want to eliminate the help which the Small Business Administration gives to small business.

Mr. PHILLIPS. Mr. Speaker, will the gentleman yield?

Mr. WOLCOTT. I yield.

Mr. PHILLIPS. Is it not also a fact that one of the functions of the Small Business Administration is to gather together individuals or groups of small merchants so that they may take advantage of group contracts, an effort which large business is able to do, but which small business can only do by coordination because it costs money?

Mr. WOLCOTT. That is correct.

Mr. SPENCE. Mr. Speaker, will the gentleman yield?

Mr. WOLCOTT. I yield.

Mr. SPENCE. I am not advocating that we abandon it. I am only advocating that they do better in the future than they have in the past. I am not entirely in accord with the statement made by the able chairman of the committee, that advice is a substitute for money when a man is in trouble. I have no doubt that they are profuse with their advice, but when the man came for a loan, and I think the statement I have made will not be controverted, he did not get it.

Mr. WOLCOTT. This bill facilitates the help which small business can get either in the field of loans or research by making it possible for the national banks to make the same type of loans that the Reconstruction Finance Corporation or the Housing and Home Finance Administration is making at the present time.

Mr. McCORMACK. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I have listened with interest to the apologetic remarks of my good friend, the gentleman from Michigan.

Mr. WOLCOTT. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. Mr. Speaker, I shall yield to the gentleman—I want to say I construe the remarks he made to be apologetic.

Mr. WOLCOTT. Mr. Speaker, will the gentleman yield now so that I may answer the statement which he has just made.

Mr. McCORMACK. I yield.

Mr. WOLCOTT. I am not apologizing for the Small Business Administration. I think they have done a splendid job.

Mr. McCORMACK. I construe the gentleman's remarks to be very apologetic, and the gentleman can have his own views, but the fact remains that the Small Business Administration has done very little since its establishment. The further fact remains that when the bill was up here, there were some of us who recognized that there were written into the law limitations upon real action by this Administration. For example, there was a limitation of $150,000 as the extent of a loan. Some of us from New England pointed out that small, independent businesses in New England and particularly in the industrial areas of the country greatly exceeded that amount. I agree that some good can come out of it, and I am satisfied that there will be more good to come out of it in the future than there has been in the past. But when the gentleman from Michigan makes reference to the remarks made on the floor today by other Members, my mind goes back not so many weeks ago when the chairman of the special small business committee, the gentleman from Colorado [Mr. HILL] addressing a meeting of some of the officials in the various regional offices of this Administration, which was held in Washington, severely and properly, I thought, called to their attention the fact that they were making very few loans, and that they would have to form an organization which in cooperation with the banks would more effectively carry out the intent of Congress within the limits of the organic act. I think it is pretty generally understood that we could improve the law we passed, which is now on the statute books. Of course, until that times comes, I do not expect that the so-called small, independent business firms of America are going to get the maximum consideration that they should get, and which they should receive through this governmental action. There is no question but that up to this time, this Administration has not made many loans. The reason why they have not made many loans is very evident.

I am also satisfied, since the gentleman from Colorado [Mr. HILL] made his remarks, and they were very able and constructive remarks, that there has been improvement. But when the gentleman from Michigan undertakes to tell Members of the House that this Administration has been doing an outstanding job, there are some of us who are acquainted with the record up to date who know that it has not been an outstanding job. We are hopeful that as a result of what the gentleman from Colorado [Mr. HILL] said, and I compliment him for the statement he made several weeks ago, that there will be decided improvement. I

am satisfied that since he made his remarks there has been improvement in the right direction.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Illinois.

Mr. YATES. As a matter of fact, it has only been the pushing and the persuasion by congressional committees, the Committee on Appropriations and the Select Committee on Small Business, that the Small Business Administration has made any loans at all. Most of the loans that have been made have not been made directly to small businesses, but the vast majority of them have been in cooperation with banks to the small business of the country.

Mr. McCORMACK. The gentleman is a member of the committee?

Mr. YATES. I am.

Mr. McCORMACK. And as I recall, I sent the gentleman a copy of the CONGRESSIONAL RECORD in which the speech made by our colleague, Mr. HILL, was printed.

Mr. YATES. The gentleman is absolutely correct.

Mr. McCORMACK. It was a very fine speech, but he unmistakably called to their attention the fact that there was keen disappointment in what had been accomplished up to date.

Mr. YATES. That is absolutely correct. As a matter of fact, under the first Administrator appointed to the Small Business Administration, whose name was Packard, I think, there were no loans made. He was opposed to making loans. It was only after Mr. Barnes was appointed in December that they started making any loans at all.

Mr. McCORMACK. Whom did Mr. Barnes succeed?

Mr. WOLCOTT. William Mitchell.

Mr. YATES. I thank the gentleman. It was William Mitchell. He refused to make any loans at all.

Mr. McCORMACK. I understand he is now employed in the Department of Agriculture.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed, and a motion to reconsider was laid on the table.

AMENDMENTS TO THE BANKHEAD-JONES FARM TENANT ACT

Mr. NICHOLSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 617 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 1276) to amend the Bankhead-Jones Farm Tenant Act in order to increase the interest rate on loans made under title I of such act, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Agriculture now in the bill, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. NICHOLSON. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH].

Mr. Speaker, I rise to urge the adoption of House Resolution 617 which will make in order the consideration of the bill S. 1276, to amend the Bankhead-Jones Farm Tenant Act in order to increase the interest rate on loans made under title I of such act.

House Resolution 617 provides for an open rule, waiving points of order and allows for the consideration of the committee substitute amendment as an original bill for purposes of amendment. One hour of general debate is provided on the bill.

Mr. Speaker, S. 1276 will provide the authorization for the Secretary of Agriculture to increase the rate of interest to not to exceed 5 percent in the case of direct FHA loans and to a base interest of not in excess of 4 percent on insured mortgage loans. The report on this bill emphasizes the fact that the present interest rates on FHA loans are too low and thus compete unfairly with private loans. Consequently instead of farmers coming to the FHA people as a last resort when they fail to get loans through private lending means, the farmers come directly to the FHA which was never the intent of the Congress when the enabling legislation was originally passed.

S. 1276 will also permit the Farmers' Home Administration to make direct loans on the security of second mortgages where the combined value of the first and second mortgages does not exceed the value of the farm as certified by county FHA officials.

The third major provision in this bill, Mr. Speaker, will permit FHA to sell property acquired by foreclosure to corporations engaged in the farming business if such a corporation makes the highest bid for the property.

Lastly, S. 1276 extends to several recent acts of Congress the authority for FHA to protect its investment and its security by making advances to protect its loans or bidding for and purchasing at foreclosure sale or otherwise property which has been pledged as security for such loans.

Mr. Speaker, S. 1276 includes many provisions recommended by the Secretary of Agriculture. The Committee on Agriculture has studied this whole subject at great length and I hope that the rule will be adopted and that the bill itself will pass.

Mr. SMITH of Virginia. Mr. Speaker, I have no requests for time.

Mr. NICHOLSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

REVISED ORGANIC ACT OF THE VIRGIN ISLANDS

Mr. SAYLOR. Mr. Speaker, I call up the conference report on the bill (S. 3378) to revise the Organic Act of the Virgin Islands of the United States, and ask unanimous consent that the statement of the managers on the part of the House may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2105)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3378) to revise the Organic Act of the Virgin Islands of the United States, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill, and agree to the same with an amendment as follows: In lieu of the matter inserted by the House amendment insert the following: "That this Act may be cited as the 'Revised Organic Act of the Virgin Islands'.

"SEC. 2. (a) The provisions of this Act, and the name 'Virgin Islands' as used in this Act, shall apply to and include the territorial domain, islands, cays, and waters acquired by the United States through cession of the Danish West Indian Islands by the convention between the United States of America and His Majesty the King of Denmark entered into August 4, 1916, and ratified by the Senate on September 7, 1916 (39 Stat. 1706). The Virgin Islands as above described are hereby declared an unincorporated territory of the United States of America.

"(b) The government of the Virgin Islands shall have the powers set forth in this Act and shall have the right to sue by such name and in cases arising out of contract, to be sued: *Provided*, That no tort action shall be brought against the government of the Virgin Islands or against any officer or employee thereof in his official capacity without the consent of the legislature constituted by this Act.

"The capital and seat of government of the Virgin Islands shall be located at the city of Charlotte Amalie, in the island of Saint Thomas.

"BILL OF RIGHTS

"SEC. 3. No law shall be enacted in the Virgin Islands which shall deprive any person of life, liberty, or property without due process of law or deny to any person therein equal protection of the laws.

"In all criminal prosecutions the accused shall enjoy the right to be represented by counsel for his defense, to be informed of the nature and cause of the accusation, to have a copy thereof, to have a speedy and public trial, to be confronted with the wit-

nesses against him, and to have compulsory process for obtaining witnesses in his favor.

"No person shall be held to answer for a criminal offense without due process of law, and no person for the same offense shall be twice put in jeopardy of punishment, nor shall be compelled in any criminal cause to give evidence against himself; nor shall any person sit as judge or magistrate in any case in which he has been engaged as attorney or prosecutor.

"All persons shall be bailable by sufficient sureties in the case of criminal offenses, except for first-degree murder or any capital offense when the proof is evident or the presumption great.

"Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishment inflicted.

"No law impairing the obligation of contracts shall be enacted.

"No person shall be imprisoned or shall suffer forced labor for debt.

"All persons shall have the privilege of the writ of habeas corpus and the same shall not be suspended except as herein expressly provided.

"No ex post facto law or bill of attainder shall be enacted.

"Private property shall not be taken for public use except upon payment of just compensation ascertained in the manner provided by law.

"The right to be secure against unreasonable searches and seizures shall not be violated.

"No warrant for arrest or search shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

"Slavery shall not exist in the Virgin Islands.

"Involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted by a court of law, shall not exist in the Virgin Islands.

"No law shall be passed abridging the freedom of speech or of the press or the right of the people peaceably to assembly and petition the government for the redress of grievances.

"No law shall be made respecting an establishment of religion or prohibiting the free exercise thereof.

"No person who advocates, or who aids or belongs to any party, organization, or association which advocates, the overthrow by force or violence of the government of the Virgin Islands or of the United States shall be qualified to hold any office of trust or profit under the government of the Virgin Islands.

"No money shall be paid out of the Virgin Islands treasury except in accordance with an Act of Congress or money bill of the legislature and on warrant drawn by the proper officer.

"The contracting of polygamous or plural marriages is prohibited.

"The employment of children under the age of sixteen years in any occupation injurious to health or morals or hazardous to life or limb is prohibited.

"Nothing contained in this Act shall be construed to limit the power of the legislature herein provided to enact laws for the protection of life, the public health, or the public safety.

"FRANCHISE

"SEC. 4. The franchise shall be vested in residents of the Virgin Islands who are citizens of the United States, twenty-one years of age or over. Additional qualifications may be prescribed by the legislature: *Provided, however,* That no property, language, or income qualification shall ever be imposed upon or required of any voter, nor shall any discrimination in qualification be made or based upon difference in race, color, sex, or religious belief.

"LEGISLATIVE BRANCH

"SEC. 5. (a) The legislative power and authority of the Virgin Islands shall be vested in a legislature, consisting of one house, to be designated the 'Legislature of the Virgin Islands', herein referred to as the legislature.

"(b) The legislature shall be composed of eleven members to be known as senators. The Virgin Islands shall be divided into three legislative districts, as follows: The District of Saint Thomas, comprising Saint Thomas, Hassel, Water, Savana, Inner Brass, Outer Brass, Hans Lollik, Little Hans Lollik, Great Saint James, Little Saint James, and Capella Islands, Thatch Cay and adjacent islets and cays; the District of Saint Croix, comprising Saint Croix and Buck Islands and adjacent islets and cays; and the District of Saint John, comprising Saint John and Flanagan Islands, Grass, Mingo, Lovango, and Congo cays and adjacent islets and cays. Two senators shall be elected by the qualified electors of the District of Saint Thomas; two senators shall be elected by the qualified electors of the District of Saint Croix; and one senator shall be elected by the qualified electors of the District of Saint John. The other six senators shall be senators at large and shall be elected by the qualified electors of the Virgin Islands from the Virgin Islands as a whole: *Provided,* That in the election of senators at large, each elector shall be entitled to vote for two candidates, and the candidates receiving the largest number of votes shall be declared elected up to the number to be elected at that election. The order of names upon the ballot for each office shall be determined by lot among the candidates: *Provided,* That the Government Secretary or his designee is authorized to draw for a candidate who does not appear in person, or by authorized representative, at the drawing of lots.

"SEC. 6. (a) The term of office of each member of the legislature shall be two years. The term of office of each member shall commence on the second Monday in April following his election: *Provided, however,* That the term of office of each member elected in November 1954 shall commence on the second Monday in January 1955 and shall continue until the second Monday in April 1957.

"(b) No person shall be eligible to be a member of the legislature who is not a citizen of the United States, who has not attained the age of twenty-five years, who is not a qualified voter in the Virgin Islands, who has not been a bona fide resident of the Virgin Islands for at least three years next preceding the date of his election, or who has been convicted of a felony or of a crime involving moral turpitude and has not received a pardon restoring his civil rights. Federal employees and persons employed in the legislative, executive or judicial branches of the government of the Virgin Islands shall not be eligible for membership in the legislature.

"(c) All officers and employees charged with the duty of directing the administration of the electoral system of the Virgin Islands and its representative districts shall be appointed in such manner as the legislature may by law direct.

"(d) No member of the legislature shall be held to answer before any tribunal other than the legislature for any speech or debate in the legislature and the members shall in all cases, except treason, felony, or breach of the peace, be privileged from arrest during their attendance at the sessions of the legislature and in going to and returning from the same.

"(e) Each member of the legislature shall be paid the sum of $600 annually, one-third on the second Monday in April, one-third on the second Monday in May, and one-third at the close of the regular session: *Provided, however,* That each member of the legislature shall be paid for the regular session commencing on the second Monday in January 1955, the sum of $600 annually, one-third on the second Monday in January, one-third on the second Monday in February, and one-third at the close of that session. Each member of the legislature who is away from the island of his residence shall also receive the sum of $10 per day for each day's attendance while the legislature is actually in session, in lieu of his expenses for subsistence, and shall be reimbursed for his actual travel expenses in going to and returning from each session, or period thereof, for not to exceed a total of eight round trips during any calendar year. The salaries, per diem, and travel allowances of the members of the legislature shall be paid by the Government of the United States.

"(f) No member of the legislature shall hold or be appointed to any office which has been created by the legislature, or the salary or emoluments of which have been increased, while he was a member, during the term for which he was elected, or during one year after the expiration of such term.

"(g) The legislature shall be the sole judge of the elections and qualifications of its members, shall have and exercise all the authority and attributes, inherent in legislative assemblies, and shall have the power to institute and conduct investigations, issue subpena to witnesses and other parties concerned, and administer oaths. The rules of the Legislative Assembly of the Virgin Islands existing on the date of approval of this Act shall continue in force and effect for sessions of the legislature, except as inconsistent with this Act, until altered, amended, or repealed by the legislature.

"(h) The Governor of the Virgin Islands shall fill any vacancy in the office of a member of the legislature by appointment. If the vacant office is that of a senator from a district, the person appointed shall be a resident of the district from which the member whose office is vacant was elected. If the vacant office is that of a senator at large the person appointed may be a resident of any part of the Virgin Islands. In any case, the person appointed shall serve for the remainder of the unexpired term.

"SEC. 7. (a) Regular sessions of the legislature shall be held annually, commencing on the second Monday in April, and shall continue in regular session for not more than sixty consecutive calendar days in any calendar years: *Provided, however,* That the annual session for 1955 shall commence on the second Monday in January 1955, and shall continue in regular session for not more than sixty consecutive calendar days. The Governor may call special sessions of the legislature at any time when in his opinion the public interests may require it, but no special session shall continue longer than fifteen calendar days, and the aggregate of such special sessions during any calendar year shall not exceed thirty calendar days. No legislation shall be considered at any special session other than that specified in the call therefor or in any special message by the Governor to the legislature while in such session.

"(b) Sessions of the legislature shall be held in the capital of the Virgin Islands at Charlotte Amalie, Saint Thomas.

"SEC. 8. (a) The legislative authority and power of the Virgin Islands shall extend to all subjects of local application not inconsistent with this Act or the laws of the United States made applicable to the Virgin Islands, but no law shall be enacted which would impair rights existing or arising by virtue of any treaty or international agreement entered into by the United States, nor shall the lands or other property of nonresidents be taxed at a higher rate than the lands or other property of residents.

"(b) The legislature of the government of the Virgin Islands may cause to be issued on

behalf of said government bonds or other obligations for a specific public improvement or specific public undertaking authorized by an act of the legislature, which bonds or obligations shall be payable solely from the revenues directly derived from and attributable to such specific public improvement or public undertaking. The total amount of such revenue bonds which may be issued and outstanding for all such improvements or undertakings at any one time shall not be in excess of $10,000,000. Bonds issued pursuant to this subsection may bear such date or dates, may be in such denominations, may mature in such amounts and at such time or times, not exceeding thirty years from the date thereof, may be payable at such place or places, may carry such registration privileges as to either principal and interest, or principal only, and may be executed by such officers and in such manner as shall be prescribed by the government of the Virgin Islands. Said bonds shall be sold at public sale and shall be redeemable after five years without premium. In case any of the officers whose signatures appear on the bonds or coupons shall cease to be such officers before delivery of such bonds, such signature, whether manual or facsimile shall, nevertheless, be valid and sufficient for all purposes, the same as if such officers had remained in office until such delivery. The bonds so issued shall bear interest at a rate not to exceed 5 per centum per annum, payable semiannually. All such bonds shall be sold for not less than the principal amount thereof plus accrued interest. All such bonds issued by the government of the Virgin Islands or by its authority shall be exempt as to principal and interest from taxation by the Government of the United States, or by the government of the Virgin Islands, or by any State, Territory, or possession, or by any political subdivision of any State, Territory, or possession, or by the District of Columbia. Such bonds shall under no circumstances constitute a general obligation of the Virgin Islands or of the United States. The legislature shall have no power to incur any indebtedness which may be a general obligation of said government.

"(c) The laws of the United States applicable to the Virgin Islands on the date of approval of this Act, including laws made applicable to the Virgin Islands by or pursuant to the provisions of the Act of June 22, 1936 (48 Stat. 1807), and all local laws and ordinances in force in the Virgin Islands, or any part thereof, on the date of approval of this Act shall, to the extent they are not inconsistent with this Act, continue in force and effect until otherwise provided by the Congress: *Provided*, That the legislature shall have power, when within its jurisdiction and not inconsistent with the other provisions of this Act, to amend, alter, modify, or repeal any local law or ordinance, public or private, civil or criminal, continued in force and effect by this Act, except as herein otherwise provided, and to enact new laws not inconsistent with any law of the United States applicable to the Virgin Islands, subject to the power of Congress to annul any such Act of the legislature.

"(d) The President of the United States shall appoint a commission of seven persons, at least three of whom shall be residents of the Virgin Islands, to survey the field of Federal statutes and to make recommendations to the Congress within twelve months after the date of approval of this Act as to which statutes of the United States not applicable to the Virgin Islands on such date should be made applicable to the Virgin Islands, and as to which statutes of the United States applicable to the Virgin Islands on such date should be declared inapplicable. The members of the commission shall receive no salary for their service on the commission, but under regulations and in amounts prescribed by the Secretary of the Interior, they may be paid, out of Federal funds, reasonable per diem fees, and allowances in lieu of subsistence expenses, for attendance at meetings of the commission, and for time spent on official business of the commission, and their necessary travel expenses to and from meetings or when upon such official business, without regard to the Travel Expense Act of 1949.

"(e) The Secretary of the Interior shall arrange for the preparation, at Federal expense, of a code of laws of the Virgin Islands, to be entitled the 'Virgin Islands Code', which shall be a consolidation, codification and revision of the local laws and ordinances in force in the Virgin Islands. When prepared, the Governor shall submit it, together with his recommendations, to the legislature for enactment. Upon the enactment of the Virgin Islands Code it and any supplements to it shall be printed, at Federal expense, by the Government Printing Office as a public document.

"SEC. 9 (a) The quorum of the legislature shall consist of seven of its members. No bill shall become a law unless it shall have been passed at a meeting, at which a quorum was present, by the affirmative vote of a majority of the members present and voting, which vote shall be by yeas and nays.

"(b) The enacting clause of all acts shall be as follows: 'Be it enacted by the Legislature of the Virgin Islands'.

"(c) The Governor shall submit at the opening of each regular session of the legislature a message on the state of the Virgin Islands and a budget of estimated receipts and expenditures, which shall be the basis of the appropriation bills for the ensuing fiscal year, which shall commence on the first day of July.

"(d) Every bill passed by the legislature shall, before it becomes a law, be presented to the Governor. If the Governor approves the bill, he shall sign it. If the Governor disapproves the bill, he shall, except as hereinafter provided, return it, with his objections, to the legislature within ten days (Sundays excepted) after it shall have been presented to him. If the Governor does not return the bill within such period, it shall be a law in like manner as if he had signed it, unless the legislature by adjournment prevents its return, in which case it shall be a law if signed by the Governor within thirty days after it shall have been presented to him; otherwise it shall not be a law. When a bill is returned by the Governor to the legislature with his objections, the legislature shall enter his objections at large on its journal and proceed to reconsider the bill. If, after such reconsideration, two-thirds of all the members of the legislature agree to pass the bill, it shall be presented anew to the Governor. If he then approves it, he shall sign it; if not, he shall within ten days after it has been presented to him transmit it to the President of the United States. If the President approves the bill, he shall sign it. If he disapproves the bill, he shall return it to the Governor, so stating, and it shall not be a law. If the President neither approves nor disapproves the bill within ninety days from the date on which it is transmitted to him by the Governor, the bill shall be a law in like manner as if the President had signed it. If any bill presented to the Governor contains several items of appropriation of money, he may object to one or more of such items, or any part or parts, portion or portions thereof, while approving the other items, parts, or portions of the bill. In such a case he shall append to the bill, at the time of signing it, a statement of the items, or parts or portions thereof, to which he objects, and the items, or parts or portions thereof, so objected to shall not take effect.

"(e) If at the termination of any fiscal year the legislature shall have failed to pass appropriation bills providing for payment of the obligations and necessary current expenses of the Government of the Virgin Islands for the ensuing fiscal year, then the several sums appropriated in the last appropriation bills for the objects and purposes therein specified, so far as the same may be applicable, shall be deemed to be reappropriated item by item.

"(f) The legislature shall keep a journal of its proceedings and publish the same. Every bill passed by the legislature and the yeas and nays on any question shall be entered on the journal.

"(g) Copies of all laws enacted by the legislature shall be transmitted within fifteen days of their enactment by the Governor to the Secretary of the Interior and by him annually to the Congress of the United States.

"SEC. 10. The next general election in the Virgin Islands shall be held on November 2, 1954. At such time there shall be chosen the entire membership of the legislature as herein provided. Thereafter the general elections shall be held on the first Tuesday after the first Monday in November, beginning with the year 1956, and every two years thereafter. The Municipal Council of Saint Thomas and Saint John, and the Municipal Council of Saint Croix, existing on the date of approval of this Act, shall continue to function until January 10, 1955, at which time all of the functions, property, personnel, records, and unexpended balances of appropriations and funds of the governments of the municipality of Saint Thomas and Saint John and the municipality of Saint Croix shall be transferred to the government of the Virgin Islands.

"EXECUTIVE BRANCH

"SEC. 11. The executive power of the Virgin Islands shall be vested in an executive officer whose official title shall be the "Governor of the Virgin Islands", and shall be exercised under the supervision of the Secretary of the Interior. The Governor of the Virgin Islands shall be appointed by the President, by and with the advice and consent of the Senate, and shall hold office at the pleasure of the President and until his successor is chosen and qualified. The Governor shall maintain his official residence in the Government House of Saint Thomas during his official incumbency, free of rent, and while in Saint Croix may reside in Government House on Saint Croix free of rent. He shall have general supervision and control of all the departments, bureaus, agencies, and other instrumentalities of the executive branch of the government of the Virgin Islands. He may grant pardons and reprieves and remit fines and forfeitures for offenses against the local laws, and may grant respites for all offenses against the laws of the United States applicable in the Virgin Islands until the decision of the President can be ascertained. He may veto any legislation as provided in this Act. He shall appoint all officers and employees of the executive branch of the government of the Virgin Islands, except as otherwise provided in this or any other Act of Congress, and shall commission all officers that he may be authorized to appoint. He shall be responsible for the faithful execution of the laws of the Virgin Islands and the laws of the United States applicable in the Virgin Islands. Whenever it becomes necessary he may call upon the commanders of the military and naval forces of the United States in the islands, or summon the posse comitatus, or call out the militia, to prevent or suppress violence, invasion, insurrection, or rebellion; and he may, in case of rebellion or invasion, or imminent danger thereof, when the public safety requires it, suspend the privilege of the writ of habeas corpus, or place the islands, or any part thereof, under martial law, until communication can be had with the President and the President's decision thereon made known. He shall annually, and at such other times

as the President or the Congress may require, make official report of the transactions of the government of the Virgin Islands to the Secretary of the Interior, and his said annual report shall be transmitted to the Congress. He shall perform such additional duties and functions as may, in pursuance of law, be delegated to him by the President, or by the Secretary of the Interior. He shall have the power to issue executive regulations not in conflict with any applicable law. He may attend or may designate another person to represent him at the meetings of the legislature, may give expressions to his views on any matter before that body, and may recommend bills to the legislature.

"SEC. 12. The President shall appoint a Government Secretary for the Virgin Islands. He shall have custody of the seal of the Virgin Islands and shall countersign and affix such seal to all executive proclamations and all other executive documents. He shall record and preserve the laws enacted by the legislature. He shall promulgate all proclamations and orders of the Governor and all laws enacted by the legislature. He shall have such executive powers and perform such other duties as may be assigned to him by the Governor.

"SEC. 13. The Governor may appoint an administrative assistant who shall reside in Saint Croix and an administrative assistant who shall reside in Saint John. These administrative assistants shall perform such duties as may be assigned to them by the Governor. In making such appointments, preference shall be given to qualified residents of the Virgin Islands.

"SEC. 14. In case of a vacancy in the office of Governor or the disability or temporary absence of the Governor, the Government Secretary shall have all the powers of the Governor.

"SEC. 15. The Secretary of the Interior may from time to time designate the head of an executive department of the government of the Virgin Islands to act as Governor in the case of a vacancy in the offices, or the disability or temporary absence, of both the Governor and the Government Secretary, and the person so designated shall have all the powers of the Governor for so long as such condition continues.

"SEC. 16. (a) The Governor shall, within one year after the date of approval of this Act, reorganize and consolidate the existing executive departments, bureaus, independent boards, agencies, authorities, commissions, and other instrumentalities of the government of the Virgin Islands or of the municipal governments into not more than nine executive departments, except for independent bodies whose existence may be required by Federal law for participation in Federal programs. The head of each executive department shall be designated as the Commissioner thereof, and the Commissioner of Finance shall be bonded. No other department, bureau, independent board, agency, authority, commission, or other instrumentality shall be created, organized, or established by the Governor or the legislature, without the prior approval of the Secretary of the Interior, unless required by Federal law for participation in Federal programs.

"(b) The Governor shall, from time to time, after complying with the provisions of subsection (a) of this section, examine the organization of the executive branch of the government of the Virgin Islands, and shall make such changes therein, subject to the approval of the legislature, not inconsistent with this Act, as he determines are necessary to promote effective management and to execute faithfully the purposes of this act and the laws of the Virgin Islands.

"(c) The heads of the executive departments created by this act shall be appointed by the Governor, with the advice and consent of the legislature. Each shall hold office during the continuance in office of the Governor by whom he is appointed and until his successor is appointed and qualified, unless sooner removed by the Governor. Each shall have such powers and duties as may be prescribed by the legislature.

"SEC. 17. (a) The Secretary of the Interior shall appoint a government comptroller who shall receive a salary of not to exceed $12,500 per annum. The government comptroller shall hold office for a term of ten years and until his successor is appointed and qualified unless sooner removed by the Secretary of the Interior for cause. The government comptroller shall not be eligible for reappointment.

"(b) The government comptroller shall audit and settle all accounts and claims pertaining to the revenues and receipts from whatever source of the government of the Virgin Islands and of funds derived from bond issue; and he shall audit and settle, in accordance with law and administrative regulations, all expenditures of funds and property pertaining to the government of the Virgin Islands including those pertaining to trust funds held by the government of the Virgin Islands.

"(c) It shall be the duty of the government comptroller to bring to the attention of the proper administrative officer failures to collect amounts due the government, and expenditures of funds or property which in his opinion are extravagant, excessive, unnecessary, or irregular.

"(d) It shall be the duty of the government comptroller to certify to the Secretary of the Interior the net amount of government revenues which form the basis for Federal grants for the civil government of the Virgin Islands.

"(e) The decisions of the government comptroller shall be final except that appeal therefrom may be taken by the party aggrieved or the head of the department concerned within one year from the date of the decision, to the Governor, which appeal shall be in writing and shall specifically set forth the particular action of the government comptroller to which exception is taken with the reasons and the authorities relied upon for reversing such decision.

"(f) If the Governor confirms the decision of the government comptroller, then relief may be sought by appeal to the legislature or suit in the District Court of the Virgin Islands if the claim is otherwise within its jurisdiction.

"(g) The government comptroller is authorized to communicate directly with any person having claims before him for settlement, or with any department officer or person having official relation with his office. He may summon witnesses and administer oaths.

"(h) As soon after the close of each fiscal year as the accounts of said fiscal year may be examined and adjusted, the government comptroller shall submit to the Governor of the Virgin Islands an annual report of the fiscal condition of the government, showing the receipts and disbursements of the various departments and agencies of the government.

"(i) The government comptroller shall make such other reports as may be required by the Governor of the Virgin Islands, the Comptroller General of the United States, or the Secretary of the Interior.

"(j) The office of the government comptroller shall be under the general supervision of the Secretary of the Interior, but shall not be a part of any executive department in the government of the Virgin Islands.

"SYSTEM OF ACCOUNTS

"SEC. 18. The Governor shall establish and maintain systems of accounting and internal control designed to provide—

"(a) full disclosure of the financial results of the government's activities;

"(b) adequate financial information needed for the government's management purposes;

"(c) effective control over and accountability for all funds, property, and other assets for which the government is responsible, including appropriate internal audit; and

"(d) reliable accounting results to serve as the basis for preparation and support of the government's request for the approval of the President or his designated representative for the obligation and expenditure of the internal revenue collections as provided in section 26, the Governor's budget request to the legislature, and for controlling the execution of the said budget.

"SEC. 19. The office and activities of the Government Comptroller of the Virgin Islands shall be subject to review annually by the Comptroller General of the United States, and report thereon shall be made by him to the Governor, the Secretary of the Interior, and to the Congress.

"SEC. 20. (a) The Governor shall receive an annual salary at the rate provided for Governors of Territories and possessions in the Executive Pay Act of 1949.

"(b) The Government Secretary, the heads of the executive departments, and the members of the immediate staffs of the Governor and the Government Secretary, shall receive annual salaries at rates established by the Secretary of the Interior in accordance with the standards provided in the Classification Act of 1949.

"(c) The salaries of the Governor, the Government Secretary, and the members of their immediate staffs shall be paid by the United States. The salaries of the government comptroller and the heads of the executive departments shall be paid by the government of the Virgin Islands; and if the legislature shall fail to make an appropriation for such salaries, the salaries theretofore fixed shall be paid without the necessity of further appropriations therefor.

"JUDICIAL BRANCH

"SEC. 21. The judicial power of the Virgin Islands shall be vested in a court of record to be designated the 'District Court of the Virgin Islands', and in such court or courts of inferior jurisdiction as may have been or may hereafter be established by local law.

"SEC. 22. The District Court of the Virgin Islands shall have the jurisdiction of a district court of the United States in all causes arising under the Constitution, treaties and laws of the United States, regardless of the sum or value of the matter in controversy. It shall have general original jurisdiction in all other causes in the Virgin Islands, exclusive jurisdiction over which is not conferred by this Act upon the inferior courts of the Virgin Islands. When it is in the interest of justice to do so the district court may on motion of any party transfer to the district court any action or proceeding brought in an inferior court and the district court shall have jurisdiction to hear and determine such action or proceeding. The district court shall also have appellate jurisdiction to review the judgments and orders of the inferior courts of the Virgin Islands to the extent now or hereafter prescribed by local law.

"SEC. 23. The inferior courts now or hereafter established by local law shall have exclusive original jurisdiction of all civil actions wherein the matter in controversy does not exceed the sum or value of $500, exclusive of interest and costs, all criminal cases wherein the maximum punishment which may be imposed does not exceed a fine of $100 or imprisonment for six months, or both, and all violations of police and executive regulations, and they shall have original jurisdiction, concurrently with the district court, of all actions, civil or criminal,

jurisdiction of which may hereafter be conferred upon them by local law. Any action or proceeding brought in the district court which is within the jurisdiction of an inferior court may be transferred to such inferior court by the district court in the interest of justice. The inferior courts shall hold preliminary investigations in charges of felony and charges of misdemeanor in which the punishment that may be imposed is beyond the jurisdiction granted to the inferior courts by this section, and shall commit offenders to the district court and grant bail in bailable cases. The rules governing the practice and procedure of the inferior courts and prescribing the duties of the judges and officers thereof, oaths and bonds, the times and places of holding court, and the procedure for appeals to the district court shall be as may hereafter be established by the district court. The rules governing disposition of fines, costs, and forfeitures, enforcement of judgments, and disposition and treatment of prisoners shall be as established by law or ordinance in force on the date of approval of this Act or as may hereafter be so established.

"SEC. 24. The President shall, by and with the advice and consent of the Senate, appoint a judge for the District Court of the Virgin Islands, who shall hold office for the term of eight years and until his successor is chosen and qualified, unless sooner removed by the President for cause. The salary of the judge of the district court shall be at the rate prescribed for judges of the United States district courts. Whenever it is made to appear that such an assignment is necessary for the proper dispatch of the business of the District Court the Chief Judge of the Third Judicial Circuit of the United States may assign a circuit or district judge of the Third Circuit, or the Chief Justice of the United States may assign any other United States circuit or district judge with the consent of the judge so assigned and of the chief judge of his circuit, to serve temporarily as a judge of the District Court of the Virgin Islands. The compensation of the judge of the district court and the administrative expenses of the court shall be paid from appropriations made for the judiciary of the United States. The Attorney General shall, as heretofore, appoint a marshal and one deputy marshal for the Virgin Islands to whose office the provisions of chapter 33 of title 28, United States Code, shall apply.

"SEC. 25. The Virgin Islands consists of two judicial divisions; the Division of Saint Croix, comprising the island of Saint Croix and adjacent islands and cays, and the Division of Saint Thomas and Saint John, comprising the islands of Saint Thomas and Saint John and adjacent islands and cays. The district court shall hold sessions in each division at such time as the court may designate by rule or order, at least once in three months in each division. The rules of practice and procedure heretofore or hereafter promulgated and made effective by the Supreme Court of the United States pursuant to section 2072 of title 28, United States Code, in civil cases, section 2073 of title 28, United States Code, in admiralty cases, and section 30 of the Bankruptcy Act in bankruptcy cases, shall apply to the District Court of the Virgin Islands and to appeals therefrom. All offenses shall continue to be prosecuted in the District Court by information as heretofore except such as may be required by local law to be prosecuted by indictment by grand jury.

"SEC. 26. In any criminal case originating in the district court, no person shall be denied the right to trial by jury on the demand of either party. If no jury is demanded the case shall be tried by the judge of the district court without a jury, except that the judge may, on his own motion, order a jury for the trial of any criminal action. The legislature may provide for trial in misdemeanor cases by a jury of six qualified persons.

"SEC. 27. The President shall, by and with the advice and consent of the Senate, appoint a United States attorney for the Virgin Islands, who shall hold office for the term of four years and until his successor is chosen and qualified, unless sooner removed by the President for cause. The United States attorney, by himself or the assistant United States attorney, shall conduct all legal proceedings, civil and criminal, to which the Government of the United States or the government of the Virgin Islands is a party in the District Court of the Virgin Islands and in the inferior courts of the Virgin Islands. Offenses against the laws of the Virgin Islands shall be prosecuted in the name of the government of the Virgin Islands. The United States attorney shall perform his duties under the supervision and direction of the Attorney General of the United States. The Attorney General may appoint one assistant United States attorney. The Attorney General may authorize the employment of necessary clerical assistants. The compensation of the district attorney and his assistant and employees shall be fixed by the Attorney General and their salaries and the other necessary expenses of the office shall be paid from appropriations made to the Department of Justice. In the case of a vacancy in the office of the district attorney, the District Court of the Virgin Islands may appoint a district attorney to serve until the vacancy is filled. The order of appointment by the court shall be filed with the clerk of the court.

"FISCAL PROVISIONS

"SEC. 28. (a) The proceeds of customs duties, the proceeds of the United States income tax, the proceeds of any taxes levied by the Congress on the inhabitants of the Virgin Islands, and the proceeds of all quarantine, passport, immigration, and naturalization fees collected in the Virgin Islands, less the cost of collecting all of said duties, taxes, and fees, shall be covered into the treasury of the Virgin Islands, and shall be available for expenditure as the Legislature of the Virgin Islands may provide: *Provided*, That the term 'inhabitants of the Virgin Islands' as used in this section shall include all persons whose permanent residence is in the Virgin Islands, and such persons shall satisfy their income tax obligations under applicable taxing statutes of the United States by paying their tax on income derived from all sources both within and outside the Virgin Islands into the treasury of the Virgin Islands: *Provided further*, That nothing in this Act shall be construed to apply to any tax specified in section 3811 of the Internal Revenue Code.

"(b) Subchapter B of chapter 28 of the Internal Revenue Code is amended by adding to section 3350 thereof the following subsection:

"'(c) DISPOSITION OF INTERNAL REVENUE COLLECTIONS.—Beginning with the fiscal year ending June 30, 1954, and annually thereafter, the Secretary of the Treasury shall determine the amount of all taxes imposed by, and collected during the fiscal year under, the internal revenue laws of the United States on articles produced in the Virgin Islands and transported to the United States. The amount so determined less 1 per centum and less the estimated amount of refunds or credits shall be subject to disposition as follows:

"'(1) There shall be transferred and paid over to the government of the Virgin Islands from the amounts so determined a sum equal to the total amount of the revenue collected by the government of the Virgin Islands during the fiscal year, as certified by the Government Comptroller of the Virgin Islands. The moneys so transferred and paid over shall constitute a separate fund in the treasury of the Virgin Islands and may be expended as the legislature may determine: *Provided*, That the approval of the President or his designated representative shall be obtained before such moneys may be obligated or expended.

"'(ii) There shall also be transferred and paid over to the government of the Virgin Islands during each of the fiscal years ending June 30, 1955, and June 30, 1956, the sum of $1,000,000, or the balance of the internal revenue collections available under this subsection (c) after payments are made under the preceding paragraph (1), whichever amount is greater. The moneys so transferred and paid over shall be deposited in the separate fund established by the preceding paragraph (i), but shall be obligated or expended for emergency purposes and essential public projects only, with the prior approval of the President or his designated representative.

"'(iii) Any amounts remaining shall be deposited in the Treasury of the United States as miscellaneous receipts.

"'If at the end of any fiscal year the total of the Federal contribution made under (i) above at the beginning of that fiscal year has not been obligated or expended for an approved purpose, the balance shall continue available for expenditure during any succeeding fiscal year, but only for approved emergency relief purposes and essential public projects as provided in (ii) above. The aggregate amount of moneys available for expenditure for emergency relief purposes and essential public projects only, including payments under (ii) above, shall not exceed the sum of $5,000,000 at the end of any fiscal year. Any unobligated or unexpended balance of the Federal contribution remaining at the end of a fiscal year which would cause the moneys available for emergency relief purposes and essential public projects only to exceed the sum of $5,000,000 shall thereupon be transferred and paid over to the Treasury of the United States as miscellaneous receipts.'

"(c) Section 42 of the Trade Mark Act of 1946 (60 Stat. 440, 15 U. S. C., 1952 edition, sec. 1124), and section 526 of the Tariff Act of 1930 (46 Stat. 741, 19 U. S. C., 1952 edition, sec. 1526), shall not apply to importations into the Virgin Islands of genuine foreign merchandise bearing a genuine foreign trademark, but shall remain applicable to importations of such merchandise from the Virgin Islands into the United States or its possessions; and the dealing in or possession of any such merchandise in the Virgin Islands shall not constitute a violation of any registrant's right under said Trade Mark Act.

"(d) There shall be levied, collected, and paid upon all articles coming into the United States or its possessions from the Virgin Islands the rates of duty which are required to be levied, collected, and paid upon like articles imported from foreign countries, and the internal revenue taxes imposed by section 3350 of title 26, United States Code: *Provided*, That all articles, the growth or product of, or manufactured in, such islands, from materials grown or produced in such islands or in the United States, or both, or which do not contain foreign materials to the value of more than 50 per centum of their total value, upon which no drawback of custom duties has been allowed therein, coming into the United States from such islands shall be admitted free of duty. In determining whether such a Virgin Islands article contains foreign material to the value of more than 50 per centum, no material shall be considered foreign which, at the time the Virgin Islands articles is entered, or withdrawn from warehouse, for consumption, may be imported

into the continental United States free of duty generally.

"MISCELLANEOUS PROVISIONS

"SEC. 29. All officials of the government of the Virgin Islands shall be citizens of the United States. Every member of the legislature of the Virgin Islands and all officers and employees of the government of the Virgin Islands shall before entering upon the duties of their respective offices, or, in the case of persons in the employ of the government of the Virgin Islands on the effective date of this Act, then within sixty days of the effective date thereof, make a written statement in the following form:

"'I, ----------, do solemnly swear (or affirm) that I will support, obey, and defend the Constitution and laws of the United States applicable to the Virgin Islands and the laws of the Virgin Islands, and that I will discharge the duties of ---------- with fidelity.

"'And I do further swear (or affirm) that I do not advocate, nor am I knowingly a member of any organization that advocates, the overthrow of the Government of the United States or of the Virgin Islands by force or violence or other unconstitutional means, or seeking by force or violence to deny other persons their rights under the Constitution and laws of the United States applicable to the Virgin Islands or the laws of the Virgin Islands.

"'And I do further swear (or affirm) that I will not so advocate nor will I knowingly become a member of such organization during the period that I am an employee of the Virgin Islands.'

"SEC. 30. All reports required by law to be made by the Governor to any official of the United States shall hereafter be made to the Secretary of the Interior, and the President is hereby authorized to place all matters pertaining to the government of the Virgin Islands under the jurisdiction of the Secretary of the Interior, except matters relating to the judicial branch of said government which on the date of approval of this Act are under the supervision of the Director of the Administrative Office of the United States Courts, and the matters relating to the United States Attorney and the United States Marshal which on the date of approval of this Act are under the supervision of the Attorney General.

"SEC. 31. (a) The Secretary of the Interior shall be authorized to lease or to sell upon such terms as he may deem advantageous to the Government of the United States any property of the United States under his administrative supervision in the Virgin Islands not needed for public purposes.

"(b) The government of the Virgin Islands shall continue to have control over all public property that is under its control on the date of approval of this Act.

"SEC. 32. Section 6 of the Act of August 30, 1890 (26 Stat. 414, 416), as amended (21 U. S. C., 1946 edition, sec. 104) is further amended by inserting the words 'and the admission into the Virgin Islands' immediately following the word 'Texas', so that such section will read as follows:

"'The importation of cattle, sheep, and other ruminants, and swine, which are diseased or infected with any disease, or which shall have been exposed to such infection within sixty days next before their exportation, is prohibited: *Provided*, That the Secretary of Agriculture, within his discretion and under such regulations as he may prescribe, is authorized to permit the admission from Mexico into the State of Texas and the admission into the Virgin Islands of cattle which have been infested with or exposed to ticks upon being freed therefrom. Any person who shall knowingly violate the foregoing provision shall be deemed guilty of a misdemeanor and shall, on conviction, be punished by a fine not exceeding $5,000, or by imprisonment not exceeding three years, and any vessel or vehicle used in such unlawful importation within the knowledge of the master or owner of such vessel or vehicle that such importation is diseased or has been exposed to infection as herein described, shall be forfeited to the United States.'

"SEC. 33. Section 2 of the Act of February 2, 1903 (32 Stat. 791, 792), as amended (21 U. S. C., 1946 edition, sec. 111), is hereby further amended by striking out the period and adding at the end thereof the following: ': *Provided*, That no such regulations or measures shall pertain to the introduction of live poultry into the Virgin Islands of the United States.'.

"SEC. 34. This Act shall take effect upon its approval, but until its provisions shall severally become operative as herein provided, the corresponding legislative, executive, and judicial functions of the existing government shall continue to be exercised as now provided by law or ordinance, and the incumbents of all offices under the government of the Virgin Islands shall continue in office until their successors are appointed and have qualified unless sooner removed by competent authority. The enactment of this Act shall not affect the term of office of the judge of the District Court of the Virgin Islands in office on the date of its enactment.

"SEC. 35. There are hereby authorized to be appropriated annually by the Congress of the United States such sums as may be necessary and appropriate to carry out the provisions and purposes of this Act.

"SEC. 36. If any clause, sentence, paragraph, or part of this Act, or the application thereof to any person, or circumstances, is held invalid, the application thereof to other persons, or circumstances, and the remainder of the Act, shall not be affected thereby."

And the House agree to the same.

RUSSELL B. LONG,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to S. 3378, revising the Organic Act of the Virgin Islands of the United States, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report, namely:

Section 1 provides that the act may be cited as the "Revised Organic Act of the Virgin Islands."

Section 2, in subsection (a), provides that the act shall apply to the Virgin Islands, defines the term "Virgin Islands" and describes the Virgin Islands as an unincorporated territory of the United States. Subsection (b) provides that the government of the Virgin Islands may sue, in cases arising out of contract, and except for a tort action in connection with which the legislature has not given its consent, be sued. It also provides that the capital of the Virgin Islands shall be at Charlotte Amalie, St. Thomas.

Section 3 provides a bill of rights which is in considerable extent similar to the Bill of Rights of the United States Constitution and parallels the bill of rights, in somewhat different order, contained in the existing Virgin Islands Organic Act. The Senate provision, providing that no person who advocates or who aids or belongs to any party, organization, or association which advocates the overthrow by force or violence of the government of the Virgin Islands or of the United States, shall be qualified to hold any office of trust or profit under the government of the Virgin Islands, was agreed to.

Section 4 provides that the franchise shall be vested in Virgin Islands residents who are American citizens. It further provides that the legislature may prescribe additional qualifications but that no property, language, or income qualifications shall be imposed and that no discrimination shall be based upon race, color, sex, or religious belief. The Senate conferees agreed to the inclusion of language as one of the qualifications that shall not be imposed on voters.

Section 5 vests legislative power and authority in the Legislature of the Virgin Islands, provides for the division of the islands into legislative districts, and for the election of 5 senators therefrom and for 6 senators-at-large. The Senate conferees agreed to the designation of members of the legislature as senators instead of as representatives and also receded from their earlier stipulation that candidates' names should appear alphabetically on the first 500 ballots printed and thereafter be alternated on each succeeding group of 500 ballots. Instead, they agreed to the House provision that such order on the ballot shall be determined by lot among the candidates. The House conferees receded to the Senate's demands that in the election of senators-at-large, each elector shall be entitled to vote for 2 candidates instead of the originally proposed 4.

Section 6, in subsection (a), provides 2-year terms of office for each senator commencing on the second Monday in April following his election. The conferees agreed to the House proposal that the term of office of each senator elected in November 1954 shall commence on the second Monday in January 1955 and shall continue until the second Monday in April 1957. Subsection (b) prescribes eligibility of requirements for senators; subsection (c) provides that persons directing the administration of the electoral system shall be appointed as the legislature directs. Subsection (d) provides for legislative immunity; subsection (e) provides for payments to the senators of $600 annually as follows: One-third on the second Monday in April, one-third on the second Monday in May, and one-third at the close of the regular session. It further provides, however, that since the next regular session commences on the second Monday in January 1955, one-third of the annual sum will be paid on the second Monday in January, one-third on the second Monday in February, and one-third at the close of that session. The Senate agreed to the House provision that travel expenses for not to exceed a total of eight round trips in going to and returning from each session of the legislature, or period thereof, shall be paid by the Government of the United States, as will salaries and per diem of members of the legislature; subsection (f) limits the positions which senators may hold or to which they may be appointed; subsection (g) sets forth certain legislative powers; and subsection (h) provides that the Governor of the Virgin Islands shall fill vacancies in the legislature. In this instance the conferees adopted the Senate proposal that the Governor instead of the judge of the district court should make such appointments.

Section 7 provides for regular sessions of 60 days per annum, commencing on the second Monday in April. It was agreed that the annual session for 1955 shall commence on the second Monday in January. This section also empowers the Governor to call special sessions of the legislature but provides that no such session shall continue longer than 15 calendar days nor shall the aggregate of such special sessions during any calendar year exceed 30 calendar days.

Section 8, in subsection (a), describes the extent of the legislature's power and stipulates that lands and other property of nonresidents may not be taxed at a higher rate than the lands or other property of residents. It further provides that public indebtedness of the Virgin Islands shall be limited to 10 percent of the aggregate tax valuation of the property in the Virgin Islands. Subsection (b) authorizes the issuance of revenue bonds for public improvements, subject to certain limitations specified therein. Subsection (c) provides that the laws of the United States applicable to the Virgin Islands and local laws and ordinances in force in the Virgin Islands or any part thereof on the date of the approval of this act, shall continue to apply. Subsection (d) provides for the appointment of a seven-man commission to make recommendations to the Congress with regard to the application of Federal laws to the Virgin Islands. Subsection (e) provides for the codification of Virgin Islands laws at Federal expense.

Section 9, subsection (a), prescribes the quorum of the legislature; subsection (b) prescribes the enacting clause of the acts of the legislature. Subsection (c) provides for the Governor's message to the legislature on the state of the Virgin Islands and for the presentation of the annual financial budget for the fiscal year commencing on the 1st day of July. Subsection (d) sets forth the procedures for executive approval of legislative measures, provides for the Governor's veto, and, in certain circumstances, for the President's consideration of the bills which the Governor has vetoed. Subsection (e) provides that if the legislature fails to pass certain appropriation bills, the sums appropriated in the last preceding appropriation bills shall be deemed to be reappropriated. Subsection (f) provides that a journal of legislative proceedings shall be kept and published. Subsection (g) provides for the transmission within 15 days of the laws enacted by the legislature to the Secretary of the Interior and subsequently to the Congress of the United States.

Section 10 provides for general elections every 2 years. The first election shall be held on November 2, 1954, and thereafter on the first Tuesday after the first Monday in November, beginning with the year 1956. It further provides that the functions and records of the Municipal Councils of St. Thomas and St. John and of St. Croix shall be transferred to the government of the Virgin Islands.

Section 11 vests executive power in the Governor of the Virgin Islands, who will be appointed by the President and exercise his powers under the supervision of the Secretary of the Interior. The Governor shall reside in the Government House on St. Thomas during his official incumbency, free of rent, and while in St. Croix may reside in the Government House there, free of rent. These rent-free stipulations were agreed to at the request of the Senate conferees. This section also defines the functions and powers of the Governor and provides that, except as otherwise expressly stated, he shall appoint all officers and employees of the executive branch of the government of the Virgin Islands.

Section 12 provides for the appointment of a Government Secretary for the Virgin Islands and describes his primary functions. The House conferees receded from their original provision to require the Government Secretary to reside in St. Croix during his official incumbency and to serve as Administrator of St. Croix without additional compensation.

Section 13 is a new section which provides for the appointment of an administrative assistant for each of the islands of St. Croix and St. John. It specifies that, in making such appointments, preference shall be given to qualified residents of the Virgin Islands. This section was added in response to a general feeling that the Governor should have a personal representative on each of the major outlying islands.

Section 14 combines sections 13 and 14 of the House bill and provides that in the event of disability or temporary absence of the Governor, the Government Secretary shall have all the powers of the Governor.

Section 15 provides that in the event of disability or temporary absence of the Governor and the Government Secretary, the Secretary of the Interior may designate the head of an executive department of the government of the Virgin Islands to act in their stead.

Section 16, in subsection (a), provides that within a year after this act becomes effective the Governor shall reorganize and consolidate the executive branch of the Virgin Islands into not more than nine executive departments and generally prohibits the creation of additional executive departments. The Senate conferees receded to the House request that these executive departments include the following: A department of finance, the head of which shall be designated the commissioner of finance; a department of public works, the head of which shall be designated as the commissioner of public works; a department of education, the head of which shall be designated as the commissioner of education; a department of travel, commerce and industry, the head of which shall be designated the commissioner of travel, commerce and industry; a department of health and welfare, the head of which shall be designated as the commissioner of health and welfare; a department of agriculture and labor, the head of which shall be designated as the commissioner of agriculture and labor; and the department of public safety, the head of which shall be designated as the commissioner of public safety. Subsection (b) provides that after the reorganization of the executive branch, the Governor shall, from time to time, examine the executive branch of the government of the Virgin Islands and subject to the approval of the legislature make such changes, not inconsistent with this act, as are necessary. Subsection (c) provides for the appointment of the heads of the executive departments by the Governor with the advice and consent of the legislature.

Section 17, in subsection (a), provides for the appointment by the Secretary of the Interior of a government comptroller to hold office for a term of 10 years unless sooner removed for cause. He shall receive not to exceed $12,500 annually and shall not be eligible for reappointment. Subsections (b) through (d) describe the powers and duties of the government comptroller. Subsection (e) provides that the comptroller's decisions shall be final except for an appeal to the Governor and subsection (f) provides a further appeal to the District Court of the Virgin Islands. Subsection (g) provides that the government comptroller may communicate directly with persons having claims or business with him and that he may summon witnesses and administer oaths. Subsections (h) and (i) provide for reports by the government comptroller; and subsection (j) provides that the comptroller's office shall be under the supervision of the Secretary of the Interior and shall not be a part of any executive department in the government of the Virgin Islands.

Section 18: The House conferees agreed to accept the systems of accounting and internal control proposed by the Senate conferees. These systems must meet certain standards specified therein.

Section 19 provides for the annual review by the Comptroller General of the United States of the office and activities of the government comptroller, with a report thereon to be submitted by the former to the Governor, the Secretary of the Interior, and to the Congress.

Section 20, in subsection (a), provides a salary for the Governor in accordance with existing law; subsection (b) provides for the establishment by the Secretary of the Interior of rates of salaries for others in the executive branch of the Virgin Islands; and in subsection (c) provides for the payment of the salaries of the Governor, the Government Secretary and members of their immediate staffs, by the United States, and those of the government comptroller and the heads of the executive departments by the government of the Virgin Islands.

Section 21 vests the judicial powers of the Virgin Islands in the District Court of the Virgin Islands and in inferior courts created by local law.

Section 22 provides that the District Court of the Virgin Islands shall have the jurisdiction of a district court in the United States, as well as certain local jurisdiction, both original and appellate. The House conferees agreed to the Senate proposal that certain suggestions made by the Honorable Albert B. Maris of the Third Circuit Court be accepted. These suggestions include the stipulation that the District Court of the Virgin Islands shall have jurisdiction over all causes arising under the Constitution, treaties, and laws of the United States regardless of the sum or value of the matter in controversy. The House also agreed to the Senate's request to accept the provision that, when it is in the interest of justice to do so, the district court may, on motion of any party, transfer to the district court any action or proceeding brought in an inferior court and the district court shall have jurisdiction to hear and determine such action or proceeding.

Section 23 provides that the inferior courts shall have jurisdiction concurrent with the district court of civil actions in which the matter in controversy does not exceed $500 and in criminal cases in which the maximum punishment which might be imposed does not exceed a fine of $500 or 6 months' imprisonment, or both. The House conferees agreed to accept the Senate's language, which provides that the inferior courts shall have original jurisdiction concurrently with the district court and that any action or proceeding brought in the district court, which is within the jurisdiction of an inferior court, may be transferred to such inferior court by the district court in the interest of justice.

Section 24 provides for the appointment by the President, with the consent of the Senate, of a judge for the District Court of the Virgin Islands to hold office for an 8-year term, and for the temporary assignment of judges of the District Court of the Virgin Islands by the chief judge of the Third Judicial Circuit of the United States. It also provides for the appointment of a marshal and a deputy marshal for the Virgin Islands by the Attorney General of the United States. It is the opinion of the conference committee that in times of emergency the marshal may appoint as many deputies as may be required. In the matter of the temporary assignment of judges to the District Court of the Virgin Islands, the House agreed to the Senate's proposal.

Section 25 provides for two judicial divisions and for the holding of sessions of the district court in both. Upon the suggestion of Judge Maris, both the Senate and the House amended this section from the floor to include the following provision: "The rules of practice and procedure heretofore or hereafter promulgated and made effective by the Supreme Court of the United States pursuant to section 2072 of title 28, United States Code, in civil cases, section 2073 of title 28, United States Code, in admiralty cases, and section 30 of the Bankruptcy Act in bankruptcy cases, shall apply to the District Court of the Virgin Islands and to appeals therefrom. All offenses shall continue to be prosecuted in the District Court by information as heretofore except such as

may be required by local law to be prosecuted by indictment by grand jury."

Section 26 guarantees the right to trial by jury in criminal actions to those who demand it.

Section 27 provides for the appointment by the President, with the consent of the Senate, of a United States district attorney and for the appointment by the Attorney General of an assistant district attorney of the United States. This section also outlines the duties of these officials.

Section 28, subsection (a), provides that the proceeds of customs duties, United States income taxes, other taxes levied by Congress and certain other fees less the cost of collection shall be covered into the treasury of the Virgin Islands. Taxes collected in connection with the old-age and survivors' insurance program are specifically exempt. This section further provides that all persons whose permanent residence is in the Virgin Islands shall satisfy their United States income-tax obligations by paying their tax to the Virgin Islands regardless of their source of income. The conferees agreed to accept the wording of the House version that the term "inhabitants of the Virgin Islands" shall include all persons whose permanent residence is in the Virgin Islands in lieu of the Senate stipulation that "inhabitants of the Virgin Islands" shall include all citizens of the United States whose permanent residence is in the United States. Subsection (b) provides that the Secretary of the Treasury shall determine annually the amount of taxes collected under Federal internal revenue laws with respect to articles produced in the Virgin Islands and transported to the United States. From this amount, there shall be paid to the government of the Virgin Islands a sum equal to the amount of revenue collected during the same years by the government of the Virgin Islands. Such sum would be available for expenditure as the Territorial legislature, with the approval of the President, may determine. For the fiscal years 1955 and 1956, the remainder of the amount collected under the Federal internal revenue laws on Virgin Islands products sent to the United States, or the sum of $1 million, whichever is greater, shall also be paid to the government of the Virgin Islands. Such sums shall be expended only for such emergency purposes or for such public projects as the President approves. If funds for such emergency purposes of public projects are not expended during the fiscal year, they remain available for subsequent expenditure, but they cannot exceed $5 million at the end of any fiscal year. Subsection (c) provides that certain sections of the Trade Mark Act of 1946 and the Tariff Act of 1930 shall not apply to importations into the Virgin Islands of genuine foreign merchandise bearing a genuine foreign trade-mark but shall remain applicable to importations of such merchandise from the Virgin Islands into the United States or its possessions. It further provides that dealing in or possession of any such merchandise in the Virgin Islands shall not constitute a violation of any registrant's right under said Trade Mark Act. This revision, prepared jointly by officials from the Departments of Interior, Commerce, and Treasury, is in response to objections raised to the original version, and was agreed to by both legislative bodies.

Section 28 (d) provides that articles which are the growth, product, or manufacture of the Virgin Islands, or which do not contain more than 50 percent of their total value, may be admitted into the United States free from customs duty. Otherwise, such importations shall be subject to the rates of duty imposed by section 3350 of title 26, United States Code. This proposal was made by the Department of the Treasury.

Section 29 provides that officials of the government of the Virgin Islands shall be citizens of the United States and that they shall take the oath set forth in this section.

Section 30 provides generally that matters pertaining to the government of the Virgin Islands, except for the judiciary, shall be placed under the jurisdiction of the Secretary of the Interior. Upon the suggestion of Judge Maris, the following statement was added to the end of the section: "and the matters relating to the United States attorney and the United States marshal, which on the date of the approval of this Act are under the supervision of the Attorney General."

Section 31 (a) authorizes the Secretary of the Interior to lease or sell property of the United States under his administrative supervision in the Virgin Islands. Subsection (b) provides that the government of the Virgin Islands shall have control over public property that is under its control on the date of enactment of the act.

Section 32 provides an amendment to the Animal Quarantine Act, so that cattle which have been infested with or exposed to ticks, but which are now free from them, may be admitted into the Virgin Islands under such regulations as the Secretary of Agriculture may prescribe.

Section 33 amends a statute pertaining to poultry quarantine to provide that the Secretary of Agriculture cannot issue regulations or take measures with respect to the introduction of live poultry into the Virgin Islands.

Section 34 sets up an orderly procedure under which the provisions of this act shall supersede existing law.

Section 35 authorizes appropriations to carry out the purposes of this act. The House conferees agreed to this provision which authorizes these appropriations.

Section 36 provides that if any portion of this act is held invalid, the remainder shall not be affected thereby. This severability clause was included at the request of the Senate conferees.

WESLEY A. D'EWART,
JOHN P. SAYLOR,
E. Y. BERRY,
CLAIR ENGLE,
LLOYD M. BENTSEN, JR.,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

AMENDMENTS TO BANKHEAD-JONES FARM TENANT ACT

Mr. HOPE. Mr. Speaker, I ask unanimous consent that the bill S. 1276 be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Kansas [Mr. HOPE]?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 3 (b) (2) of the Bankhead-Jones Farm Tenant Act, as amended, is amended by inserting "not in excess of 5 percent" in lieu of "4 percent," and section 12 (c) (4) of such act is amended by inserting "not in excess of 4 percent" in lieu of "3 percent."

With the following committee amendment:

Strike out all after the enacting clause and insert "That the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1001), is further amended as follows:

"(a) The words 'less any prior lien indebtedness' shall be added at the end of and as a part of the parenthetical phrase of section 3 (a) (7 U. S. C. 1003 (a)), and the words 'or second' shall be inserted after the word 'first' where it appears in the first sentence of section 3 (a).

"(b) The words 'a rate of interest not in excess of 5 percent per annum as determined by the Secretary' shall be inserted in lieu of the words 'the rate of 4 percent per annum' in section 3 (b) (2) (7 U. S. C. 1003 (b) (2)).

"(c) the words 'shall not be in excess of 4 percent per annum as determined by the Secretary' shall be inserted in lieu of the words 'shall be 3 percent per annum' in section 12 c) (4) (7 U. S. C. 1005b (c) (4)).

"(d) The words 'pursuant to section 43' shall be deleted from section 46 (7 U. S. C. 1020).

"(e) Section 51 of said act (7 U. S. C. 1025) is amended to read as follows, except insofar as said section affects title III of the Bankhead-Jones Farm Tenant Act, as amended:

" 'The Secretary is authorized and empowered to make advances to preserve and protect the security for, or the lien or priority of the lien securing, any loan or other indebtedness owing to or acquired by the Secretary under this act, the act of August 14, 1946, the act of April 6, 1949, the act of August 28, 1937, or the item "Loans to farmers, 1948, flood damage" in the act of June 25, 1948, as those acts are heretofore or hereafter amended or extended; to bid for and purchase at any foreclosure or other sale or otherwise acquire property pledged, mortgaged, conveyed, attached, or levied upon to secure the payment of any such indebtedness; to accept title to any property so purchased or acquired; to operate for a period not in excess of 1 year from the date of acquisition, or lease such property for such period as may be deemed necessary to protect the investment therein; and to sell or otherwise dispose of such property in a manner consistent with the provisions of section 43 of this act'."

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act to amend the Bankhead-Jones Farm Tenant Act, as amended, so as to provide for a variable interest rate, second mortgage security for loans under title I, and for other purposes."

A motion to reconsider was laid on the table.

THE TVA MUST BE CONSISTENT OR NO CALF LIKES TO BE WEANED

The SPEAKER. Under special order heretofore entered, the gentleman from California [Mr. PHILLIPS] is recognized for 60 minutes.

Mr. PHILLIPS. Mr. Speaker, last Tuesday, I came on the floor, as you will recall, somewhat unexpectedly and discovered that a few of my friends in the Congress were blowing up the proverbial "tempest in a teapot" over the logical, and very reasonable proposal, that the Atomic Energy Commission, as the party most interested, should contract with a group of private utility companies—who would, in turn, create a separate corporate entity for the purpose—for the necessary additional kilowatts to operate the AEC plant at Paducah.

I doubt, Mr. Speaker, if any Member of the Congress is taking these objections seriously, but I think they should

be answered. You, Mr. Speaker, and the Members of the Congress are entitled to the facts. Since I am the chairman of the subcommittee responsible for the appropriations for both the TVA and the AEC, and thus have an intimate acquaintance with both sides of this argument, I think perhaps I should be the one to come to the floor now and attempt to give these facts for the information of the Members. The facts are all ascertainable; they are matters of record in the hearings and reports from the Committee on Appropriations, over a period of more than 7 years, and there is no mystery whatever about the present contract, nor its desirability.

As a matter of fact, Mr. Speaker, I think I may be in error in referring to this as "a tempest in a teapot." The sound had a familiar ring to me when I came on the floor last Tuesday, and I say in all friendliness, that I think it will have a familiar ring to any Member of Congress who has ever owned a farm, or who has any farm friends. Perhaps you, Mr. Speaker, have heard the protests of a calf when the time has come for it to be weaned. Do you recognize a similarity between the protests of the calf, who wants to continue his meals without working for them, and the protests of the TVA officials and their friends, who would like that favored agency of Government to continue its carefree life, without the responsibilities and worries which face every private enterprise of any kind in the United States which must raise its own money, live upon its income, set aside its own reserves, pay taxes to Federal, State, and local governments, plan its own future with some thought to its probable income, make a profit for those who have been optimistic enough to invest in it, and in every way conduct itself as a normal business operations? This the TVA has never done, and this the TVA, like the familiar calf, will not do without echoing the calf's protests.

For brevity, and for my own convenience, I shall ask myself a series of questions, taken largely from the statements of my friends on the floor of the House, and I shall give the answers. I shall yield for questions, Mr. Speaker, to the extent of my available time, but I would appreciate it very much if the Members would withhold their questions until after I have concluded this slightly more formal part of my statement. I have asked my colleague, the gentleman from North Carolina [Mr. JONAS] to help me out with a few of the statistics, as we have so many agencies of Government coming to the Subcommittee on Independent Offices for their appropriations, that we follow a convenient plan of dividing the work among the members of the subcommittee, and my very able colleague, the gentleman from North Carolina, has quite an accumulation of material regarding both the AEC and the TVA, some of which may have reference to this contract argument.

Question No. 1: Did the President of the United States order the Atomic Energy Commission to sign a contract with anyone?

Answer: Obviously, the President did not. I presume the friends of the TVA monoply would like to have it appear that the President somehow invaded the legislative area, which would be a very farfetched conclusion, even if he had given such an order, but he did not. I quote from the letter, under date of June 16, 1954, addressed to Mr. Strauss, from the Director of the Bureau of the Budget. I quote:

> The President has asked me to instruct the Atomic Energy Commission to proceed with negotiations with the sponsors of a proposal made by Messrs. Dixon and Yates, with a view to signing a definitive contract on a basis generally within the terms of the proposal. He has also requested me to instruct the Commission and the Tennessee Valley Authority to work out necessary contractual, operational, and administrative arrangements between the two agencies so that operations under the contract between AEC and the sponsors will be carried on in the most economical and efficient manner from the standpoint of the Government as a whole.

I find nothing to object to in that statement. If two agencies of Government as important as the Atomic Energy Commission on one hand and the Tennessee Valley Authority on the other hand cannot coordinate their activities, for the safety of the Nation, and at the same time for the benefit of the taxpayers, Congress and the President should know the reason why.

Question No. 2: How did the idea for the proposal originate?

Answer: The Committee on Appropriations has, for a number of years, urged the Atomic Energy Commission to explore the possibility of a source of power from private utilities, both because the area of the TVA is limited by its act and for security reasons, on the well-known theory of not carrying all the eggs in the same basket.

The fact of the matter is, however, Mr. Speaker, that the House of Representatives has by vote 4 times, I repeat, Mr. Speaker, 4 times, in this session and last, expressed its opposition to the idea that the Tennessee Valley Authority shall spread westward, or in any other direction, outside of the area designated as its limitations in the basic act, and particularly that this expansion, not contemplated in that act, and perhaps illegal, should be by the process of building steam plants to produce additional power. It should be obvious that if the Tennessee Valley Authority has the legal right to build a steam plant at Fulton, where it proposed to build the plant for the additional power the Government now hopes to get from private enterprise, and to carry the current to Memphis, which is 115 miles west of the Tennessee River, then there is no limitation upon its area of construction nor of service. If it can supply power to Memphis, it can just as legally supply power to Ohio, or to Kansas or to California. Its expansion would be limited only by the willingness of a subservient Congress to supply it with the funds for such construction. I think this is a matter which should have very serious consideration, Mr. Speaker, by all Members of Congress.

Question No. 3: Is there anything unusual in "proceeding with negotiations" before detailed specifications have been prepared and submitted to the negotiating parties?

Answer: None that I know of, and apparently none in connection with the previous operations of either the TVA or the AEC. Both have followed this method in the past, particularly the Atomic Energy Commission. In the present situation, Dixon-Yates have simply made a proposal in general terms, and the President has authorized further negotiations. I think the idea is good.

Question No. 4: In what area of the United States is the Tennessee Valley Authority authorized to operate?

Answer: The basic law limits the Tennessee Valley Authority to the area of the Tennesseee River and its tributaries. The plant the TVA monopoly requested $100 million to build would have been 115 air-miles west of the Tennessee River and entirely outside the TVA area, as defined in the act.

Question No. 5: Is the Tennessee Valley Authority authorized by law to build steam plants for the production of power?

Answer: This is a moot question. The Subcommittee on Independent Offices has been repeatedly importuned to give authority to any citizen, who wishes to take advantage of that authority, to take this question to court, to determine whether the Congress intended, in the authorizing act, to permit the TVA to build steam plants, or perhaps I should say, to build steam plants and sell this power to consumers, either inside or outside the area named. Anyone reading the basic act will be struck with the fact that it was the intention of the Congress at the time to make it possible for the TVA to create hydroelectric power, and to operate plants already in existence. Permission to sell the power was limited to excess power, and the implication was that it was excess power from the existing steam plant or plants, and from the hydroelectric power developed on the river and its tributaries.

The Subcommittee on Independent Offices has consistently refused to give authority to take this question to court, not because we have no question in our minds, but because we felt that the building of steam plants, pressed upon us as a war necessity, was a fait accompli. Under a necessity of war and the demands of the atomic energy installations, we had appropriated money to build steam plants. It would seem a little inconsistent for us, at this late date, to question our right to build them. However, I think I may say with some assurance that, first, if additional steam plants are contemplated inside the TVA area, without this war necessity, or to provide power which could be supplied from private utilities, or to supply additional current while the residents of the area are to retain the luxury uses of power in their own homes, subsidized by the Federal Government, then I think the Committee on Appropriations should authorize such a test case; and second,

I feel very confident that such a test case would necessarily be authorized, were the TVA to insist on going outside of its own area for the construction of steam plants.

I am taking for granted that the Mississippi River has not become a tributary of the Tennessee River. It has been a long time since I studied geography in school, but I do not think there has been that change.

Question No. 6. Where will the proposed plant be built, either by the TVA or by the Dixon-Yates proposal?

Answer. Mr. Speaker, this is an extremely interesting question. The TVA monopoly proposed to build an additional plant at Fulton, which is in Tennessee, 30 miles upstream from Memphis. The Dixon-Yates proposal is to build a plant across the river, in Arkansas. The distance between the 2 plants is approximately 30 miles, presuming that a Tennessee crow flies in a straight line, as crows still fly in Pennsylvania and California, and not in the erratic line suggested by the occasionally devious reasoning of TVA's devoted friends.

Apparently if TVA builds the plant that is considered to be good, but if Dixon-Yates build the plant, in the same locality, then it is iniquitous and wrongly placed. Let us be consistent, Mr. Speaker, if nothing else.

Question No. 7. Is there anything unusual about the proposal to have the AEC contract for power, to be delivered to the TVA, for eventual use by the AEC?

Answer. There is nothing unusual, and nothing remarkable, and certainly nothing objectionable. Both the AEC and the TVA are agencies of the United States Government. We need more coordination between Government agencies, rather than less. It would save the taxpayers' money.

Neither is the replacement of power a new idea, nor is it a new method of supplying power for AEC plants. It is the practice employed by the TVA itself, and it has been employed by the TVA since it began adding capacity to its system to serve the AEC. This began in 1949. I think, Mr. Speaker, that the record should be set straight on this point.

In these years, whenever the AEC requested additional power, the TVA has not, except for the initial load at Paducah, added the full capacity in the area of AEC expansion. Instead of that, the TVA has come to my subcommittee and secured the necessary money, with both congressional and Bureau of the Budget approval, to place this capacity at some distant point in its system.

It amuses me very much to hear some of my distinguished friends moan about the fact that the proposed Dixon-Yates plant will be some distance from Paducah. Please note this, Mr. Speaker, when the Atomic Energy Commission secured authorization for a major expansion in 1949 the TVA asked for money to build the Widows Creek generating plant, and to build units for the Johnsonville steam plant. You have only to look back to the hearings before my subcommittee to discover that this request was justified on the basis of the demand for additional power by the AEC. Now Johnsonville is 200 miles away from Oak Ridge, where the power was to be used, which is a much greater distance than the proposed Dixon-Yates plant would be from Paducah. The Widows Creek plant is approximately 100 miles from Oak Ridge. I think Congress has the right to insist, Mr. Speaker, that the friends of the TVA be consistent in these arguments. If it is all right for the TVA to do something, then it must not be termed iniquitous for a private utility to do the same thing.

The next expansion of the AEC program was in 1951, at Paducah. In this case, the power requirements were contracted on a 50–50 basis with TVA and EEI. Each was to supply 500,000 kilowatts. At that time TVA requested my subcommittee to appropriate funds for the building of the Shawnee plant, stating that that plant would be located adjacent to the point of consumption. That was done.

Late in 1952, it again became necessary to expand the AEC facilities. The new power requirements, checking back on our records, were to be something over a million kilowatts needed at Oak Ridge, 950,000 kilowatts needed at Paducah, and 1,800,000 needed at Portsmouth. TVA was requested to supply the Oak Ridge requirements and 700,500 kilowatts of the additional Paducah requirements.

Now Mr. Speaker, how did TVA decide to supply these requirements? Did they insist on adding this new capacity immediately adjacent to the AEC plants? The answer is in the records of my subcommittee, and in the records of the Appropriations Committee. TVA did not.

To serve the Oak Ridge load, TVA requested an appropriation for the construction of 2 units at Kingston, 2 units at John Sevier, and 2 at Gallatin. The Kingston plant is located adjacent to Oak Ridge, and when it is completed, it will be the largest steam plant in the world. This plant, because of its location, and because of its capacity, and the transmission facilities from it to the Oak Ridge area, will supply all of the additional Oak Ridge requirements. Thus we have exactly the same situation to which the TVA objects now, when proposed by a private utility. The Kingston plant is now serving the Oak Ridge area, just as the proposed Dixon-Yates plant would service Memphis, and the kilowatts poured into the TVA grid from other locations would be used, quite properly, to serve the new AEC plants. It is simply another story of replacement. I say again, Mr. Speaker, if it is all right for the TVA to do this, then it is not iniquitous for similar arrangements, to do exactly the same thing, to be made with private enterprise.

The John Sevier units, which are 70 miles from Oak Ridge, and the Gallatin units, which are 150 miles from Oak Ridge, would be used to serve other demands, by replacement.

Question No. 8: Does TVA use only its own power?

Answer: Certainly not. TVA buys power from private utilities, and carries it over its own construction lines, supplementing or replacing power produced by its own plants. It thinks nothing of this. Twelve to fourteen percent of the power used last year was bought from private utilities, and delivered by the TVA over its own lines. It is only when someone else proposes to make the arrangement that TVA objects.

It seems to me that the only difference between the proposed replacement of 600,000 kilowatts to Paducah, and the system followed by the TVA in the last 5 years, in supplying other AEC requirements, is that the Tennessee Valley Authority in the past made the decisions. In this case the President has decided, quite properly, that the additional power needed is to be obtained through a contract between the AEC and private utilities for a new plant located in the Memphis area—which, by the way, is the same area selected by the TVA for itself. In one case, the Federal taxpayers were to have put up the necessary money, and in the present case, the plant is to be built by private financing. This is a little matter of a hundred million dollars to the taxpayers of the United States, plus interest at perhaps 3 percent during the life of the loan. I shall come to this particular point a little later. We are approaching the legal debt limit.

Question No. 9: Is there anything unusual about combining public and private power?

Answer: Certainly not. I have just indicated that TVA does it all the time. One of my good friends from the Tennessee Valley area expressed himself eloquently last Tuesday that the combination of public and private power was something that had never been done, and should not be done. I can only point out that I live in the shadow of the Hoover Dam, one of the outstanding examples of the successful combination of public and private interests. The Hoover Dam, and its operation, and the satisfactory repayment of its costs, plus interest, is constantly pointed to with pride by the Interior Department, under all administrations, to use the words of the Arabian Nights, as "an example to all who may take profit of example."

Question No. 10: What was the situation at Joppa?

Answer: The reason I ask myself this question is because some of my distinguished friends have attempted to make something of the delay in building the Joppa plant. The contention is that this is evidence of the inability of private utilities—which have, of course, been building plants successfully over the United States for generations—to build a powerplant. Nothing could be more absurd. It is true there was a delay in building the Joppa plant. If there is anything to be criticized in the situation, then the criticism should be placed where it belongs, on the shoulders of the labor leader who caused the delay. I can say now what I could not have said 90 days or more ago, although it was then known to members of the subcommittee. The contract was let by the contracting utilities to an experienced contractor. A million dollars in extortion money was demanded of him by the union leader in

charge of the work. When the contractor refused to be blackmailed or browbeaten, the strikes began. A day or so stoppage at a time, sometimes for a longer time. All this appears in the official records of the Joint Committee on Atomic Energy. The union leader is now under indictment and I presume the matter will be in court records before very long. The delay in finishing the plant is less than the time represented by the stoppages. If the private utilities are to be charged with anything, they can be charged only with inexperience in dealing with a situation of that kind, involving a Government agency and an unsympathetic labor leader.

Question No. 11: Has the TVA some inherent right to supply all power, from the Atlantic seaboard to the Mississippi, or even in the territory defined in the basic act?

Answer: It has no inherent right of any kind, but TVA has a beautiful monopoly created for its benefit, partly by Congress, and partly because of the war demands. In discussing this matter with my colleague from California, who had said that a committee of the other body was about to investigate the Dixon-Yates proposal, on the grounds that it constituted a monopoly, I asked a very simple question, Will the Senate committee then investigate the TVA monopoly at the same time?

I meant that seriously. The TVA is permitted, under the law, to require contracts from its customers that they will not purchase power from any other power producer. If this is not a monopoly, I never saw one, but the contracts are even more monopolistic than that; they provide that the power may only be resold by communities at rates approved by the TVA itself.

I know of no comparable situation in the United States. The community in which I live purchases its power from a private utility and distributes it in the community. If it wishes to add a few mills for community purposes, specific or general, it has a perfect right to do so. During the depression years, I suspect that many communities in the United States kept themselves in the black by adding a little to the costs of the power they bought, and resold to the community consumers. Yet the TVA monopoly, as I have already said, goes out and buys power from other sources, and sells it, not at cost, but at a price which will make it possible to prefer one customer to another. For example, the AEC, at Paducah, has been paying TVA a higher rate for power, than it paid the private utility. This overcharge to AEC helped enable TVA to keep its rates low to its individual consumers in the Tennessee Valley. The TVA monopoly is enabled to sell the power at the prices it charges only because these consumers are subsidized by the taxpayers of the other States.

Question No. 12: Under the Dixon-Yates proposal will the new corporation pay taxes to local and State and Federal Governments?

Answer: I see no objection, and certainly the Congress by its frequent actions, has indicated its approval of the idea that Government agencies should do something to compensate the States by in lieu taxes, just as the Congress has expressed its concern over the increasing encroachment of Government into State and local areas, both in the ownership of land, and into tax sources.

One of the speakers, of the group which seems to be trying to prevent a contract between the Atomic Energy Commission and private enterprise, spoke slightingly of the fact that the new corporation will pay over a million dollars of taxes to the State of Arkansas. I rise to remark, Mr. Speaker, that I do not consider that a bad idea. Cities and counties and States and the Government at Washington, all live by collecting taxes. What I want to know is why my friends in Tennessee consider it wrong for a private utility to pay taxes to the State of Arkansas, when the State of Tennessee has itself been receiving, from the taxpayers of the other States, amounts of money in excess of a million dollars annually, appropriated by the Congress, for what is politely known as resource development? One year we appropriated $4,800,000. A careful analysis of these expenditures will indicate that in States not in the TVA area, these expenses are borne by the taxpayers of the States themselves, and they are not subsidized for these local operations and local costs by a paternalistic government. I think it will be a very healthy sign, when we stop subsidizing the TVA States for expenditures which, in the other States, are borne by the taxpayers of those States. I think it will be an even healthier sign, when the Federal Government gets back on a basis of dealing with private utilities, local businesses and industries, and stops the octopus-like spread into all areas of Government, business, industry, and financing. If, in that process, money is paid in taxes to the separate States, where the industries are located, I shall certainly not be the one to object, and I am convinced, from previous voting records, that a majority of the Members of Congress will not object.

Question No. 13: Will the Federal Government pay the Federal taxes of the new corporation?

Answer: Although a contract is not yet finally signed, apparently this is the intention. I admit quite frankly that this is an unusual provision in a Federal contract, but I am not convinced that it is a wrong provision. If it errs at all, it errs on the side of honesty. I cannot believe that any Member of Congress is so naive that he thinks the money to pay Federal taxes comes out of thin air. If one of the airplane plants in my State makes a contract to build airplanes, I can assure you the contractor has added to his bid the estimated cost of the taxes he will have to pay, corporate or individual, to the Federal Government. Otherwise he would not stay in business. I can also assure you that he has not deliberately underestimated the amount of money he will need for these taxes. It seems to me, reading the testimony carefully, that the proposal of the Dixon-Yates corporation is simply that the Federal Government consider the taxes as a separate item, to be separated and identified from the other costs. This puts the new corporation on exactly the same footing as the TVA monopoly, which is its competitor in bidding, and which of course pays no taxes, and assures the Federal Government that it will pay only the exact amount of the taxes and no more.

Question No. 14: Is the new corporation to be guaranteed a 9 percent profit on its investment?

Answer: The proposal of Dixon-Yates contemplates a return of 9 percent only on approximately $5 million of paid-in capital. What is so wrong about that? I wish it clearly understood that I am not opposed to the theory that an individual, or a corporation, in the United States of America, is entitled to a profit upon his investment or his efforts. This happens to be the theory that has made the United States the strongest Nation in the world.

I suggest again that the friends of the TVA monopoly realize the desirability of being consistent. To put up the plant, to provide the power needed, the TVA would require approximately $100 million in cash, over several years, which would have to be borrowed from the taxpayers of the United States, who will shortly become increasingly reluctant to advance all of this money, year after year, for the benefit of one small area, in the United States. The Government will then pay interest on this money and I presume it will run about 3 percent on the average. The taxpayers will then be asked to advance this interest.

However, Mr. Speaker, that is not the only reason I was asking the friends of the TVA monopoly to be consistent. I want them to look at some figures. If they will turn to page 2447 of the hearings of the Committee on Independent Offices, part 3, for the TVA appropriations for fiscal year 1955, they will find a table, which begins with the year 1934—at which time we appropriated $50 million to the TVA—and which continues through the year 1954, to make a grand total of money appropriated to the TVA of $1,785,214,581.

During that same period repayments to the United States Treasury have totaled $123,170,667. Thus, the United States, over a period of more than 20 years' investment in the TVA, has received repayments of less than 8 percent of the total amount appropriated. I do not want to be misunderstood. We do not expect the TVA to reimburse the Government for money spent for other purposes than the power program. However, the total amount of the money was supplied by the taxpayers of the whole country. For the power program alone the unpaid balance is still in excess of $800 million, and this is figured generously, from the TVA standpoint. TVA pays no interest on this investment. TVA pays interest only on the bonds which Congress authorized it to issue when it took over the properties of Commonwealth & Southern.

Question No. 15: Does the TVA repay its investment to the Federal Government?

Answer: I would like, once and for all, to explode this fairy tale. The TVA does not repay its investment, and makes no pretense of repaying its investment. I will drop figures for a moment, which might be confusing, and give you in simple language the theory upon which the devoted supporters of the TVA monopoly attempt to explain this inconsistency. The theory is that the money advanced by the taxpayers of the other States and poured into the Tennessee Valley area is used to build powerplants, transmission lines, dams, and other facilities for the production of power which, in the words of the TVA witnesses before my subcommittee, "belong to the Government." It is a nice theory. I wish I could go down to my banker in my home county and say to him, "Mr. Smith, I can't pay you anything on my loan this year because I bought myself a new suit of clothes. We will consider that you own the suit of clothes and that will be a repayment on my loan." I suspect he would say to me that in his opinion the suit would wear out, and he would not have much left after a few years. The simile may be amusing, and I mean it to be so, but there is more truth in it than our friends of the Tennessee Valley will want to admit. Powerplants wear out. Powerplants become obsolete. In a generation moving into atomic power and new methods of production and use and distribution, I am afraid the Government will have very little value left in its powerplants and distribution systems in the Tennessee Valley after 40 or 50 years. I have a feeling that the United States Government should take the position my banker would probably take, and say to me quite firmly that he would prefer to have the cash. Even under the TVA theory, the power construction, after 50 years, will still serve that local area, not the taxpayers of other States, to whom the TVA says the plants belong.

Yet seriously, Mr. Speaker, this is exactly the argument the TVA has used before my subcommittee for years. It has been paying back a few million a year and comes back to Congress for deficit money running as high as several hundred million dollars a year.

For fiscal year 1954 we appropriated $188,546,000; and for 1953 we appropriated $336,027,000. In those 2 years, we got back, respectively, $24,676,977 and $19,229,268.

If I lived in the Tennessee Valley, I would undoubtedly think this was a wonderful idea, to have the taxpayers of the other States subsidize me. As a member of the Committee on Appropriations, I am unable to look upon this as a good investment.

I have great sympathy for my friends in the Tennessee Valley area, and I have no controversy with any of them individually. I can imagine the pressures upon them from that area. Take the matter of heating the houses, alone. When I first went to California, practically all the facilities on my little ranch were operated by electric current, but I did not feel that I could afford to heat the house by electricity, and the bills for heating water were enormous. I imagine over the years current rates have come down, but still house heating by electricity is considered to be one of the most luxurious uses of electric current, from the standpoint of cost.

Yet in the city of Nashville, 20,000 homes are heated by electricity furnished from TVA sources. In the State of Tennessee, 110,000 homes are heated by electricity. It is perfectly obvious that this is a subsidized use of electricity. And here is an interesting thing: The Atomic Energy Commission has the first call upon power in the Tennessee Valley area. We are not discussing today, basically, whether we shall continue to appropriate Federal money, and subsidize TVA operations, for the benefit of the Atomic Energy Commission, and for the security of the United States; we are discussing whether we will continue to subsidize the TVA, and permit it to build another steam plant, outside of its own area, in order to heat the houses of the people of Tennessee.

Question No. 16: Will there be a loss of approximately $3 million per year if power is secured from this new plant, rather than supplied by a new plant built and operated by the TVA?

Answer: Practically, to the taxpayers, there will be no loss. I could easily build up a book loss, as our friends of the Tennessee Valley have done, and I could make it as high as $3 million, but honesty compels me to repeat that there is no such loss, in fact. I think I can prove this.

The estimated annual cost of the Dixon-Yates proposal, which includes taxes, is $20,959,000.

The estimated total charges to AEC, by the TVA, if we use the TVA-Paducah contract as a base, is estimated as $19,856,000.

We start therefore with a projected difference between the two costs of $1,013,000.

Since the TVA pays no income taxes, and since this is set up as a separate item in the Dixon-Yates proposal, we may consider it only as a transfer of Federal money from one pocket to the other. Deducting $820,000, as the estimated Federal income tax, leaves us a difference of only $283,000.

Now, Mr. Speaker, turn back to the figures upon which these differences in cost were originally estimated. I point to only one item. The difference in cost between private money and public money was based on the assumption that we could obtain Government money for 2½ percent interest. I raise a firm question as to whether that would be possible? If we were to pay only 3 percent over the years, for the money we would be required to advance to the TVA to build the plant, and if we do not take into consideration the historic custom of the TVA to come before my subcommittee every year and ask us to pick up its deficit, then that slight increase of one-half percent in interest rate would wipe out the difference between the two proposals. I could cite other items, I am quite sure, between the operation costs of the TVA and of a private utility, and I have already pointed out that in the case of a private utility, it must create its own reserves, pay its own taxes, pay insurance, and all the other items which go into the normal and proper operation of an industry in the United States of America. I repeat: There is no difference or, if there is any, it is on the side of the Dixon-Yates proposal.

Question No. 17: Is any attempt actually being made, in this Congress, to destroy the TVA?

Answer: I apologize, Mr. Speaker, for even including this question, but actually, this was implied in a statement on the floor last Tuesday. The answer is, "Absolutely no." It would be impossible to do so, if anyone had such a thought, and it would certainly be undesirable.

I assure you, Mr. Speaker, that there has been no discussion of this kind before my subcommittee at anytime, and I am quite sure we would be aware of it, had there been such a discussion anywhere. The discussions regarding the TVA, generally speaking, have confined themselves to four groups:

First. Shall the TVA be permitted to build powerplants and extend its power lines still further, outside of the area designated in the basic act? This is entirely a matter to be decided by the Congress. I gather, however, from discussions and votes in preceding years, on the floor of this House, that the idea does not meet with general favor in this House.

Second. Does the TVA have the legal right to build steam plants, for the sale of power, either inside or outside of its designated area? I have discussed this already this afternoon, and I will not repeat my comments.

Third. Should the TVA be required to pay interest on the unpaid balance of the money advanced to it, for its power systems? The money for this purpose is borrowed from the taxpayers and then interest is collected from these taxpayers to pay interest on the bonds issued. It would seem a reasonable thing to require the TVA to pay the same interest on this unpaid balance as the Treasury Department is required to pay for the money. The Subcommittee on Independent Offices recommended this to the full Committee on Appropriations, and the Committee on Appropriations, by a recorded vote, accepted and confirmed the recommendation.

You will remember, Mr. Speaker, that the bill also contained provisions regarding public housing and because of these latter provisions, the Rules Committee declined to give us a rule. Consequently, when the bill came to the floor, the provision regarding interest from the TVA went out of the bill on a point of order.

Fourth. Should the TVA be permitted to carry its monopoly into the resale of power by the communities, which buy from the TVA, when these communities resell the power to their own citizens? I have personally very strong feelings on this because I served on the city council of my home town and I know just what the situation is. I think this is an unreasonable monopoly and the Independent Offices Subcommitee recommended to the full committee that this control of resale prices be abolished. The full

committee approved the recommendation but it also went out of the bill on a point of order.

Fifth. The only other discussion regarding the TVA has been over whether or not it should be set up as a Government corporation, to operate on its own money, issue its own bonds if necessary, and in every way maintain itself as a private utility would be expected to maintain itself. This has never come formally before my subcommittee, nor do I know that it has ever been formally presented to a legislative committee. If the TVA is as successful an operation as its friends maintain, then it should have no concern over such a proposal. It has a monopoly area. I have no reason to doubt that it can operate economically and efficiently. Certainly it should not expect indefinitely to operate at the expense of the taxpayers of the other States.

Question No. 18: Was the President well advised or badly advised when he issued the instructions to the Bureau of the Budget to negotiate with private companies for the supply of this power for the Atomic Energy Commission?

Answer: The question answers itself. He was well advised. From the beginning of time, all nations that have permitted themselves to be drawn little by little into a paternalistic, centralized form of government, no matter what we choose to call it, have destroyed themselves. If for no other reason, they have exhausted their resources. I have no desire to discuss the propriety of having created the TVA in the first place, nor to discuss the years and management of the TVA up to the present time. We are talking about from now on. The time has come for us to treat this situation in an intelligent and reasonable way. The President of the United States was elected on a platform of attempting to stop deficit financing, to stop this trend toward paternalistic government and consequent dictatorship, and to encourage private enterprise. The proposed contract with the Dixon-Yates group is for the benefit of the taxpayers and for the benefit of the Atomic Energy Commission. It should be signed. I see no reason why the Atomic Energy Commission should not go ahead at once and sign the contract and completely disregard the obvious attempts to confuse and obstruct which are now taking place on Capitol Hill.

Of course, there are people who may not be happy over such a contract. These are people of the Tennessee Valley who have been getting current at a subsidized cost. I said in my speech on the floor months ago that I know the people of the Tennessee Valley. They are fine people, patriotic and intelligent. I know their Representatives on the floor of this House are able and intelligent and experienced. Properly presented to the people of Tennessee, this plan will be approved. They want assurance that there is no intention to destroy the TVA. They want assurance that they will continue to have power themselves. They can be further assured that, as citizens of the whole United States, this plan is for the best interests of all.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. PHILLIPS. I yield.

Mr. EVINS. I have listened with a great deal of interest to what the gentleman has said. It seems to me that of all the Members of the House of Representatives, the gentleman from California who has just spoken should be one of the best informed Members on the TVA and AEC programs as he now sits as chairman, and has sat in the past as ranking member of the Subcommittee on Appropriations which hears representatives of these Government agencies annually. Each year representatives of the TVA come before your committee and present to the committee the facts of its efficiency and the details of its operation. So the gentleman should be better informed than his speech indicates. He should know the answers to the questions he poses. I think he does. I know that the gentleman, in his own heart, knows that he has not given the full facts of this situation. His questions and observations are full of half-truths and not full truths and full information. The whole story has not been told by the questions he has propounded. His remarks are designed to mislead and give a one-sided picture. I know that the gentleman, in his own heart, knows that he has not given this House the full facts. He has brought out a red herring, trying to pull the President out of a hole when he has gotten into a hole by ordering a lush contract for a private power syndicate without the benefit of competition, or competitive bidding. This deal will cost the taxpayers of the Nation, according to estimates by the Atomic Energy Commission, some $92 million and by the Tennessee Valley Authority in excess of $139 million. It has been questioned by three members of the Atomic Energy Commission, and also questioned by the Acting Comptroller General of the United States as to its legality, propriety, and its feasibility.

Mr. PHILLIPS. Is this a question?

Mr. EVINS. Here is my question. Has the gentleman given the Members of the House all of the facts and all of the truth, taking into consideration the position which he holds on the Appropriations Committee?

Mr. PHILLIPS. The gentleman answers frankly that he has not given all the facts.

Mr. EVINS. I thank the gentleman.

Mr. PHILLIPS. The gentleman from California had only 50 minutes, but if he were able to give the facts in detail, they would much more conclusively, than stated today, show that the contract is good and that these are not half-truths. If they are half-truths, they are half of the facts.

My distinguished friend the gentleman from North Carolina [Mr. JONAS] has inserted in the RECORD today statistical information which will support the things I am saying. I have made an accurate statement.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. PHILLIPS. You will notice that you have several friends standing, and I have only 8 minutes remaining.

Mr. EVINS. I refer to a press release from the Foreign Operations Administration, dated June 10, in which it states:

> FOA today announced a $30 million authorization for the building of three thermo steam electrical plants in the Republic of Korea at a cost of $30 million.

This Appropriations Committee—the gentleman's committee—has denied 1 steam plant for the people of the TVA area and the Nation and yet has approved $30 million for 3 steam plants in Korea. Can the gentleman explain the inconsistency of that action by his committee?

Mr. PHILLIPS. Yes. Did the gentleman vote for the steam plants in Korea?

Mr. EVINS. I should be pleased to do so in the event they are demonstrated to be needed and necessary.

Mr. PHILLIPS. You voted for it. I did not vote for the ones in Korea.

Mr. EVINS. But your committee has approved the funds and your administration has approved it.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. PHILLIPS. I yield.

Mr. JONES of Alabama. The gentleman stated to the House the repayment plan written into the Appropriation Act, carried on by the TVA.

Mr. PHILLIPS. Five million dollars a year, plus interest on the bonds.

Mr. JONES of Alabama. How long was the TVA given to make this repayment to the Treasury?

Mr. PHILLIPS. Quite a time.

Mr. JONES of Alabama. Forty years; is that not correct?

Mr. PHILLIPS. I believe it was.

Mr. JONES of Alabama. Now the gentleman has examined their repayment progress up to the present date, as chairman of the Appropriations Subcommittee. Will the gentleman state to the House whether or not the TVA is in arrears in its repayment plan?

Mr. PHILLIPS. It cannot be in arrears, for TVA does not have any specific payment plan.

Mr. JONES of Alabama. The gentleman from California knows there is written in the appropriation bill for 1948 and 1949 a repayment plan of 40 years.

Mr. PHILLIPS. Yes.

Mr. JONES of Alabama. The TVA at the present time is not in arrears in that payment, and they are 45 percent ahead of their repayment schedule of 40 years.

Mr. PHILLIPS. I remarked that they had paid back, to date, 7 percent of the amount, without interest.

Mr. JONES of Alabama. The gentleman stated that they owed $32 million on bonds. As a matter of fact the information as already given to the committee, of which the gentleman is chairman, is that TVA has recently paid back $10 million on those bonds. Is that not correct?

Mr. PHILLIPS. Let me tell the gentleman something. I have made a calculation while the gentleman was talking. It is about $20 million a year that it would have to pay back, if paid back in equal payments, and that, without interest.

Mr. JONES of Alabama. If the gentleman is using the figures correctly, then on the project of the increased income these new investments will show a repayment to the Treasury.

Mr. PHILLIPS. Wait a minute; let me get this straight. That is one of these TVA calculations.

Mr. JONES of Alabama. I do not know that TVA has done any calculating. I know that the gentleman from California's own figures show that TVA is ahead on its payments to the Treasury of the United States on those bonds in which the people of the country have invested.

Mr. PHILLIPS. It would follow from that that if you should divide the amount TVA ought to pay, into the amount due now, it would be $20 million a year, with no interest.

Mr. JONES of Alabama. But the gentleman must admit that on the repayment plan that has been adopted TVA has carried out all its commitments.

Mr. PHILLIPS. I really must yield to some of these other gentlemen standing. I have but 6 minutes left. I yield to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS of North Carolina. If the gentleman will permit, I would like to respond to our colleague from Alabama. It is true that the law requires TVA to return to the Government the capital investment applicable to power over a period of 40 years.

Mr. JONES of Alabama. That is right.

Mr. JONAS of North Carolina. And TVA is up to its schedule in respect to those payments.

Mr. PHILLIPS. Without interest.

Mr. JONAS of North Carolina. But the point the gentleman from California was making is that the taxpayers are continually asked to put up hundreds of millions of dollars a year, and the repayments do not approach these figures.

Mr. JONES of Alabama. Why are you trying TVA when we have got under consideration here a contract with the Dixon-Yates group?

Mr. JONAS of North Carolina. I am not trying TVA. I am agreeing with you that the law permits TVA to write off its capital investment in power development over a period of 40 years and it is up to and ahead of its schedule on that.

Mr. JONES of Alabama. But that is not the case being tried. The gentleman from California is bringing up the question of whether or not TVA pays interest in determining whether or not it is to the best interest of the Federal Government to carry out a contract between two private utilities and the Atomic Energy Commission.

Mr. PHILLIPS. The only thing I am trying to do is to take the taxpayers' side.

I yield to the gentleman from Tennessee [Mr. PRIEST], who very willingly yielded to me the other day.

Mr. PRIEST. I do not know that I need take the gentleman's time, I certainly do not want to needlessly. The question I had was to get clear on the record the fact that this repayment has been lived up to, and I think that has been made clear, that TVA is ahead of its schedule on amortization payments.

Mr. JONES of Alabama. That is it.

Mr. PHILLIPS. I yield to the gentleman from Mississippi.

Mr. ABERNETHY. Mr. Speaker, I listened with a great deal of interest to the gentleman's speech. While I disagree with a considerable portion of what he said, I do think he made a good speech. I want to ask a question, and I am sure he will be fair with it: Does not this deal smack somewhat of being a cloudy deal in that it was carried on and negotiated behind closed doors with no one else permitted to come in and bid for this particular business? Does not that indicate that it is a somewhat cloudy payoff proposition?

Mr. PHILLIPS. Not at all, because I think others could come in on it; others can still come in.

Mr. ABERNETHY. Now, wait just a minute. This deal was negotiated and announced as closed. Or is it not closed today?

Mr. PHILLIPS. No.

Mr. ABERNETHY. Has not the Dixon-Yates Co. been notified that they will have this particular contract? And has not the AEC been instructed to enter into it by the President?

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. PHILLIPS. I refer the gentleman to my colleague.

Mr. JONAS of North Carolina. May I answer that? The President did not order anybody to sign any contract. He issued instructions to the AEC to negotiate a contract.

Mr. PHILLIPS. That is true.

Mr. ABERNETHY. He just popped a gun in their back and said, "Negotiate a contract with these utilities." That is what he did to them—of course he did.

Mr. JONAS of North Carolina. The gentleman from California quoted from the directive itself.

But with respect to the question of the gentleman from Mississippi as to whether any other companies could be included in the negotiations, I ask the gentleman from California how many other power companies are in position to supply power in the Memphis area? You would not expect a power company from California, New York, or elsewhere, to invest $100 million in a power development on the Mississippi River.

Mr. ABERNETHY. Is it not a fact Mr. Burch represented a particular client that wanted to make a proposal in this deal and have they not closed the door in his face?

Mr. PHILLIPS. The answer is, "No." I hope to take time on Wednesday to discuss that.

Mr. ABERNETHY. Now, can the gentleman tell the House who they could negotiate with, who they could discuss it with?

Mr. JONAS of North Carolina. Anybody that wants to submit a proposal.

Mr. PHILLIPS. They talk to the Bureau of the Budget.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. PHILLIPS. I yield to the gentleman from Illinois.

Mr. PRICE. I am chiefly concerned with the threat to an independent agency of the Government. It is a very serious thing that the Congress should give attention to. In the consideration of this problem you can talk about all of these other things but the chief danger here is the threat to the independence of a Government agency created by the Congress itself, a congressional agency, you may say.

Mr. PHILLIPS. The gentleman means the Atomic Energy Commission?

Mr. PRICE. The Atomic Energy Commission, yes. The gentleman stated that in his view it was not a Presidential directive, but I might point out to the gentleman that 3 of the 5 members of the Atomic Energy Commission testified before our committee and said they would not have given their approval to the project if it were not for the Presidential order and 3 of the 5 members of the Commission opposed the plan. They did not think the Commission had the authority to enter into such a contract, they did not think it came within the province of the Commission, but they interposed no objection, let us say because of the Presidential order.

Mr. JONAS of North Carolina. That is not the way I understand the letter from the Commissioners.

Mr. PRICE. I suggest to the gentleman that he read the testimony.

Mr. JONAS of North Carolina. I have read the testimony and I have read the letter. What they said was that it is a question of policy and that they did not feel they should get into that and that they would leave it up to the President or to the Congress.

Mr. PRICE. Every one of these three members referred to a Presidential order.

Mr. JONAS of North Carolina. Will the gentleman read the joint letter signed by Commissioner Smyth and Commissioner Zuckert?

Mr. PRICE. I read his testimony and the letter and I think I know Commissioner Smyth's feeling on the subject.

Mr. PHILLIPS. Both the gentlemen who wrote the letter referred to the question of propriety or legality of what should be done. Both of them said if the President decided that way they would be very glad to work it out.

Mr. PRICE. And that they were under compulsion because it was a Presidential directive. I know how the gentlemen felt about it.

TENNESSEE VALLEY AUTHORITY

The SPEAKER pro tempore (Mr. CANFIELD). Under special order heretofore entered, the gentleman from Tennessee [Mr. COOPER] is recognized for 30 minutes.

Mr. COOPER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous material.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Speaker, it has been my privilege to address the House quite a number of times on the subject of the Tennessee Valley Authority. I spoke again on this subject at some length here in the House on February 2 of this year. At that time I endeavored to present the situation as it existed and predicted some of the things that are now happening with respect to the Tennessee Valley Authority and the policies of this administration.

I would like to again point out that 20 years ago last year the Congress created the Tennessee Valley Authority and the production of power for the use of the people was one of the major tasks asigned to this great agency of regional resource development.

TVA has been of untold benefit to the region and the Nation. Today, by Act of Congress, it has become the sole supplier of electricity in an area of 80,000 square miles. Five million people depend upon it for all of the energy they use in their homes, on their farms, and in their business enterprises. Power use is growing in this area at a great rate, and now capacity must be provided to meet the expanding demand of a more productive economy. Last year TVA requested funds to continue the construction of 34 steam and hydro units already underway and scheduled for completion before the end of 1955 and funds to begin construction of four new units to meet the increase in requirements which must be met by 1956. Two of the new units recommended are scheduled to be located at a new plant to be built at what is known as the Fulton site, 30 miles north of Memphis, Tenn., in Lauderdale County, a part of the 8th District, which I have the honor to represent. It takes 3 years to build a modern steam plant of the kind TVA plans to construct at the Fulton site. If the appropriation of $30 million for the Fulton plant had been granted, the first unit of 225,000 kilowatts would have been placed in service in the fall of 1957. As we all know, the TVA power system is operated as a whole. No plant is a captive of any individual community, but this plant is proposed for location near Memphis and in west Tennessee because the increasing requirements of that area can be most economically served if additional capacity is provided here. At peak loads west Tennessee now uses about 450,000 kilowatts of capacity. By the winter of 1956–57 it is estimated that west Tennessee loads will have grown to 700,000 kilowatts and to almost 900,000 by the winter of 1958–59. In Memphis alone electricity consumption is expected to rise to 2.5 billion kilowatt-hours by 1956. To get an idea of what this quantity means, let me point out that this figure for Memphis is 80 percent of the total amount of electricity produced during 1952 by all the utilities both privately and publicly owned in our neighboring State of Arkansas across the river from Memphis. Today the major load centers in the west Tennessee area are being served from generating plants located from 100 to 200 miles away. Power comes into our area over transmission lines from the various TVA hydro plants along the Tennessee River and from the steam plant at Johnsonville. The existing lines are inadequate to take care of the larger loads that are certain to develop in the next few years. TVA had two alternatives for meeting west Tennessee's future power requirements: One, to add to generating capacity of steam plants already under construction, then to build additional transmission lines from those distant plants to the Memphis area, or to start a new plant in the west Tennessee area, thereby reducing the transmission costs and transmission power losses. This is the method selected by the TVA engineers after a thorough study of all factors. This is the prudent, efficient way for TVA to add to the total generating capacity available on its system.

In west Tennessee the number of electrified farms has increased more than 4 times in the past 7 years, from less than 15,000 farms in 1945 to more than 63,000 farms today. About 90 percent of our farms are equipped to take electric service now. Their loads are growing. Therefore, Mr. Speaker, this information clearly shows the need for additional generating capacity for the west Tennessee area.

Now then, with respect to the question presented here as to whether it is better to provide this additional capacity through the TVA, the agency created by Congress and having the responsibility and the duty of providing electrical energy for that area or having private power companies build a new plant across the Mississippi River from the area that needs to be served, you have this ridiculous situation. Here is the area that needs the power and this proposal is to go across the Mississippi River, a mile-wide river, and build a plant and then bring the power back over there where it is needed in the first place. All of us who are familiar with the situation know that sometimes the Mississippi River when in flood stages is many miles wide.

Mr. Speaker, in the budget message of the President to the Congress this year no funds were provided for the Fulton steam plant or for any new power generating units by the TVA. I would like to invite attention to the following extracts from the President's message:

> Although no appropriations are included in the 1955 budget for new power generation units by the TVA, expenditures will increase for continuation of construction of powerplants presently underway, and for operation of powerplants after they are completed. Expenses for operation of flood control, navigation, and fertilizer facilities will continue at about the 1954 level. Expenditures for power and fertilizer operations are more than offset by the income from sales.
>
> In order to provide with appropriate operating reserves for reasonable growth in industrial, municipal and cooperative power loads in the area through the calendar year 1957, arrangements are being made to reduce, by the fall of 1957, existing commitments of the Tennessee Valley Authority to the Atomic Energy Commission by 500,000 to 600,000 kilowatts. This would release the equivalent amount of Tennessee Valley Authority generating capacity to meet increased load requirements of other consumers in the power system and at the same time eliminate the need for appropriating funds from the Treasury to finance additional generating units. In the event, however, that negotiations for furnishing these load requirements for the Atomic Energy Commission from other sources are not consummated, as contemplated, or new defense loads develop, the question of starting additional generating units by the TVA will be reconsidered.

From these statements in the President's message and other information available, it was understood that the additional power sought to be provided by the private power companies would be for the use of the Atomic Energy Commission in the operation of its facilities. Now, we find that the President, acting through the Bureau of the Budget, has ordered the AEC to enter into a contract with specified private power companies not to provide power for their use but to be supplied to the TVA for use of other customers of the TVA. This contract has been adequately described by the gentleman from California [Mr. HOLIFIELD] who is a distinguished member of the Joint Committee on Atomic Energy of the Congress and other Members who have spoken on this subject. It is certainly a most unusual contract, and the action of the President is most unfortunate.

Mr. GATHINGS. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield briefly to the gentleman.

Mr. GATHINGS. I want to say to the gentleman that he is highly regarded in the House of Representatives. I will say that among the Democrats, he is "1," "2," "3," and always has been since I have been here.

Mr. COOPER. I appreciate the gentleman's compliment.

Mr. GATHINGS. My district is immediately across the river. Do you recall a committee was set up composed of a gentleman from Memphis and a gentleman from West Memphis, and two or three other district engineers to select a site to make a recommendation to this Congress for the building of that plant, and that the first selection they made was some 4 or 5 miles south of the city of Memphis, just across the river from where this location is here proposed in the Dixon-Yates proposition? Did you know that the first selection that was made was some 4 or 5 miles south, and then they moved up a mile or two and selected a second site or location some 2 miles south of the city of Memphis.

Mr. COOPER. Mr. Speaker, if the gentleman will permit, I would like to answer him by asking him this question: Have the Army engineers investigated and passed upon this location in West Memphis?

Mr. GATHINGS. I want to say to you——

Mr. COOPER. Well, have they?

Mr. GATHINGS. I do not know whether they have or not. Mr. W. G. Hustable, of St. Francis Levee District, served as a member. I understood that Major Allen, of Memphis, also was a member.

Mr. COOPER. Let me answer the gentleman.

Mr. GATHINGS. There was a reason for the President of the United States suggesting that private power companies build this plant. The first reason was

this—because of the fact it is not known whether atomic energy would be needed 25 years from today, and he wanted private industry to build the plant to take away some Government risk.

Mr. COOPER. I understand the gentleman's question.

Mr. GATHINGS. Should private power come in and build this plant they would have the risk.

Mr. COOPER. Mr. Speaker, when the Tennessee Valley Authority faced the responsibility of locating a new steam plant, they called upon the United States Army engineers to make an investigation. They made the investigation and selected the site at Fulton, Tenn., as the best site for the plant. That was the usual and proper way.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield briefly to the gentleman from California.

Mr. HOLIFIELD. I hope the gentleman will not yield to me too briefly as I want to bring out 1 or 2 points in the 10 minutes that he has remaining. If he is pressed for time, I will be glad to desist and obtain some time on my own.

Mr. COOPER. If the gentleman will indulge me just a few more moments, then I will be glad to yield to him.

Mr. Speaker, I want to emphasize one point that I think deserves considerable merit. The people of the Tennessee Valley area have invested roughly about half as much money to the TVA power system as the Federal Government has. Roughly, the Federal Government has invested about $800 million in the power system of the TVA area, and the people of that area have invested roughly about $400,000 of money in the power system of the TVA. Our people have a very vital interest in this matter and they are deeply concerned about this contract, as they should be.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. The gentleman will recall that in the President's budget message transmitted to the Congress he stated that TVA would be relieved of furnishing the Atomic Energy Commission 600,000 kilowatts capacity, and therefore the TVA would not need the Fulton steam plant. Is that the situation which the President was correcting by this contract?

Mr. COOPER. I appreciate the gentleman's comment.

Mr. Speaker, there has been considerable editorial and newspaper comment on this proposed contract, and most of it that I have seen has been very critical of the position taken by the administration. I would especially like to invite attention to 3 recent editorials appearing in Memphis, Tenn., newspapers; 2 in the Commercial Appeal, under dates of July 2 and July 7, 1954; and 1 in the Press-Scimitar, July 6, 1954. I include those editorials in my remarks at this point:

[From the Memphis Commercial Appeal of July 2, 1954]

THE FACTS OF POWER COST

President Eisenhower has told newspapermen he is trying to learn the facts of the cost of the West Memphis steam plant proposal.

It would be better if the President had learned more about the facts before he instructed the Atomic Energy Commission to sign such a costly contract that 3 of the 5 members of AEC have objected publicly. But now that the uproar about this contract has resulted in the President undertaking to study it, we hope he gets down to the fundamental facts.

It seems to us likely that this will be the first study of the proposal. We think it probable that the West Memphis deal was recommended by Assistant President Sherman Adams and that the President simply accepted his staff advice.

We doubt, for instance, that the President noticed that the AEC worksheets comparing costs of power from the Tennessee Valley Authority and from the proposed West Memphis plant seem to reflect 9 percent earnings for the Middle South Utilities equity in the plant.

In order to attract investments of risk capital, 9 percent and more is frequently paid. But in this case the element of risk all but disappears with a market for full production of the West Memphis plant waiting and the United States Treasury as the power buyer.

Other money for this plant would come from the bond market at substantially less than 9 percent.

We also doubt if the President has noticed on the AEC worksheets that after taking out the widely discussed tax advantage of TVA this West Memphis power would still be more expensive. TVA has an advantage in absence of Federal taxes, and the private power lobby would like to have the Government tax itself in order to force upward the price of TVA electricity. But even if the Treasury sends money on a silly circuit to AEC for the West Memphis plant and back to the Treasury as taxes the remaining cost of private power is higher.

Overall, including the tax plan, the AEC experts are on the record with an estimate of $92 million of unnecessary expense in private power compared to TVA power.

We suggest that the Eisenhower study also include TVA finances for the year that ended this week. He will find that Treasury financing of TVA power resulted during the 12 months in $20 million being sent to the Treasury, in addition to $10 million for retirement of TVA bonds.

The President is doubtful about location of the plant TVA planned to meet the same need as the private power plan for West Memphis. TVA has chosen a site at Fulton, Tenn., on the extreme edge of the TVA region. This is an item on which TVA would do well to yield. A location inside the Tennessee River watershed would be more in keeping with the TVA design.

There must be other interesting items in this Middle South Utilities proposal. We hope the President studies them thoroughly, and we suggest that his study include asking the advice of someone who knows publicly owned power better and more favorably than Assistant Adams, whose life has been spent in high-priced, private-power New England.

[From the Memphis Commercial Appeal of July 7, 1954]

A SECOND FRONT FOR TVA

Whatever the outcome of efforts to give, and we do mean give, private power a plant at West Memphis and a slice of the market the Tennessee Valley has been serving, another front in the war on TVA is ready.

The Atomic Energy Commission needs another 130,000 kilowatts of electricity at Oak Ridge. President Eisenhower has ordered TVA to provide it. This is beyond the anticipated AEC need for power, for which TVA is already expanding its generating plants.

Nothing has been changed in the budget to finance still greater expansion of generating plants or the starting of a new plant.

Another situation in which TVA will be instructed to buy private power is in the making. It is so close that Senator ALBERT GORE says a private power company in Virginia has already submitted a proposal for building a new plant near Kingsport, Tenn., which is only a few miles south of the Virginia border.

This would build private power in the Tennessee River Valley itself. For many miles in any direction from Kingsport the rivers are tributaries of the Tennessee.

In the original AEC diversion of TVA's market to private power, at the northwestern corner of the TVA area, the plant was built across the Ohio River from the TVA sales region. The West Memphis proposal for more of the same at the southwestern corner would place a plant across the Mississippi River from the TVA sales region.

At the northeastern corner, in a slot of private power country, extending between two prongs of TVA sales territory in Virginia, the besieging forces attacking TVA would build a stronghold in the very watershed of the Tennessee River.

So far we have heard nothing about private power plans to use AEC for the siege at the southeastern corner of TVA's market, but we consider it unlikely that private power has overlooked this corner.

In both Houses of Congress there is an uproar about this West Memphis plan to force the AEC to become a broker of electric power. The business of the AEC is creation of atomic weapons, a gigantic task of primary importance. The administration is requiring it to take up the additional and expensive task of intervention in the TVA-private power war. As Senator ESTES KEFAUVER has said, "This is about the same as directing the United States Wildlife Service to run a brewery."

Three of the five members of the AEC would rather stay at the atomic work than take up the private power fight.

There is some doubt about whether either AEC or TVA has the authority to make the West Memphis deal. Without waiting to see what Congress or the AEC or TVA does about West Memphis, the many advocates of TVA might as well realize another battle is brewing at the far corner of TVA's map.

[From the Memphis Press-Scimitar of July 6, 1954]

PEDDLING PRIVATE POWER IS NO JOB FOR THE AEC

The United States Atomic Energy Commission, whose sole job should be to maintain American atomic superiority for the safety of the free world, has been ordered into a ridiculous, costly sideline for the next 25 years.

It has been directed, over its own protest, to contract with private utility companies for a large amount of electric power to be delivered to the Tennessee Valley Authority—200 miles and more away from the closest AEC facility.

President Eisenhower issued the order. Presumably it was to prove what needs no proving: that this administration looks favorably upon private enterprise.

The President has directed that this unnecessary, dangerous and expensive gesture of friendliness to the private power industry shall be accomplished by AEC's signing a contract with Middle South Utilities, Inc., and the Southern Co. These two companies would form a third company to build a big new steam-electric generating plant at West Memphis, Ark., just across the Mississippi from Memphis, Tenn.

AEC told the Budget Bureau "the Commission did not agree on the wisdom of AEC entering into this type of contract." Three of the five atomic commissioners opposed

it. Among this majority was the outstanding exponent of private enterprise in the AEC, Commissioner Thomas E. Murray, of New York.

Although called an "independent office" of the Government, AEC passed the buck on the final decision to the White House. The President, through his Budget Bureau, decided in favor of the contract.

If this was a delegated decision by Mr. Eisenhower, then some subordinate has put him in an absurd position. If he acted with all the facts before his eyes, then he misinterpreted the facts.

He ordered the contract despite the fact that Budget Bureau and AEC figures showed power from the private combine would cost the Government at least $3,685,000 more a year than power bought from TVA at Paducah, Ky. The chief difference was in the fact that TVA paid no taxes while the private company did, and TVA got its money at a cheaper interest rate than the private company. So, Mr. Eisenhower ordered AEC to pay all the private company's taxes; and the contract, if signed, would constitute a Government guarantee of the $100 million in 3.5 percent bonds the private company would issue to finance the plant.

The President's decision means that over the minimum period of the contract, the minimum excess cost to the Government of this power from this private source would be $92,125,000.

The basic fault of this proposed contract is that it forces the Atomic Commission into a field where it has no business being. TVA needs more power at Memphis, not the AEC. But AEC is being used as a reluctant power broker.

The next major fault lies in the waste of more than $92 million of Federal funds over the next 25 years. At the end of that time, the private powerplant, completely paid for with United States tax dollars, will remain the property of the private companies.

The proposed contract would set a precedent which might be used in later years to make AEC a power broker anywhere in the country.

It would mean construction of a big powerplant on a made-land site that could be flooded by the Mississippi River. And the plant may loose ashes, smoke, and sulfur on the clean city of Memphis.

It would commit the AEC, not the TVA (although TVA gets the power), to pay all the local, State, and Federal taxes of the company that builds and operates the West Memphis plant. This tax bill would make up the bulk of the $92 million excess cost.

AEC has authority to buy power it needs. It should not be forced to prostitute this authority to buy power for TVA.

If TVA is subsidized by the Government, as some claim, then what better beneficiary of this subsidy than our own atomic plants?

If it is decided that TVA shall get no more appropriations from the Treasury to build additional generating plants, then let AEC and TVA each fulfill its own power needs from private power sources at the cheapest possible rate.

The General Accounting Office has suggested that AEC's power needs be met by a contract let on an advertised low-bid basis.

That sounds reasonable to us.

Mr. Speaker, there has been considerable comment and discussion of this question. The effort was made yesterday by a release made by the Bureau of the Budget to give some excuses for this very unusual type of contract, but that did not touch, neither did my distinguished friend the able gentleman from California, or the distinguished gentleman from North Carolina, in their comments, touch the main point. The main point here is that it would be especially unfortunate for the Atomic Energy Commission to have placed upon it the responsibility of providing electric power, when it is well known that it was not created for any such purpose.

The Atomic Energy Commission has no more business providing power for Memphis than for Chicago, New York, Boston, or any other city in the United States. The Atomic Energy Commission has no business buying any power from anybody that it does not need to operate its own facilities under the authority conferred by act of Congress.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield.

Mr. EVINS. First of all, I commend the gentleman, but I want to say that there has been considerable comment here about the possibility of other power companies being able to compete. Is it not a fact that this order was so drawn, the specifications were so worded, as to eliminate any possibility of competition, that it fit only one private power company? In other words, it was a tailor-made contract.

Mr. COOPER. That is the criticism that has been made, and I think there is considerable justification for it.

Mr. MURRAY. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield.

Mr. MURRAY. Does not the gentleman agree with me that the private-power companies have been jealous of TVA ever since it was authorized by Congress, and that the private-power companies are eager to destroy the electric-power yardstick to TVA? And does not the gentleman think that the President by his directive is using the Atomic Energy Commission as a pliant tool or instrumentality or stooge to try to weaken and impair TVA? I ask the gentleman if he does not think further that this directive or order of the President is playing directly into the hands of selfish, greedy, private-power groups who are trying to destroy TVA today?

Mr. COOPER. I think the gentleman is correct about it, and I just wanted to point out one other thing to my good friend the distinguished gentleman from California [Mr. PHILLIPS], and also to the distinguished gentleman from North Carolina. Both have protested a number of times: "We do not want to hurt TVA; we just do not want to hurt TVA."

You know, it reminds me of the old, old story of somebody just wanting to love you to death. We do not like that kind of affection down in our part of the country where we have a $400 million investment in this TVA system that was provided by law. It has continued to operate under the law. The gentleman from California talks about it being a monopoly. The TVA was created by law and has operated under the law of the land. It is the law of the United States that controls the operation of the TVA system.

Mr. PRICE. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Illinois.

Mr. PRICE. I think the gentleman from Tennessee in his remarks just a moment ago brought out the real issue involved, and that is the independence of the Atomic Energy Commission and the remote responsibility that is being placed on it by this Presidential directive. That is the position taken by 3 of the 5 members of the Commission itself. They felt they were being directed into a remote responsibility that they should not be involved in; they felt it was something that the Commission was not capable of exercising.

Mr. COOPER. Does the gentleman from Illinois, who is a most distinguished member of the Joint Committee on Atomic Energy, agree with me in the statement I made that the Atomic Energy Commission has no more business providing power for Memphis than it does for New York, Chicago, Boston, or any other city of this country?

Mr. PRICE. Not only does the gentleman from Illinois agree with you but I think I can say without fear of successful contradiction that 3 of the 5 members of the Atomic Energy Commission agree with the gentleman.

Mr. COOPER. It is entirely outside of the scope of their activity and it never was contemplated by the Congress at the time the act was passed creating the Atomic Energy Commission that it would be used in any such manner as is proposed under this contract.

Mr. PRICE. The gentleman is absolutely correct.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Tennessee.

Mr. EVINS. Certain gentlemen shed crocodile tears for the taxpayers of the Nation, but here is an example of where the taxpayers of the Nation will be robbed to the extent of $92 million under the testimony of the AEC and $135 million in excessive power cost according to the testimony of the TVA. I just wonder sometimes why they shed crocodile tears for the taxpayers of the Nation. Is it not also a fact that these gentlemen who tried to break the TVA yardstick, under which power is being brought to consumers not only in the TVA area but in other areas, must be aware that information before the Appropriations Committee, the Atomic Energy Commission and other places where the question has been discussed shows that the private power companies on the perimeter of the TVA have made tremendous profits over the years in that area?

Mr. COOPER. The gentleman is correct.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. In addition to the argument advanced by the gentleman from Tennessee, may I say that there is another basic issue involved? The Atomic Energy Commission was created as the result of an act of Congress. There is the organic law not only establishing the commission but providing for the field in which it will operate and with directions from the Congress. The TVA is similarly established by the Congress. The concern to me is the fact that the members of the Atomic

Energy Commission are ordered to do something that their judgment might not prompt them to do and whether or not they violate their oath of office in accordance with the provisions of the organic law relating to the AEC. That is dictation which, if it were by a Democratic President, would result in his being called a dictator.

Mr. COOPER. I thank the gentleman.

SPECIAL ORDER GRANTED

Mr. HOLIFIELD asked and was given permission to address the House for 40 minutes today, following the special orders heretofore entered.

SPECIAL ORDER

The SPEAKER pro tempore. Under special order heretofore entered, the gentlewoman from Massachusetts [Mrs. ROGERS] is recognized for 20 minutes.

Mrs. ROGERS of Massachusetts. I would be very glad to have the gentleman from Georgia [Mr. BROWN] address the House first if he cares to. I have a long-distance call and I have two special orders, one before the gentleman speaks and one afterward. I will be glad to have him proceed for 10 minutes.

The SPEAKER pro tempore. Without objection the transfer will be made.

There was no objection.

EXTENSION OF SPECIAL ORDER PREVIOUSLY GRANTED

Mr. JONAS of North Carolina. Mr. Speaker, I have a special order for tomorrow afternoon of 30 minutes. I ask unanimous consent that that be extended to 1 hour. Considering the debate we have had today I intend to yield to anyone who may ask me to yield and I think I will need an hour instead of 30 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

EXPORT-IMPORT BANK

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Georgia [Mr. BROWN] is recognized for 15 minutes.

Mr. BROWN of Georgia. Mr. Speaker, I am vitally interested in legislation to reorganize and revitalize the lending activities of the Export-Import Bank. It is an unfortunate fact that the bank has not been active in making loans during the past year. Appropriate legislation is needed to correct this situation.

Last Thursday the Senate approved a bill to return the Export-Import Bank to independent status, restore the bank to National Advisory Council membership, reestablish its Board of Directors, and increase its lending authority by $500 million. This leaves the matter squarely up to us in the House of Representatives. I have joined the chairman of the House Banking and Currency Committee [Mr. WOLCOTT] and the ranking Democratic member [Mr. SPENCE] in introducing similar legislation in the House. We hope to hold hearings in the very near future and to bring a bill before the House for action before this session is over.

The critical curtailment of Export-Import Bank loans in the last year has occurred when just the opposite should have taken place. At a time when we are seeking ways and means of reducing expenditures for foreign economic aid, the Export-Import Bank should be playing a major role in the extension of credits to encourage economic development.

World economic conditions have improved substantially in the last few years and I think it is reasonable to conclude that most foreign countries are in a position to stand on their own feet if adequate foreign investment is forthcoming. Foreign investment in the underdeveloped areas is vital to long-run economic development and a better utilization of resources. The Export-Import Bank is an institution with an enviable record of success in this field.

Not only have the Export-Import Bank projects throughout the world contributed to economic development and higher standards of living; these bank loans have also provided markets for United States products. Stepped-up lending activity at this time should reduce the need for direct grants and aid, and should increase markets so desperately needed by United States producers.

I think that we can all agree that greater emphasis should be placed on sound projects to aid the economic development of underdeveloped areas. Such programs, if directed toward increasing the purchasing power of the peoples of these areas and bringing about an expansion of foreign trade, offer a real opportunity in the long run of increasing the exports of our own agricultural and industrial commodities. At the same time, they will contribute to a general strengthening of the economies of the free nations.

There is one thing we should keep in mind about these development programs. The benefits accruing from the development of the world's underdeveloped resources—greater purchasing power, increased consumption, and expansion of trade—are in the long run cumulative. Benefits to the United States will grow progressively.

The Export-Import Bank has not been as active as it might be in the field of providing credit to American importers who have not been able to obtain adequate credit at reasonable rates for financing the importation of goods. Assistance in this field may be just as important in encouraging a high level of international trade as the making of foreign loans, which would directly provide the dollars for financing United States exports.

Although the bank has done a good job of promoting our foreign trade in the past, it is apparent that we have not made the fullest possible use of the resources available to this great institution. The bank today has $1.3 billion in unused lending authority. The legislation we are considering provides the bank with additional lending authority of $500 million. This increased authority should clearly indicate to bank officials and the National Advisory Council, as well as to the country's leading businessmen, that it is the will and the intent of Congress that the Export-Import Bank become more active in utilizing its resources fully in providing needed capital for investments abroad.

In regard to the determination of bank policy, it seems to me that it would be highly desirable to make the Secretary of Agriculture a member of the National Advisory Council on International Monetary and Financial Problems. The Secretary of Agriculture could make a valuable contribution in guiding, establishing, and coordinating our international financial policy.

There is no question but what the Secretary of Agriculture could provide valuable assistance in formulating policy governing the bank in making loans to finance the exportation of agricultural commodities. For instance, there is a general feeling that the Government should be more aggressive in seeking ways to expand cotton exports through the extension of special credits.

Commodity loans have been an important segment of the Export-Import Bank's operations. The bank has performed an important service in establishing credits to facilitate exports of cotton over the years. In total, more than $600 million have been authorized for this purpose. These loans have been most successful from a banking standpoint, and losses have been negligible. Our agricultural exports are of such great importance, and of such extreme interest to the Department of Agriculture, that the Secretary should assist in formulating policy governing these transactions.

There is another reason why the Secretary of Agriculture should be on the National Advisory Council. Many of the development loans made by the Export-Import Bank and the International Bank for Reconstruction and Development are either in the field of agriculture or closely related to agriculture. It is my feeling, and I am sure many others will agree with me, that the Secretary of Agriculture's judgment and experience would be of great help in determining Export-Import Bank policy, as well as in coordinating policy with the International Bank on financing numerous agricultural development programs that must be considered from time to time. The experience and views of the Secretary of Agriculture, who is closest to this problem, should be of tremendous value to the National Advisory Council in formulating international financial policy.

An amendment will be offered to the proposed legislation to add the Secretary of Agriculture to the National Advisory Council, along with the Secretaries of the Treasury, State, and Commerce, the Chairman of the Board of Governors of the Federal Reserve System, the Administrator of the Foreign Operations Administration, and the president of the Export-Import Bank.

I will support this amendment, and I urge those of you who are interested in shaping our policies to bring about a healthy and expanding foreign trade to give the matter serious consideration.

I am confident we can act upon this legislation before adjournment. A vigorous Export-Import Bank, capable of acting to strengthen the economic position of our friends, is an integral part of a sound foreign economic policy. Congress has the obligation to make sure that the bank is equipped with the tools necessary to carry out its responsibilities.

INCREASE IN DISABILITY COMPENSATION PAYMENTS

The SPEAKER pro tempore. Under the transfer of time of the special orders, the gentlewoman from Massachusetts [Mrs. ROGERS] is now recognized for 20 minutes. We have reached the point in the special orders where the gentlewoman from Massachusetts has another special order for 20 minutes. Therefore, the Chair recognizes the gentlewoman for 40 minutes.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I should like to announce to the House again that on Wednesday the petition of the gentleman from New York [Mr. RADWAN] will be on the desk for Members to sign. When 218 signatures are secured, that petition will force action on H. R. 9020 which is a very modest bill giving a 10-percent increase across the board for service-connected cases and certain amounts for non-service-connected cases.

Mr. Speaker, although we have repeatedly asked verbally and by letter for a hearing before the Committee on Rules, to date we have not been granted that courtesy. We have been promised a rule by two influential persons, but to date we have not been even granted a hearing. I am sure the gentleman from New York [Mr. RADWAN] did not want to put a petition on the desk, but thank heavens, we have the right to petition. It seems we will have to use that right in order to get our legislation. It is a very modest bill—it will only cost $231 million. Why should our veterans' legislation be left until the last possible moment? It is beyond my comprehension. The servicemen and women are the first in the trenches when we declare war. We have had legislation—piece after piece after piece of legislation from the Committee on Armed Services and appropriations to give the men the implements of war with which to kill the enemy and to protect themselves and the country, but nothing—practically nothing has been passed this year for the veterans who are injured in the service of their country, the men who have borne the heat of the day and the fire and the slaughter and the agony and the mental anguish and all that goes with it. How can you expect any veteran to want to win this war today?

Mr. EVINS. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I am very glad to yield to the distinguished gentleman from Tennessee, a very active member of the committee, and a ranking minority member of the committee.

Mr. EVINS. I wish to commend the gentlewoman from Massachusetts [Mrs. ROGERS], the chairman of my committee, for the very fine statement which she has just made, and to assure her that I am certainly in agreement with her statement. I certainly want to associate myself with the distinguished chairman of the Committee on Veterans' Affairs in this matter as I have in many times past in connection with legislation for the benefit of the veterans of the Nation. As the gentlewoman knows, the subcommittee on compensation and pensions held hearings for a number of weeks on the overall question of the need for an increase in compensation for the disabled veterans of the Nation. The Committee on Veterans' Affairs heard representatives of veterans' organizations and many others, and reported to the full committee a bill to increase and more nearly equalize the compensation benefits for all veterans of the Nation presently receiving compensation not just for one war but for all the wars in which this Nation has participated, and to recodify more or less the compensation benefit laws for the veterans, their widows, and dependents. After extensive executive sessions in which the bill was read very carefully, and after many amendments were offered and some adopted and some rejected, the Committee on Veterans' Affairs unanimously passed and reported this bill, which we feel is a very good "one package" veterans' compensation bill. And yet, notwithstanding this consideration and action further consideration of the measure has been held up and no action has been taken to report it by the Rules Committee to the House. I shall certainly join with my chairman in signing the discharge petition when it is placed on the Speaker's desk if this action is necessary to bring the bill to the floor for passage.

Mrs. ROGERS of Massachusetts. The gentleman is always very helpful. I know the gentleman remembers that the bill was cut from $289 million to $231 million—not that the members wanted to cut it, but they felt that to secure the quick passage of the bill at this late date that would be the wiser thing to do.

Mr. EVINS. The amount of authorization in this bill is very modest when we consider the past appropriation bills which have been provided for the veterans of this Nation. Appropriations for all veterans' programs and benefits, at one time, totaled about $9 billion and now they have been cut down to about $3.8 billion for the next year, I believe. So there has been a substantial and drastic cut in veterans' compensation benefits over the past several years—the authorization contained in the pending bill is modest by many comparisons.

Mrs. ROGERS of Massachusetts. And the amount is a drop in the bucket compared to the amount we give to foreign countries. I voted for that somewhat unwillingly, but I was willing to take a chance, if anything could be done to stop the fighting. I wanted to do that, if it could be done. But I do not see how anybody in the Congress can say we are willing to appropriate $3 billion for other countries and not appropriate money for our own veterans. I know what the verdict will be. There are 22 million veterans today in the country. I believe the figure is over 22 million. Approximately 5 million of those veterans are represented by service organizations who work tremendously hard to secure the passage of veterans' legislation and protect the veterans' interests. I think it would be helpful if more veterans joined those organizations, but as the gentleman knows there are many veterans who do not join any organization. They are very vocal about this bill. Also, I would like to speak for the mothers of the men who are going into the service, or who are in the service now—they have come to me in great numbers and have written to me besides personally, and begged us to keep on taking care of the veterans. They know that it would ease their load a little bit if they felt that their sons and their husbands and fathers were cared for.

Mr. EVINS. Mr. Speaker, will the gentlewoman yield further?

Mrs. ROGERS of Massachusetts. I yield.

Mr. EVINS. I thank my chairman for her indulgence. I merely want to state further that one of the principal objectives of the veterans' organizations and the veterans of this Nation, in the way of legislation from this session of Congress, is a reasonable cost-of-living increase. That is the bill we have reported. But no action has been taken on it on the floor.

Mrs. ROGERS of Massachusetts. Yes, and I know that our subcommittee spent hours and hours and hours working for this in an effort to try not to have it cost too much, and they felt we might secure earlier passage of the bill in that way.

I was interested the other day when the wife of a veteran came to me and said, "Please do everything you can on the committee to keep our interest in the veterans."

Mr. MACK of Washington. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield to the distinguished gentleman who is chairman of the Subcommittee on Spanish-American War Veterans.

Mr. MACK of Washington. I would like to associate myself with the gentleman from Tennessee [Mr. EVINS] in complimenting the gentlewoman from Massachusetts on the excellent and clear and convincing statement which she has made. It was my good fortune as chairman of the Spanish-American War Veterans' Committee to hold hearings for over 2 days on the problems of the Spanish-American War widows and veterans' dependents.

Mrs. ROGERS of Massachusetts. You held numerous hearings last year on the same subject, did you not?

Mr. MACK of Washington. Yes; both last year and this year. We have recommended that the pension be increased from $51.60 to $58, which is an increase of only about 12 percent and is in keeping with the increased cost of living which has occurred since the last increase. There are a limited number of these Spanish-American War widows, and they are in most cases over 70 years of age. Fifty-eight dollars a month which they receive is not too liberal to provide for any extravagant living.

Mrs. ROGERS of Massachusetts. It would hardly provide for the bare necessities of life.

Mr. MACK of Washington. That is right. I do hope the Rules Committee

will give a rule on this bill and allow it to be discussed on the floor of the House.

Mrs. ROGERS of Massachusetts. It is the most amazing disregard of a committee that I have ever known. I have been in Washington for 40 years, and in the Congress over 30 years. I have never known anything quite like it before, and I hope I never have to experience it again.

Mr. MACK of Washington. I thank the gentlewoman for yielding to me.

Mrs. ROGERS of Massachusetts. I thank the gentleman for his exhaustive hearings and his fine ability in his fight for the Spanish-American War veterans and their widows. You also have a bill for the Moro veterans, do you not?

Mr. MACK of Washington. We have. That was passed once by the House of Representatives and once by the Senate and vetoed by the President. Another time it was passed by the House. It has been reported out of the Veterans' Affairs Committee unanimously four times, but it has never been enacted. It is a similar action to the Korean action, where it was a police action rather than a war, but those men are entitled to this pension. There are very, very few of them.

Mrs. ROGERS of Massachusetts. There was not a dissenting vote against the bill. It has been gathering dust in the Rules Committee.

Mr. MACK of Washington. That is correct.

Mr. SPRINGER. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I gladly yield to the chairman of the Subcommittee on Education and Training.

Mr. SPRINGER. There is a small raise in this for World War II widows as well, but there has been a lot of correspondence with my office with reference to putting World War I widows under the same provision as the Spanish-American War widows. However, I believe the committee did give this rather modest raise from $48 to $54 per month, which I believe everyone will admit is about as small a raise as could be given. In other words, these raises that have been given are more or less in keeping with the rise in cost of living and have not in any instance that I know of been, or would be, termed liberal or exorbitant.

Mrs. ROGERS of Massachusetts. I would say they are picayunish. They are small, but we thought it best not to make it too high.

Mr. SPRINGER. I think that is true. I think the committee tried in every way it could to come out with a bill which could not be criticized as being an extravagant measure, but we did feel that based upon the increase in the cost of living those widows were entitled to at least this very modest raise.

Mrs. ROGERS of Massachusetts. They were given to World War II widows. Only the Spanish-American War widows were getting more before. It seems to me rather hard not to give them more, but I know that the House does not want the Committee on Veterans' Affairs to liquidate the veterans.

We were not created to liquidate; we were created to see how we could help them. The membership on our committee is divided 14 to 14 between the 2 parties; it is a nonpartisan committee, and we work that way, and as chairman I express my appreciation to the members of the committee for their fine cooperation often to the extent of putting aside their own wishes. It has been a very satisfying experience.

Mr. MACK of Washington. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield to the gentleman from Washington.

Mr. MACK of Washington. The provision would increase the pension rate of World War I and World War II from $48 to $54 a month, or an increase of $6 a month. For the Spanish-American War veterans the increase is from $51.60 to $58, about the same amount in dollars.

Mrs. ROGERS of Massachusetts. I would like to say to the gentleman from Illinois that he has a constructive fine bill, providing for the continuation of educational opportunities for the Korean war veterans and also for the veterans of World War II who because of confinement in hospitals have not been able to avail themselves of the training program.

Mr. SPRINGER. If the gentlewoman will yield, may I say, without revealing the sources of the information, that it has come to me that it is quite possible the administration will look with more favor upon these two bills than has been indicated previously. At least it seems to me there may be encouraging signs ahead of us on these two pieces of legislation.

Mrs. ROGERS of Massachusetts. I think that the administration—in fact, I know—the administration is pledged to that and also for help to widows and orphans.

I would like to say to the membership that I feel very sure, judging by the 80th Congress, that there are many bills that we have reported out of the Committee on Veterans Affairs that the Senate would have been glad to pass first and then send them to the House. It is rather humiliating that this House cannot start them.

I would like to thank the members of the committee again. I see the very fine Member from Kentucky [Mr. NATCHER] who has not missed a single hearing and has been very cooperative.

Mr. Speaker, I ask unanimous consent to include a description of the rates of compensation fixed under H. R. 9020.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

(The matter referred to follows:)

COMMITTEE ON VETERANS' AFFAIRS,
HOUSE OF REPRESENTATIVES,
EDITH NOURSE ROGERS, *Chairman.*

INCREASED RATES OF COMPENSATION AND PENSION, H. R. 9020

Title: To provide increases in the monthly rates of compensation and pension payable to certain veterans and their dependents.

Mr. RADWIN. Introduced and referred May 5, 1954.

Analysis: Provides the increases in service-connected compensation and non-service-connected pension as indicated in the tables which follow:

Veterans' compensation—All wars

	Present law war service-connected rates, Veterans Regulation 1 (a), as amended, pt. I	H. R. 9020	Present law peacetime service-connected rates, Veterans Regulation 1 (a), as amended, pt. II	H. R. 9020
(*a*) 10 percent disability	$15.75	$17	$12.60	$14.00
(*b*) 20 percent disability	31.50	35	25.20	28.00
(*c*) 30 percent disability	47.25	52	37.80	42.00
(*d*) 40 percent disability	63.00	69	50.40	55.00
(*e*) 50 percent disability	86.25	95	69.00	76.00
(*f*) 60 percent disability	103.50	114	82.80	91.00
(*g*) 70 percent disability	120.75	133	96.60	106.00
(*h*) 80 percent disability	138.00	152	110.40	122.00
(*i*) 90 percent disability	155.25	171	124.20	137.00
(*j*) Total disability	172.50	190	138.00	152.00
(*k*) Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, rates (*a*) to (*j*) increased monthly by	47.00	47	37.60	37.60
Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, in addition to requirement for any of rates in (*l*) to (*n*), rate increased monthly for each loss or loss of use by	[1] 47.00	[1] 47	[2] 37.60	[2] 37.60
(*l*) Anatomical loss, or loss of use of both hands, or both feet, or 1 hand and 1 foot, or blind both eyes with 5/200 visual acuity or less, or is permanently bedridden or so helpless as to be in need of regular aid and attendance, monthly compensation	266.00	293	212.80	234.00
(*m*) Anatomical loss, or loss of use of 2 extremities at a level, or with complications, preventing natural elbow or knee action with prosthesis in place, or suffered blindness in both eyes, rendering him so helpless as to be in need of regular aid and attendance, monthly compensation	313.00	344	250.40	275.00
(*n*) Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthetic appliance, or suffered anatomical loss of both eyes, monthly compensation	353.00	388	282.40	310.00
(*o*) Suffered disability under conditions which would entitle him to 2 or more rates in (*j*) to (*n*), no condition being considered twice, or suffered total deafness in combination with total blindness with 5/200 visual acuity or less, monthly compensation	400.00	440	320.00	352.00
(*p*) In event disabled person's service-incurred disabilities exceed requirements for any of rates prescribed, Administrator, in his discretion, may allow next higher rate, or intermediate rate, but in no event in excess of	400.00	440	320.00	352.00
(*q*) Minimum rate for arrested tuberculosis	67.00	67	53.60	53.60

[1] But in no event to exceed $440.
[2] But in no event to exceed $352.

Section 2 increases the rate of compensation for widows without children from $75 to $87 monthly. Dependent parents are increased from $60 to $75 and where two parents are living from $35 to $40 each.

Veterans' pension

INDIAN WARS

	Law	H. R. 9020
30 days or more service or through campaign in connection with or in zone of active Indian hostilities—rates:		
⅓o disability or more	$96.75	$100
Age 62 or over	96.75	100
Aid and attendance	129.00	135

CIVIL WAR

90 days or more service or discharge for disability incurred in line of duty:		
Rate	$96.75	$100
Aid and attendance	129.00	135

SPANISH-AMERICAN WAR, PHILIPPINE INSURRECTION, AND BOXER REBELLION

(Service pension laws in effect Mar. 19, 1933, reenacted by Public Law 269, 74th Cong., Aug. 13, 1935, as modified or amended)

90 days or more service or discharge for disability incurred in line of duty—rates:		
⅓o disability or more	$96.75	$100
Age 62 or over	96.75	100
Aid and attendance	129.00	135
70 days or more service but less than 90 days—rates:		
⅓o disability or more	64.50	68
Age 62 or over	64.50	68
Aid and attendance	83.85	87

WORLD WAR I, WORLD WAR II, AND SERVICE ON OR AFTER JUNE 27, 1950

90 days or more service or discharge for disability incurred in line of duty. In active service before cessation of hostilities—rates:		
Permanent and total	$63	$68
Rated permanent and total for continuous period of 10 years or reaches age 65 years	75	80
Aid and attendance	129	135

Cost: First year, $231,722,000.

Reported: May 28, 1954; House Report 1685.

Mr. NATCHER. Mr. Speaker, will the gentlewoman yield?

Mrs. ROGERS of Massachusetts. I yield.

Mr. NATCHER. I would like to commend my chairman at this time on the splendid statement she has made and to say to her that I want to aline myself with the position that she has taken in this matter, and further to state that if it becomes necessary I shall be glad to sign a petition to discharge H. R. 9020.

Mrs. ROGERS of Massachusetts. Frankly I know there are members of the committee who have never signed a discharge petition, but I do not believe any member of the committee would be willing to go home and face the people at home without signing such a discharge petition. I doubt if there is any Member of Congress who would want to go home to his people—I know I would not want to go home and face my people and say that we were willing to do nothing for veterans or even to go before the Rules Committee. I thank the gentleman. He has been very cooperative.

Again I say, Mr. Speaker, this has been a very fine committee to work with and I have enjoyed it. But it is the members themselves who have done the work.

THE DIXON-YATES CONTRACT

The SPEAKER pro tempore (Mr. CANFIELD). Under the previous order of the House, the gentleman from California [Mr. HOLIFIELD] is recognized for 40 minutes.

Mr. HOLIFIELD. Mr. Speaker, I had not expected to talk on this subject again because I felt that my two speeches in the RECORD of July 6 and July 7 pretty well covered the Dixon-Yates contract, the Bureau of the Budget letter from Mr. Hughes to Mr. Strauss, and other points which I think have been adequately explained and which have not been refuted by any of the gentlemen who have followed me.

I do, however, want to say this: I have in my hand the remarks of the gentleman from North Carolina [Mr. JONAS]. I have not had a chance to look at them. I note that he has placed in the RECORD a detailed analysis of the Middle South-Southern proposal. That is the proposal which has been presented to our committee and it is the proposal which should be referred to in our debate.

It does show a total of $3,685,000 more per annum cost to the United States Government than if they had purchased the same amount of power from the proposed Fulton plant of the TVA.

At this point I want to call attention to the fact that the gentleman from Arkansas [Mr. GATHINGS] placed in the RECORD of July 6 a table which was evidently supplied to him by the Bureau of the Budget. This table is an obsolete table, it is a discredited table. The proper table which I will submit for the RECORD at this point is found on pages 1026 and 1027 of the hearings. It was presented to the Joint Committee on Atomic Energy by Mr. Wessenauer, of the TVA, in our hearings. It was testified to by General Nichols, General Manager of the Atomic Energy Commission, that the Bureau of the Budget and the Atomic Energy Commission, with the assistance of Mr. Francis Adams, of the Federal Power Commission, had agreed upon the figures contained in this table. It was presented to us on February 17, and it is known as table 2. It is a comparison of the Dixon-Yates offer for the new plant at West Memphis, Ark., and the TVA offer for the same type plant to be built at Fulton or at Fulton and Johnsonville.

Mr. GATHINGS. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Arkansas.

Mr. GATHINGS. I was present at the time that material was placed in the RECORD on the Senate side when the joint committee met. The gentleman is stating it like it is.

Mr. HOLIFIELD. I thank the gentleman.

Mr. GATHINGS. I want to say to the gentleman that the figures I placed in the RECORD were not antiquated at all, because here is a slip showing the date of June 30, 1954, that these figures were supplied to me.

Mr. HOLIFIELD. I do not know about the gentleman's slip nor what it purported to be. It may very well be that they were furnished to him by the Bureau of the Budget because they are squirming and they are trying to justify their position, but I say to the gentleman that the figures he has are not pertinent, they are not the acknowledged official figures and the amount I have given from the official figures found on pages 1026 and 1027, part 2 of the hearings of the joint committee is the accurate figure.

Mr. GATHINGS. That was the bare bone price to furnish this power with its

own plant, without having to pay interest or taxes. They are the bare bone figures but take into consideration the actual figures that TVA is charging AEC after all taxes have been paid.

Mr. HOLIFIELD. I am not going to enter into a controversy with the gentleman on that point. That is not the point in issue. The point in issue is whether the powerplant in the area to be served will be more economical to the taxpayers by being built by the TVA at Fulton or by the Dixon-Yates plant to be built at West Memphis. That is the point at issue.

Mr. GATHINGS. I put in the RECORD in the remarks I made the other day that it resulted in a saving to the Government after you took into consideration the amount of money the Government of the United States would have to throw into these various districts because of the school impacted problems that would exist, for one thing.

Mr. HOLIFIELD. The gentleman's statement will stand for itself, and I refuse, Mr. Speaker, to yield further at this time. However, I will yield later to the gentleman.

Now, in Mr. JONAS' statement there is a sheet of figures which is noted as attachment 1, a comparison of actual cost to Federal Government for power supplied and to be delivered to the TVA system at the Memphis area, and the Dixon-Yates proposal is analyzed. This, as far as I know, is an accurate presentation, and it again shows at the bottom of the page, additional cost to the Government per year of $3,685,000.

Now, attachment No. 2 attached to Mr. JONAS' remarks is a comparison of the Dixon-Yates proposal with the TVA-Paducah contract and it shows an additional cost of $2,923,000 a year. And, I point out again that this is not a comparison between the Dixon-Yates proposal and the proposed Fulton-TVA plant, but it is a comparison with the Paducah contract with TVA.

And, at this time I want to say that the cost at the Paducah plant at the present time, of the TVA delivery of power to the AEC at Paducah at this time, is a higher cost than the contract price by Electric Energy, Inc. The reason for that is that an emergency requirement has been placed upon the TVA to furnish power for that plant. TVA does not have the capacity to supply it with its own facilities. It has gone out into the private utility market and made at least 4 contracts—maybe more than 4, but 4 to my knowledge—with private utilities for high-priced kilowatts. And, of course, the total price of the high-priced private utility kilowatts and the low-cost TVA kilowatts has to be balanced, and that is what makes the present cost of the TVA delivered power, which is not again, as I say, TVA-produced power in its entirety, but it makes it higher at the present time than the long-term contract of the EEI. But, the TVA has testified that as soon as they get their additional plants into operation at the Shawnee site that the cost of delivery will go down to 3.47 mills per kilowatt, and will at that time be substantially cheaper than the long-term contract price of the EEI delivery at this time.

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from North Carolina.

Mr. JONAS of North Carolina. I am asking for information. I do not know. I have read in the record a speech made by a Member in the other body to the effect that TVA is charging the AEC today more for the power it delivers at Paducah than TVA is selling its power and charging its customers in the Memphis area. Is that right?

Mr. HOLIFIELD. That is true, because the power it is delivering to its customers in the Memphis area is not TVA produced power; a large part of it is purchased from private utilities. At Paducah it is purchased, as I said before, from private utilities, not all of it, but a major portion of it is being purchased outside of TVA. The original requirement by AEC of the TVA at Paducah was 500,000 kilowatts and the original requirement from Electric Energy, Inc., was 500,000 kilowatts. Later on AEC came to them and asked them for another 1 million kilowatts. At that time Electric Energy, Inc., had the right to take 50 percent of that additional load. It turned down its right to take 50 percent and only took 205,000 kilowatts out of the 1 million kilowatts, and at that time TVA contracted to give the other 735,000 kilowatts, and I believe I am quoting the right figures from memory. Now, in order to do that, it did not have but four of its generating plants built—others were budgeted for but not built, and in order to take the load which the EEI turned down to furnish to the AEC, it made these private utility contracts and, of course, it had to pay a higher price, and that brought up the cost of the delivery by TVA to AEC at Paducah. But that is a temporary emergency arrangement and the rates will be reduced when the new generating capacity is built at Shawnee which is now budgeted, and in process of construction and on which the AEC has a firm contract.

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield at that point?

Mr. HOLIFIELD. I yield.

Mr. JONAS of North Carolina. I am seeking information; I am not trying to get into an argument.

Mr. HOLIFIELD. I understand.

Mr. JONAS of North Carolina. I think the facts will show that TVA is buying power from private utilities all around the periphery of the TVA area. It is buying power in the Memphis area.

Mr. HOLIFIELD. This is undoubtedly true.

Mr. JONAS of North Carolina. Therefore, I cannot see how it is a legitimate excuse that TVA gives, as the reason why the power it sells to AEC at Paducah costs the Government more money than AEC has to pay for private power.

Mr. HOLIFIELD. I shall explain that to the gentleman. The power that the TVA is buying from different utilities is on a peak-load basis, on an exchange basis, in order to level out the power requirements of the TVA and the adjoining private utilities throughout their system. It does not amount to a substantial figure at any other place except at Paducah, where there is a tremendous purchase of power from private utilities for this emergency need of the AEC at the Paducah plant.

Mr. EVINS. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Tennessee.

Mr. EVINS. As long as we continue to have private power piped back into the TVA system at higher rates, we are going to continue to have higher rates to the Government and to others; is not that correct?

Mr. HOLIFIELD. Not only is that right, but I point out another factor in this Dixon-Yates contract. The Dixon-Yates contract provides that the TVA shall build a $9 million transmission line from the middle of the Mississippi River at the delivery point of Dixon-Yates terminal up to the Tennessee Valley grid near Memphis. This will cost the TVA $9 million for the purpose of procuring higher-cost power than they could manufacture in their own plants. This is charged up to the TVA budget, and, as the gentleman from Tennessee [Mr. EVINS] said, it will help to pad the cost of TVA, run up their cost—in my opinion, unjustly, because if they built their own plant at Fulton, which is an approved site, approved by the Corps of Engineers, while the Memphis site is not an approved site, then they could build their own plant cheaper, and they would not have to build a $9 million transmission line to hook up with their grid system.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. JONES of Alabama. Since the creation of TVA, there has not been anything unusual about TVA buying power from the private utilities in the neighborhood, nor is there anything unusual about TVA seling power to them.

Mr. HOLIFIELD. No. This is just a straw man. No one has claimed that this is anything unusual.

Mr. JONES of Alabama. All of the testimony adduced before the Committee on Appropriations every year from the private utilities and the TVA is that their relationship has been one of cordiality and one of total satisfaction on the sale of power between the private utilities and the Authority; is not that correct?

Mr. HOLIFIELD. That is correct.

Mr. MURRAY. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Tennessee.

Mr. MURRAY. I am intensely interested in the continued independence of the Atomic Energy Commission.

Mr. HOLIFIELD. This is the most important issue involved in this controversy, I may say.

Mr. MURRAY. The AEC was created by Congress as an independent commission.

Mr. HOLIFIELD. That is right.

Mr. MURRAY. Free from the influence or interference of the executive

branch. If this directive finally becomes effective and the contract is entered into, then I am afraid that it will set a dangerous precedent for the future of the Atomic Energy Commission.

Mr. HOLIFIELD. I agree with the gentleman.

Mr. MURRAY. I fear the AEC will simply become a pliant tool, a puppet of the Executive, instead of remaining an independent commission. The AEC is our most highly sensitive agency, our most vital defense instrumentality. By all means it should be kept absolutely free and independent from dictation from the Executive or from anyone else on the outside.

Mr. HOLIFIELD. I agree with the gentleman from Tennessee [Mr. MURRAY]. He has expressed by opinion on this much more brilliantly than I could. This is really the important factor. I would rather talk about that principle than talk about the public-private power issue.

Mr. EVINS. Mr. Speaker, will the gentleman yield at this point?

Mr. HOLIFIELD. I yield.

Mr. EVINS. The gentleman from California is a very distinguished member of the House-Senate Joint Committee on Atomic Energy. I would like to ask him this question as to whether or not there is any authority in law for the Atomic Energy Commission to be in the power-brokerage business?

Mr. HOLIFIELD. In the July 6 speech which I made, which the gentleman will find in the RECORD, he will find adequate treatment of that point. I brought forward testimony of Mr. Boyer, the then General Manager of the Atomic Energy Commission when he appeared before our committee and asked for the legislation which is now section 12 (d) of the Atomic Energy Act of 1946, as amended, and which will be carried over in the so-called Cole-Hickenlooper Atomic Energy Revision Act as section 164. He testified at that time before our committee that this was strictly limited to the three atomic energy plants named in the section, which were the atomic energy installations at Oak Ridge, Portsmouth, and Paducah. He expressed beyond any shadow of a doubt the meaning of his language and this was not challenged. In fact, the gentleman from California [Mr. HINSHAW] and I questioned him at some length on that. That was our understanding, as is revealed by the record, and it was the understanding of the rest of the Joint Committee on Atomic Energy at that time, I am sure, because no one challenged the gentleman's testimony.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. JONES of Alabama. Has the Atomic Energy Commission had an opinion from the Attorney General as to whether or not the Atomic Energy Commission had legal authority to make contracts for or on behalf of the Tennessee Valley Authority?

Mr. HOLIFIELD. As the gentleman knows, the party of which I am a member is not in control of the committee. It has no right, that is the minority has no right, to ask for such an opinion An opinion has not apparently been asked for and, if it has been asked for, I am not aware of it. Therefore, this point is up in the air as far as I know.

Mr. JONES of Alabama. Is there any legal precedent for one agency to make contracts for another agency of Government, for Government corporations or independent operations?

Mr. HOLIFIELD. The gentleman is taking in a great deal of territory. I personally know of no such precedent and I know that none was contemplated in this particular instance.

Mr. JONES of Alabama. Has any comment been made by the Atomic Energy Commission that it did possess the inherent authority, and that the power was vested in it to execute contracts for the TVA or any other Government agency?

Mr. HOLIFIELD. The testimony on that point from the lawyers of the Atomic Energy Commission was that they felt section 12 (d), which I referred to just a moment ago, did give them that authority. I think they are completely wrong in making that statement, and I challenge their interpretation of it.

Mr. JONES of Alabama. If they have the authority to acquire power for the Tennessee Valley Authority, would not they have equal justification to obtain power for the General Services Administration to furnish energy for the Capitol buildings and the House and Senate Office Buildings and to contract as to all the other contractual relationships between the Federal Government which are taken care of by the General Services Administration?

Mr. HOLIFIELD. I would say so.

Mr. JONES of Alabama. Would they not equally have the same authority to acquire power for the Department of Defense?

Mr. HOLIFIELD. The gentleman is right. I will have to ask the gentleman now to give me a little of my own time, Mr. Speaker.

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield? I would like to respond to those statements.

Mr. HOLIFIELD. If the gentleman will wait just a few minutes, I would like to complete my statement. Then, I will be glad to yield to the esteemed gentleman from North Carolina.

Mr. Speaker, there is one point which I wish to completely clarify at this point. There have been various talks of replacement by the proponents of the Dixon-Yates proposal on the floor, in the language of the Bureau of the Budget and so forth.

I want to read from page 970, part II, Atomic Energy Commission hearings, in which I questioned the general manager, Mr. Nichols. This is the colloquy which took place:

Mr. NICHOLS. * * * In other words, the Bureau of the Budget says that we should bear the cost of the taxes. It would be just a financial transaction whereby in making our payments to TVA we would reduce the amount due at Paducah by the amount we had paid Dixon-Yates less taxes.

Representative HOLIFIELD. Yes, but this is not a reduction of power commitments of TVA to the AEC, is it?

Mr. NICHOLS. It is what you would call replacement power.

Representative HOLIFIELD. No, it is not replacement power. You may have a bookkeeping transaction that you may call offsetting, but it is not replacement, because you made the contract with the TVA for the AEC Paducah plant prior to any such consideration as this, did you not?

Mr. NICHOLS. That is right.

Representative HOLIFIELD. And you had no contingency in there for furnishing at a later date offsetting power to that amount, did you?

Mr. NICHOLS. No.

Mr. Speaker, this proves beyond doubt that the idea of replacement is something completely new, and there is other testimony which I could give. At this time, Mr. Speaker, I ask unanimous consent to place in the RECORD at this point a letter to the then Director of the Budget, Mr. Dodge, from Mr. Lewis L. Strauss, of the Atomic Energy Commission, containing five pages, and which is an analysis from the AEC standpoint of the Dixon-Yates proposed contract.

The SPEAKER pro tempore (Mr. CANFIELD). Is there objection?

There was no objection.

The matter referred to follows:

UNITED STATES
ATOMIC ENERGY COMMISSION,
Washington, D. C., April 15, 1954.

Hon. W. STERLING COLE,
Chairman, Joint Committee on Atomic Energy, Congress of the United States.

DEAR MR. COLE: By letter dated March 3 and March 22, 1954 from Mr. Nichols to Mr. Allardice, we have advised the Joint Committee of the progress made in response to the President's Budget Message and the request of the Bureau of the Budget to explore the possibility of reducing existing commitments of the TVA to AEC by 500,000 to 600,000 kilowatts.

Enclosed for your information is a copy of a report made today to the Bureau of the Budget covering the present status in detail. It is our understanding that the Bureau plans to arrive at a conclusion shortly.

If there is any further information you desire, we shall be happy to furnish it.

Senator HICKENLOOPER is also being advised.

Sincerely yours,

LOUIS STRAUSS,
Chairman.

LETTER FROM MR. STRAUSS TO MR. DODGE ANALYZING THE DIXON-YATES CONTRACT FROM THE COMMISSION'S VIEWPOINT

Hon. JOSEPH M. DODGE,
Director, Bureau of the Budget.

DEAR MR. DODGE: On March 3, 1954, in a meeting held in Mr. Hughes' office was furnished an analysis of a proposal dated February 25, 1954, which the Atomic Energy Commission had received from Mr. E. H. Dixon, president of the Middle South Utilities, Inc., and Mr. E. A. Yates, chairman of the board, the Southern Co., for the supply of 600,000 kilowatts of firm power. This proposal was in response to the President's budget message and your letter of December 24, 1953, requesting the Atomic Energy Commission to explore the possibility of reducing existing commitments of the TVA to AEC by 500,000 to 600,000 kilowatts.

As you requested, since March 3 we have been meeting separately and jointly with staff members of the Federal Power Commission and representatives of the sponsors of the proposal in an endeavor to work out a fair and equitable arrangement to the Government which could serve as a basis for negotiations leading to a definitive contract.

These discussions have been on the basis of an analysis of comparative costs between our TVA Paducah contract and the Dixon-Yates proposal as revised during the course of the meetings.

We have proceeded on the basis that there would be no contract cancellation for a like portion of the AEC-TVA Paducah contract; that AEC would contract with the sponsors for power needed by TVA for load growth in the Memphis area on the basis of replacement. This approach assures AEC of continuity and reliability of power to the Paducah project.

On April 10, 1954, a joint meeting was held at the Atomic Energy Commission's office and was attended by the leading representatives of the sponsors; the Chief, Bureau of Power, Federal Power Commission and the General Manager of the AEC. As a result of this meeting, the sponsors withdrew their proposal of February 25, 1954, and later submitted the revised proposal attached to this letter.

Under the revised proposal, the sponsors have offered, subject to securing financing on the basis described in (b) below, (a) to form a new company sponsored by Middle South Utilities, Inc., and the Southern Co.; (b) to secure the necessary capital requirements presently estimated at $107,250,000, by subscribing 5-percent equity capital which will bear a return of 9 percent and issuing 30-year bonds to institutional investors for the remaining 95 percent based on an interest rate of 3½ percent; (c) to build a 650,000-kilowatt steam-electric station near West Memphis, Ark., to provide transmission facilities from the sponsors' new facilities to the middle of the Mississippi River between Shelby County, Tenn., and Crittenden County, Ark., including modifications to existing river crossing interconnections between TVA and Arkansas Power & Light Co., and its existing and future points of connection between subsidiaries of the Southern Co., Mississippi Power & Light Co., and TVA; and (d) to enter into a contract with the Atomic Energy Commission for a term of 25 years from date of commencement of commercial operation to the first unit under the following provisions:

(1) An annual base capacity charge, exclusive of taxes, of $8,775,000, which is equivalent to $14.625 per kilowatt-year, subject to variation (a) up or down in case of increase or decrease in actual cost of construction compared with present estimate, with a maximum annual increase of $285,000 or 47.5 cents per kilowatt-year, (b) up or down for changes in cost of fuel from 19 cents per million British thermal units for fuel component included in the base capacity charge required to keep the plant in operation under no load conditions, and (c) upward only for power factor correction or less than 93 percent.

(2) An energy charge of 1.863 mills per kilowatt-hour subject to adjustments up or down in case of increase or decrease in fuel costs from 19 cents per million British thermal units and for increases or decreases in labor rates based on the hourly earnings of production workers in gas and electric utility industries as compiled by the Bureau of Labor Statistics, using $1.97 per hour as a base.

(3) Reimbursement by the AEC for all taxes, licenses, and fees of every kind or character—State, local, or Federal—paid or payable by the new corporation during the term of the contract except that taxes arising out of use of facilities for purposes other than supply of capacity and energy to AEC will not be paid by AEC.

(4) Cancellation is provided as follows:

(a) For TVA to continue to receive and AEC to pay power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA to make other arrangements for the meeting of the requirements of the Memphis area.

(b) After termination, company shall have first call on the capacity and will absorb as rapidly as load growth will permit, but in any event not less than 100,000 kilowatts per year. Costs associated with capacity absorbed by the sponsors will be borne by the sponsors.

(c) Any capacity not absorbed by the sponsors after the 3-year notice period may be assigned to another governmental agency at an increased price to be approved by FPC.

(d) In event no capacity is used during the notice period, the base capacity charge will be reduced by $1,500,000 and proportionally in case of partial reductions. After termination, the base capacity charge less the $1,500,000 will be reduced proportionately to the capacity absorbed by the sponsors.

(e) The total maximum cost of cancellation to the Government, assuming the plant is idle from date of notice of cancellation, is estimated at $40,012,500 plus fair and reasonable expenses payable to third parties.

(5) The making of appropriate arrangements by the AEC with the TVA for the receipt by it and delivery to the AEC in kind of power and energy to be supplied as indicated above.

With respect to (1) above, the base capacity charge is subject to adjustment for changes in the cost of construction from an estimated cost of $107,250,000 or $149 per kilowatt of capability. Under the formula provided in the proposal, AEC shares on a 50–50 basis with the sponsors any decrease or increase in actual costs. In case the actual cost of the facilities is greater than $107,250,000, AEC shares the increase in cost up to a maximum actual cost of $117 million which would result in the maximum annual increase of $285,000 to the capacity charge. Costs greater than this must be paid in their entirety by the sponsors.

The February 25, 1954, proposal used an estimate of $200 per kilowatt which the sponsors assumed was the cost used by TVA for the Fulton steam plant. The sponsors' present estimate appears to be a realistic cost based on current construction costs of new capacity added by private utilities and TVA in a recent period.

In (3) above, the revised proposal provides that since the capacity and energy charges do not include taxes except those included in other reimbursable costs, i. e., social security taxes, etc., the AEC will pay such additional amounts as will result, after payment by seller of Federal, State and local taxes, licenses, fees and other charges in the seller having net operating revenue in the same amount as seller would have had it seller were not liable for such taxes, etc., except those tax liabilities arising out of use of facilities for others than AEC will not be included in additional charges for capacity and energy. The sponsors state that, based on present tax laws, the additional amount to be added to the capacity and energy charges is estimated at $2,319,000 of which $1,499,000 represents State and local taxes, including $83,000 State income taxes, and $820,000 represents Federal taxes on income. The sponsors have indicated that if a favorable ruling is secured from the Treasury Department to the effect that $262,000 included in the capacity charge for replacements is not to be considered as revenue for tax purposes, the taxes estimated above will be reduced by approximately $313,000, resulting in a total of $2,006,000.

The proposal is also subject to securing appropriate Treasury Department rulings or agreements with respect to the sinking fund depreciation upon which the computations are predicated.

In the cancellation covered by (4) above, considerable time was devoted to developing the present provisions. While they are not on a formula basis similar to the OVEC and the EEI contracts, which are based on the expected load growth of the connected systems of the sponsors and provide for a definite date on which the cancellation costs reduce to zero, they do provide for a minimum absorption of 100,000 kilowatts per year with the understanding the maximum possible will be absorbed each year, the absorption to be cumulative with a minimum of 100,000 kilowatts for each ensuing year.

Further discussions with Mr. Dixon on April 12, 1954, on possible revisions to the sponsors' proposal to develop a cancellation provision that would commit the sponsors to an increasing absorption rate each year after full scale commercial operation was not successful. They felt in view of the uncertain future in load growth and recent experience with systems reserves in excess of normal, they could commit the sponsors only to a firm 100,000 kilowatts with the provision that they would absorb as much as they could each year over and above this amount. It should be noted, however, that the cancellation provisions are computed on the base capacity charge as modified and in this respect are reasonable.

There is no cancellation provision in the event of termination prior to full-scale operation. This was also discussed with Mr. Dixon in an effort to provide for this presently unforeseen possibility. His view was since this capacity is to provide for the normal load growth in the TVA and it would take at least 3 years for TVA to provide for replacement, he could foresee no need for cancellation prior to full-scale commercial operation and did not desire to modify the proposal in this regard. Under concurrent major reductions in AEC load and lack of normal load growth in the TVA system, the lack of cancellation provisions prior to completion of the plant could prove to be disadvantageous to the Government.

The attached table covering the major components of cost of the revised proposal has been prepared and is compared with the February 25 proposal and with our present estimate of cost of power, including escalation, to be delivered to AEC from the TVA Shawnee plant, under the terms of our present contract with TVA at 98 percent load factor of 5.2 billion kilowatt-hours per year.

As a result of the meetings previously cited, the additional annual cost over the Paducah contract has been reduced from $4,138,000 to $1,706,000, or less than the amount of estimated taxes. The additional costs exclude the costs associated with TVA transmission lines required to deliver energy from the points of interconnection of the sponsors' system to TVA's substation at Memphis.

Consideration of the revised proposal by Dixon-Yates should not overlook the following:

(a) The AEC presently has a firm contract with TVA for supply of power.

(b) Reliability and continuity of power supply to the AEC must be protected.

(c) The entire difference in cost between the sponsors' revised proposal and the TVA contract is accounted for by taxes.

(d) AEC would expect the Bureau of the Budget to obtain the concurrence of TVA to all provisions of the proposal, and any subsequent definitive contracts relating to TVA.

(e) The proposal provides that the power factor at point of delivery shall be maintained by TVA at no lower than 93 percent. To maintain this power factor, it may be necessary for TVA to provide reactive kilovolt-amperes in the Memphis area or a penalty maybe applied in the form of increased demand charges.

With the understanding that arrangements would be made through the Bureau of the Budget for TVA to enter into a 25-year contract with AEC to take the power provided for under this proposal subject to all provisions including cancellation, the AEC could enter into a contract with the sponsors to provide TVA with 600 thousand watts

needed for its load growth on a basis of replacement. However, it is our position that any costs involved to AEC over and above the cost of power under our present contract to Paducah should be borne by TVA. Otherwise, the TVA would be further subsidized through an operating expense appropriation to the AEC.

We feel that higher executive authority or Congress should make this determination.

In making such determination, the following information is pertinent:

(a) By utilizing private utilities, the United States would save a capital outlay of at least $100 million, the cost estimated by TVA for the construction of equivalent capacity at the Fulton site.

(b) Excluding all taxes and TVA transmission, the sponsors proposal is estimated to cost annually $613,000 less than the Paducah contract.

(c) Including taxes, the estimated annual cost is $1,706,000 greater than the Paducah contract. This is accounted for entirely by taxes of which $820,000 would be returned to the Federal Government. The remaining $886,000 represents State and local income and ad valorem taxes, leaving a balance of $613,000 of the estimated annual taxes totaling $2,319,000 that can be included within the sponsors' proposal without exceeding the estimated anual cost under the Paducah contract.

(d) The estimates of plant, operating, and other costs that are the basis of the revised proposal have been reviewed by representatives of the FPC and they believe them to be fair and reasonable.

(e) AEC would request the Federal Power Commission to formally indicate that the estimated costs are realistic, that cost allocations between capacity and energy are in accordance with their practice of approving rates for resale in interstate commerce, and that the rate terms and conditions are fair and reasonable to the Government.

We believe that we have explored the subject proposal to the extent practicable at this time. Higher authority will now presumably determine what course of action is in the best interest of the Government.

Sincerely yours,

LEWIS L. STRAUSS,
Chairman of Atomic Energy Commission.

Mr. HOLIFIELD. In this particular letter Mr. Straus objects to the fact that they are called upon to pay the taxes of the Dixon-Yates Co. This is dated April 15. Here again is talk of replacement. Then he goes on:

However, it is our position that in cases involving AEC over and above the cost of power under our present contract to Paducah should be borne by TVA. Otherwise TVA would be further subsidized through operating expenses appropriation to AEC.

In other words, while opposing the principle of the AEC having to pay the taxes of the Dixon-Yates proposal, he brings out that it would be subsidization. Of course it is subsidization, whoever pays those taxes outside of the people who own the plant, the Dixon-Yates people. Of course, if they get the Government to pay it, it is subsidization, regardless of whether the AEC pays it or whether it comes out of the general fund. This cannot be denied.

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. JONAS of North Carolina. It is a fact, is it not, that the question of taxes is a question that enters into the cost of the power? Is that not one of the elements?

Mr. HOLIFIELD. Taxes enter into the cost of power supplied by every private utility in the United States, to my knowledge, with the exception of Dixon-Yates. Here is an instance where a private utility company, Dixon-Yates is relieved of its obligation to pay taxes.

Mr. JONAS of North Carolina. No. The tax does not go into the contract.

Mr. HOLIFIELD. That is the point. It is relieved of its obligation to pay taxes to the Government, and every other private utility in the United States has to pay taxes.

Mr. JONAS of North Carolina. But if Dixon-Yates paid them the cost of the power would be increased.

Mr. HOLIFIELD. That is exactly right; and that is why it is relieved.

Mr. JONAS of North Carolina. And if TVA paid them——

Mr. HOLIFIELD. That is why this relief from taxes was put in so they could get down to a near competitive position with TVA.

I realize TVA does not pay taxes as such; I recognize that TVA in its delivery of energy to the AEC is delivering it from one Government agency to another for use in a defense plant, and it was only on the basis that it is being used for the defense needs that the Securities and Exchange Commission passed over the provisions of the Private Utilities Holding Act of 1935 and allowed the Ohio Valley Electric Corp. and Electric Energy, Inc., to fund their bonds on the basis of a 95 percent funding, when normal requirements of the SEC require that bonds sold to the public shall be sold on an approximate 40 percent capital investment equity on the part of the sponsors and a 60-percent funding on the part of the bonds sold the public. But because these particular plants were supplying all of their energy for defense purposes, because of the emergency need of the Government in the Korean war and to furnish the Paducah plant and AEC further energy to make the weapons, the atomic and the hydrogen type of weapons which were needed to preserve the freedom of the free world, they were given special treatment; they were given temporary relief from the effects of the Private Utility Holding Company Act of 1935, but with this admonition, that they would come back later, the Securities and Exchange Commission would come back later and hold the hearings required by the Holding Company Act and at that time they would make the determination as to which one of these utility companies would be allowed to buy the bonds and control the fee title ownership of these companies in the future.

I maintain that this excuse or this reason which was used in the case of the Ohio Valley Electric Corp. and Electric Energy, Inc., for total use of energy in defense plants does not obtain in the Memphis area for either TVA or Dixon-Yates. The energy that will be bought there will be purchased through the administrative device of the AEC acting as a power broker and using the 25-year contract privilege.

The power will be transferred by the AEC to the Tennessee Valley grid not for defense plants, not for the AEC, not in replacement for 1 canceled kilowatt, but it will be for the new power which will be served to the TVA grid at a higher cost than the TVA could generate it itself. It will be served to them for the purpose of distribution to commercial, industrial, and residential users and not 1 kilowatt to AEC for defense needs or for other defense plants.

This is the rock upon which the barge of replacement founders, because you cannot justify in the name of national defense—and this is the only provision in the Atomic Energy Act which the President has to relieve AEC from the other contractual obligations which are used by AEC. The President can exempt the AEC if it is found that it is necessary on behalf of the national security and the defense needs of the Nation. This power of exemption is carried in the Atomic Energy Act of 1946, as amended, and it will be carried again in the new atomic energy bill. But the President cannot use that in this case, nor the Budget Bureau. The AEC has not tried to appeal to that section because they know they cannot sustain the need in this area on the basis of national defense.

They have tried to base their authority on section 12 (d) of the Atomic Energy Act, which provides only for new contract, modification of contracts, and alteration of contracts for the three existing atomic energy plants at Oak Ridge, Portsmouth, and Paducah; and it is upon that rock that the admonition of the President to negotiate and enter into this contract founders.

Mr. JONAS of North Carolina. Mr. Speaker, will the gentleman yield for a question?

Mr. HOLIFIELD. And at that point I want to go into the question of whether——

Mr. JONAS of North Carolina. Before the gentleman leaves that point, will be permit me to ask a question?

Mr. HOLIFIELD. Just as soon as I read this from Mr. Hughes' letter of June 16, which was placed in the RECORD of July 7 and appears in the first column, paragraph 9 (b) on page 9480. Mr. Hughes states:

I have been asked by the President to instruct the Atomic Energy Commission to proceed with the negotiations of a definitive contract. Such instructions have been given this agency. The Commission and the TVA have also been instructed to work out the necessary interagency arrangements to assure the most favorable operation under the contract from the standpoint of the Government.

Any attempt on the part of the gentleman from California [Mr. PHILLIPS] and the gentleman from North Carolina [Mr. JONAS] to relieve the Atomic Energy Commission of the instructions to go ahead and negotiate a definitive contract will have my hearty support; but I say there will have to be an additional directive from the President telling them not to sign the contract. No one has said, that I know of and who knows the subject, that they have signed a contract. We all know that they are negotiating it. The Dixon-Yates people have not even appealed to the Securities and Exchange Commission to get approval of

their bonds. I do not know why they have not appealed to them. Maybe they are afraid they will not get the approval of the Securities and Exchange Commission.

I am going to look with a great deal of interest at the memoranda of approval, if it is issued by the Securities and Exchange Commission, because they are going to have to find a different reason for issuing approval of the 95 percent funding operation of the Dixon-Yates people than they found for the Ohio Valley Electric Corp. and the electric energy companies at Portsmouth and at Paducah. I now yield to the gentleman from North Carolina.

Mr. JONAS of North Carolina. I thank the gentleman from California for the statement he just made. It was my understanding, and he has now confirmed it, that this was not an order from the President to sign a contract that has already been worked out. It was a directive to negotiate a contract from the standpoint of the necessities of the Government.

Mr. HOLIFIELD. I read it. "For the best interests under the contract" but it might be to the best interests of the Government not to sign the contract. They are directed to negotiate; but there is other language not contained in this letter, which is contained in another letter that I shall get from my office and possibly introduce at a later date which is even clearer than this particular language that I happen to have at hand in the July 7 RECORD.

There is no doubt in my mind but that the Burch-Von Tresckow proposal, which the gentleman has put in his remarks and which I pass no comment on because I have not studied it, has been rejected. The gentleman will agree it has been rejected by the AEC. They have been ordered to go ahead and negotiate a definitive contract. If they do not intend to sign the contract why are they negotiating a definitive contract? I hope that the gentleman's modification of the generally accepted idea that the AEC is going to be forced against their testimony of 3 to 2, to do something which is unwise, awkward and unbusinesslike will be accepted by sustained Presidential action. I say with all kindness that the President is out on a limb. The President has gone beyond the power, in my opinion, of the executive branch in ordering an independent agency of the Government to do something which is not authorized under the law. This is the important thing. It is not whether the Tennessee Valley Authority builds the plant or whether the Dixon-Yates people build the plant, I may say to my friends who are interested on both sides, that the issue is not my primary concern. The reason I have talked on it is because the matter has been one of controversy and I have tried to give to the House to the best of my knowledge, the true facts.

The thing I am concerned with is this encroachment on the statutory power of an independent agency and I say with all due respect to the President—he is my President the same as he is your President—that if the President of the United States can be advised and then if he follows that advice to direct an independent agency of the Government to do that which by law and by the testimony of witnesses when they come before the committees to obtain that law, if he can direct them to go beyond the provisions of the statute and do things foreign to their purposes and objectives, and completely foreign, without any benefit to them for the purposes upon which they were established by the Congress of the United States, then I say to you that the President can upset the legal statutes of every independent agency of Government. Not only can he go to the Atomic Energy Commission, in which I am deeply interested, having served on that Commission since its establishment in 1946—no, but he can go to the Federal Power Commission, he can go to the Federal Communications Commission and tell them to issue a TVA license notwithstanding certain provisions of the statute. He can go to the Interstate Commerce Commission, and he can tell the Interstate Commerce Commission to issue rate approvals not authorized by statute. This is the important issue that is going to face the Congress when the Atomic Energy Revision Act comes before it. At that time I expect to offer an amendment which I offered and which was very narrowly defeated, I will tell the gentleman, in committee, in executive session; but I intend to offer the same amendment again and the Congress will have the right then at that time to say whether section 12 (d) of the act means exactly what it says, or they will have the right to modify. Now, if the Congress says that they want to modify the act, that is one thing. It is the will of the Congress. They can modify these acts which authorized these independent agencies, but it is one thing for the Congress to consider and modify a basic statutory provision, and it is another thing for the President of the United States to direct that Commission to go beyond its statutory authorization.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. Will the gentleman from California tell us whether or not the Atomic Energy Commission made any inquiry as to how much it would cost the Government to build their own steam plants in the immediate vicinity of where the energy will be used?

Mr. HOLIFIELD. I have no knowledge of any such survey. The Tennessee Valley Authority is a power agency created by the Congress and it has supplied on demand to the AEC all the electricity which the AEC has asked for from it.

Mr. JONES of Alabama. I believe that the Commission testified before your committee that those contractual relationships and the supplying of power by the TVA have been satisfactory arrangements during the life of their operation at Oak Ridge and the surrounding plants.

Mr. HOLIFIELD. So satisfactory that when the President's budget message said that they must negotiate on the basis of actual replacement, which would involve the cancellation of existing AEC contracts, that the AEC has frequently said that it would not cancel one kilowatt of its present contracts, and the reason it will not cancel is because it is in the best interest of the Government for them to continue getting this power at a cheap price from the TVA. Therefore, the original idea of the President on replacement was thrown out the window. And, again I say this is not replacement, regardless of how many times the word "replacement" or "exchange" or "substitution" is used. It is not exchange, not substitution, not replacement. It is an additional power capacity which is being contracted for, not for defense needs, but for the commercial, industrial, and residential uses of the people in the Tennessee Valley area.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. MILLER of Nebraska.

Mr. WILLIS (at the request of Mr. HÉBERT).

Mr. PRICE and to include extraneous matter.

Mr. ROBSION of Kentucky and to include extraneous matter.

Mr. DORAN of South Carolina.

Mr. WOLVERTON and to include extraneous matter.

Mr. SCHENCK.

Mr. WILSON of California.

Mr. SIEMINSKI.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 2 hours tomorrow, following any special orders heretofore entered.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. JUDD (at the request of Mr. ARENDS), for July 12, on account of death in family.

Mr. MAILLIARD (at the request of Mr. SHELLEY), for an indefinite period, on account of death of his father.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 120. An act for the relief of Gerasimos Giannatos; to the Committee on the Judiciary.

S. 231. An act for the relief of Otmar Sprah; to the Committee on the Judiciary.

S. 232. An act for the relief of Hugo Kern; to the Committee on the Judiciary.

S. 328. An act for the relief of Casimero Rivera Gutierrez, Teresa Gutierrez, Susana Rivera Gutierrez, Martha Aguilera Gutierrez, and Armando Casimero Gutierrez; to the Committee on the Judiciary.

S. 673. An act for the relief of Urho Paavo Patoski and his family; to the Committee on the Judiciary.

S. 771. An act for the relief of Anni Wolf and her minor son; to the Committee on the Judiciary.

S. 808. An act for the relief of Frederick Wiesinger; to the Committee on the Judiciary.

S. 810. An act for the relief of Jan E. Tomczycki; to the Committee on the Judiciary.

S. 966. An act for the relief of Demitrious Vasiliious Karavogeorge; to the Committee on the Judiciary.

S. 1212. An act for the relief of Alice Masaryk; to the Committee on the Judiciary.

S. 1585. An act to amend the District of Columbia Traffic Act, 1925, as amended; to the Committee on the District of Columbia.

S. 1611. An act to regulate the election of delegates representing the District of Columbia to national political conventions, and for other purposes; to the Committee on the District of Columbia.

S. 2380. An act to amend the Mineral Leasing Act of February 25, 1920, as amended; to the Committee on Interior and Insular Affairs.

S. 2381. An act to amend section 27 of the Mineral Leasing Act of February 25, 1920, as amended, in order to promote the development of oil and gas on the public domain; to the Committee on Interior and Insular Affairs.

S. 2387. An act for the relief of Willy Voos and his wife, Alma Voos; to the Committee on the Judiciary.

S. 2389. An act to amend the act of December 3, 1942; to the Committee on Merchant Marine and Fisheries.

S. 2456. An act for the relief of Martin Genuth; to the Committee on the Judiciary.

S. 2504. An act for the relief of Elisa Albertina Cioccio Rigazzi or Elisa Cioccio; to the Committee on the Judiciary.

S. 2510. An act for the relief of Paul Lewerenz and Margareta Ehrhard Lewerenz; to the Committee on the Judiciary.

S. 2512. An act for the relief of Jeannette Kalker and Abraham Benjamin Kalker; to the Committee on the Judiciary.

S. 2542. An act for the relief of Gliceric M. Ebuna; to the Committee on the Judiciary.

S. 2587. An act for the relief of Domenico Peri; to the Committee on the Judiciary.

S. 2635. An act for the relief of Nadeem Tannous and Mrs. Jamile Tannous; to the Committee on the Judiciary.

S. 2655. An act to amend the District of Columbia Teachers' Salary Act of 1947, as amended; to the Committee on the District of Columbia.

S. 2686. An act to amend the act entitled "An act to control the possession, sale, transfer, and use of pistols and other dangerous weapons in the District of Columbia, to provide penalties, to prescribe rules of evidence, and for other purposes," approved July 8, 1932; to the Committee on the District of Columbia.

S. 2687. An act to authorize the Commissioners of the District of Columbia to designate employees of the District to protect life and property in and on the buildings and grounds of any institution located upon property outside of the District of Columbia acquired by the United States for District sanitoriums, hospitals, training schools, and other institutions; to the Committee on the District of Columbia.

S. 2798. An act for the relief of Azizollah Azordegan; to the Committee on the Judiciary.

S. 2958. An act for the relief of Ida Reissmuller and Johnny Damon Eugene Reissmuller; to the Committee on the Judiciary.

S. 3085. An act for the relief of Mrs. Helen Stryk; to the Committee on the Judiciary.

S. 3306. An act for the relief of Kang Chay Won; to the Committee on the Judiciary.

S. 3329. An act to amend the District of Columbia Police and Firemen's Salary Act of 1953, to correct certain inequities; to the Committee on the District of Columbia.

S. 3464. An act to amend the Communications Act of 1934 in order to make certain provision for the carrying out of the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio; to the Committee on Interstate and Foreign Commerce.

S. 3482. An act to amend the District of Columbia Unemployment Compensation Act, and for other purposes; to the Committee on the District of Columbia.

S. 3506. An act to repeal the act approved September 25, 1914, and to amend the act approved June 12, 1934, both relating to alley dwellings in the District of Columbia; to the Committee on the District of Columbia.

S. 3518. An act to amend the laws relating to fees charged for services rendered by the office of the Recorder of Deeds for the District of Columbia and the laws relating to appointment of personnel in such office, and for other purposes; to the Committee on the District of Columbia.

S. 3546. An act to provide an immediate program for the modernization and improvement of such merchant-type vessels in the reserve fleet as are necessary for national defense; to the Committee on Merchant Marine and Fisheries.

S. 3558. An act to amend the act entitled "An act to provide for the better registration of births in the District of Columbia, and for other purposes," approved March 1, 1907; to the Committee on the District of Columbia.

S. 3589. An act to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the Bank on the National Advisory Council on International Monetary and Financial Problems and to increase the Bank's lending authority; to the Committee on Banking and Currency.

S. 3681. An act to authorize the Civil Service Commission to make available group life insurance for civilian officers and employees in the Federal service, and for other purposes; to the Committee on Post Office and Civil Service.

S. 3683. An act to amend the District of Columbia Credit Unions Act; to the Committee on the District of Columbia.

S. 3697. An act to amend the act of April 6, 1937, as amended, to include cooperation with the Governments of Canada or Mexico or local Canadian or Mexican authorities for the control of incipient or emergency outbreaks of insect pests or plant diseases; to the Committee on Agriculture.

S. 3699. An act granting the consent of Congress to a compact entered into by the States of Louisiana and Texas relating to the waters of the Sabine River; to the Committee on Interior and Insular Affairs.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 733. An act for the relief of Hildegard H. Nelson;

H. R. 734. An act for the relief of Mihai Handrabura;

H. R. 944. An act for the relief of Mr. and Mrs. Zygmunt Sowinski;

H. R. 1115. An act for the relief of Mrs. Suhula Adata;

H. R. 1762. An act for the relief of Sugako Nakai;

H. R. 2899. An act for the relief of Igor Shwabe;

H. R. 3333. An act for the relief of Julia N. Emmanuel;

H. R. 3624. An act for the relief of Peter M. Leaming;

H. R. 4496. An act to authorize and direct the conveyance of certain lands to the Board of Education of Prince Georges County, Upper Marlboro, Md., so as to permit the construction of public educational facilities urgently required as a result of increased defense and other essential Federal activities in the District of Columbia and its environs;

H. R. 6342. An act to amend the Public Buildings Act of 1949 to authorize the Administrator of General Services to require title to real property and to provide for the construction of certain public buildings thereon by executing purchase contracts; to extend the authority of the Postmaster General to lease quarters for post-office purposes; and for other purposes;

H. R. 6422. An act to authorize the Secretary of the Army to convey to the Government's grantors certain lands erroneously conveyed by them to the United States;

H. R. 6650. An act for the relief of Joseph Gerny;

H. R. 6998. An act for the relief of Erna White;

H. R. 7125. An act to amend the Federal Food, Drug, and Cosmetic Act with respect to residues of pesticide chemicals in or on raw agricultural commodities;

H. R. 7132. An act to exempt from taxation certain property of the Veterans of Foreign Wars of the United States in the District of Columbia;

H. R. 7158. An act authorizing the United States Government to reconvey certain lands to S. J. Carver;

H. R. 7468. An act to amend certain provisions of part II of the Interstate Commerce Act so as to authorize regulation, for purposes of safety and protection of the public, of certain motor-carrier transportation between points in foreign countries, insofar as such transportation takes place within the United States;

H. R. 7500. An act for the relief of Kurt Forsell;

H. R. 7802. An act for the relief of Hanna Werner and her child, Hanna Elizabeth Werner;

H. R. 8247. An act to provide for the restoration and maintenance of the U. S. S. *Constitution* and to authorize the disposition of the U. S. S. *Constellation*, U. S. S. *Hartford*, U. S. S. *Olympia*, and U. S. S. *Oregon*, and for other purposes;

H. R. 8692. An act to permit the payment of certain trust accounts to the beneficiary on the death of the trustee by savings and loan, and similar associations in the District of Columbia;

H. R. 8973. An act to amend paragraph 31 of section 7 of the act entitled "An act making appropriations to provide for the government of the District of Columbia for the fiscal year ending June 30, 1903, and for other purposes," approved July 1, 1902, as amended;

H. R. 8974. An act to permit investment of funds of insurance companies organized within the District of Columbia in obligations of the International Bank for Reconstruction and Development;

H. R. 9143. An act to repeal the provisions of section 16 of the Federal Reserve Act which prohibits a Federal Reserve bank from paying out notes of another Federal Reserve bank;

H. R. 9561. An act to correct typographical errors in Public Law 368, 83d Congress; and

H. J. Res. 459. Joint resolution to designate the lake to be formed by the completion of the Texarkana Dam and Reservoir on Sulphur River, about 9 miles southwest from Texarkana, Tex., as Lake Texarkana.

ADJOURNMENT

Mr. STRINGFELLOW. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 9 minutes p. m.) the House adjourned until tomorrow, Tuesday, July 13, 1954, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1721. A letter from the Acting Comptroller General of the United States, transmitting a report on the audit of the Panama Canal Company and the Canal Zone Government for the year ended June 30, 1953, pursuant to the Government Corporation Control Act (31 U. S. C. 841), the Budget and Accounting Act, 1921 (31 U. S. C. 53), and the Accounting and Auditing Act of 1950 (31 U. S. C. 67) (H. Doc. No. 473); to the Committee on Government Operations and ordered to be printed.

1722. A letter from the Acting Secretary of Defense, transmitting as attachment A, copies of 17 separate reports of violation of section 3679, Revised Statutes, which have been received from the Departments of the Navy and Air Force, pursuant to section 3679 (i) (2), Revised Statutes; to the Committee on Appropriations.

1723. A letter from the Acting Secretary of the Army, transmitting a draft of legislation entitled "A bill to amend the Career Compensation Act of 1949, as amended, to allow credit for certain service for purposes of pay, and for other purposes"; to the Committee on Armed Services.

1724. A letter from the Chairman, Federal Communications Commission, transmitting a report on backlog of pending applications and hearing cases in the Federal Communications Commission as of May 31, 1954, pursuant to section 5 (e) of the Communications Act as amended July 16, 1952, by Public Law 554; to the Committee on Interstate and Foreign Commerce.

1725. A letter from the Attorney General, transmitting a draft of a proposed bill entitled "A bill to amend section 284 of title 18 of the United States Code relating to the representational activities of former employees"; to the Committee on the Judiciary.

1726. A letter from the Attorney General, transmitting a draft of a proposed bill entitled "A bill to amend section 709 of title 18, United States Code, so as to protect the name of the Federal Bureau of Investigation from commercial exploitation; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of July 8, 1954, the following conference report was filed July 9, 1954:

Mr. D'EWART: Committee of Conference. S. 3378. A bill to revise the Organic Act of the Virgin Islands of the United States (Rept. No. 2105). Ordered to be printed.

Under clause 2 of rule XIII, pursuant to the order of the House of July 8, 1954, the following bill was reported July 9, 1954:

Mr. WOLVERTON: Committee on Interstate and Foreign Commerce. H. R. 8356. A bill to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services; with amendment (Rept. No. 2106). Referred to the Committee of the Whole House on the State of the Union.

Under clause 2 of rule XIII, pursuant to the order of the House of July 8, 1954, the following bill was reported July 10, 1954:

Mr. REES of Kansas: Committee on Post Office and Civil Service. H. R. 9836. A bill to provide a method for the establishment of an equitable classification and pay system for the postal field service, to provide increases in the salaries of personnel in such service, and for other purposes; with amendment (Rept. No. 2107). Referred to the Committee of the Whole House on the State of the Union.

[*Submitted July 12, 1954*]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOPE: Committee on Agriculture. S. 1381. An act to amend the Agricultural Act of 1949; without amendment (Rept. No. 2177). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. S. 2583. An act to indemnify against loss all persons whose swine were destroyed in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema; without amendment (Rept. No. 2178). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. H. R. 6393. A bill granting the consent and approval of Congress to an interstate forest-fire protection compact; without amendment (Rept. No. 2179). Referred to the Committee of the Whole House on the State of the Union.

Mr. HINSHAW: Joint Committee on Interstate and Foreign Commerce. H. R. 9390. A bill to extend certain civilian-internee and prisoner-of-war benefits under the War Claims Act of 1948, as amended, to civilian internees and American prisoners of war captured and held during the hostilities in Korea; with amendment (Rept. No. 2180). Referred to the Committee of the Whole House on the State of the Union.

Mr. COLE of New York: Joint Committee on Atomic Energy. H. R. 9757. A bill to amend the Atomic Energy Act of 1946, as amended, and for other purposes; without amendment (Rept. No. 2181). Referred to the Committee of the Whole House on the State of the Union.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 623. Resolution for the consideration of H. R. 8356, a bill to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services; without amendment (Rept. No. 2182). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 624. Resolution for consideration of S. 3539, an act to further amend title II of the Career Compensation Act of 1949, as amended, to provide for the computation of reenlistment bonuses for members of the uniformed services; without amendment (Rept. No. 2183). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 625. Resolution for consideration of S. 3458, an act to authorize the long-term time charter of tankers by the Secretary of the Navy, and for other purposes; without amendment (Rept. No. 2184). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 626. Resolution for consideration of H. R. 236, a bill to authorize the construction, operation, and maintenance by the Secretary of the Interior of the Fryingpan-Arkansas project, Colorado; without amendment (Rept. No. 2185). Referred to the House Calendar.

H. R. 9879. A bill for the relief of Helga Kutschka; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1092. By Mr. GOODWIN: Petition of Rev. Wallace Forgey and 48 others of Melrose, Mass., favoring passage of the Bryson bill, H. R. 1227; to the Committee on Interstate and Foreign Commerce.

1093. By Mr. HORAN: Petition of L. S. Worley, Spokane, Wash. and 25 other citizens of Spokane, Wash., favoring action to outlaw the Communist Party; to the Committee on the Judiciary.

1094. By Mr. NORBLAD: Petition of Elizabeth R. Keeney and 39 other citizens of Corvallis, Oreg., urging the enactment of the Bryson bill, H. R. 1227, to the Committee on Interstate and Foreign Commerce.

1095. By the SPEAKER: Petition of the deputy clerk, Board of Supervisors, Buffalo, N. Y., requesting that the necessary steps be taken to provide adequate funds and resources to properly develop the port of Buffalo, etc.; to the Committee on Public Works.

1096. Also, petition of George H. Ball, Columbia Typographical Union, No. 101, Washington, D. C., appealing for the relief of more than 9,000 retired International Typographical Union printers, who through a decision of the Commissioner of Internal Revenue have had their ITU pensions placed in a taxable status effective January 1, 1954; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

Breaux Bridge, La., High School Band

EXTENSION OF REMARKS

OF

HON. EDWIN E. WILLIS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 12, 1954

Mr. WILLIS. Mr. Speaker, it is indeed a pleasure to call the attention of my colleagues to the presence in Washington today and tomorrow of a talented and popular organization from my congressional district—the Breaux Bridge (La.) High School Band.

I trust that a number of Members of Congress had an opportunity to hear this band in a concert this afternoon on the east front center steps of the Capitol, which was followed by a tour of the Capitol and visits to the House and Senate galleries. We, in Louisiana, and particularly in the Third Congressional District and my home parish—county—of St. Martin, in which Breaux Bridge is situated, are very proud of this band and the honors it has received.

These honors include selection of the band to represent Louisiana at the Lions international convention in New York City where the members won much additional acclaim and attention, playing at the convention in Madison Square Garden, participating in the convention parade, and in other presentations. They have taken part in many events in Louisiana, and this band of 67 young musicians has become widely known.

The citizens of Breaux Bridge, who through various benefit activities, raised the large sum of money necessary to defray expenses of the band on the trip to New York, can feel that their interest and efforts in this connection, and on previous occasions, are amply rewarded by the appearance and ability of this organization, the widespread publicity it has given to its home town and the State of Louisiana, and the excellent musical training afforded these young people.

The band, now en route home from New York, is accompanied by a number of leading citizens of Breaux Bridge, together with other Louisianians. Mr. Leo Delahoussaye, principal of the Breaux Bridge High School, is in general charge of the trip, and the band is under the leadership of Mr. Harry Greig, band director of the music department of the high school.

The band members are: Betty Delhomme, Patricia Balch, Roberta Webre, Jeannelle Gauthier, Shirley Guidry, Beverly Hebert, Jean Nell Broussard, Rebecca Cormier, Joan Guidry, Jo Ann Keterlers, Elaine Pellerin, Patricia Patin, Barbara Broussard, Edward Domingue, Glenda Landry, Gloria Patin, Elizabeth Latiolais, Joy Conrad, Gaynell Guidry, Lydia Rose Guidry, Elaine Mason, Dolores Barnes, Tommy Balch, June Cormier, Mike Morrogh, Emily Hebert, Kerny Broussard, Dickie Hebert, Jeanette Pellerin, Larry Thibodeaux, James Domingue, Donna Melancon, Dorsy Brasseaux, Dalton Broussard, Roland Guidry, Vienna Mae Marks, Horace Guidry, Ray Pellerin, A. P. Dupuis, Dianna Melancon, Curtis Guidry, Betty Jo Young, Jo Jo Guidry, Yvonne Thibodeaux, Jerome Mouton, J. C. Tabor, Burnell Martin, Clifford Hebert, Jason Dupuis, Rufus Hebert, Clifford Mouton, Edwin Hebert, Patsy Green, Faye Guidry, Richard Broussard, Charlene

Theriot, P. J. Hebert, Janice Nepveu, Erline Begnaud, Arthur Broussard, Rose Angelle, Irene Delhomme, Judy Thibodeaux, Joan LaRue Hebert, Rochelle Roberts, Dianne Domingue, Russel Peltier.

The chaperones are: Mrs. Harry Greig, John Breaux, Earl Hollier, Mr. and Mrs. Frank Guidry, Mrs. Percy Broussard, Mrs. Claude Guidry, Mrs. Felix Pellerin, Mrs. Dalton Broussard, registered nurse.

Others in the group include: Miss Julie Cormier, Mrs. B. D. Champagne, Marine Guidry, Mrs. Leo Delahoussaye, Miss Louise Castille, Miss Simone Castille, Mrs. Francis Broussard, Miss Linda Conrad, Hemby Morgan, Mrs. Odile B. Clause, Miss Mary K. Clause, Miss Carolyn Clause, Mrs. Whitney Hebert, Mrs. James Thevenet, Mrs. Chester Broussard, Mr. and Mrs. Sanders Delhomme, Jerry Delhomme, Leon Breaux, Miss Laure Lee Dauterive, Mr. and Mrs. Randall Bulliard, Miss Jacqueline Ann Tabor, Mrs. Roger Ketelers, Mrs. H. Guillory, Miss Mary Louise Hebert, Mrs. Percy Cormier, Ricky Cormier, Mrs. Frank Patin, Mr. and Mrs. Harris Pellerin and son Junior, Mrs. Maude D. Dupuis, Mrs. Claude J. Dauterive, all of Breaux Bridge, La.

Mr. and Mrs. J. J. Arceneaux, Opelousas, La.

Mrs. J. E. Narreau, Mrs. James Gauthier, Mrs. Willie Fournet, all of St. Martinville, La.

Miss Isabelle Guidry, of New Iberia, La.

Miss Mary Ann Domingue and Miss Louise Sonniraer, both of Scott, La.

Jimmy Benoit, of Welsh, La.

Mr. and Mrs. Lionel Thibodeaux and Mrs. John Gorr, all of Lafayette, La.

Mr. and Mrs. Terrel Thibodeaux, Lake Charles, La.

Texas is also represented in the group by Mrs. Victor Bush, Miss Patsy Bush, and Robert Bush, of Brownwood.

Schenck To Confer With Residents of His District

EXTENSION OF REMARKS
OF
HON. PAUL F. SCHENCK
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. SCHENCK. Mr. Speaker, it is my great honor and privilege to represent the people of the Third Congressional District of Ohio here in the Congress of the United States. As their Representative, I have always tried to maintain a close contact personally with them and their opinions on the many important issues confronting us.

The Third District of Ohio is not only the largest one in Ohio and the fifth largest one in the United States, but is also very important from other points of view. Our beautiful Miami Valley has made and is making many outstanding contributions to our Nation and to the world. It is the birthplace and cradle of aviation and within it many important scientific, manufacturing, and agricultural developments are taking place daily. Our citizens are well recognized for their expert and skilled abilities. We have a truly cosmopolitan congressional district because we have all phases of science, manufacturing, and agriculture represented to an unusual degree.

Since becoming their Representative in Congress I have considered it my duty to not only be well informed of their opinions, but also to be of greatest possible service to each and every person in our Third District who has a personal problem with some department or agency of our Federal Government. I, therefore, initiated the idea of holding grassroots conferences throughout the district 3 years ago and have continued to hold them each year during the time Congress is in adjournment. I also opened a full-time Congressional Service Office at 1219 Third National Building in Dayton, where I can confer with people personally at such times as my official duties permit me to return to the district. At all times when it is necessary for me to be in Washington attending to my legislative and other official duties, a competent secretary is in charge of my District Congressional Service Office to assist anyone in the preparation of requests for me to assist them in their personal problems with the various Federal governmental departments and agencies. Thus I have sincerely tried to not only represent the opinions and desires of all the people in our very important Third District to the best of my ability, but I have also made every effort to serve them.

Members of Congress are called upon to deal with legislation covering a vast amount of subject matter dealing with both national and international subjects which affect the lives of each and every citizen to an unbelievable extent. These personal conferences help me to serve them in a much more effective manner.

Again this year I will take time during the period of our official congressional recess to hold conferences with the people of my congressional district in the courthouses and city halls of a number of our communities.

This is the schedule I have established:

Hamilton: Courthouse; September 7 and 8; 9 a. m. to 4 p. m.

Miamisburg: City building; September 9; 4 p. m. to 8 p. m.

Germantown: City building; September 10; 4 p. m. to 8 p. m.

Brookville: City building; September 11; 4 p. m. to 8 p. m.

Dayton: Federal building, room 203; September 13 and 14; 9 a. m. to 4 p. m.

Middletown: American Legion; September 16 and 17; 9 a. m. to 4 p. m.

Oxford: Municipal building; September 18; 4 p. m. to 8 p. m.

It is surprising how much can be accomplished when a citizen and his Congressman can sit down and talk over national and personal problems.

No appointment is needed, and I urge any individual or group to meet with me on the date most convenient to them. With the knowledge thus obtained, I know I will be better able to truly represent the people of my district in the Congress of the United States.

Well-Deserved Tribute to Former Congressman Maurice H. Thatcher, Only Surviving Member Isthmian Canal Commission

EXTENSION OF REMARKS
OF
HON. JOHN M. ROBSION, JR.
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. ROBSION. Mr. Speaker, one of my predecessors in Congress from the Louisville, Ky., District was Hon. Maurice H. Thatcher, 1923–33. Upon the formal presentation and dedication—on March 31 last—of the memorial monument to Gen. George W. Goethals, chairman and Chief Engineer, of the Isthmian Canal Commission from 1907 to 1914, during the construction period of the Panama Canal, Mr. Thatcher took part in the formal program at Balboa, Canal Zone. The Commission had charge of the work of building the canal.

Mr. Thatcher is the only surviving member of the Commission, and during the years 1910–13, he served as such commissioner and also as head of the Department of Civil Administration—Governor—of the Canal Zone. He and Mrs. Thatcher were in attendance on the indicated occasion as guests of the Canal Zone Government.

In his Isthmian post, Mr. Thatcher discharged his duties with efficiency and fidelity and did much to build up good relationships between the United States and the Canal Zone with the Government and people of the Panamanian Republic. On their recent visit to the isthmus—following a lapse of more than 21 years since their visit in January 1933, while he was yet in Congress—both were received in the Canal Zone and Panama with the greatest welcome and esteem. There were a number of old-timers in similar attendance at the dedication exercises—men and women who had been employed or lived on the isthmus during the canal-construction era.

As the sole surviving member of the Isthmian Canal Commission, Mr. Thatcher constituted an important link with the construction period; and afterwards, during his five terms in Congress, and subsequently, he has done much for the benefit of his fellow old-timers in helping to bring about legislation for annuities and benefits in their behalf, and related matters. Socially, also, he and Mrs. Thatcher, in the years of their Isthmian life, were widely known for their fine hospitality, and their attractive residence in the Canal Zone, at Ancon, was indeed a tropical Kentucky home. In the course of his remarks—which were warmly received by the large open-air assembly at the dedication exercises mentioned, he took occasion to express high praise of all the builders of the great Isthmian ocean link—from the highest to the least, and from the least to the highest—declaring that during the construction period of the canal, "the recording angel must have worked overtime in noting the outstanding serv-

ices of all those who had been thus engaged." In the course of his remarks he presented awards to the two winners of the contests, in the senior high schools and the junior high schools of the Canal Zone, for the best essays on the life of General Goethals. Two student girls were the successful contestants, respectively Miss Mary Abele in the first category, and Miss Carolina E. Zirkman in the second. Each prize was a $25 United States savings bond.

Under leave accorded me, I am including as a part of these remarks news stories which appeared in the Star and Herald of Panama City, during the indicated celebration, as follows:

[From the Panama City Star and Herald of March 30, 1954]

THATCHER MAINTAINS INTENSE PERSONAL INTEREST IN CANAL

Although his direct connections with the Panama Canal were severed over 40 years ago, Maurice H. Thatcher, member of the Isthmian Canal Commission from 1910 to 1913, has maintained his intense personal interest in Isthmian affairs throughout these years.

He and Mrs. Thatcher, who now live in Washington, D. C., will arrive by plane Tuesday afternoon to participate in the Goethals Memorial dedication ceremonies this week. Mr. Thatcher is the only surviving member of the group of men on whose shoulders rested the responsibility for the successful completion of the Panama Canal.

Although he was born in Chicago, Mr. Thatcher is known as a Kentuckian. He grew up in Kentucky and was practicing law in Louisville when he was appointed to the Isthmian Canal Commission after his fellow Kentuckian, Jo. C. S. Blackburn, resigned in 1910. He became a member of the I. C. C. April 12, 1910, and served until his resignation August 8, 1913, during which time he was head of Civil Administration in the Canal Zone.

Mr. Thatcher served 10 years from 1923 to 1933 in the United States House of Representatives from the Fifth Kentucky District. During his service in Congress he devoted his interests chiefly to welfare, public parks, and highways, Pan American and Panama Canal affairs, and to the promotion of domestic and foreign airmail service.

His congressional service is best known on the Isthmus as author of the legislation for the establishment and maintenance of Gorgas Memorial Laboratory in Panama, and for the construction of the ferry facilities and highway which provide the direct traffic link between the city of Panama and the interior of the Republic. The highway and ferry were named in his honor when completed.

The construction of Thatcher Highway and ferry was one of the major public improvements made in the Canal Zone during the 1930's. When Congressman and Mrs. Thatcher visited the Isthmus early in 1933 he was given a warm official welcome by the Republic of Panama.

The City Council of Arraijan voted to give him a plot of ground in that picturesque village as a token of their appreciation for the highway through the town, in addition, a special tour to the interior was arranged in his honor by various Panama organizations. Official and civic organizations participating included the Junta Central de Caminos, Panama Automobile Club, Rotary Club, and the Panama Federation of Highway Education.

High officials invited to attend the public demonstration for the Congressman included President Harmodio Arias and his cabinet, and Governor Julian L. Schley and many Canal officials.

Mr. Thatcher's personal interest in Isthmian affairs has continued since his congressional service. He was one of the principal supporters of the so-called "Old Timers" legislation which provides for an annuity for civilian employees who served during the Canal construction period. He was also the attorney in the test case in which the court of claims ruled that the annuities were not subject to income tax.

Mr. Thatcher is a prolific writer and has been a frequent contributor to newspapers and other publications. He is particularly well known for his poetry, much of which deals with the canal and the people who built it or operate it. Many of his poems and other contributions have been published locally.

The former member of the Isthmian Canal Commission has been the recipient of high honors from many Latin American nations because of his friendship and interest in their progress. Among the honors which have been accorded him is the Vasco Nuñez de Balboa medal in the rank of Comendador from the Republic of Panama, and decorations from both Venezuela and Ecuador.

[From the Panama City Star and Herald of April 2, 1954]

TOWNSMEN AT ARRAIJAN HONOR M. H. THATCHER—FORMER ICC MEMBER AND CONGRESSMAN VISITS STAR-HERALD PLANT

The Honorable Maurice H. Thatcher, former member of the Isthmian Canal Commission now visiting here in connection with the Goethals memorial ceremonies, was honored yesterday by the people of the town of Arraijan on the Canal Zone border at the terminal of Thatcher Highway.

It was the second time that Mr. Thatcher had been so honored by the people of that Panamanian town who on a previous visit had similarly welcomed him and set aside a lot within the town's limits as their recognition for the many benefits they had received from Mr. Thatcher's efforts while a Member of the United States Congress.

Upon returning from his visit to Arraijan, where he was accompanied by his wife, Mr. Thatcher called at the Star and Herald offices where he was received by members of the management and editorial staff of this paper, with which the canal oldtimer and former Congressman maintained close and very cordial relations during the time of his service here, which were continued uninterruptedly after his retirement from isthmian activities.

Mr. and Mrs. Thatcher were shown around the Star and Herald's plant and expressed themselves as deeply impressed with the progress and development noted since their last visit.

La Estrella de Panama—the Spanish language counterpart of the Star and Herald—on April 1, 1954, carried an editorial which paid high tribute to Mr. Thatcher; and its English translation—as it appeared on the following day in the Star and Herald—follows:

REUNION OF OLD FRIENDS

In a recent editorial, we discussed the vigorous and extraordinary personality of Col. George W. Goethals, who directed the construction of the interoceanic canal in Panama and was chairman of the Isthmian Canal Commission. In it we set forth the achievement of this man of superlative genius and will, to whose memory a monument has been erected in the Canal Zone.

Today we want to convey a heartfelt greeting to the hundreds of former officials and employees of the canal, who left our shores many years ago to scatter in their own country and who just a few days ago met again under Panamanian skies to pay their tribute of homage to the builder of the interoceanic canal.

Linked to the canal enterprise for a long time through various offices, jobs, and positions, they left our shores, thinking perhaps that theirs would be a permanent absence. Yet, let the unforgettable name of Col. George W. Goethals—so closely linked to their memories—be invoked for the tribute it so justly deserved, and here we have again on Panamanian soil many men whose labor over the years wrote a large portion of the history of the canal.

Among them is Maurice H. Thatcher, who headed the Department of Civil Administration in the early canal days. He has returned to Panama, where he is remembered and loved, to clasp friendly hands and to receive spontaneous expressions of affection, which bespeak clearly that our country has not forgotten his work as a "good neighbor" even in the days when the "good neighbor policy" was something unknown. And like Mr. Thatcher, there are hundreds of former employees of the canal back in Panama to whom we convey our most sincere greeting.

For, having turned the corner of the first century ourselves, having carried in our pages the account of the great canal enterprise, from the first attempt to its successful culmination, there have appeared in our columns the names of Americans who have returned to our country to reminisce over times gone by and to find out for themselves how friendships formed years ago are still in bloom.

May their return to Panama be a pleasant experience for these canal old timers, many of whom we are proud to call our friends. That is our sincere wish. And may they feel that, despite time and the great material changes that they have found, Panamanians have kept faith with them. For all of them—whose names are too numerous to mention, but which are ever in our mind—our cordial greeting and the expression of our lasting affection.

The Star and Herald, by the way, has a lineage of 105 years, dating back to something like 1849 when the construction of the Panama Railroad across the isthmus was begun. It is an outstanding daily newspaper of Central America, and its editorial policy, through the years, has done much to promote good relations between Panama and the United States. It has long been an effective antagonist of communism and has vigorously opposed its infiltration into Latin American countries.

In addition, I include an article which appeared in the Panama Canal Review, the official organ of the Panama Canal Company and the Canal Zone Government, dated April 2, 1954, with reference to Mr. Thatcher's participation in the Balboa ceremonies already mentioned:

Attending the Goethals Memorial dedication ceremonies this week is one of the central figures of the canal construction period and one of the most enthusiastic alumni of the canal organization.

He is Maurice H. Thatcher, member of the Isthmian Canal Commission from 1910 to 1913 and head of the civil administration in the Canal Zone during that period.

Mr. Thatcher is as well known and famous in Panama as in the Canal Zone as Thatcher Highway and Ferry, the link to the interior of the Republic, is named in his honor. He was author of the legislation authorizing the highway and ferry.

He has followed news of the isthmus with intense interest since leaving the Canal Zone over 40 years ago to return to his native State of Kentucky and become United States Representative from the Fifth Congressional District. His lively interest in isthmian affairs was recently demonstrated when he participated in the formal opening of the "50 Years of Friendship" exhibit in the Library of Congress.

Mr. Thatcher, the only living member of the Isthmian Canal Commission, has made his home in Washington, D. C., for many years. He is a poet of note and has written many poems relating to the Panama Canal and the men and women who work for it.

In this general connection it should be noted, also, that in Congress Mr. Thatcher brought about enactment of the legislation establishing the Gorgas Memorial Laboratory in the city of Panama, and maintained and operated by Federal funds. The laboratory is doing splendid humanitarian service in research work, with respect to yellow fever, malaria, and the many other diseases of the tropics—both human and veterinary. Its fame is worldwide. Mr. Thatcher, following his retirement from Congress, became vice president and general counsel of the Gorgas Memorial Institute of Tropical and Preventive Medicine, which has supervision of the laboratory. These services—invaluable in character—he renders without compensation, and purely as a contribution to Isthmian and international welfare.

Then I would add an editorial article which appeared in the Jeffersonian, published in my congressional district, at Jeffersontown, in Jefferson County, Ky., on May 28, 1954; and of which Mr. Carl A. Hummel is editor, and Mr. Thomas R. Jones is publisher. It is one of the best county newspapers in the entire State.

CANAL ZONE HONORS FORMER GOVERNOR

This year, 1954, being the 50th anniversary of the independence of Panama, and of the acquisition by the United States Government of the Canal Zone, celebration rites of these historic events are being appropriately observed. A memorial shaft, to the memory of Gen. George W. Goethals, has been erected and was dedicated on March 31, in Balboa at the foot of the grounds of the Canal Zone Government's Administration Building. General Goethals was chairman and chief engineer of the Isthmian Commission.

Former Congressman Maurice H. Thatcher, from this Kentucky district, was also a member of the Commission, as well as Governor of the Canal Zone. The present Canal Zone Governor, Gen. John S. Seybold, extended to Mr. and Mrs. Thatcher, now residing in Washington, D. C., a formal invitation to visit the Isthmus as guests of the Canal Zone government. Governor Thatcher was one of the principal participants in the ceremonies dedicating the Goethals memorial.

The Thatchers were among other distinguished guests at the dedication to fly from Washington to the Pacific side of the Canal Zone on March 30, making the nonstop flight of 2,100 miles in 8½ hours. Among the other passengers were United States Senator ALEXANDER WILEY, of Wisconsin, and George N. Roderick, Assistant Secretary of the Army, and their wives. Governor and Mrs. Seybold, with other officials met the plane and welcomed the guests.

Ancon, adjacent to the city of Panama, was the first home of the Thatchers following their marriage in Frankfort, Ky., on May 4, 1910.

At the dedicatory ceremonies, Mr. Thatcher spoke and awarded prizes to student girls, winners in contests conducted in junior and senior high schools of the Canal Zone for essays on the life of General Goethals.

Following his tenure in the Congress, Mr. Thatcher was chosen vice president and general counsel of the Gorgas Memorial Institute of Tropical and Preventive Medicine, which supervises the Gorgas Memorial Laboratory. Through the years he has rendered constant and valuable gratuitous service relative to the operation and maintenance of the laboratory.

The ferry across the Canal bears the name of "Thatcher," as well as the highway across the Canal Zone strip, both of which constitute links in the Inter-American Highway System. Many were the courtesies and the honors extended Mr. and Mrs. Thatcher on their visit to the Canal Zone, not only by the Zone officials but by the general public as well, who turned out en masse to greet them and to take part in parades and other festive occasions.

The party returned to Washington from the Canal Zone on April 2, in time to attend, on the following day, the crowning of a Kentucky girl, Miss Frances Mae Fisher, as queen of the cherry blossom festival.

During their recent brief stay on the isthmus, Mr. and Mrs. Thatcher received various courtesies. Thus he was presented with a scroll-letter of appreciation by the Panama Canal West Indian Employees Association, in appreciation of his effective services in their behalf through the years; and a demonstration was accorded both of them by the inhabitants of the town of Arraijan, in the Republic of Panama, in appreciation of Mr. Thatcher's services in Congress, which brought about the enactment establishing the ferry across the Panama Canal at Balboa and the construction of the connecting highway from the western terminus of the canal to the Canal Zone-Panama boundary line. The ferry and highway brought liberation from complete isolation to Arraijan and its residents have been grateful because of this. In January 1931, they presented a lot to him as a token of gratitude. At the recent demonstration, he gave the lot back to the town for use as a children's playground, and pledged a substantial contribution for playground equipment. The municipal officials of Arraijan have named the lot Parque Thatcher.

I am sure that the many friends of Mr. Thatcher—some of them his colleagues in this Chamber, yet serving here—and Mrs. Thatcher, will join me in extending to them heartiest congratulations upon these pleasing honors accorded them; and in wishing them many more years of health, strength, and useful endeavors.

Touching the reference in the Panama Canal Review article to poems written by Mr. Thatcher relative to the Panama Canal, and the men and women who work for it, a conclusion of these remarks may well be made by adding his fine tribute, in verse, to these workers, first published in the Star and Herald in its historic edition in commemoration of the 25th anniversary—August 15, 1939—of the formal opening of the canal to world traffic:

BUILDERS OF THE PANAMA CANAL

(In commemoration of the 25th anniversary of the formal opening)

(By Maurice H. Thatcher)

There were workers great, and workers small—
As judged by rank—in the enterprise;
But glory enough there was for all,
And each was great to seeing eyes.
Let Fame take care that her Scroll be just,
And give to each his meed of praise,—
Else, out of the ashes and the dust,
The Shade of Censure shall upraise.

A laud for the work of the first gold men
Who toiled and wrought and strove, amain,
To dig the ditch. They began it when
Old Yellow Jack, and the blight and bane
Of Chagres Fever, took starkest toll.
They came, enlisted, and ventured all;
And wrestled death, with body and soul,—
To linger, these—and those, to fall.

Another fever filled blood and bone
Of all, throughout. Its currents run
Until, within the stretch of the zone,
The last lone yard of the link was done:—
A fever, absorbing in the fire
Which single zeal forever brings;
A fever which always must inspire
That strength from which great action springs.

From a boundless field from which to choose—
The ablest Uncle Sam could find,—
Were here assembled: steam-shovel crews,
And engineers of ev'ry kind;—
Designers, trainmen, inventors rare;
Dredgers, foremen, mechanics skilled;
Electrical wizards;—and, ev'rywhere,
The art to do what the blue-prints willed.

Whate'er the call, whatever the task,
Each one strove for a single end;
So fair his service that none could ask
Better result, or aught amend.
He reamed the hole, and the bolt sent home;
He mixed the parts, and filled the form;
Into cores he pumped the silt and loam;
And wavered not in sun or storm.

The dirt he hauled from the deepest cut;
Reclaimed tidelands in manner vast;
He "toed" the dams with the huge output
Of spoil of shovel and slide and blast.
He dredged the channels in sea and lake,
And built the bounds of dock and lock;
Upreared the spillways and each intake,—
And planted all on the solid rock.

He lent the sleight of his brain and hand
To do all things the goal required;
All things designed, and each thing planned,
Till naught was left to be desired.
The strengths of nature—both seen and hid—
He put in bonds to do his will;
And today, as then, as they are bid,
They work the wonders of his skill.

For the silver groups—a word or two;
For those of ev'ry race and soil:
Theirs were the humbler tasks to do;
They bore the brunts of periled toil.
In loyal spirit they labored here,
Through all the great, eventful days;
They met all duty devoid of fear,
And earned their bit of deathless praise.

And back of all was the Gorgas Squad,
To hold the bitter plagues at bay;
With stern Hygeia's miracle rod,
Swift were the scourges swept away.
Strange things were done with a sturdy grace,
Until in Isthmia all was well;
Death's haunt became an abiding place
Where the non-immune might safely dwell.

America's mood was here maintained;
All civil functions carried on;
Orderly government ruled and reigned,
And codes to fit all needs were drawn;
And homes were made, and society
Was much the same as the homeland brings;
Here, men and women and children, free,
Lived in the midst of mighty things.

Executives, judges, and Q. M. D.'s;
Teachers and clerks, firemen, police;
Nurses and doctors; and more like these,
Bewrought, each one, his separate piece
Of the finished whole. Their toils, no less
Than those of the workers, "skilled" and "raw,"
Were full required for the job's success:
All were impelled by the selfsame law.

The mountains moved, and the waters rose;
And faith, at last, fulfilled her dream:
Lake, lock, and channel—the whole world knows—
Attest the worth of a hope supreme!
The ships now shuttle from shore to shore:
Up, up, and up—and thence straight on;
Then three times downward—and on, once more—
Into the sunset or the dawn!

All were as one; and they strove and wrought
To shape the passage to the Ind.
In terms of life it was dearly bought;
In money, cheap. The ranks are thinned
By time and death; but the deed they did
Excels all others of like and kind;
Its strength and virtue cannot be hid:
It lives—all tongues and lands to bind!

Protecting the Nation's Health

EXTENSION OF REMARKS
OF
HON. A. L. MILLER
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. MILLER of Nebraska. Mr. Speaker, last week the House agreed to the Senate amendment to H. R. 7125 and sent the bill to the President for signature. There was little ballyhoo about it. The radio, press, and television gave it little play.

H. R. 7125 deals with pesticides—not a very interesting subject even though it is used or affected by nearly everybody. The primary purpose of the bill is to protect the public health. It reaches that end by providing that no pesticide may be placed on the market until a tolerance for the product has been established by the Department of Health, Education, and Welfare.

Under existing laws, a tolerance need not be established before the product is placed on the market. This is evidenced by the fact that only 1 tolerance has been established even though there are about 40,000 different pesticides on the market.

In other words, no one knew how dangerous those which did not have a tolerance were to the public health.

Under H. R. 7125 we would know and the consumer would be assured that he was not being poisoned unknowingly.

As for the farmer, he will be able to use the pesticide on his product without the fear of having his year's work confiscated as being adulterated or deleterious and injurious to public health by the Food and Drug Administration. Records show that entire crops have been confiscated because the chemical residue was too great.

Industry will be able to assure the farmers that if they use their product according to the directions it will greatly eliminate the losses due to pests. These losses are estimated at over a billion dollars a year.

Besides requiring that a tolerance be established prior to marketing, the bill sets up a workable procedure in establishing a tolerance. Under the present law, lengthy public hearings must be held and too often they have become so long and drawn out that they are not workable. This is borne out by the fact that despite 2 years of hearings, costing millions of dollars, only 1 tolerance was established.

The Select Committee To Investigate the Use of New Chemical Additives in Foods, Drugs, Cosmetics, and Pesticides, of which I was a member, found during the 81st and 82d Congresses that legislation along this line was sorely needed. As a medical doctor, I was a little disturbed with what I learned and was determined that legislation should be introduced to plug the leak in our public health laws.

I am most happy that Congress has passed this legislation and am quite confident the President will soon sign it into law.

Area Job Total Drops—Summer Gain Unlikely

EXTENSION OF REMARKS
OF
HON. MELVIN PRICE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. PRICE. Mr. Speaker, when I picked up my hometown newspaper, the East St. Louis Journal for June 22, I was greeted with a headline: "Area Job Total Drops—Summer Gain Unlikely." I was struck by a number of facts related in the story, which was based upon an interview with C. R. Hughes, manager of the East St. Louis office of the Illinois State Employment Service.

Mr. Hughes said that unemployment in East St. Louis had climbed to 6,200 during May, an increase of 700 over the level on March 15 of this year.

We may recall that March was announced by the President as the month which would be the key to Federal action to relieve the stress of unemployment. March came and went, and now in my hometown, at least—and I do not think we are very much different than anyplace else—unemployment is almost 13 percent higher than it was in March.

The question is, Where is the antirecession program of the administration? Those 6,200 unemployed in East St. Louis, together with other millions of unfortunate would-be wage earners throughout the land have been looking in vain for such a program.

The best they have had were statements, along in mid-March that April would be the month to look at, since a late Easter would delay the hypodermic of the new bonnet trade. Easter has long since passed; we are now in summer, and still there is no program; unless we call the recent easing of credit a program. However, the easiest credit in the world is of little value to a man who has no job, and a hungry family to feed.

There was another very pertinent fact in Mr. Hughes' report. He said new job opportunities were nonexistent, since all local firms had a large backlog of laid-off workers with call-back rights. The 600 or 700 high-school graduates and returning college students were expected by Mr. Hughes to swell the May unemployment total.

This analysis has been made by an employee of the State of Illinois, where the administration is run by the Republicans, so we can hardly kiss off his remarks as the words of a "prophet of doom and gloom." We must accept them as proven facts, and we must accept his analysis as that of one who knows whereof he speaks.

The reference to the lack of new job opportunities is highly significant because it points up the utter fallacy of the view taken by the Secretary of the Treasury, who says he is satisfied with a "second best" year, and who insists that it is not necessary to break records always in order to have prosperity.

What does a "second best year"—which seems to make Mr. Humphrey very happy—mean? It means that a number of persons who were employed in the "best year" are not working. It also means that new members of the labor force—the 600 to 700 referred to by Mr. Hughes in East St. Louis and an estimated 700,000 each year for the Nation as a whole—are denied job opportunities.

We have heard a very great number of words spoken by administration officials, Members of the Congress, and others about the sacredness of the right to work. Of course, these words have always referred to legislation designed to break the back of organized labor. But what about the right to work of these new members of the labor force? Is not that a sacred right; a sacred right which is callously rejected by the smug satisfaction with a second best year?

Our national economy must be expanded by from 3 to 5 percent every year if we are to provide jobs for all those who want to work; and we must provide jobs for them if we are to sell our gross national product. Anything less than such an expansion will mean that the second best year will be followed by a third best, and then a fourth best, and the spiral of unemployment will roll onward and upward to a point where the depression which followed the crash of 1929 will seem like heavenly prosperity.

Unless we provide such an expanding economy, we must admit and accept failure and defeat, not for ourselves but for our way of life and for our system of free enterprise. This we cannot do, for there is another evil system poised and ready to take over if we fail.

I include the article from the East St. Louis Journal as a part of my remarks:

AREA JOB TOTAL DROPS—SUMMER GAIN UNLIKELY

East St. Louis area employment has dropped, with no probability of an upturn during the rest of the summer.

"The impact of production curtailment in the metals industry forced employment in the East St. Louis area down by 75 at the 92 reporting firms during a 60-day period ending May 15," said C. R. Hughes, manager of the East St. Louis office of the Illinois State Employment Service.

Seasonal employment rises in commercial fertilizers totaled 200; in the stone-clay-glass industry, 175; in roofing mills, 100; and scattered gains in other industries, 100. These gains, however, failed to offset a drop of 650 in the metals fields.

The May employment total for the 92 firms reporting was 22,443 or 2,250 less than May 1953.

Hughes said job opportunities have decreased materially in the past 60 days and unemployment has climbed to 6,200, about 700 above the March 15 level. New hiring will be limited for the next 2 months as most major firms have a pool of laid-off workers with call-back rights. The 600 or 700 high-school graduates and returning college students also will tend to swell the already unemployed group.

According to Hughes, manufacturing employment is expected to level off at current figures and in general remain stable. Potential construction expansion could raise nonmanufacturing employment to a somewhat higher level than anticipated.

Hughes said that information provided by local employers shows that employment will continue at a gentle decline during the next 60-day period. Heavy seasonal layoffs in the commercial-fertilizer industry, coupled with pessimistic employment forecasts in the metals industry, preclude the possibility of any overall employment rise in the next 2 months, he added.

Almost every major firm in the area has a pool of laid-off workers with call-back rights, according to Hughes. Industrial job openings for vacation workers practically are nonexistent this year.

Hughes said the overall outlook for the area is for a leveling off in the downward employment trend, with some degree of stabilization near present levels by midsummer.

Section-by-Section Analysis of H. R. 8356, a Bill To Provide for Reinsurance of Health Service Prepayment Plans

EXTENSION OF REMARKS
OF

HON. CHARLES A. WOLVERTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, July 12, 1954

Mr. WOLVERTON. Mr. Speaker, it is my understanding that H. R. 8356, a bill to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services, under the rule granted today, will probably be brought before the House for consideration on Tuesday, July 13. Because of this fact it seems appropriate that I should submit for the benefit of the membership of the House a section-by-section analysis of the bill.

The bill provides for the establishment of a health reinsurance program in the Department of Health, Education, and Welfare. The short title of the act is "Health Service Prepayment Plan Reinsurance Act." However, it is often referred to as the health reinsurance bill.

The following is my analysis, by sections, of the bill reported to the House from the Committee on Interstate and Foreign Commerce, July 9, 1954:

ANALYSIS OF PROVISIONS OF H. R. 8356

TITLE I. GENERAL

Section 1, short title of bill.

Section 2, declaration of purpose: "To encourage and stimulate private initiative in making good and comprehensive health services generally accessible on reasonable terms, through adequate health service prepayment plans, to the maximum number of people, (a) by providing technical advice and information, without charge, to health service prepayment plans and to the carriers or sponsors thereof; and (b) by making a form of reinsurance available for voluntary health service prepayment plans where such reinsurance is needed in order to stimulate the establishment and maintenance of adequate prepayment plans in areas, and with respect to services and classes of persons, for which they are needed."

To reaffirm the congressional policy opposed to Federal regulation of insurance, the committee added the following:

"Nothing in this act shall be construed to authorize any action inconsistent with the policy and provisions of the act entitled 'An act to express the intent of the Congress with reference to the regulation of the business of insurance,' approved March 9, 1945 (59 Stat. 33), as amended (15 U. S. C. 1011–1015)." (The so-called McCarran Act.)

Section 3, definitions:

The principal definitions in this section deal with "beneficiary," "carrier," "health service prepayment plan," and "personal health services."

The term "beneficiary" means an individual to whom a carrier, pursuant to a health service prepayment plan, undertakes (1) to pay in whole or in part for specified personal health services furnished to him by others, or (2) to provide specified personal health services.

The term "carrier" means an organization, other than an instrumentality of a State or political subdivision thereof, which is sponsoring or is engaged in providing protection under insurance policies or subscriber contracts, or operating under a health service prepayment plan.

The term "health service prepayment plan" means a plan under which a carrier undertakes to pay for or to provide personal health services to specified beneficiaries or classes of beneficiaries.

The term "personal health services" includes any services rendered to individuals by licensed health personnel or, under the supervision of such personnel, by auxiliary personnel for the improvement or preservation of physical or mental health or for the diagnosis and treatment of disease or injury; the use by such licensed or auxiliary personnel of any and all apparatus or machines designed to aid in the diagnosis or treatment of disease or injury; the provision of bed and board in general or special hospitals, convalescent homes, nursing homes, sanatoria, or other institutions licensed or designated as such by a State when care in such institutions is prescribed by such licensed personnel; the provision of drugs and machines, dressings and supplies, prostheses and applicances (including eyeglasses), when prescribed by such licensed personnel; and ambulance service.

The definition of the term "carrier" is intended to make clear, in conjunction with the definition of the term "health service prepayment plan" that all kinds of plans using the prepayment method in the provision of personal health services or in payment or reimbursement for the cost of such services fall within the scope of the bill and may be considered for reinsurance. This would include, for example, insurance companies' plans offering protection under insurance policies, corporations or associations, such as the typical Blue Cross plan, undertaking in subscription or membership contracts to provide services through providers of such services (with whom, frequently, the carrier has directly or indirectly a contract or arrangement, in which case the contract or arrangement is considered a part of the plan), and prepayment plans of the direct-service type, such as those offered by medical cooperatives offering personal health services primarily through their own staff and facilities, as well as groups of physicians undertaking to furnish medical care on a prepayment basis.

Section 4, National Advisory Council and other committees: This section establishes within the Department of Health, Education, and Welfare a National Advisory Council on Health Service Prepayment Plans, consisting of 12 members appointed by the President. The Council is charged, under section 4 (b), with the duty of advising, consulting with, and making recommendations to the Secretary on matters of policy relating to the activities and functions of the Secretary under the act. Under section 4 (c) the Secretary is also authorized to utilize the services of any member or members of the Council for advisory or consultative purposes in connection with matters related to the administration of the act and may also appoint special advisory committees and utilize the services of any member of such a committee for such purposes. Section 4 (d) provides that members of the Council and of other advisory and technical committees shall receive per diem and travel expenses.

Section 5, consultants: Authorizes use of expert consultants or organizations thereof.

Section 6, utilization of other agencies: In addition to authorizing utilization of other Federal agencies, or of any other public or nonprofit agency or institution, section 6 provides for utilization of State agencies supervising carriers, especially in determining compliance with requirements and standards prescribed by the Secretary for reinsurance.

Section 7, voluntary and uncompensated services: Authorizes Secretary to use volunteered or uncompensated services of outside individuals or groups.

Section 8, exemption from conflict-of-interest statutes: Provides a limited waiver of certain conflict-of-interest statutes for members of the Advisory Council and for special consultants used in an advisory or consultative capacity.

Section 9, regulations: Authorizes Secretary to promulgate necessary regulations. Prohibits any Federal supervisory or regulatory control over carriers, or over hospitals, other health facilities, or personnel furnishing health services.

Section 10, disclosure of information: With narrow exceptions, disclosure of information gained as result of operation of program is specifically prohibited.

TITLE II. TECHNICAL AND ADVISORY SERVICES

Section 201 authorizes studies and the collection of information on health service prepayment plans, and the distribution of such information as is developed.

Section 202 authorizes appropriations for the purposes of title II.

TITLE III. REINSURANCE OF HEALTH SERVICE PREPAYMENT PLANS

Section 301, authority to reinsure:

Section 301 (a) authorizes the Secretary, subject to the provisions of this title and to such terms and conditions as may be prescribed under the authority of this title, to reinsure carriers with respect to health service prepayment plans if the Secretary, after consultation with the Council, determines that reinsurance with respect to any kind or type of health service prepayment plan upon terms and conditions and at premium rates comparable to those offered pursuant to this title is not available from private sources to an extent adequate to promote such purposes.

Section 301 (b) limits Federal reinsurance to that part of a plan that is not otherwise reinsured.

Section 302, applications for reinsurance:

Section 302 (a) establishes the bases upon which carriers file applications for reinsurance. The Secretary is authorized to require applicants to furnish whatever infor-

mation may be necessary to evaluate the application.

Section 302 (b) requires applicants to agree to (1) pay reinsurance premiums; (2) comply with applicable State laws; (3) make periodic reports; and (4) comply with reinsurance contract.

Section 302 (c) makes such requirements applicable to renewal applications, except as otherwise specified by regulations.

Section 303, terms and conditions of approval for reinsurance:

Section 303 (a) sets forth broad terms and conditions which the Secretary must take into account in granting reinsurance.

After consultation with the Advisory Council, the Secretary may specify by regulation as conditions for reinsurance: (1) The kinds and types of plans eligible; (2) minimum benefits; (3) safeguards against undue exclusions of health conditions or health services, or other undue exclusions or limitations; (4) standards for deductible and maximum liability provisions; (5) waiting periods for benefits; (6) coinsurance provisions; (7) standards for plan provisions with respect to costs and charges of providers of personal health services payable by the carrier, to the extent such standards are necessary to protect the fund against abuses or arbitrary cost increases; (8) standards as to duration, cancelability, and renewability of policies or subscriber contracts; and (9) other policy provisions.

Section 303 (b) requires that regulations prescribed under the authority of section 303 (a) be promulgated only after such consultation by the Secretary with interested groups, including State insurance department officials, as the Secretary deems appropriate.

Section 303 (c) prohibits the Secretary from reinsuring any plan for which the carrier's premium rates are such as to make the plan financially unsound, or any plan with respect to which the carrier's breakdown of its single premium rate, as between reinsured and nonreinsured types of benefit costs, is unreasonable, or any plan if reinsurance of the plan, considered as a whole, would not promote the purposes of the act. In other respects the Secretary would be precluded from setting any standards for the carrier's premium rates.

Section 303 (d) provides safeguards to carriers in the event of changes in the terms, conditions, limitations, etc., prescribed by regulations. Prohibits retroactive regulations.

Section 303 (e) prohibits the Secretary from reinsuring any plan for direct provision of medical or dental services by the carrier through a salaried staff of physicians, surgeons, or dentists in the employ of such carrier, unless control over the practice of medicine or dentistry rests solely in duly licensed members of the professions involved.

Section 304, reinsurance certificate: Section 304 provides that a reinsurance certificate may be granted if: (1) The applicant carrier is operating according to law; (2) there is no reason to believe that the carrier is financially unsound or operating in a manner which does not entitled it to public confidence; (3) the carrier agrees to comply with the terms and conditions prescribed for reinsurance; (4) the plan is sound; (5) the carrier has agreed to the reinsurance premium rate fixed by the Secretary for the plan; and (6) the reinsurance of the plan will promote the purposes of the act.

Section 305: Scope and extent of reinsurance obligation:

Section 305 (a) contains the formula to be used in determining the liability of the reinsurance fund to reinsured carriers. It provides for payment by the fund of 75 percent of the amount by which the carrier's aggregate benefit costs (i. e., "losses" or "claims") exceed the carrier's gross premium income reduced by a predetermined and agreed-upon allowance for administrative expenses of the carrier.

Section 305 (b) provides for an analogous formula to be established in the case of direct providers of health services (e. g., health cooperatives, fraternal organizations, or other group practice prepayment plans) and affiliates of such carriers.

Section 305 (c) defines the scope and extent of the reinsurance obligation for plans that include benefits for other purposes than those specified in the definition of "health service prepayment plan" (sec. 3 (e)) (e. g., disability benefits).

Section 305 (d) establishes basis for reinsurance payments to bankrupt or insolvent carriers.

Section 305 (e) provides for regulations dealing with (1) reinsurance of two or more plans offered by a single carrier, and (2) duration of reinsurance of a new or renewal plan.

Section 305 (f) prohibits retroactive application of new or amended regulations to approved plans if such new or amended regulations are less favorable to the carrier than those theretofore in effect.

Section 305 (g) limits the liability of the United States to the amounts actually in the fund.

Section 305 (h) contains definitions of terms used elsewhere in section 305.

Section 306, premium charges for reinsurance:

Section 306 (a) provides for the Secretary to prescribe reinsurance premium rates, varying in accordance with the hazard involved in any particular plan.

Section 306 (b) requires reinsurance premium rates to remain constant during the current reinsurance term, except under certain circumstances.

Section 306 (c) authorizes the Secretary to prescribe the frequency and time of reinsurance premium payments.

Section 306 (d) provides for paying reinsurance premiums into the reinsurance fund.

Section 307, reinsurance fund:

Section 307 (a) creates in the Treasury a health service prepayment plan reinsurance fund.

Section 307 (b) provides for handling payments into and out of the reinsurance fund, including payments of interest and, beginning July 1, 1959, for administrative expenses.

Section 307 (c) authorizes the Secretary, after consultation with the Council, to establish special accounts within the fund.

Section 307 (d) provides for investment of portions of the fund.

Section 307 (e) establishes basis for the Secretary to transfer funds from the different accounts for administrative expenses.

Section 308, advances to the fund:

Section 308 (a) authorizes appropriation of $25 million to capital advance account in Treasury for repayable advances to fund.

Section 308 (b) provides for repayments to capital advance account from income of fund.

Section 308 (c) provides for annual interest payments to the Treasury on advances to the fund, until advances have been repaid.

Section 309, payment of reinsurance claims:

Section 309 (a) makes provision for carriers to claim reinsurance payments, and establishes basis for United States court action if the Secretary denies a claim.

Section 309 (b) provides for interest payments to carriers on unpaid claims.

Section 309 (c) establishes bases for payment of reinsurance claims, including authority to make tentative payments subject to adjustment after final determination of the claims.

Section 309 (d) provides for payment of reinsurance claims when carriers are involved in bankruptcy or insolvency proceedings; it also provides that distribution of reinsurance payments shall be solely used to satisfy claims of subscribers or policyholders under reinsured plans.

Section 310, involuntary termination of reinsurance: This section provides for the Secretary to terminate reinsurance in accordance with provisions of regulations that have been in effect not less than 90 days.

Section 311, actions by policyholders or subscribers: Provides that individual policyholders have no claim against the fund.

Section 312, appropriations: Authorizes annual appropriations through June 30, 1959, for administrative expenses only incurred under title III. (Thereafter, such expenses will be payable from the fund.)

TITLE IV. MISCELLANEOUS

Section 401, legal powers and responsibilities:

Section 401 (a) provides authority to the Secretary to enforce or settle claims.

Section 401 (b) authorizes Secretary to hold hearings.

Section 401 (c) authorizes Secretary to determine the character and necessity of expenditures out of the fund and the manner in which they will be made.

Section 401 (d) establishes jurisdiction of United States courts.

Section 402, accounting and audits: This section provides for an annual budget program like those for wholly owned government corporations, and for annual audits by the General Accounting Office.

Section 403, annual reports: This section provides for annual reports, including recommendations of the Council (with minority views and recommendations, if any).

Section 404, criminal provisions and injunctions:

Section 404 (a) is a declaration by the Congress of the need to circumscribe advertising by reinsured carriers.

Section 404 (b) requires the Secretary to prescribe safeguards with respect to advertising and other representations by carriers concerning reinsurance under the act. It also provides criminal penalties for violations of this section.

Section 404 (c) provides for legal action by the Secretary in respect to advertising.

Section 404 (d) amends the United States Code as it relates to false advertising.

Section 405, appointments above grade GS–15: This authorizes the Secretary to employ not more than 10 persons in grades above GS–15 to administer the reinsurance program.

Section 406, effective date: Provides for effective date 30 days after enactment, but provides for lag period before reinsurance applications are received or considered.

The National Air Academy

EXTENSION OF REMARKS
OF

HON. W. J. BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 12, 1954

Mr. DORN of South Carolina. Mr. Speaker, of course, South Carolina would have been pleased had it been selected as the site of the National Air Academy, but I must commend and compliment the committee and Secretary Talbott for the splendid selection of Colorado. Springs. Colorado is one of the most beautiful States in the Union, and is centrally located, easily accessible from all parts of the United States. The climate and recreational facilities in that immediate area are near perfect for the Academy. I congratulate the people of

Colorado on being selected for the location of our National Air Academy. Also, Mr. Speaker, I wish to congratulate Lt. Gen. Hubert R. Harmon, Gen. Carl A. Spaatz, Gen. Charles A. Lindburgh, Dr. V. M. Hancher, Mr. Merrill C. Meigs, and Secretary Talbott. They had a difficult assignment. They performed this job well and deserve the commendation of the American people.

A New Continent for Less Than a Million Dollars

EXTENSION OF REMARKS
OF
HON. ALFRED D. SIEMINSKI
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. SIEMINSKI. Mr. Speaker, we can take possession of a new continent for less than a million dollar, provided, of course, that, since the Korean war and the diversion in Indochina, Soviet whaling ships and planes have not beaten us to the punch and staked their claims on it.

To our knowledge, no man has seen the new continent in its entirety. No plane has flown across it. No maps have accurately outlined its contours.

The new continent has a land mass larger than that of the United States. Its mineral wealth is reportedly greater than that of any continent.

Strategically, it sits 300 miles south of Cape Horn, across the Drake Strait. It is south of Australia and it is south of Africa. Up to now, one could comfortably assume that South America, Africa, and Australia formed the tripod of the free world, and that so long as they were free, the world would be free.

What would launching platforms for rockets and guided missiles on Antarctica enable an unfriendly power to do to South America, to the United States, to Australia, and to Africa? It could make the sweep of Islam from China to France, through the Mediterranean and across Spain, from the time of Mohammed in 632 to the early Middle Ages, seem like a child's romp.

Once developed by Soviet hands, would the Russians sell the new continent to us as they sold Alaska? Would they give it up without a fight, especially with morality on their side? The Monroe Doctrine does not apply to Antarctica, only to the Americas, North and South. With a valid claim in their hands in Antarctica, the Soviets could become, almost overnight, masters of the world, strategically, militarily, and economically.

There were those who ridiculed the cost of Alaska to Uncle Sam for $7 million. Others said that $15 million for the Louisiana purchase was theft of the taxpayers' money. There might be those who hold that the purchase of a new continent greater than Alaska, greater than the Louisiana Purchase, greater than both, plus Texas and the Far West, for less than a million dollars is madcap folly over an ice cap. There might be, Mr. Speaker, but I doubt it.

If the Congress steps on the gas in this session, Mr. Speaker, while there is still time, it can claim this continent in the next 2 years for less than a million dollars and do it without gumming the works of the Bureau of the Budget on the $13 million appropriation it plans to trot out in 1957 for approval of the Congress to enable an expedition to take readings of the universe from three or four locations in Antarctica. Nice if we can afford the time, Mr. Speaker. But while we gaze at the horizon and cock our ear at the stratosphere, busy ourselves with flying saucers, the diversions of Korea and Indochina, it seems to me that the realists in the Kremlin, like rattlesnakes in the grass, even now, coil for the lunge at our heel, the heel of the free world—South America, Africa, and Australia.

Soviet whaling ships in Antarctica? Yes. They've been whaling down there since Korea and 1950. Only whaling, Mr. Speaker?

In 1946, the Soviets had over 200 weather stations in the Arctic. We had none. We have nothing in Antarctica today, Mr. Speaker. What have the Soviets there? How do we know? I say we can't afford to wait for that $13 million expedition to come off in 1957 before the people of the United States find out the situation in Antarctica.

The time is now, Mr. Speaker. The Congress cannot flinch. Neither can the Bureau of the Budget nor the White House, nor the Senate.

The Soviets are not asleep. Why should we be? Let us go. Now. In 1954 to Antarctica. The continent is ours for less than a million.

More soon on this situation, Mr. Speaker.

Federal Pay Legislation

EXTENSION OF REMARKS
OF
HON. BOB WILSON
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, July 12, 1954

Mr. WILSON of California. Mr. Speaker, as the 83d Congress approaches adjournment, I fervently hope we can take action to grant a pay increase to the service men and women, along with the anticipated increase for postal workers and classified civil-service employees. I am currently exploring the possibility of amending the civil-service pay legislation to include the military as well. Equity demands that the largest group of Government employees, the men and women of the armed services, be accorded an adjustment in their pay status.

There can be no question that inadequate compensation is the main contributing factor to the increasing resignations of career servicemen, who simply cannot make ends meet. I have made an extended study of this problem over the past 18 months, and the obvious conclusion is that the career serviceman is a victim of an inflationary spiral that squeezed him as it flattened out. The last military pay raise, in 1949, according to many servicemen, actually resulted in a decrease of from $4 to $12 per month in take-home pay because of adjustments and tax changes made concurrently. The increased cost of living since then is well known to us all.

Certainly the Department of Defense is aware of the need for an adjustment at this time. Air Force Secretary Talbott has made many public statements to that effect, as has Assistant Secretary of Defense for Manpower, Dr. John Hannah, and many others.

It has been publicly stated that the Secretary of Defense would press for an increase this session, if classified civil-service workers get an increase. Substantial testimony has been gathered to prove the need for a pay increase for classified workers. As a result of the urgings of the Civil Service Commission and many Congressmen, there is every likelihood of positive action in the next few weeks, which will result in an increase for classified Federal employees and postal workers, too.

Recent testimony before the Senate Appropriations Committee by Defense Comptroller, W. J. McNeil, showed a parallel between military and civil-service pay. While there are intimations that the comparisons were unfairly drawn, if we accept them as accurate, we must also accept the fact that an increase in civil-service pay this year will create still another gap between the comparative pay scales.

While I am on this subject, I want to correct a mistaken impression I may have created by inserting an editorial from the July 3 issue of Army Times in the Appendix of the daily RECORD. The editorial discussed the pay issue, and, by inference, suggested that the distinguished Member of the other body, Senator HOMER FERGUSON, Republican, of Michigan, concurred with the attitude of Defense Comptroller McNeill in opposing a pay increase. I did not intend to give the impression that the distinguished Senator agreed with Mr. McNeil. As a matter of fact, he has proved to be a true friend of servicemen during his years of exemplary service in the Senate, and I am happy to state publicly that no criticism of his actions was intended.

On the matter of a pay increase, it seems to me that the Defense Department and Congress should take immediate action to correct these inequities, and to bring the serviceman and his family into the proper economic level in our normal economy.

I have made no effort to stress the importance of maintaining career service personnel. The Womble Commission, Dr. Hannah and many others, have admirably recorded the losses our country and its defensive strength have suffered and will suffer under a continuation of present policy, unless decisive action is taken immediately.

The House will soon be voting on a reenlistment-bonus bill which has already passed the Senate. While in the main this bill has many features that will help solve the reenlistment program, it is by no means the answer to it. It is not a substitute for a pay raise. For one thing,

it favors the first- and second-term reenlistments, but does little to improve the economic status of those who have decided to make the military a career and who have already served from 8 to 15 years. It offers nothing to the experienced sergeants and chiefs and the junior officers so vital to our defense setup.

I have tried in many ways to call to the attention of my colleagues the plight of the services today. The need is obvious. Perhaps the best statement that I have seen on the subject is the body of a petition, written and circulated by two Navy wives. Over 500 of these individual petitions have been received by my office and have been forwarded to the proper officials in the Defense Department. In my opinion, this petition is an eloquent challenge to us for action now.

Under unanimous consent, I include this in the RECORD:

GIVE US A CHANCE TO STAY IN THE NAVY

When our husbands joined the Navy they felt there was no better career than in the service of their country.

When we married Navy men we accepted the inherent disadvantages of Navy life; frequent moves, long separations, added responsibility a Navy wife must assume, etc. We were proud of our country, and wanted to instill in our children the same love and devotion.

However, we did expect that after 10, 15, or 20 years of service our husbands would receive sufficient pay for us to maintain at least a decent standard of living and to give our children a few of the advantages a competent civilian could secure for his children.

Over the past several years, the rising cost of living, plus constant reduction of benefits we were promised, plus the lack of any real pay raise, has made a Navy career a choice between serving our country and providing for our children. We can no longer do both.

We respectfully request that you do all in your power to secure the pay raise which is now before Congress, so that more husbands are not forced to make the choice between service to his country and the welfare of his own family.

SENATE

TUESDAY, JULY 13, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 11 o'clock a. m., on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O merciful God, who alone can fill our life with holy purpose, at the beginning of this new day we beseech Thee that all its hours may be hallowed by tasks that are faced with a sense of Thy presence. From this altar of supplication we would go refreshed and empowered to dedicate our labor for that which is just and true. To serve the present age, we would give the best that is in us against the wrong that needs to be resisted and for the right that needs our assistance.

Teach us this day to enthrone wisdom upon our tongues and kindness within our hearts. And now, as problems having to do with the welfare of our Nation and of other nations fill to the brim the hours of this day, give us a joy in service that is independent of time or place and outward circumstances. So by Thy might shall we be garrisoned with fortitude and strengthened with courage: In the Redeemer's name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Monday, July 12, 1954, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Tribbe, one of his secretaries, and he announced that on July 10, 1954, the President had approved and signed the act (S. 2475) to increase the consumption of United States agricultural commodities in foreign countries, to improve the foreign relations of the United States, and for other purposes.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. THYE. Mr. President, I ask unanimous consent that the Subcommittee on Rules of the Committee on Rules and Administration may be permitted to meet this afternoon during the session of the Senate.

Mr. JOHNSON of Texas. Mr. President, has the Senator from Minnesota consulted with the minority leadership with respect to this request?

Mr. THYE. No.

Mr. JOHNSON of Texas. I object.

The VICE PRESIDENT. Objection is heard.

Mr. THYE subsequently said: Mr. President, I ask unanimous consent that a Subcommittee of the Committee on Rules and Administration be authorized to sit this afternoon during the session of the Senate. This meeting has been cleared with the minority leader.

The VICE PRESIDENT. Without objection, it is so ordered.

On request of Mr. KNOWLAND, and by unanimous consent, the Subcommittee on Education of the Committee on Labor and Public Welfare was authorized to meet during the session of the Senate today.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following the quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. KNOWLAND. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Green	Morse
Bridges	Hill	Murray
Burke	Johnson, Colo.	Neely
Butler	Johnson, Tex.	Pastore
Crippa	Johnston, S. C.	Payne
Ervin	Knowland	Robertson
Flanders	Lehman	Saltonstall
Gillette	Lennon	Stennis
Goldwater	Mansfield	Thye
Gore	Monroney	

Mr. SALTONSTALL. I announce that the Senator from Kansas [Mr. CARLSON], the Senator from Pennsylvania [Mr. DUFF], and the Senator from Michigan [Mr. POTTER] are necessarily absent. The junior Senator from Wisconsin [Mr. MCCARTHY] is absent on official business.

Mr. CLEMENTS. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan-American Highway Congress at Caracas, Venezuela.

The VICE PRESIDENT. A quorum is not present.

Mr. KNOWLAND. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from California.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will execute the order of the Senate.

After a little delay, Mr. ANDERSON, Mr. BARRETT, Mr. BEALL, Mr. BENNETT, Mrs. BOWRING, Mr. BRICKER, Mr. BUSH, Mr. BYRD, Mr. CAPEHART, Mr. CASE, Mr. CHAVEZ, Mr. CLEMENTS, Mr. COOPER, Mr. CORDON, Mr. DANIEL, Mr. DIRKSEN, Mr. DOUGLAS, Mr. DWORSHAK, Mr. FERGUSON, Mr. FREAR, Mr. FULBRIGHT, Mr. GEORGE, Mr. HAYDEN, Mr. HENDRICKSON, Mr. HENNINGS, Mr. HICKENLOOPER, Mr. HUMPHREY, Mr. IVES, Mr. JACKSON, Mr. JENNER, Mr. KEFAUVER, Mr. KENNEDY, Mr. KILGORE, Mr. KUCHEL, Mr. LANGER, Mr. LONG, Mr. MAGNUSON, Mr. MALONE, Mr. MARTIN, Mr. MCCARRAN, Mr. MILLIKIN, Mr. MUNDT, Mr. PURTELL, Mr. REYNOLDS, Mr. RUSSELL, Mr. SCHOEPPEL, Mr. SMATHERS, Mrs. SMITH of Maine, Mr. SMITH of New Jersey, Mr. SPARKMAN, Mr. SYMINGTON, Mr. UPTON, Mr. WATKINS, Mr. WELKER, Mr. WILEY, Mr. WILLIAMS, and Mr. YOUNG entered the Chamber and answered to their names.

The VICE PRESIDENT. A quorum is present.

Routine business is now in order.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following communications and letters, which were referred as indicated:

PROPOSED SUPPLEMENTAL APPROPRIATIONS, DEPARTMENT OF THE INTERIOR (S. Doc. No. 135)

A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1955, in the amount of $6,838,000, for the Department of the Interior (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

PROPOSED SUPPLEMENTAL APPROPRIATIONS, DEPARTMENT OF THE ARMY (S. Doc. No. 134)

A communication from the President of the United States, transmitting proposed supplemental appropriations for the fiscal year 1955, in the amount of $7,325,000, for the Department of the Army (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

SOIL SURVEY AND LAND CLASSIFICATION, AVONDALE PROJECT, IDAHO

A letter from the Assistant Secretary of the Interior, reporting, pursuant to law, that an adequate soil survey and land classification has been made of the lands on the Avondale project, Idaho, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of sprinkler irrigation (with an accompanying paper); to the Committee on Interior and Insular Affairs.

PROPOSED AWARDS OF CONCESSION CONTRACTS

Four letters from the Assistant Secretary of the Interior, transmitting, pursuant to law, proposed awards of concession contracts in the Rocky Mountain National Park, Colo., the Mount Rushmore National Memorial, S. Dak., the Grand Teton National Park, Wyo., and Glacier National Park, Mont. (with accompanying papers); to the Committee on Interior and Insular Affairs.

PETITIONS

Petitions, etc., were laid before the Senate, and referred as indicated:

By the VICE PRESIDENT:

A resolution adopted by the Wyoming Federation of Republican Women, Douglas, Wyo., favoring the prompt abrogation of "The Status of Forces Treaty"; to the Committee on Foreign Relations.

A resolution adopted by the Wyoming Federation of Republican Women, Douglas, Wyo., commending congressional investigating committees; to the Committee on Rules and Administration.

A letter in the nature of a petition from George H. Ball, of Washington, D. C., relating to the recent decision of the Commissioner of Internal Revenue, which declared that the pension fund of the International Typographical Union was taxable; to the Committee on Finance.

PAYMENTS BY FEDERAL GOVERNMENT IN LIEU OF TAXES—LETTER FROM CITY MANAGER, EAU CLAIRE, WIS.

Mr. WILEY. Mr. President, there is an exceedingly important question as to Federal payment in lieu of taxes to local governments which have been deprived by Uncle Sam of an increasing amount of tax-collecting base.

I present a representative letter which I received from David D. Rowlands, city manager of Eau Claire, Wis., urging action on a pending bill (S. 2473) for such payment.

I ask unanimous consent that the letter be printed at this point in the RECORD, and be thereafter appropriately referred to the Senate Finance Committee.

There being no objection, the letter was referred to the Committee on Government Operations, and ordered to be printed in the RECORD, as follows:

CITY OF EAU CLAIRE, WIS.,
July 6, 1954.

The Honorable ALEXANDER WILEY,
United States Senate,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: It is my understanding that Senate bill 2473 which would provide payments by the Federal Government in lieu of taxes to local governments is now being considered by the Senate Government Operations Committee. This bill, as you know provides for payments in lieu of taxes on Federal real and personal property of an industrial or commercial nature.

The officials in the city of Eau Claire are interested in having this bill enacted into law and it will be appreciated if you will confer with the members of this committee—Senators KENNEDY of Massachusetts, BUTLER of Maryland, BURKE of Ohio, and SMITH of Maine—to express our support of this legislation.

I want to take this opportunity to thank you in advance for giving this matter your immediate consideration.

As a final observation, it should be pointed out that the Federal Government has made payment in lieu of taxes to municipalities in other fields, particularly where defense housing was established during World War II, so some unusual precedent is not being established.

Sincerely yours,

DAVID D. ROWLANDS,
City Manager.

PURCHASE OF FIRE-FIGHTING EQUIPMENT — RESOLUTION OF MINNESOTA STATE CIVIL DEFENSE FIRE BOARD, ST. PAUL, MINN.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that a resolution adopted by the Minnesota State Civil Defense Fire Board, requesting that the Federal Government appropriate moneys to match local and State funds for the purchase of fire-fighting equipment, be printed in the RECORD, and appropriately referred.

There being no objection, the resolution was referred to the Committee on Government Operations, and ordered to be printed in the RECORD, as follows:

Whereas, Public Law 920 and the Minnesota Civil Defense Act of 1951 have made civil defense a governmental responsibility; and

Whereas the degeneration of the international situation emphasizes the increasing need for preparedness; and

Whereas the development of destructive weapons the enemy is capable of delivering to American cities can cause conflagrations and fire storms far exceeding anything heretofore experienced in our history; and

Whereas a complete inventory and analysis of every piece of fire-fighting equipment, including State-owned equipment, operated by local fire departments in Minnesota has given only an inadequate amount of fire apparatus for the direct support of the critical target areas of St. Paul and Minneapolis and the target area of Duluth: Now, therefore, be it

Resolved, That we the undersigned, the State civil defense fire defense board, as established under the authority of the Minnesota civil defense plan, meeting in the State civil defense control center, 1643 Rice Street, St. Paul, Minn., on the 25th day of June 1954, respectfully request Congressional representatives of the people of Minnesota and other States to appropriate Federal moneys for the purpose of matching local and State funds for the purchase of fire-fighting equipment to strengthen the operational effectiveness of the fire-fighting services in Minnesota.

Frank Everett, Rochester Fire Defense Chief, MSU I, 20 Counties, Southeast Minnesota; Parcy Burns, Keewatin, Fire Defense Chief, MSU II, 8 Counties, Northeast Minnesota; William A. Herbert, Crookston, Fire Defense Chief, MSU III, 15 Counties, Northwest Minnesota; Conrad Lund, Alexandria, Fire Defense Chief, MSU IV, 24 Counties Central Minnesota; Ben Bangerter, Mankto, Fire Defense Chief, MSU V, 20 Counties, Southwest Minnesota; Leonard C. Lund, Deputy Commissioner, Fire Marshal Division, State of Minnesota; R. C. Malmquist, Fire Chief, City of Minneapolis; W. H. Mattacks, Fire Chief, City of St. Paul; A. E. Pimley, Fire Protection, Forestry Division, State Department of Conservation.

GOVERNMENT COMPETITION WITH PRIVATE INDUSTRY—RESOLUTION

Mr. HUMPHREY. Mr. President, I ask unanimous consent that a resolution relating to Government competition with private industry, adopted by the National Marking Device Association, brought to my attention by E. M. Mellgren, president of the Stamp Works at St. Paul, Minn., and vice president of the National Marking Device Association, be printed in the body of the RECORD and appropriately referred.

There being no objection, the resolution was referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

To Whom It May Concern:

Whereas the marking-device industry has developed products and methods for the marking of the products of the world, and among them many very essential ones for use in either peace or wartime, and has invested extensively in tools and processing equipment for this production; and

Whereas this industry has been in the past and is still fully prepared to provide adequate product and services for the country's entire needs; and

Whereas the Federal Government is now competing in increasing and, in most cases, uneconomical ways with these valuable products and services to their disadvantage and in some instances to the point of driving them from the field: Now, therefore, be it

Resolved, That this industry in convention assembled, deploring this unnecessary and unfair competition—emanating from Federal prisons, ammunition plants, arsenals, Bureau of Standards, and elsewhere—is unalterably opposed to this intrusion by the Government into private industry, and will willingly cooperate in any effort made in its behalf to restore to it its proper functions, particularly in the manufacture of rubber stamps, marking inks, and similar marking products.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. LANGER, from the Committee on the Judiciary:

S. 3168. A bill granting the consent and approval of Congress to an interstate compact relating to the creation, development, and operation by the States of Kentucky and Virginia of a park to be known as the Breaks Interstate Park; with amendments (Rept. No. 1800).

MUTUAL SECURITY ACT OF 1954—REFERENCE OF BILL TO ARMED SERVICES COMMITTEE

Mr. KNOWLAND. Mr. President, pursuant to the custom which has been followed heretofore, and after consultation with the minority leader [Mr. JOHNSON of Texas], I ask unanimous consent that when the bill (H. R. 9678) to promote the security and foreign policy of the United States by furnishing assistance to friendly nations, and for other purposes is reported from the Committee on Foreign Relations it be referred to the Committee on Armed Services.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

MUTUAL SECURITY ACT OF 1954—REPORT OF A COMMITTEE

Mr. WILEY subsequently said: Mr. President, from the Committee on Foreign Relations, I report favorably, with an amendment, the bill (H. R. 9678) to promote the security and foreign policy of the United States by furnishing assistance to friendly nations, and for other purposes, and I submit a report (No. 1799) thereon.

The VICE PRESIDENT. The report will be received; and, under the order heretofore agreed to, the bill will be referred to the Committee on Armed Services.

Mr. WILEY subsequently said: Mr. President, I ask unanimous consent that the Senator from North Dakota [Mr. LANGER] be permitted to submit minority views on House bill 9678, to be printed as part 2 of Senate Report No. 1799.

The VICE PRESIDENT. Is there objection? The Chair hears none and it is so ordered.

MUTUAL SECURITY ACT OF 1954—MINORITY VIEWS

Subsequently,

Mr. LANGER, as a member of the Committee on Foreign Relations, submitted, pursuant to the order of the Senate of today, his minority views on the bill (H. R. 9678) to promote the security and foreign policy of the United States by furnishing assistance to friendly nations, and for other purposes, which was ordered to be printed as part 2 of Report No. 1799.

NOTICE OF HEARING BY ARMED SERVICES COMMITTEE ON MUTUAL SECURITY AUTHORIZATION BILL

Mr. SALTONSTALL. Mr. President, with reference to the request of the distinguished majority leader, made earlier today, with respect to the mutual-aid authorization bill, which has now been referred to the Committee on Armed Services, I respectfully state that the Committee on Armed Services expects to hold hearings on the bill in executive session tomorrow morning at 10 o'clock, and any Senator who wishes to do so, may appear before the committee.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SALTONSTALL (by request):

S. 3736. A bill for the relief of Louis Bostiga; and

S. 3737. A bill for the relief of Leopoldine Maria Lofblad; to the Committee on the Judiciary.

By Mr. LANGER:

S. 3738. A bill to fix the fees payable to the Patent Office and for other purposes; and

S. 3739 (by request). A bill to permit the naturalization of certain persons by reason of honorable service to the United States Navy prior to December 24, 1952; to the Committee on the Judiciary.

By Mrs. BOWRING (for herself, Mr. CARLSON, Mr. CASE, Mr. JOHNSON of Colorado, Mr. YOUNG, Mr. SPARKMAN, Mr. MUNDT, Mr. MALONE, Mr. REYNOLDS, and Mr. GOLDWATER):

S. 3740. A bill to amend the Packers and Stockyards Act, 1921, with respect to the charging of brand inspection fees; to the Committee on Agriculture and Forestry.

By Mr. MARTIN:

S. 3741. A bill to amend section 120 of the Internal Revenue Code (relating to the unlimited deduction for charitable and other contributions); to the Committee on Finance.

By Mr. MORSE:

S. 3742. A bill relating to the claims of the Mid-Columbia River Indians against the United States arising out of the construction of the Dalles Dam; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. BRIDGES (for himself and Mr. BYRD):

S. J. Res. 174. Joint resolution proposing an amendment to the Constitution of the United States to provide for the imposition of Federal taxes to provide revenues at least equal to appropriations, except in time of war declared by the Congress or when the United States is engaged in open hostility against an external enemy; to the Committee on the Judiciary.

(See the remarks of Mr. BRIDGES when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. CASE (by request):

S. J. Res. 175. Joint resolution to authorize the quartering in public buildings in the District of Columbia of troops participating in activities related to the American Legion National Convention of 1954; to the Committee on Government Operations.

S. J. Res. 176. Joint resolution to provide additional municipal services for the District of Columbia, in connection with the American Legion National Convention of 1954, to authorize the granting of permits to the American Legion 1954 Convention Corporation on the occasion of the American Legion National Convention of 1954, and for other purposes; to the Committee on the District of Columbia.

MID-COLUMBIA RIVER INDIANS' CLAIMS FOR LOSS OF FISHERY RIGHTS AT CELILO FALLS, OREG.

Mr. MORSE. Mr. President, I introduce for appropriate reference a bill relating to the claims of the Mid-Columbia River Indians against the United States arising out of the construction of the Dalles Dam. I ask unanimous consent that the bill, together with a statement by me relating to the bill be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill and statement will be printed in the RECORD.

The bill (S. 3742) relating to the claims of the Mid-Columbia River Indians against the United States arising out of the construction of the Dalles Dam, introduced by Mr. MORSE, was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Chief of Engineers is authorized, for the purposes of the last proviso in the paragraph entitled "Construction, General" in the Civil Functions Appropriation Act, 1954, to negotiate with the Mid-Columbia River Indian Right Council, or any agent or attorney designated by such council, as the representatives of the Indians whose names appear on the roll prepared under section 2, in connection with their claims arising out of the construction, operation, or maintenance of the Dalles Dam, Columbia River, Oreg. and Wash.

SEC. 2. The Secretary of the Interior is authorized and directed to prepare, at the earliest practicable date, a roll of the individual Indians who—

(a) through domicile at or in the vicinity of the Dalles Dam and through custom and usage, or through membership in a recognized tribe, are found to have an equitable interest in the fishery at Celilo Falls; and

(b) on the date of enactment of the Civil Functions Appropriation Act, 1954, were domiciled at or in the vicinity of the Dalles Dam.

SEC. 3. Any amounts determined to be payable to the Indians whose names appear on the roll prepared under section 2 of this act, in connection with their claims arising out of the construction, operation, or maintenance of the Dalles Dam, shall be paid to such Indians individually, or to the guardians of those who may be minors or of unsound mind, except that no such payment shall be made to any Indian who is an enrolled member of a recognized tribe unless he executes a waiver, in such form as may be prescribed by the Secretary of the Interior, of all right to or interest in any amounts payable to such tribe or the members thereof in connection with their claims arising out of the construction, operation, or maintenance of the Dalles Dam.

The statement by Mr. MORSE is as follows:

STATEMENT BY SENATOR MORSE ON THE MID-COLUMBIA RIVER INDIANS' CLAIMS FOR LOSS OF FISHERY RIGHTS AT CELILO FALLS, OREG.

The Mid-Columbia River Indians, who from time immemorial have lived at Celilo

Falls on the banks of the Columbia River in Oregon, are going to lose their homesite and ancient fishery. These Indian people depend upon Nature's bountiful supply of salmon in the Columbia River as the principal means of their livelihood. Most Americans have seen pictures of the magnificent falls of Celilo and the Indians assembled on the rocks and structures fishing for salmon as their ancestors did centuries ago.

Man's progress in this swift-moving world will soon leave only memories of Celilo Falls. The reservoir to be formed by the Dalles Dam will inundate the falls and the Mid-Columbia Indians will no longer dwell at the site to obtain their livelihood under the customs of their forebears.

The Government, in recognition of the fact that the Indians' fishery is a valuable property right, arranged for the payment of many millions of dollars to compensate for the loss sustained by these people. Congress, under Public Law 153 of the 83d Congress, implemented this arrangement by authorizing the Chief of Engineers to make compensation payments to the various Indian tribes affected by the loss of the fishery.

The Mid-Columbia River Indians had, for some time prior to the enactment of Public Law 153, encountered difficulties with the interested Government agencies in obtaining recognition as an Indian tribe with which a settlement could be effected for the loss of their valuable rights. These Indians retained counsel, participated in committee hearings in Washington, D. C., and upon inclusion in the Senate civil functions appropriation bill of the proviso that ultimately appeared in Public Law 153, they assumed that their right to compensation as an Indian tribe was settled beyond question and that the Government would negotiate a final settlement under the authority of Public Law 153. The proviso in question reads as follows:

"*Provided further*, That funds appropriated herein may, at the discretion and under the direction of the Chief of Engineers, be used in payment to the accounts of the Confederated Tribes of the Yakima Reservation; the Confederated Tribes of the Warm Springs Reservation; the Confederated Tribes of the Umatilla Reservation; or other recognized Indian tribes, and those individual Indians not enrolled in any recognized tribe, but who through domicile at or in the immediate vicinity of the reservoir and through custom and usage are found to have an equitable interest in the fishery, all of whose fishing rights and interests will be impaired by the Government incident to the construction, operation, or maintenance of the Dalles Dam, Columbia River, Wash. and Oreg., and must be subordinated thereto by agreement or litigation."

Despite the enactment of the foregoing language, the Department of the Interior has taken the position that "Departmental recognition of the existence of an Indian tribe as such" is "dependent upon ratification by the United States Senate of a treaty or agreement with an Indian tribe or recognition of a tribal entity under Federal statutes." Consequently, the Department of the Interior through its Bureau of Indian Affairs has concluded that it cannot regard the Mid-Columbia River Indians as a recognized Indian tribe for the purpose, among others, of approving contracts between Indian tribes and their attorneys.

The Army engineers have taken the position that they cannot negotiate with counsel for the Mid-Columbia River Indians until counsel qualifies by obtaining approval of the Bureau of Indian Affairs.

So far as I have been able to ascertain, these Indians want to be treated as a tribe or band and they desire to be represented by tribal counsel for purposes of negotiating with the Government.

In view of the fact that the interested Government agencies take the position that there are legal obstacles to the recognition of attorney contracts and to negotiations of the type desired by the Mid-Columbia River Indians, I have introduced for appropriate reference, a bill which is designed to remove such legal obstacles. I ask that the Senate Committee on Interior and Insular Affairs give consideration to this matter at the earliest possible date because I am sure that the Government agencies and all interested parties are most anxious to resolve this case promptly upon a fair and reasonable basis.

PROHIBITION OF TRANSPORTATION OF GAMBLING DEVICES IN INTERSTATE AND FOREIGN COMMERCE—AMENDMENT

Mr. BUTLER submitted an amendment intended to be proposed by him to the bill (S. 3190) to amend section 3 of the act of January 2, 1951, prohibiting the transportation of gambling devices in interstate and foreign commerce, which was ordered to lie on the table and to be printed.

AMENDMENT OF SECTION 345 OF REVENUE ACT OF 1951

Mr. BUSH (for himself, Mr. BRIDGES, Mr. CAPEHART, and Mr. FERGUSON) submitted an amendment intended to be proposed by them, jointly, to the bill (H. R. 6440) to amend section 345 of the Revenue Act of 1951, which was referred to the Committee on Finance and ordered to be printed.

EXTENSION OF COVERAGE UNDER OLD-AGE AND SURVIVORS INSURANCE PROGRAMS—AMENDMENT

Mr. LONG. Mr. President, some of us are very much concerned that every time social-security payments have been increased the minimum benefits have remained so inadequate that many recipients have found it necessary to rely in large measure upon public assistance. Every time their social-security payments have been increased they have found that their public assistance was reduced by the same dollar amount that the social-security benefits were increased. That same result would again occur if H. R. 9366 were passed in its present form. Although the bill provides an average of $6 increase for every person on social security, that benefit would be of no use to those who were drawing public assistance, because it would be necessary for the public-assistance administrators throughout the country to deduct that amount from the public assistance to which each person would be entitled.

For that reason, Mr. President, I have been joined by three other Senators, the Senator from Florida [Mr. SMATHERS], the Senator from Nevada [Mr. MALONE], and the Senator from California [Mr. KUCHEL], in submitting an amendment intended to be proposed by us jointly to the bill (H. R. 9366) to amend the Social Security Act and the Internal Revenue Code so as to extend coverage under the old-age and survivors insurance program, increase the benefits payable thereunder, preserve the insurance rights of disabled individuals, and increase the amount of earnings permitted without loss of benefits, and for other purposes.

The VICE PRESIDENT. The amendment will be received and printed, and will be referred to the Committee on Finance.

CHANGES OF REFERENCES

Mr. LANGER. Mr. President, at a recent meeting of the Committee on the Judiciary motions were made and passed unanimously by the committee, a quorum being present, to refer four bills now pending in the committee to other committees of the Senate on jurisdictional grounds.

The first one is S. 603, introduced by the Senator from Montana [Mr. MURRAY], for himself and a number of other Senators, all members of the Labor and Public Welfare Committee, which would make a criminal offense of certain actions which are now described as only unfair labor practices under the provisions of the Taft-Hartley law. Since the bill has the indirect effect of amending that law, the committee believes it should be considered by the Labor and Public Welfare Committee.

The second bill is S. 2449, a private bill for the relief of a civil-service employee who became entangled in the operation of the so-called Whitten rider so as to miss out on a grade promotion. In all probability, the Post Office and Civil Service Committee has had occasion to study this problem generally, and therefore it is the recommendation that this bill be referred to that committee.

The third bill, S. 2631, introduced by the Senator from Delaware [Mr. WILLIAMS], would prohibit the payment of Government retirement benefits to persons convicted of certain offenses. A similar bill, introduced by the Senator from Michigan [Mr. FERGUSON], was referred to the Committee on Post Office and Civil Service, and therefore, in the opinion of the committee, this bill should go to that committee for consideration at such time as they take up the Ferguson bill.

The fourth bill is H. R. 1325, a private bill for the relief of George L. F. Allen, relates to the waiver of certain veterans' regulations, the subject matter of which is in the jurisdiction of the Committee on Labor and Public Welfare.

Mr. President, I now ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the above bills and that they be referred to the other committees as indicated.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Committee on the Judiciary will be discharged from further consideration of the bills, and they will be referred as requested by the Senator from North Dakota.

AMENDMENT OF INTERSTATE COMMERCE ACT, RELATING TO REQUESTS OF COMMON CARRIERS FOR INCREASED TRANSPORTATION RATES—WITHDRAWAL OF MOTION TO RECONSIDER

Mr. BRICKER. Mr. President, I ask unanimous consent that the motion to reconsider the vote by which the bill (S. 1461) to amend the Interstate Commerce Act, as amended, concerning requests of common carriers for increased transportation rates, was recommitted to the Committee on Interstate and Foreign Commerce, and which was made by the late Senator Butler of Nebraska, our deceased colleague, on May 14, 1954, be withdrawn.

The VICE PRESIDENT. Is there objection to the reqeust?

Mr. LANGER. Mr. President, I should like to ask one question. Is it the intention of the committee to bring the bill up again at this session?

Mr. BRICKER. The committee is going to take it up tomorrow morning. That is the reason for this unanimous-consent request.

Mr. LANGER. The committee will take it up?

Mr. BRICKER. Yes.

Mr. LANGER. Is it planned to report the bill to the Senate?

Mr. BRICKER. I have no idea; I do not know.

Mr. LANGER. There will be no report to the Senate until the committee takes action?

Mr. BRICKER. Oh, no.

Mr. LANGER. I thank the Senator. I have no objection.

The VICE PRESIDENT. The Chair hears no objection, and the unanimous-consent request is agreed to.

PRINTING OF REVIEW ON CHARLESTON HARBOR, CHARLESTON, S. C.

Mr. MARTIN. Mr. President, I present a letter from the Acting Secretary of the Army, transmitting a report dated June 22, 1954, from the Chief of Engineers, United States Army, together with accompanying papers and illustrations, on a review of reports on the Charleston Harbor, Charleston, S. C., requested by a resolution of the Committee on Public Works of May 12, 1950. I ask unanimous consent that the report be printed as a Senate document, with illustrations.

The VICE PRESIDENT. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. KNOWLAND. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGE REFERRED

The VICE PRESIDENT laid before the Senate a message from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

The following favorable reports of nominations were submitted:

By Mr. LANGER, from the Committee on the Judiciary:

Walter E. Hoffman, of Virginia, to be United States district judge for the eastern district of Virginia; and

William A. O'Brien, of Pennsylvania, to be United States marshal for the eastern district of Pennsylvania, vice Walter S. Farley, removed.

The VICE PRESIDENT. If there be no further reports of committees, the clerk will proceed to state the nominations on the Executive Calendar.

FOREIGN OPERATIONS ADMINISTRATION

The Chief Clerk read the nomination of Clement D. Johnston to be a member of the Public Advisory Board, Foreign Operations Administration.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Mrs. Helen Chapman to be a member of the Public Advisory Board, Foreign Operations Administration.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Harold C. McClellan to be a member of the Public Advisory Board, Foreign Operations Administration.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Mrs. Percy Maxim Lee to be a member of the Public Advisory Board, Foreign Operations Administration.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

ATOMIC ENERGY COMMISSION

The Chief Clerk read the nomination of Herbert Bernard Loper to be Chairman, Military Liaison Committee to the Atomic Energy Commission.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

COLLECTOR OF CUSTOMS

The Chief Clerk read the nomination of Merrill D. White to be collector of customs for customs collection district No. 18, with headquarters at Tampa, Fla.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

Mr. KNOWLAND. I ask that the President be immediately notified of all nomination confirmed this day.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. KNOWLAND. I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

THE FARM PROGRAM

Mr. SALTONSTALL. Mr. President, the five New England States produce annually some $200 million worth of dairy products and an equally or slightly larger amount of poultry products. That production is largely dependent upon raw materials furnished by the great Grain Belt of the West where those commodities have for the past decade been kept at an unusually high support level. Those facts give New England dairy men and poultry men a keen interest in the debate on farm price supports which is shortly to take place on the floor of this body. It is particularly helpful therefore, Mr. President, for me as a New England Senator to have received from Mr. Carleton I. Pickett, executive secretary of the Massachusetts Farm Bureau Federation, a full and detailed exposition of the federation's position on this legislation. His letter to me sheds light on it which will be of interest to many outside Massachusetts and New England.

I believe that some of the conclusions he reaches go further than we in this body, who are perhaps a little closer to the situation as it appears in Washington today, can go or wish to go. However his letter is clear, and gives a complete summary of some 7 or 8 positions which many New England farmers take. I therefore ask unanimous consent to have the letter printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MASSACHUSETTS FARM
BUREAU FEDERATION, INC.,
Waltham, Mass., July 8, 1954.

Senator LEVERETT SALTONSTALL,
United States Senate,
Washington, D. C.

DEAR SENATOR: There will be before the Senate very shortly a farm bill which probably will be a one-package bill if the action taken in the House of Representatives is any indication. I hope that you will understand that the question of price supports and how high or how low or how flexible they are is only one question. I am rather afraid that they lost sight of that fact in the House. There were days of debate on the question of how high price support would be and then no debate whatsoever over the other provisions of the bill. As a matter of fact, the other provisions of the bill are equally important, tremendously important.

First of all, I would like to talk to you about the present fixed price-support program. The present fixed price-support program does not make sense nationally. No matter how one analyzes national statistics in relation to farmers' net income and the public good, it becomes crystal clear that improvements in the farm program are overdue.

Obviously, a sound program cannot be built with only a few districts or a few commodities in mind. Yet, when one analyzes

the present farm program in relation to specific districts or areas, it becomes dramatically clear that (a) the present program is not generally applicable; (b) large numbers of farmers have been adversely affected; (c) the plight of many more will become increasingly more acute unless we come to grips now with the diverted acre problem; and (d) the whole farm program can be lost because farmers, as well as our customers, are footing the bill that makes neither sense nor money for any considerable number of voters.

Take Massachusetts, for example; only 4 percent of the value of farm products sold comes from supported basic crops. (Cigar wrapper tobacco, 1 of the 2 types produced in this State, is not covered by the price-support program. However, the census does not report the different types separately.) As you know, the prices of nonsupported commodities, as a group, have been higher than the supported.

Seventy-one and four-tenths percent of the farmers in the area buy feed from supported grain crops. Any possible desirable effect of support price seems to me to be completely offset in feed prices, to say nothing of the taxpayers' bill to pay for the program.

Nearly 2,899 farmers sold vegetables. There are nearly 5,967 dairymen, more than 8,394 sold livestock, and 178 raised oats. They have a keen interest in the effect of the 20 million or more diverted acres, from inside and outside the State. They are helping to support, through taxes, competition for themselves. Their net income hardly justifies it. Eight thousand two hundred and thirty-three have an income from poultry. The welfare of 5,967 dairymen seems hardly enhanced, if dairy products keep piling up, to help depress prices or incur public disfavor.

There is no question at all that here in New England a rigid high price support is bad for both farmers and for consumers. Yet I do not ask you to vote on strictly sectional lines. The record will show that the high rigid price support has not been good for farmers anywhere, that it is only applied to a relatively few commodities and to less than 30 percent of our Nation's farmers, that it has priced us out of the markets of the world and that it has been a tremendous tax upon consumers and farmers alike. I am deeply concerned, as are the farmers in this area, at the so-called compromise that was arrived at in the House. It was not a compromise but a surrender to political expediency and I hope in the Senate that you will be able to give all of us a bill which will embody the principles of the variable support price starting at 75 percent of parity and ending at 90 percent.

Now for a moment let's consider the question of diverted acres. Unless something is done with these diverted acres to make cross compliance necessary in order to enjoy the price support on one commodity, then the whole purpose of the farm program is defeated. Yet it is not enough for a national agricultural program to tie the farmer to cross compliance in order to have support because then he is limited only in his planting to the necessity of staying away from the other few basic crops and he can go all out into the production of poultry and eggs, fruits and vegetables, milk, and all those other things which are nonbasic but which are in surplus supply. This would cause an even greater catastrophe to American agriculture, in general, and to New England agriculture specifically than a continuation of high rigid supports.

We believe that your legislation should require the Secretary of Agriculture to establish, regionally, lists of crops which may not be produced for direct or indirect sale or may be so produced only to limited extent and that further a great deal of this land should be utilized for stockpiling fertility in the soil against the need of future all-out production. Certainly the establishment of some proper control over the use of these diverted acres is of essential necessity.

The proposal in the House bill for a two-price system in wheat seems to us equally dangerous. As large buyers of wheat we have an interest. As citizens and taxpayers we have an interest and yet our primary interest, I sincerely believe, is in a good workable farm bill and a two-price system is never satisfactory. It will be pleaded that a two-price system has worked for milk. The producers of dairy products in our area might question that very sharply. It has not always operated well and a two-price system in milk is entirely different from the proposed two-price system for wheat. Under the two-price system for wheat there would have to be a processing tax plan and if this procesing tax plan were used, it must be approximately the difference between the market price for wheat and the parity equivalent and it would have to be borne by the flour and feed products. That tax paid on total processing would be a drawback to domestic consumption and to domestic uses but beyond that there are other objections which should be anticipated. We had processing taxes back in the days of the AAA of 1933 and processors fought them bitterly just as they would again. It also stirred up consumer opposition just as it would again. The administrative costs of collecting processing tax and making payments to farmers would be high. It also is of dubious constitutionality. We hope that you will reject this particular plan.

In conclusion, Senator, let me once again call it to your attention that a national farm program is much more than a question of the degree of price support. Unless careful consideration to other phases of the agricultural bill is given by the Senate and the House bill greatly amended, I am afraid that you have offered the American farmer very little. The national farm programs on the whole have been reacting against the best interests of the New England farmer, the New England consumer, and New England industry. The rigid high price supports currently in effect upon the raw materials which we must buy for our products cannot help but make themselves adversely felt and they add to our problems of cost and prices. When you consider that within the five New England States we produce annually some $200 million worth of dairy products and an equally or slightly larger amount of poultry products and that that production is largely dependent upon the raw materials to the grain belt of the West where those commodities have for the past decade been kept at an unusually high support level, it must be evident that it is a program very distasteful to us. In the implementation of the high price support programs, it has been necessary for Government to purchase up vast stores of commodities in order to keep up the prices which we pay and a disproportionate portion of the taxes paid by our people go into the very programs that react against them. I am sure that it will be a great and grave mistake for Congress to fail to take this into consideration.

Respectfully yours,

CARLETON I. PICKETT,
Executive Secretary.

HANDLING OF UNION WELFARE FUNDS—ARTICLE BY DAVID DUBINSKY

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an article from the July issue of the American Federationist written by Mr. David Dubinsky, president of the International Ladies' Garment Workers' Union of America. The article is a proposal that the organized labor movement support legislation setting up a minimum code of propriety and responsibility in the handling of union welfare funds. I remind the Senate that on June 22, 1954, I introduced a bill, S. 3649, to accomplish many of the objectives which Mr. Dubinsky lists in his article.

Mr. Dubinsky is one of our Nation's outstanding labor statesman. His career is characterized by the phrase "community responsibility." He brings with his views many years of dedicated experience in behalf of working men and women, plus the gift of unusual wisdom and dedication to democratic ideals.

I also ask unanimous consent to have 2 editorials, 1 from the July 8 issue of the Washington Post and Times Herald and 1 from the July 5 issue of the New York Times, on the subject of union welfare funds, printed in the RECORD.

There being no objection, the article and editorials were ordered to be printed in the RECORD, as follows:

(By David Dubinsky)

During World War II the phrase "fringe benefit" became a popular term in news headlines and in labor-management talks. The word "fringe" was intended to convey the idea that the new benefit was sort of a little decoration around the basic terms contained in a collective agreement. Today these fringes have grown to be so huge and substantial that they are increasingly looked upon as a vital and normal part of a labor-management contract.

In 1938 the convention report of the American Federation of Labor showed total benefit payments—covering death, sickness, old age, disability and miscellaneous benefits—of some $25 million for all AFL affiliates.

Dramatic evidence of the growth in welfare funds is contained in the single fact that in 1953 the International Ladies' Garment Workers' Union paid out benefits of more than $36 million and had an income of $54 million. This one union in 1953 paid out more than the combined affiliates of the AFL did in 1938.

There is a great difference, however, between the character of the welfare fund listed by the AFL in 1938 and the character of the present ILGWU welfare funds. The former were financed through dues and assessments of union members; the latter are employer-contributed, based on a percentage of the payroll, as embodied in collective agreements. There were a few unions, including the ILGWU, which set up their first employer-contributed welfare funds before World War II. But the big push by labor as a whole in the direction of such funds came during the war years. The wage freeze made it difficult to get wage increases, then interpreted to be inflationary. Millions and millions of dollars, instead of adding to employers' profits, went into special funds, set aside to help working people in the hours of death, sickness, retirement, maternity, and accident.

As a result of this rapid movement in the direction of welfare funds, the horizons of labor have been broadened and the wage-earning family enjoys new securities. Our horizons have been broadened because we are no longer simply concerned with what happens to the dues-payer in the plant. We are also concerned with what happens to him when he needs or wants a vacation away from the plant; we are concerned with his health and his ability to meet medical bills; we are concerned with his ability to

live in dignity in old age; we are concerned with his family—when the breadwinner passes away. Out of this concern, the wage-earner has increasingly found in his union a bulwark against the many insecurities that dog the life of a worker and his family.

These new-type welfare funds—employer-contributed—represent a marked departure from the traditional union policy that a union contract should be limited to wages, hours, and working conditions. The new point of view, namely, that it is desirable and proper for a union to write a contract that covers matters of health, welfare, vacation, retirement, in addition to hours and wages, brought new problems with it in the administration of such funds.

When members of a union contributed out of their own pocket to union benefit funds, these self-same members had a greater inclination to keep their eye on the handling of the funds. But when the funds come from the outside, the member is less inclined to scrutinize the handling of the finances. And so far as the employers go, they count the percentage contributions as a wage increase and do not care much how it is spent so long as they are not asked for more.

These welfare plans are different from normal union operations. Generally, what a union gives to its members is service: The negotiation of an agreement, the handling of a complaint. Under the welfare plans, the union is giving more than service. It is handing out money—huge sums of money. The fact that the unions are here moving in a new direction, with no great body of tradition and precedent, and the further fact that this new aspect of unionism involves millions of dollars open the door to mismanagement and malpractice.

The rapid growth of welfare funds caught many union leaders by surprise. The pressure for such funds came from below—as the security and welfare benefits became popular with locals and rank-and-file members. Many top union leaders did not look with favor upon the introduction of these welfare benefits because they believed that a union's job was solely its concern with wages and hours. When finally these welfare systems became a fact of life, the international unions were in no way prepared to advise, supervise, or control these funds. Some of these self-same unions had an elaborate and adequate system for insuring honest and businesslike procedures in the handling of the funds based on member contributions. But they had no plans for insuring proper usage of the new and immense funds coming in through employer contributions.

Undoubtedly, cases of mismanagement and malpractice in the handling of welfare funds are exceptional rather than typical. Fortune, the magazine, wrote in April of this year: "Given the tens of thousands of welfare funds in the United States, the cases of glaring abuses may be few."

The fact that the cases are few does not mean, however, that they can be ignored. Surely, we of labor cannot afford to ignore them. The amount of unfavorable publicity arising from the glaring few tends to discredit the case of labor generally. Undoubtedly, some employers will seize upon the misuse of funds in one case to deny a proper and justified welfare fund in another trade or industry. The fact that—to quote Fortune—"many of the abuses were practiced with the tacit consent of industry trustees" will not deter a grasping employer from denying welfare funds to his employees so long as he can point to abuse of funds anywhere. Whether justly or unjustly, the employer will use the abuse as a weapon against all labor.

Although in the main these funds are by law jointly administered by employers and unions, organized labor has the responsibility of helping to clean up these funds so that the idea generally may not be discredited by an irresponsible and grasping few. The American Federation of Labor officially recognized this responsibility in a recent resolution of the executive council urging the international unions to take steps to put welfare funds on a clean and businesslike basis, to insure proper administration of health and welfare funds.

The problem of keeping union welfare funds clean is, in many respects, akin to curbing racketeering when it, too, seeks to worm its way into the ranks of organized labor. The main problem, though not necessarily the sole problem, is at the local level. All attempts to intervene are immediately resisted as interference with the local autonomy of the local union.

In the case of union welfare funds, locals and joint councils have negotiated agreements that make local and council officers trustees for funds running into millions of dollars. Since in more than 90 percent of the cases it is the local or the joint council that generally makes the agreement, it is the same body that finds itself naturally and properly participating in the control of these funds.

A number of rackets have sprung up. Special insurance companies are created to act as carriers. Overnight consultants mushroom into existence to claim fees. So-called insurance agents and agencies appear out of nowhere to cut fat commissions. The practice of insurance companies of giving commissions to these agents—even where no agent is involved and no commission warranted—instead of reducing rates to these funds is one of the most important sources of corruption. It is not my purpose here either to detail the abuses or to point the accusing finger at anyone. That has been done in detail—and, unless the abuse is halted, the accusing finger of the newspapers and the law will embarrass the entire labor movement, punishing all for the sins of the few.

It is my purpose to raise the question of how to deal with the local or joint council—or even higher body—that is permitting or indulging in the misuse of welfare funds.

Out of our own experiences, I can tell how one international union tackles this problem. The ILGWU's program has gradually evolved not so much in response to actual abuses as in a steady effort to avoid the development of such abuses in the first place. I quote our experiences not because they are typical but because they may be so nontypical as to raise the question of inevitable action by some other agencies outside the ranks of labor.

In December 1953 the net resources of the health, welfare, and retirement funds of our various locals and joint boards affiliated with the ILGWU was $129,579,578.16. These 124 separate funds are handled autonomously by the locals and joint boards, scattered across many States and many cities.

The key to the proper policing of these funds lies in the international union's practice of auditing the local's books. This right of the international union to audit the books of the locals goes back many years in the ILGWU. The auditing of the local books—including the local health and welfare and retirement funds—by a well-trained corps of international auditors is the key to vigilant policing.

A companion to our international audit is the publication by the international of the full financial facts about the welfare funds administered by locals and joint boards. How much received? How much paid out? And how much toward administrative costs?

It is in respect to this last item—administrative costs—often covering a variety of strange practices, that publication of the thoroughly audited facts will check many abuses.

These supervisory controls over welfare funds are imbedded deep in our ILGWU constitution. Section 12 states:

"The general secretary-treasurer shall publish in the official publication of the ILGWU annual reports giving a summary of the income and disbursements of all funds of union and the general office, after audit by the auditing department of the ILGWU."

Out of this power to audit, to publish and to police has come a general supervisory practice, contained in article 4 of the Constitution:

"The health and welfare funds committee (of the international) shall have general power of supervision and coordination over all health and welfare funds, retirement funds or other similar funds. * * * It shall strive to bring about uniformity in such plans, to the extent that it is feasible * * * no plan, bylaw, rule, or regulation or amendment thereto, and no provision establishing new benefits or altering benefits already established * * * shall become operative * * * until the same has received the approval of this committee."

Certain general regulations concerning the handling of welfare funds are contained in our constitution. Article 15, section 2, for instance, specifies:

"All moneys received by a local union, joint board or other subordinate body for the benefits of its membership, as contributions to a fund described in section 1, shall be deposited and held in an account separately maintained under the name of such fund. The moneys in such account shall be used only for the specific purpose of such fund and for the administrative expense thereof, and shall not be used for any other purpose. No loans shall be made therefrom to the LU, JB, or other subordinate body or to any of the members thereof. The surplus moneys or reserves of such a fund shall be invested only in securities which have received the approval of the health and welfare funds committee of the GEB. All bonds or other securities representing investments of such funds shall be placed in safekeeping under the joint control of representatives of the ILGWU, designated by the health and welfare funds committee of the GEB."

Since the juggling of administrative costs is responsible for much of the shenanigans in fund abuses, our regulations put a limitation on this item of expense. Article 15, section 4 declares that "an expenditure of 5 percent of the total contribution to any such fund in any 1 year shall be deemed a reasonable administrative expense." This 5 percent includes the cost of auditing employer payrolls to make certain that the proper amounts are being paid into the fund. It (the 5 percent) also covers administration of vacation benefits—a costly item to administer—that in the ILGWU alone is part of the employer-contributed health and welfare funds. It should be added that in the case of retirement funds the administrative cost is limited to only 3 percent.

These welfare funds are self-insured, that is, they are not farmed out to insurance companies but are administered by local and board committees under international policing and supervision.

Ours is a system that combines local control and operation of welfare funds with international supervision and policing, that we refer to as controlled autonomy.

I do not cite our practice in order to induce other unions to copy our model. Our practice is the outgrowth of our history, our experience, our industry, and union structure. Our right to audit local books goes back some 40 years, preceding the establishment of any regular welfare funds.

I cite our practice, indeed, because I know that some international unions are seeking to set up methods of control over local welfare funds, thus far without any success.

The resistance on the part of local units, including very honest local units, has been too great. The desire for local autonomy has been raised to a principle that refuses to yield to any kind of international supervision.

It appears to me that under these circumstances, where labor recognizes the existence of a real evil—no matter how limited—and where the internal union structure does not provide controls for the elimination of abuses that the pressure for legislative action to control union welfare funds will inevitably mount.

American labor has traditionally and properly resisted all efforts on the part of governmental agencies to interfere with the conduct of internal union affairs. We felt that to open the door to interference is to allow a wedge to be driven into our "house" that could ultimately shatter the union home we have so laboriously built. For that reason, we have opposed Government intervention in union elections, strike votes, handling of funds in the general treasury, etc.

We have also resisted all Government intervention for fear that politicians would use Government agencies in acts of reprisal against unions that may have opposed them at the polls.

Public report of abuses in some union welfare funds, however, makes legislative intervention more and more likely, and perhaps inevitable. The internal structure or unwillingness of some unions to deal with this problem among their units, where an abuse does develop, leaves the trade union movement in a weak position to argue against governmental intervention.

Many rank and file trade unionists, with a long and passionate devotion to the freedom and independence of free trade unionism, know that any form of governmental intervention in union affairs is an evil. But when these same unionists see some of the welfare funds squandered and misused by racketeering elements, some of whom are muscling their way into the trade unions precisely in order to get their hands on these welfare funds, many rank and filers and leaders will come to look upon governmental intervention—to protect welfare funds—as a lesser evil.

Antilabor legislators will seize upon this situation to advance legislation that will merely use the evil as an excuse for punitive legislation directed against labor as a whole. Needless to say, any such legislation, conceived against labor and put through without any regard to the wishes of the responsible spokesmen for labor must be fought with every ounce of energy we have.

But in the face of the evil that does exist, we must begin to think about lending our support to legislation that may call for publication of the financial facts about welfare funds, including administrative costs and commissions, or that may set a minimum code of propriety and responsibility in the handling of these funds.

The nature of our reaction to such legislation, it seems to me, must inevitably be affected by the ability of the trade union movement itself to set up standards and methods of enforcing these standards among its units. If there are structural barriers or an unwillingness within some unions, making needed controls impossible or unlikely, then it seems to me that the trade union movement will have to support some measure of legislative action to protect union members and their families against abuse of welfare funds.

This is a positive alternative, in my opinion, to any attempt on the part of anti-labor legislators to seize upon a limited evil in some unions as an excuse to attack or weaken the labor movement as a whole.

Welfare funds are a new area of labor-management relations and a new form of union-membership relations. Overwhelmingly, these funds are a source of strength to unions and of security to workers and their families.

As our unions face new problems, we must find new answers. We must know when and how to adjust traditional rights and privileges so that we may attain new strength and fulfill new responsibilities. It is in this vein that I propose that labor take a positive approach, a constructive approach, toward legislation—conceived with a proper respect for labor's rights—to end the abuse of union welfare funds.

[From the Washington Post and Times Herald of July 8, 1954]

UNION WELFARE FUNDS

Vice President David Dubinsky, of the American Federation of Labor, is to be congratulated on his candor and good judgment in calling for legislation to halt the squandering and misuse of union welfare funds by racketeering elements. The need for governmental supervision of such funds has been obvious since they first came into use. Up to now it has been vigorously fought by organized labor. Mr. Dubinsky acknowledges that trade unionists have traditionally opposed any form of governmental intervention in union affairs. But abuses in the handling of these funds have become great enough that he now thinks Government regulation to be a lesser evil.

In regard to this one item the effect of Mr. Dubinsky's statement is to line up the AFL with President Eisenhower in seeking amendment of the Taft-Hartley Act. In his message to Congress last January the President said:

"It is my recommendation that Congress initiate a thorough study of welfare and pension funds covered by collective bargaining agreements with a view of enacting such legislation as will protect and conserve these funds for the millions of working men and women who are beneficiaries."

If such an investigation had been made, it would doubtless have revealed a widespread demand among members and leaders of trade unions for legislation of this kind. Why has the subcommittee headed by Representative MCCONNELL, which has been given this assignment, been so tardy in getting its inquiry under way? Obviously it is now too late to get action on any welfare fund legislation from the 83d Congress. The investigation ought to go forward, however, with the object of determining what type of control over union welfare funds is required. Incidentally, the most effective way of improving the Taft-Hartley Act, in view of the rejection of the administration bill for this purpose, may be to legislate on one item at a time as the need for specific changes in and additions to the present law becomes pressing.

[From the New York Times of July 5, 1954]

FOR LABOR'S WELFARE

Courage and good sense are qualities we have come to associate with David Dubinsky. The president of the International Ladies' Garment Workers' Union has demonstrated both of these virtues in the advice he has just given his colleagues in organized labor on legislation to control abuses in the administration of union welfare funds.

Mr. Dubinsky feels that the huge sums handled by such funds and the malpractices that have been allowed to develop in some of them makes some form of Government regulation inescapable. In an article published in the official magazine of the American Federation of Labor he urges that labor drop its traditional hostility to any Government intervention in its internal affairs and get behind legislation intended to set up a "minimum code of propriety and responsibility" for the conduct of welfare funds.

Mr. Dubinsky fears that a continued resistance on labor's part to any type of public supervision would give unfriendly legislators an excuse for forcing through laws that would punish all unions for the evils of a few. Every investigation has demonstrated that the great majority of welfare funds are honestly run. Mr. Dubinsky's own union has a particularly distinguished record in administering programs that take in $54 million a year in employer contributions.

It would be harmful to the community, as well as to labor, if the frauds that have been uncovered in some funds became the basis for a blunderbuss attack on unions generally. Labor can best avoid this by heeding Mr. Dubinsky's words and cooperating in the formulation of sound standards for insuring the integrity of the benefit plans that mean so much to millions of American workers and their families.

ATOMIC ENERGY COMMISSION CONTRACT

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point in my remarks an excellent editorial entitled "Mr. FULBRIGHT versus Humbug," which was published in the Washington Evening Star of July 12, 1954.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MR. FULBRIGHT VERSUS HUMBUG

Senator FULBRIGHT belongs to what is described as the liberal wing of the Democratic Party. He also has always been, and still is, a strong supporter of the Tennessee Valley Authority. So it is a particularly impressive fact that he has come out with a vigorous full-dress defense of the President's directive to the Atomic Energy Commission to negotiate a 25-year contract with two private companies for construction of a powerplant at West Memphis, Ark.

Arkansas, of course, is Mr. FULBRIGHT's home State, and certain benefits would naturally accrue to it from the building and operation of such a plant. But that is not the real reason why he has spoken out as he has in the Senate. The real reason, as he has put it, is that the proposed contract "has been so viciously attacked, and I think so unfairly and so erroneously attacked, and figures have been so freely used without justification, that someone simply had to say something about the actual facts."

Broadly speaking, the proposal's critics (mostly the Democratic liberals) have made the following major charges, among others: (1) That the AEC has no legal authority to negotiate the contract in question; (2) that the President has exceeded his powers in issuing his directive; (3) that the directive constitutes a sort of sly, underhanded move that would misuse one of the Nation's most vital and sensitive agencies to initiate a policy that could ultimately destroy TVA for the benefit of the private utilities; and (4) that power from the projected plant would cost the Government between $3.5 million and $5.5 million more a year than equivalent power from facilities that TVA could build at Fulton, Tenn.

These and similar charges, however, have been effectively rebutted by Mr. FULBRIGHT. True enough, his Friday speech does not constitute the last or most authoritative word on the subject, but it certainly presents a persuasive case in favor of the proposed contract—an arrangement under which the private companies, at a cost of about $107 million, would build a 600,000-kilowatt plant whose output (which would be for nongovernmental consumers in the Memphis area) would be fed into the TVA system to make up for a comparable amount of TVA

power now being delivered to the atomic installations at Paducah, Ky. Clearly, judging from Mr. FULBRIGHT's argument, the AEC's legal right to negotiate such a contract and the propriety and validity of the President's directive seem to be wholly beyond question.

Further, from the standpoint of the economics involved, Mr. FULBRIGHT has powerfully challenged the figures of the opposition. Using the present AEC-TVA Paducah contract as a yardstick, he has presented a table showing that power from the West Memphis project, far from imposing an additional annual cost of up to $5.5 million, would cost only $282,000 more a year than power from the TVA. And above all, in addition to citing other advantages inherent in the proposed arrangement, the Senator has stressed the important fiscal fact that it would obviate the need for a Government outlay of about $100 million that would otherwise have to be spent on new TVA facilities during the next 3 years.

A summary of this sort cannot do justice to all the points raised by Mr. FULBRIGHT. Suffice to say, however, that his speech—taken together with the statement just issued by the Budget Bureau—makes much of the criticism of the directive look like the sheerest sort of humbug. As he sees the proposed contract, there is nothing immoral, illegal, or wrong about it in any way. On the contrary, he welcomes it for what it plainly seems to be—an honest and aboveboard effort to cut down on Federal outlays and encourage free enterprise in a manner that will serve the national interest without hurting TVA.

Mr. FULBRIGHT. Mr. President, the next item I must mention distresses me, and I am reluctant to mention it. I have the highest respect for the New York Times, a great newspaper. I have known some of their representatives, such as Reston, Krock, White, Knowles, and others, who are uniformly outstanding leaders in their profession. Naturally I am distressed that, in contrast to the Star, which accepted my speech on the Atomic Energy Commission versus the TVA controversy in good faith and discussed its merits, the New York Times merely questioned my motives. I read from a part of the editorial:

At the moment, however, Mr. FULBRIGHT seems to be torn between his approval of TVA and his desire as an Arkansan to have a private dam built in West Memphis, Ark., with an Atomic Energy Commission contract to furnish power to TVA to replace power that the TVA is now feeding into the atomic energy plant at Paducah. * * * As a Democrat he is not bound to defend a Republican President's policies. Can it be that he feels a moral obligation to support the West Memphis Dam because West Memphis (population 9,112 in 1950) is in Arkansas? We pause for a reply. Maybe it will be forthcoming before the week is out and the debate is over.

Mr. President, my answer can only be to refer the editor to my speech, and beg that he consider the facts which I have presented and which I believe to be correct. If the editor will do that, he will discover that I was not and am not concerned about, as he says, a "a private dam built in West Memphis, Ark."

To dam the Mississippi at West Memphis would be quite an undertaking. I would guess that such a dam would have to reach from the Ozark Mountains to the Alleghenies, and would probably cost $100 billion, and inundate the United States up to and including Chicago, and probably the Chicago Tribune. That might be a worthy enterprise, but I did not advocate it.

No, Mr. President; in reply to the editor, I wish to say I merely recommend that private enterprise be given an opportunity to share in the making of power for the Atomic Energy Commission, if it can do so on a reasonably comparable basis, which I believe it can do.

I hope the editor of the New York Times will honor me by reading my speech in the CONGRESSIONAL RECORD. I believe he will agree that I made no recommendation regarding a private dam across the Mississippi River at West Memphis, Ark.

MARYLAND TOBACCO AND SWISS WATCHES

Mr. BUTLER. Mr. President, the question of tariffs on Swiss watches is now the subject of considerable discussion and controversy. This problem poses certain ramifications which concern the people of the State of Maryland, as it unquestionably would affect the people of other areas. By way of emphasizing this situation, I ask unanimous consent to have printed in the body of the RECORD an editorial which appeared in the Baltimore Sun this morning.

Mr. BEALL. Mr. President, I join in the request of my colleague. I may add that on February 12, 1954, the Tariff Commission concluded its hearings on a petition of watch manufacturers for an increase in rates on Swiss watch imports. On May 28 the Commission reported its recommendations to the President, who has 60 days from that date in which to decide the case.

It seems a little incongruous that the tariff on Swiss watch movements is of such great importance to the tobacco growers in southern Maryland—but it is a perfect illustration of how complex our world economy has become.

The simple fact is that if the Swiss do not receive dollars from the sale of watches to the United States they will be unable to buy a great many American products, including southern Maryland tobacco.

In amount the export of United States tobacco and wheat to Switzerland in 1952 was about the same as in 1950, and exports of cotton were up substantially. The value of these 3 commodities exported to Switzerland is about equal in value to the imports of Swiss watches.

This morning the Baltimore Sun printed a very comprehensive editorial on this situation, and I think it is deserving of our attention. The Sun points out that the Swiss purchase about one-sixth of the total Maryland crop, and because they buy top quality tobacco Swiss purchases account for about one-third of the total cash receipts. In addition, the Sun explains, Switzerland buys about $11 worth of American farm products per person per annum, and about $29 worth of manufactured goods. The United States buys only about $1 worth of Swiss products per person per annum.

Swiss watches and Maryland tobacco are probably a relatively insignificant part of the total world commerce, but I know of no better example of how local economy is tied in so directly with the economy of a small European country.

Mr. President, as I stated when I began my remarks, I join in the unanimous consent request of my colleague that the editorial from the June 13 issue of the Baltimore Sun be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MARYLAND TOBACCO AND SWISS WATCHES

It is a long way from the humid flatlands of southern Maryland to the crisp village of the Swiss Alps. A Maryland tobacco grower and a Swiss watchmaker would have a hard time communicating with each other face to face. Yet, by the ramifications of trade, their interests and their livelihoods are closely interlocked.

This is how it works. Switzerland likes Maryland tobacco. It is the largest outside buyer, purchasing each year about one-sixth of the Maryland crop by volume. Since it buys the higher grades, its purchases in cash amount to about one-third of the total.

The only way the Swiss can buy Maryland tobacco is by selling Swiss products. Switzerland's principal export to the United States, accounting for more than half the total, is the jeweled watch. The Swiss watch industry, built up over the past 250 years, has some 450 export factories. Their product is tailored mainly to the United States market.

In more general terms, Switzerland buys about $11 worth of American farm products per person per year, and about $29 worth of American manufactured goods. The United States buys about $1 worth of Swiss products per person per year.

It is against this background that the tobacco growers of southern Maryland are urging President Eisenhower to turn down a Tariff Commission recommendation that the duty on Swiss watches be increased.

The large watchmakers in this country have argued for the increase. Their arguments are not wholly without merit, but they have been overstated. It is not quite true, for example, that the large watchmakers provide the sole source of skilled workmen for the making of weapons timing devices. Nor are the earnings statements of the manufacturers quite persuasive of serious injury from Swiss competition.

This is not the first time the question has come up, nor the first time the tobacco growers have fought an increase. Two years ago, a Tariff Commission recommendation called for higher duties on Swiss watches. President Truman turned it down, not specifically to favor Maryland tobacco men but on the broader principle of increased international trade versus commercial isolation.

The administration in Washington has changed since then, but the principle has not.

SHIPBUILDING CONSTRUCTION FACILITIES

Mr. BUTLER. Mr. President, on several occasions earlier in the session I have presented to the Senate facts concerning the ship construction industry in the United States, indicating the urgency of measures to provide new ship construction work immediately in order to prevent the closing and possible bankruptcy of construction facilities the maintenance of which is essential to national security.

In this connection, I have a letter from the Shipbuilders Council of America which is much to the point. While appreciative of the pending measures to provide for naval, tanker, and passenger ship construction, the Council's president, Mr. L. R. Sanford, emphasizes that the bills now pending do not offer any sound prospect of actual new ship construction this year.

Without some new contracts affording prospects of immediate initiation, the Shipbuilders Council's letter goes on to say, some of the shipbuilding yards, particularly those without any naval construction work, will be forced into a standby status, presenting to management the dilemma of whether to try to continue the yards on such a standby basis, or to liquidate them completely.

Anyone who gives a moment's thought to the part American shipyards played in winning World Wars I and II, and in carrying on the Korean conflict, will agree, as I do most emphatically, with the Shipbuilders Council's statement that neither contingency is pleasant to contemplate. To quote from the letter:

> The former (standby status) is very expensive, not only for the period of idleness but long thereafter, as it will take about 2 years to reassemble and train adequate working forces of skilled craftsmen. * * * Complete liquidation obviously does irreparable damage to the mobilization base for shipbuilding deemed essential and adequate by the Department of Defense.

To prevent the disruption of the country's shipbuilding facilities, upon which such tremendous dependence would be placed in any future emergency, the Shipbuilders Council seconds a suggestion previously made by Adm. William D. Leggett, Jr., Chief of the Bureau of Ships, United States Navy, before our Senate subcommittee on April 26, 1954. Admiral Leggett declared it to be his opinion that an emergency shipbuilding program of at least 20 ships annually should be initiated promptly to prevent the impending shutdowns of the shipyards. Mr. Sanford suggests that the Congress give immediate consideration and approval to such an emergency shipbuilding program, and provide an appropriation of $150 million to implement it.

As Admiral Leggett warned, and as many of the representatives of the strategic shipyards of the country have emphasized before our subcommittee, such legislation cannot wait. The bills now pending will not suffice because the interim between their enactment and actual beginning of construction is too long. Many of the yards will have been closed down in the meanwhile.

The proposed 20-ship-a-year program could and would be effective, however, Mr. Sanford points out, through cooperation by the Maritime Administration in selecting for construction types of tankers and cargo vessels which already have been designed by the former Maritime Commission as the types to be constructed in the event of another war shipbuilding program. These are of advance design, and the experience of constructing them now would be of inestimable value in the event of a future war construction program, in addition to providing vital work now to keep the yards operating and to upgrade the active merchant fleet.

So important do I consider this suggestion, so vital do I think it to be, that in my scheduled visit to the White House this week, to discuss merchant-marine and shipbuilding matters, I shall discuss with the President the urgency of having the administration give its full sanction and approval to such a program, and to back such sanction and approval with a request for the necessary funds.

I can only repeat once again that the Congress would be laying the country open to the most serious danger if, through failure to provide new ship construction that the shipyards can undertake immediately, we allow a great proportion of these vital facilities to be shut down.

I ask unanimous consent that Mr. Sanford's letter and the pertinent portion of his statement be printed at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SHIPBUILDERS COUNCIL OF AMERICA,
New York, N. Y., July 1, 1954.

Hon. JOHN M. BUTLER,
Chairman, Subcommittee on Water Transportation,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: Your letter of June 30 in connection with S. 3546 has just come to hand and is greatly appreciated.

Naturally the council and its constituent members could not do less than comply wholeheartedly with your request for assistance after you had taken the initiative to bring the present plight of the shipbuilding and ship repairing industry to the attention of the Congress, the administration, and the public at large. Our appreciation is due you for taking that action.

I have read with great interest the subcommittee report and I trust that S. 3546 will receive the sympathetic attention of the Congress which you so firmly believe will be the case. Its passage accompanied by the appropriation of the necessary funds will supplement such commercial and naval repair work as is presently available. The combination of all three will enable the ship repair yards to continue operations at a more nearly normal level.

At the present time most of the ship repair yards are operating at a level well below normal with somewhat disastrous results as to employment and as to the prospect of remaining solvent. Equally important is the fact that the accomplishment of the work contemplated by S. 3546 will place in operating condition certain strategic vessels now laid up in the several reserve fleets so as to make them almost immediately available on M day, at a time when the ship repair yards inevitably will be immediately called upon to undertake a volume of other work far beyond available capacity.

As you and I have discussed several times, there is an acute present need for immediate work in both the shipbuilding and ship repairing yards. S. 3546 will help out the ship repairing yards to some extent. It is equally important that some shipbuilding contracts be made available now in such form as to permit actual ship construction in the ship building yards to commence this calendar year. The several bills now pending before the Congress covering ship construction, in one form or another, do not, as of the moment, offer any sound prospect of actual ship construction this year, although, undoubtedly some of them, if passed, will provide some ship construction next year.

In the meantime, the seagoing merchant vessels now under construction, all based upon contracts placed prior to November 1952, since which time there has not been a single order placed for a seagoing merchant ship of 2,000 gross tons and over, are rapidly nearing completion, and vital skilled shipbuilding forces are rapidly being dispersed by layoff due to lack of work. Without some new contracts affording prospect of immediate ship construction, some of the shipbuilding yards, particularly those without any naval construction work, will be forced into a standby status, presenting to management the dilemma of whether to try to continue the yards on such a standby basis or to liquidate them completely. Neither contingency is pleasant to contemplate. The former is very expensive, not only for the period of idleness but long thereafter, as it will take about 2 years to reassemble and train adequate working forces of skilled craftsmen. A heavy percentage of the reassembled force will inevitably be green men. During that period operations will be inefficient and uneconomical. Complete liquidation obviously does irreparable damage to the mobilization base for shipbuilding deemed essential and adequate by the Department of Defense.

It seems to me necessary to initiate an emergency shipbuilding program somewhat analogous to the emergency ship repair program embodied in S. 3546, to provide some immediate shipbuilding activity in order to tide the shipbuilding yards over until a more comprehensive long-range shipbuilding program can be prepared and authorized next year.

With that thought in mind, at a hearing held yesterday on H. R. 9253, relative to merchant ship construction in American shipyards, I urged Congressman TOLLEFSON, acting chairman of the House Committee on Merchant Marine and Fisheries and the members of that committee to press for passage in this session of the Congress an interim emergency shipbuilding bill of the nature suggested by Adm. W. D. Leggett, Chief, Bureau of Ships, United States Navy, in his statement before your committee on April 26, 1954. Incidentally, Admiral Leggett reiterated that same suggestion before the House Committee on June 29.

I am enclosing herewith for your information copy of my statement presented to the House Committee on June 30 and call your attention particularly to pages 14 to 16 inclusive thereof. I believe they are self-explanatory.

If you can see your way clear to support such a suggestion on the Senate side, as I am hopeful Congressman TOLLEFSON and his committee will do on the House side, I believe that you and I will accomplish the double-barreled objective which we both have in mind for relieving the critical situation in both the shipbuilding and ship repair yards.

If further, you, Congressman TOLLEFSON, and myself, in our proposed meeting with the President, can convince him that such a double-barreled program is in the national interest and thus entitled to his support, it would seem that your hope, which is equally mine, of the beginning of a brighter era for the vital ship construction and repair yards of our Nation, may indeed be ultimately realized.

With kindest regards, I am

Sincerely,

L. R. SANFORD,
President.

Mr. BUTLER. Mr. President, Admiral Leggett in his statements presented to the Water Transportation Subcommittee of the Senate Interstate and Foreign Commerce Committee on April 26,

1954 strongly urged that the Government sponsor what he called an interim emergency program of 20 ships to supplement the naval ship construction program which he admitted was inadequate to maintain the shipbuilding yards in that state of availability for the mobilization potential required by the Department of Defense.

Admiral Leggett unquestionably realized the very condition that I have stressed today, namely, that most of the several programs of ship construction covered by legislation now under consideration, even if promptly and favorably acted upon, could not possibly result in actual shipyard construction before some time next year, whereas the critical situation in the shipbuilding industry makes it necessary that some shipbuilding be inaugurated at once so that actual ship construction work in the shipyards be started at the earliest possible date of this year.

Such an interim emergency ship construction program of 20 ships would require that the plans and specifications for the ships to be constructed be now ready or at least in such condition that they could be made ready almost immediately so that invitations for bids could be issued just as soon as the necessary congressional authority and the funds for the program are authorized. This program, to be effective for the purpose for which it is intended, must be passed and the funds made available before Congress adjourns this present session.

The Maritime Administration should be in a position to proceed with such a program immediately it is authorized. The types and numbers of each type should be determined by that Agency, but probably would consist of modified C3's and T5's. These two types of vessels, cargo and tanker, are those designed by the former Maritime Commission as to the types to be undertaken, in the event of another war shipbuilding program, to take the place of the C types and T2's of the World War II shipbuilding program. They are of advanced design and the experience of constructing them now would be of inestimable value later in the event of another war shipbuilding program, in addition to providing vital work now, which in effect would be a head start on any such program.

It is therefore most strongly recommended that, as the first step in implementing H. R. 9253 to provide merchant ship construction in American yards, the Maritime Administration be authorized to immediately proceed with an emergency program of up to 20 ocean-going vessels of types the construction of which may be undertaken immediately and that a sum of at least $150 million be appropriated to finance such a program. For the purpose of maintaining the shipbuilding mobilization base envisioned in the Murray report, awards of contracts should be made as the result of competitive bids, subject to the limitation that not more than 3 such vessels may be awarded to any 1 shipyard.

Actual costs vary in different localities depending upon industrial conditions and shipyards are compelled to bid their actual costs. The limitation of not more than 3 vessels to any 1 shipyard will prevent the shipyard or shipyards that may happen to be most favorably situated costwise from monopolizing the work and will afford the geographical distribution so essential to the maintenance of the industry and to the broadest possible mobilization base.

This proposal should stand upon its own feet and be considered in addition to any other existing legislation covering shipbuilding before the present Congress, as these other bills cannot be relied upon to do what this proposal is intended to do, namely, provide sufficient shipbuilding of an essential nature to carry the shipbuilding industry over on an active basis until a 60-ship construction program to be prepared for the next Congress can be made effective.

If a proposal such as this is not enacted in this session, certain shipyards may not survive and, in that event, the shipbuilding mobilization potential will have been substantially curtailed.

PROFIT SHARING

Mr. WILEY. Mr. President, I was recently pleased to receive from one of the leading businessmen of my State, Mr. H. F. Johnson, president of S. C. Johnson & Son, Inc., of Racine, Wis., a copy of the latest research report of the Profit-Sharing Research Foundation, entitled "Profit-Sharing Patterns."

I desire to commend this report to my colleagues and to all those folks in American industry who are seeking answers to the need for encouraging greater peace, stability, and prosperity in American industry.

Mr. Johnson knows whereof he speaks on this subject because for 32 years he has been actively engaged in practicing profit sharing with the employees of his distinguished company. The Johnson plan had been started by Mr. Johnson's father 5 years before Mr. Johnson, himself, had entered the business. It is estimated that there are some 300 different profit-sharing plans in American industry today. While profit sharing is no panacea, and, indeed, can encounter exceedingly difficult problems of its own, unless it is extremely carefully planned and implemented, I believe that it represents the type of forward-looking, constructive, typically American procedure which well merits sympathetic consideration.

Mr. President, I desire now to refer briefly to another subject.

The PRESIDING OFFICER (Mr. PAYNE in the chair). The Senator from Wisconsin has the floor.

INTERNATIONAL STRENGTH OF THE COMMUNIST PARTY

Mr. WILEY. Mr. President, many of my colleagues no doubt noted that a Communist Party survey in Moscow estimates that there are 30 million members of the Communist Party throughout the world.

It is interesting to note that the Senate Foreign Relations Committee Subcommittee on Security Affairs, in its print on world Communist strength, estimated that the various national Communist Parties in some 60 countries have a possible membership of 24 million.

The Moscow survey, incidentally, points out that there is not a single country in the world without a Communist movement, legal or illegal.

There has been tremendous interest in the Senate Foreign Relations Committee study on this very subject, and I am hoping that the Senate Rules Committee will authorize reissuance of this 78-page booklet which has been in such tremendous demand that the supply of copies has been exhausted.

I send to the desk the text of the New York Times dispatch quoting Reuters News Agency. I ask unanimous consent that it be printed at this point in the body of the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TOTAL REDS HELD UNDER 30 MILLION—MOSCOW PARTY MEMBER TALLY INCLUDES CHINA AND U. S. S. R.—60,000 SEEN IN UNITED STATES

LONDON, July 1.—Communist Party members throughout the world total fewer than 30 million, according to the latest figures published in Moscow.

Yet, under Communist sway today are countries totaling more than 900 million persons. They include the 200 million of the U. S. S. R. and the 600 million of China.

Today, there is not a single country in the world without a Communist movement—legal or illegal—according to a Moscow survey, now available here. It asserted that there was a membership of 60,000 in the United States.

The survey, giving a country-by-country breakdown of the membership of Communist and Communist-controlled workers' parties, is published in a booklet called The Agitator's Notebook, issued by the central committee of the Soviet Communist Party.

The membership figures illustrate the Moscow principle that there should be a restricted quality, rather than quantity, membership in the party.

The Communist Party member is regarded as a leader and tutor of the masses. In the Soviet Union and several other Communist states, a candidate has to pass severe tests and close scrutiny before being accepted as a full party member and there are periodical purges to keep the membership up to standard.

The Soviet Communist Party counted approximately 7 million members at October 1952, when the last Soviet Communist Party congress was held. The Chinese Communist Party has a membership of about 6,500,000.

MEMBERSHIP IN SATELLITES

The Moscow survey gives the following approximate membership figures of Communist Parties in the satellite countries of Europe and the Far East:

Czechoslovakia	1,600,000
Poland	1,300,000
Hungary	900,000
Bulgaria	455,000
Albania	45,000
East Germany	1,400,000
Korea	1,000,000
Vietnam	700,000
Total	7,400,000

The survey pays no attention to the 700,000 members of the Yugoslav League of Communists, since this party has declared itself independent of Moscow.

The survey says that other countries where Communist Parties are banned are Spain, Portugal, Greece, Turkey, Iraq, Iran, Jordan, Egypt, Libya, South Africa, and also "the overwhelming majority of the countries of

Latin America." (Guatemala is not mentioned in the survey.)

In France and Italy the membership figures given are: France, 800,000; Italy, 2,120,000.

Membership figures for other capitalist countries are listed thus:

United States	60,000
Britain	35,000
Belgium	100,000
The Netherlands	50,000
Denmark	50,000
Sweden	60,000
Finland	50,000
Japan	100,000
India	60,000

The survey does not quote figures for Norway, Iceland, or West Germany.

In the Far East, no membership figures are quoted for Burma, Malaya, Thailand, Ceylon, the Philippines, or Indonesia.

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. FERGUSON. The Senator has referred to Moscow's estimate of the strength of the Communist Party. In the article which the Senator from Wisconsin has had printed in the RECORD I note that the Communist Party membership in the United States is estimated at 60,000, which is more than the total number estimated by the FBI.

Mr. WILEY. Of course I would expect Moscow to exaggerate the figures.

Mr. FERGUSON. Or perhaps the Communists may know how many members they have in the United States.

Mr. WILEY. Perhaps they are correct. Nevertheless, I would much rather accept the figures of the FBI than figures in any communication from the Communists in Russia. However, the article does present a challenge, and that challenge is that we must always be alert, because in all the countries of the world Moscow has members of the Communist Party who are constantly infiltrating.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H. R. 5173) to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes.

Mr. GILLETTE. Mr. President, I have joined with the junior Senator from Massachusetts [Mr. KENNEDY] and a number of other Senators in sponsoring an amendment to H. R. 5173, the unemployment compensation bill now before the Senate. Our amendment has a clear and simple purpose: To raise the amount and extend the duration of payments to unemployed persons covered by the unemployment-insurance system.

At the present time my State of Iowa is suffering considerable unemployment, especially in areas where farm machinery plants are located. While the total number of men out of work in Iowa may not be comparable with that in other more heavily industrialized States, several communities in my State have been hit very hard. For some months cities such as Burlington, Ottumwa, and Davenport have been classified among the areas of the country most seriously affected by unemployment.

Our average weekly benefit to an unemployed person in Iowa amounts to about $21. The maximum benefit possible under present law is only $26 a week, the minimum $5. Coverage extends for only 20 weeks.

In several of our communities large numbers of workers who were laid off because of a drop in production have long since exhausted their unemployment compensation and are forced to depend on local charities and family welfare societies.

The amendment offered by the Senator from Massachusetts and others, including myself, will by no means solve the problems facing unemployed people in my State or any other State.

But it is such a distinct improvement over the bill reported to us by the committee that it merits the support of every Senator concerned for the well-being of the American people. It establishes new national standards for unemployment-compensation programs—a longer period of coverage, 26 weeks; and a larger amount of weekly benefit—a maximum of not less than two-thirds of the State's average weekly wage and not more to any individual than 50 percent of his own weekly wage. The so-called Reed bill, pending before us, establishes no standards whatever, even for the expenditures of funds by the Federal Government through the States.

In the last 24 hours I have secured from my State of Iowa a number of case histories which, better than all the arguments we may advance here, illustrate the individual human problem we are discussing:

Case No. 1: An individual employed by the John Deere Tractor Co., in Waterloo, Iowa, was laid off on November 18, 1953. He filed for unemployment benefits immediately upon dismissal. On November 21 he sought relief from the Family Service League in his community. Two months later, on January 19, he finally received his first unemployment-compensation payment, which was, of course, insufficient to support him, his wife, and his four children. Supplementary assistance had to be given by the Family Service League. His 20 weeks of benefits ended. He is still unemployed. He must still obtain aid from the local private- and public-relief agencies, and further burden his local community. Passage of the Kennedy amendment would most certainly be of help to the thousands of people whose case histories resemble the one I have just cited, and would also relieve to some extent the tremendous burden on local relief agencies where heavy unemployment has struck.

Case No. 2: An individual employed in the Ottumwa plant of the John Deere Tractor Co. was laid off in late September last year. He applied for unemployment compensation on October 5. Offered a job in a gypsum plant in Fort Dodge, he discovered after a day's work that he was physically incapable of performing the new job. Returning to Ottumwa, he was denied unemployment benefits on the grounds he had quit his job. His case was appealed to the commission, which overruled the deputy. On the 1st of April 1954 he received his first unemployment compensation check, after 5 months without a job and without unemployment compensation. He had to depend on assistance from county welfare agencies and on his union. He is a World War II veteran, with four children, and a fifth child on the way. He had 3 years' employment with the John Deere Co. before being laid off.

The original bill proposed by the Senator from Massachusetts [Mr. KENNEDY] and others would have established standards for disqualification which in all likelihood would, if adopted, have prevented the long delay which the individual cited in case No. 2 was obliged to undergo. The present amendment omits standards for disqualification, but only because the sponsors hope, by limiting controversy, to secure approval of at least the most important provisions relating to amount and duration of benefits. I hope that in the next session of Congress we can enact truly adequate standards in this vital area of economic legislation. If the Senator from Massachusetts reintroduces his bill for higher standards, he will have my determined support.

Case No. 3: A World War I veteran aged 53 was laid off from his tool-and-die shop in Des Moines in mid-May this year. He has applied for unemployment compensation but as of this morning has not received his check. He has three children and is receiving some soldiers' relief. While the difficulty in his case appears to be caused by administrative delays in processing his application, and therefore would not be materially helped by adoption of the proposed amendment, I think it illustrates how far from adequate this whole unemployment-compensation program still is. When the blow strikes and a family man, whatever his age, is out of a job, surely we must be able, in this rich and thriving land, to provide him with the compensation he is entitled to as soon as physically possible, to make the compensation bear some adequate relation to the cost of living, and to let it endure for at least 26 weeks.

Mr. President, I am in favor of the entire substitute proposal which the Senator from Massachusetts and other Senators offered on July 1, but if we cannot secure favorable action on it, then the least we can do is to enact these minimal provisions extending coverage to 26 weeks and increasing the amount of weekly unemployment payments to people who have lost their jobs.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an article dealing with the unemployment problem in Iowa, published in the Cedar Rapids Gazette of July 4, 1954.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EMPLOYMENT PROBLEM IN IOWA GRIM; 35,000 JOBLESS

(By Ed De Mar)

DES MOINES.—Iowa's unemployment problem is grim and shows few signs of getting any better, George E. Moore, State employment director, said Saturday.

Moore estimated that 35,000 Iowans are out of work, compared with 20,000 6 months ago. The total now represents about 3½ percent of the State's working force of 1,025,000 persons.

At the beginning of the year, Moore expressed optimism that the number of unemployed would not grow to more than 2 percent. Saturday Moore declined to give any midyear prediction.

"But businessmen are very pessimistic over conditions this fall and winter," Moore said. "We can see no particular upsurge in employment in the near future."

However, Moore emphasized that Iowa "is still better off than most of the Nation." He pointed out that Iowa's unemployment work force percentage "is less than half the national average."

Part of the unemployment problem is the failure of Iowa's economy to keep pace with its growing population.

In nonfarm employment, for example, there were 12,000 more persons at work in May this year than in February, but the number of nonfarm workers unemployed continues to grow because of an influx of high-school graduates.

Moore estimated the number of nonfarm workers in the State at 616,000 in February and 628,000 in May, compared with a high of 648,000 in October 1953.

"If the economy does not advance," he said, "we will have a rise in unemployment because new workers are constantly being added to the labor market."

Three Iowa cities have been placed on the Federal Department of Labor's critical surplus labor list since January 1. A city must have a minimum total working force of 15,000 and a total estimated unemployment of more than 6 percent to be listed.

The cities are Burlington and Ottumwa, which were added to the list within the last 2 months, and Davenport, which hit the list in March.

All were hard hit by the slump in farm-machinery manufacturing.

Mr. PASTORE. Mr. President, I am opposed to the pending bill, H. R. 5173, known as the Employment Security Administrative Financing Act of 1954, in its present form. Allegedly, the purpose of this bill is to strengthen the Federal State employment security program by providing that all taxes collected under the Federal Unemployment Tax Act shall be devoted exclusively to the basic principles of this program. Such is not the case.

The adverse trends in business and industry of the past 6 months have caused increasing concern in all quarters for the well-being and future courses of our American economy. While it is true that during the past weeks we have had several encouraging reports of an upward trend in reemployment, there is still reason to believe that our delicately balanced economic system is somewhat out of gear. This is shown in the decline in business activity and in the larger number of unemployed who are desperately striving to find jobs in order that they may live in the way to which they have been accustomed, a way in keeping with American standard of living, which, indeed, is the envy of the entire world.

Our economy must be put back on an even keel, and all of its component parts must be made to function smoothly again. Jobs must be provided for the jobless. For so long as we have within our society men and women who are willing and able to work and cannot find employment, the morale and the aspirations of our people will be seriously impaired. It is necessary that income be made adequate to the high cost of living. Purchasing power must be maintained, not only to assist the individual involved, but also to buttress the entire business structure.

While it must be admitted that such a dynamic industrial economy as ours cannot always keep to an even course, and while it is true that by its very nature it is subject to periodic ups and downs in response to underlying forces in our scheme of things, yet when we have indications of widespread unemployment, together with a high-price level, we must, of necessity, realize that something has gone wrong and that the forces of government and industry must be utilized so that they can work together in order that a reasonable solution may be found to correct the situation.

Because of the complexity of our economy, it is only natural to expect that even experts will disagree on the kind of treatment needed to adjust some of the more delicate influences which sway our economy. We are, therefore, accustomed to finding diversity of opinion in this field. This, of course, is only natural.

We do not fully understand, and no one could be expected to fully understand, the part played by the various influences in the operation of the intricate pattern of our economy. But, on the other hand, there are fields in which we can be more sure of ourselves in combating our economic ills, fields in which the remedies are simpler and can be more readily applied.

I feel that if we attack our economic problems on a local basis as they arise, we will be in a much better position to overcome them rather than to wait until they have spread over the whole economy and gotten out of hand, as happened during the depression years. Once the entire economy has gotten out of control, it becomes almost impossible to set it right again.

We must always remember that the economy of each individual State taken together makes up the fullness of our national economy, and that when one State suffers, the entire Nation suffers, either directly or indirectly.

My State, for example, is a manufacturing State. More than 90 percent of its gross product is manufactured for export into the other 47 States. This means that when Rhode Island workers are out of jobs, this is so because the demand elsewhere for the goods they produce is not there. So whether or not Rhode Island has full employment depends on the economic atmosphere in other parts of the country and, in a slight degree, on the situation in other parts of the world.

Therefore, to say that the unemployment problem in any particular State is strictly the responsibility of that State and of no concern to the Nation, in my opinion, begs the question somewhat and shows a complete misunderstanding of our American economy. Consequently, if economic misfortune strikes any one of our States or any particular area, the rest of the Nation cannot afford to remain complacent and unconcerned under the delusion that this ailment will remain localized. Whether we like it or not, we are all in the same economic boat. The disaster that befalls one area today can and probably will strike some other area tomorrow.

Mr. KENNEDY. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. KENNEDY. Is it not a fact that Rhode Island has had a tax on industry of 2.7 percent for several years, and the amount paid in Rhode Island is substantially below that in any other State? Is it not also true that has not been because of Rhode Island's careless handling of its funds, but due to the fact that there has been chronic unemployment in the textile industry in Rhode Island?

Mr. PASTORE. Going a step further, from the very inception of the unemployment compensation program, with the exception of 2 years, which means 15 years from the time we inaugurated the unemployment compensation program, the tax on Rhode Island industry has been 3 percent, which is the highest rate ever paid in any State in the Nation.

The steady spreading of our current economic decline to one area after another in the past 6 months should remove all doubt or smugness as to this possibility. The maintenance of a healthy economy requires soundness in all its component parts.

If one State is allowed to remain distressed for too long, this economic cancer will speard its evil into every State of the Union. Therefore, if we think of the remedy for our economic ills first of all in local terms, and try to find it before the economic ills are allowed to spread, then I believe that much of the solution will be found to the problem of avoiding a national catastrophe.

The first and most simple remedy to help in checking economic decline on a local basis is a strong, solvent, equitable unemployment-insurance program. This system for coping with the hardships resulting from the periodic rise and fall in business and employment has proved itself valuable over the past 17 years of its operation. It has established itself as a major buttress of our wage-earning industrial economy. An adequate system of unemployment benefits, by providing continued income to the idled worker and helping to sustain the purchasing power needed for the business life of the community, serves as a most practicable balance wheel for keeping the economy as a whole on a steady level through the inevitable periods.

Both this administration and the former administration have recognized the value of and the need for a strong system of unemployment insurance in their recommendations that coverage of workers be extended and the amount and duration of weekly benefits be liberalized in the various State programs.

Valuable though unemployment insurance is, its continued operation over any extended period is threatened by the falling fund reserves in some States, and, if I may be permitted to say so, such is precisely the case in my own State. In Rhode Island, as in other States, the current low reserves have occurred under the existing benefit provisions which, by no stretch of the imagination, have been as liberal as those now recommended by this administration. The current reserves in Rhode Island would thus be in greater jeopardy or insolvency if the more liberal provisions recommended by this administration were adopted. In fact, I am willing to admit that under the present prevailing conditions, it would be impossible for Rhode Island to adopt these recommendations without some kind of Federal assistance.

I hasten to add that I agree with the philosophy that inspired these recommendations and, if at all possible, they should be adopted in order to provide a more adequate wage offset to workers, in view of the persisting high cost of living. But the basic question remains: How could Rhode Island and other States finance this sorely needed liberalization of benefits when we have no assurance of solvency under our present less liberal provisions?

This can come about, as I have already stated, only through a procedure of reinsurance of Federal nonrepayable grants, usually referred to as reinsurance of State benefit funds against insolvency.

I know there are those who will throw up their hands in horror when I mention the words "nonrepayable grant," but let me point out that the money to which we are referring in H. R. 5173 comes from the employers in the various States.

At the present time the surplus over administrative costs reverts to the general fund of the United States Treasury, and there is no requirement that this surplus be used to pay unemployment benefits.

When the farmer suffers from a drought, or for any other reason, the Federal Government hastens to his assistance. This is exactly as it should be. So, too, should not the Federal Government come to the assistance of our unemployed workers who are eligible for benefits under the unemployment compensation program and yet cannot receive these benefits under available funds unless we either cut down the benefits to a ridiculously low level or further paralyze industry by raising the contribution rate to an exorbitant extent, thereby adding insult to injury?

That the Federal Government should assume some measure of responsibility for the solvency of State funds is entirely consistent with the nature of our economy. While unemployment manifests itself on a local basis, it is actually generated by forces beyond the control of any one State or area and lies deep within the complex nature of our national economy as a whole. Therefore, unemployment in any area is rightly the liability of the total economy of the Nation and should, in some measure at least, be the concern of the Nation as a whole.

Federal participation in the field of unemployment financing is not without precedent. A principal analogous to Federal reinsurance is already applied in disbursing Federal funds for administration of the State jobless benefit programs. These funds are provided by a tax of 0.3 percent on covered employer payrolls, but the amount allocated to the various States is determined by their need, rather than by the amount contributed by their industry to this Federal funds.

In doing this, we recognize and establish the philosophy that certain States, in order to provide the essential service and the businesslike administration that is needed, should be given outside help, not on the basis of contribution, but rather on the basis of need.

The essence of this philosophy, I think, should be applied with reference to whatever help we intend to give the various States whose surpluses are low, and who, for that reason, cannot maintain the uniformity of benefit payments which is likewise essential in a sound program of unemployment insurance.

Under the pending bill, H. R. 5173, a State is required to repay a loan which is negotiated under the terms of this bill by a year from the following January. This provision would only worsen the position of the industries in the borrowing State, industries which are already suffering serious handicaps, geographical and otherwise, in their competition with industries in other States. Under the terms of this bill, any State which finds itself in the position of having to borrow could ill afford to do so realizing that in too short a time the obligation imposed upon it to pay back the borrowed money would only constitute another unbearable burden on an already weakened economy. In fact, the help we profess to give under this bill is no help at all. It is like throwing a 25-foot rope to a man drowning a mile off shore. The intention is good, but the effort is indeed weak and in vain.

It is my considered judgment, therefore, that if we do nothing else by way of amending this bill, we must liberalize the repayment features, thereby placing a borrowing State in a position to reinvigorate a faltering economy and create a more favorable climate in order to maintain and develop its industry.

Rhode Island's fund level currently stands at approximately 3.9 percent of the taxable payroll. This is a dangerously low level, and the reserve could very well be wiped out by 1 or 2 years of heavy unemployment, such as we experienced in 1949. But even several years of moderately heavy drains could cripple the fund and wreck the employment-security program completely.

Despite a slight slowing down in the unemployment rise, our jobless total in Rhode Island still represents about 13 percent of our labor force.

There will be those who might say that much of Rhode Island's present situation is of her own doing. This is absolutely not the case. There are 29 States whose maximum benefit rates constitute a higher percentage of the average weekly wage than is the case in Rhode Island. Mind you, Mr. President, 29 of the 48 States in the Union pay more than is paid in Rhode Island. Seventeen States have maximum weekly benefit rates of $30 or more, while 14 States have maximums of from $26 to $28 per week. There are 31 States whose maximums are above those paid in Rhode Island. The present rate in Rhode Island is $25 a week, for a maximum of 26 weeks.

Rhode Island's present position really is due to an economy in which there is a high degree of industrialization, such as textiles and jewelry. Efforts have been made and are being made to bring more diversified industries into Rhode Island. This is a long hard task, but one which I feel we are meeting successfully.

There are only two alternatives open to us. Unless we liberalize the repayment terms of this bill, we will find ourselves in the position of either cutting down our benefits to a ridiculously low level—and they are already low by comparison with other States—or increasing industry's contribution to the fund to a figure which will be the highest in the Nation, the natural result of which will be to drive out our present industry and make it impossible to attract new industry.

I have taken the liberty of pointing to my own State because I know the conditions there better. But, well as I know the condition there, I warn my colleagues that other States can find themselves in a similar position. If the Congress of the United States feels that a program of nonrepayable grants or reinsurance is inadvisable, a position with which I strongly disagree, and a position with which I hope there will be many others who will disagree, then I submit that unless we adopt more liberal terms in the repayment of loans, as provided in the existing bill, we are in fact doing nothing to help States which need the loan.

Therefore, I take the position that unless we do something to liberalize the repayment features of H. R. 5173, it would be much better for the economy of the Nation for us not to pass this bill at all, thereby affording us an opportunity to watch the situation very closely, and to come back at the next session of Congress with better knowledge and understanding of the conditions which will affect the future of our American economy. Once the money goes back to the States, as proposed in the bill, I am afraid we will have put a solution to this serious problem beyond our reach.

I realize how attractive it is to argue that the money should not go into the general fund of the United States Treasury; that it should be returned for the benefit of the States which make contributions to the administrative fund. I realize how difficult it is to beat down that pressure and advocate a period of longer waiting in order better to judge

the drifts of our American economy. However, I firmly believe that with the present repayment conditions in this bill, we will accomplish little, if anything at all, in helping those States which will first experience the impact of a declining economy.

If the spirit and the intention which gave birth to H. R. 5173 are indeed to strengthen the Federal State Employment Security program, then I say either liberalize the repayment features, to which end I have already proposed an amendment which I shall call up later, or vote the bill down, with the hope of finding the right solution at the next session of Congress, when we will know more about our unemployment situation.

Mr. LEHMAN. Mr. President, will the Senator from Rhode Island yield for a question?

Mr. PASTORE. I yield to the distinguished Senator from New York.

Mr. LEHMAN. I am very glad, indeed, that the Senator has so clearly brought out the plight in which some of the States will find themselves if they avail themselves of the loan privilege provision of the bill. According to the report, the $200 million fund which is described in the bill will be available to States with depleted reserve accounts, for the purpose of assisting them in the administration of their unemployment benefit payments. Obviously, only those States which are in a serious financial condition regarding their unemployment insurance funds will or could avail themselves of that privilege. But how they will be able to repay the loan as is required by the bill, is totally incomprehensible to me. The bill provides that they must repay the amount within a limited period, either through a transfer of funds from the trust funds, at the direction of the Governor, or to accept a decrease in the 90-percent allowable credit against the 3 percent for the unemployment tax. And that deduction will be increased to 5 percent each year thereafter.

That would seem to me, obviously, to pile debt upon debt, a debt which the State could not possibly repay to the Federal Government unless it at the same time was willing materially to reduce the already very small unemployment insurance payments which were being paid to its unemployed residents.

Mr. PASTORE. If the Senator from New York will permit me to say so, the bill goes a step further than that. Under the arrangements provided in the bill, insofar as the repayment features are concerned, the bill requires that unless a State pays back the money borrowed by a year after the following January, then that State can claim only, in the first year, a contribution of 85 percent on each dollar paid to the fund, instead of 90 percent. In other words, there is provided a punitive imposition of an additional 5 percent tax on industry. Then, if that amount is not paid back in the first year, there is imposed another 5 percent penalty, which means that a State then receives a credit not of 85 percent, but of 80 percent. Then if that is not paid, there is imposed, in the third degree, another 5 percent penalty, which means that a State which is already depressed will be able to receive credit only to the extent of 75 cents on each dollar paid to its unemployed. Unless the State could pay the loan out of money surpluses, it would have to impose an additional tax on an already depressed industry in order to meet its obligation.

The Senator can see what would happen. First of all, industries would be driven out. There would not be a chance of attracting new industry to that State. All the bill does is to express a pious hope of help, but so far as actual help is concerned, it would not help at all.

I was hoping the distinguished Senator from Colorado [Mr. MILLIKIN] would be present when I made my statement, because I think what I have just stated is essentially the crux of the defects of the pending bill. It imposes a new penalty on an already depressed industry to the tune of 15 percent during 3 years, which means that it will not only make worse a situation which is already bad, but will actually drive out present industry and will not attract any new industry. As a matter of fact, any State which would borrow money under this plan would be foolish. It might just as well make up its mind now that it is going to stop imposing a tax of 3 percent, and start imposing a 4-percent tax on payrolls and try to meet its obligations as best it can.

Mr. LEHMAN. Mr. President, will the Senator from Rhode Island yield further to me?

Mr. PASTORE. I yield.

Mr. LEHMAN. Of course, it is unnecessary for me to say that I am in complete agreement with the statements which have been made by the distinguished Senator from Rhode Island. Enactment of the bill as reported would inevitably lead to one of two things: either to an increase in taxation, which would drive out industry; or to a serious further decrease in what already are completely inadequate compensation payments to unemployed workers of the State, and thus impose a hardship—possibly an unusually severe hardship—on the workers of the State, and an inevitable lowering of theilr standard of living.

The Senator from Rhode Island is so completely correct in his position on this matter that I feel certain he has made a very great contribution to the consideration of the pending legislation by speaking as he has today. No State could possibly avail itself of this so-called privilege, which in fact is no privilege at all unless it already was in difficulties in regard to its compensation funds; and the operation of the bill as reported by the committee would merely add additional burdens to the great burdens which many of the States already are carrying.

Mr. PASTORE. Mr. President, I wish to give to the distinguished Senator from New York a graphic example. First, let me say that under the terms of the bill as reported, no State could borrow one nickel until its surplus had fallen below the amount of the entire collection of the previous year.

In very simple terms that means that the State would be unable to repay. It would be similar to the case of a man who came to one of us on Monday and said: "I am going to be paid on Friday of this week. Will you lend me $10 until then?" Let us assume that the person to whom he made the request was very magnanimous, and replied: "Yes; I will lend you $10, but you must repay me tomorrow." His friend would reply: "How can I repay you tomorrow? I just finished telling you that I will not be paid until Friday. So it will be impossible for me to pay you back tomorrow." In short, the bill provides, in effect, "We will lend you the money you need, but you must begin to repay the money 1 year from next January."

Mr. President, unless there were some hokus pokus in the operations of our economic structure, how would it be possible for the economy of any State to be rectified within 2 years, short of a war? Can the Senator from New York tell me how that could possibly be done?

Mr. LEHMAN. I cannot tell the Senator from Rhode Island how it could be done, because in my opinion it would be an absolute impossibility to do it.

Again I wish to congratulate the Senator from Rhode Island for the very able, useful, and valuable speech he has made on the floor of the Senate this morning.

Mr. PASTORE. I thank the Senator from New York.

Mr. President, I wish to repeat, for the benefit of the very astute Senator from Colorado [Mr. MILLIKIN], that the bill as reported by the committee amounts to no more than the expression of a pious hope. But from the practical point of view of giving help to someone who is in need of help, even with the hope of paying back the money—and I do not wish to question that too much, if it is the intent of Congress—the bill as reported would do absolutely nothing at all, for nothing that could possibly happen, short or war, could raise the economy of a State within a period of 2 years sufficiently to enable the State to pay back the money without imposing punitive penalties on its industries by raising within a period of 3 years their contribution by an added 15 percent. In my opinion, that would cause a tremendous national catastrophe.

So I hope the Senator from Colorado will give serious thought to that phase of the problem, when I call up my amendment.

Mr. President, I yield the floor.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed the bill (S. 1276) to amend the Bankhead-Jones Farm Tenant Act in order to increase the interest rate on loans made under title I of such act, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 79) to express the sense of the Senate on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need

of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin, with amendments, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

H. R. 5158. An act for the relief of Sgt. Welch Sanders; and

H. R. 5433. An act for the relief of the estates of Opal Perkins and Kenneth Ross, deceased.

CONTINUANCE OF OPERATION OF TIN SMELTER AT TEXAS CITY, TEX.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the concurrent resolution (S. Con. Res. 79) to express the sense of the Senate on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin, which were, on page 1, line 6, after "Congress", insert ", and the tin produced may be transferred to the national stockpile", and to amend the title so as to read: "Concurrent resolution to express the sense of the Congress on continuing the operation of a tin smelter at Texas City, Tex., and to investigate the need of a permanent domestic tin-smelting industry and the adequacy of our strategic stockpile of tin."

Mr. SALTONSTALL. Mr. President, I have taken up this matter with the majority leader and the minority leader. The amendment of the House of Representatives is a permissive one, not compulsory. It will not change the substance of the concurrent resolution as adopted by the Senate.

Therefore, Mr. President, I hope the Senate will concur in the amendments of the House of Representatives, and thus obviate the necessity of the resolution being sent to conference.

Mr. JOHNSON of Texas. Mr. President, will the Senator from Massachusetts yield?

Mr. SALTONSTALL. I yield.

Mr. JOHNSON of Texas. Will the Senator from Massachusetts tell us the effect of the amendment adopted by the House of Representatives?

Mr. SALTONSTALL. I shall be glad to do so. Let me say that the purpose of the concurrent resolution is to continue for 1 year—until Congress has had a chance to investigate and to determine whether there should be a further continuation—the operation of the tin smelter owned by the Government, at Texas City, Tex. The concurrent resolution as adopted by the Senate provided that operation of the smelter should be continued, and authorized the creation of a committee, but the Senate eliminated from the concurrent resolution a provision to the effect that the tin produced at the smelter should be added to the stockpile of the United States Government. That change was made because it was thought that the stockpile was ample or could be ample, let me say, without going into security reasons, and that such a restriction should not be imposed.

The amendment adopted by the House of Representatives adds a provision to the effect that the tin may be transferred to the national stockpile, but the amendment does not require that it be added to the stockpile. Thus, the amendment is merely permissive, in the opinion of Mr. Mansure and Dr. Flemming, the heads of the two agencies concerned.

So, Mr. President, I can see no objection to the amendment of the House of Representatives, inasmuch as it is a permissive amendment.

Therefore, I ask the Senate to concur in the amendment of the House.

Mr. JOHNSON of Texas. Mr. President, I should like to ask another question of the distinguished chairman of the Armed Services Committee: In his opinion, is the amendment necessary in order to have tin produced at the smelter?

Mr. SALTONSTALL. It is not.

Mr. JOHNSON of Texas. Then the amendment is superfluous, inasmuch as there is already on the statute books a law which provides that the tin may go into the national stockpile, if that is desirable, whereas the House has added an amendment to the same effect.

Mr. SALTONSTALL. I appreciate the comment the Senator from Texas has made, and I believe he is correct.

Mr. JOHNSON of Texas. Mr. President, in view of the fact that the amendment of the House of Representatives does not change or add anything to the existing law, I see no necessity for the amendment, although I do not particularly object to it. Certainly, it seems to me there is no necessity, after the passage of a law, to reiterate it from time to time.

On the other hand, I agree that the Senate should concur in the House amendment, and thus speed final action on this measure.

Mr. SALTONSTALL. Mr. President, I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

NATURALIZATION OF CERTAIN FORMER CITIZENS

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1303) to provide for the expeditious naturalization of former citizens of the United States who have lost United States citizenship by voting in a political election or plebiscite held in occupied Japan, which was, in line 4, to strike out "plebescite" and insert "plebiscite."

Mr. WATKINS. Mr. President, in the Senate bill the word "plebiscite" was misspelled. The correction of the spelling is the only amendment.

I move that the Senate concur in the amendment of the House.

The motion was agreed to.

PROPOSED CONSTITUTIONAL AMENDMENT TO REQUIRE ANNUAL BALANCING OF THE BUDGET

Mr. BRIDGES. Mr. President, I should like to request the serious attention of this body to a fiscal policy in the Federal Government whose discontinuance is, in my opinion, long overdue.

The distinguished Senator from Virginia [Mr. BYRD] and I propose that the Government put an end to the practice of financing operations through the medium of an interest-bearing charge account that is never paid. This is precisely what we have been doing for the past 20 years.

I realize that, in many economic circles, fiscal morality has been largely relegated to the "old hat" department, and that balanced budgets are regarded as vestigial remnants of our remote past. But in spite of these experts, I cannot avoid the conviction that the stability and national security of America are directly dependent upon the stability of the American dollar, which in turn, depends upon our shutting off this fantastic charge account on which the Federal Government has come to depend. The time to start is right now.

II

If my position on this matter requires collateral support, it may be found in President Eisenhower's address of June 10, in which he predicted 40 years of costly defense, and called for a fiscal program which the country could sustain for a long, long period of time.

During the past 20 years most of our serious fiscal problems have been dealt with on an emergency basis. Each issue was considered a nonrecurring crisis, a milestone in history, the crossroads of our destiny, and what have you.

No one would deny that emergencies of great magnitude which strike the Nation unexpectedly must be dealt with by heroic means, whatever the financial cost may be. But we have been deceiving ourselves concerning the unpredictability of these fiscal problems. We cannot honestly say that there is anything unexpected about the emergency which faces us now, and is likely to face us for the next 40 or 50 or even 100 years.

We are going to have to stop using the words "emergency" and "crisis" and find a new name for our problem, and a new method of dealing with it.

I suggest that the problem of expensive national defense has become, to all practical purposes, a permanent one. I urgently suggest that we face the problem of fitting this permanent situation into our permanent American way of life. This is not merely something we should do: It is something we must do.

III

This return to orthodox financing should not be a psychological strain on the Nation because the one practice which has always set America apart from most other countries is our stubborn habit of not spending any more than we can pay. As a result, for almost 150 years we had a reasonably stable dollar, which in turn, contributed

to the maintenance of a stable government.

But during the 20-year period which has elapsed since the Federal Government opened its multibillion-dollar interest-bearing charge account, the value of the American dollar has been cut in two. Theoretically, if we were to continue the same policy and continue to depreciate our currency at the same rate for the next 40 years, in 1994 the American dollar would be worth about 12½ cents.

However, there is little chance that our currency depreciation would work that way because, if history tells the truth, somewhere along the line the flood of money would burst its bounds and our entire money structure would have to be repudiated and revalued at ruinous rates.

Under these circumstances it would be virtually impossible to carry on an orderly defense program except under martial law, or under a dictatorship whose directives would carry the power to supersede the normal economic relations between people and people and between government and people.

As a result one of two things would happen. Our national defense would be weakened or our civil liberties curtailed. There will be voices from high places that will belittle these fears and assure us that no such dangers exist because with modern techniques this interest-bearing charge account can be manipulated and kept under control ad infinitum.

In fact, there have already been proposals that deliberate inflation at a predetermined rate would be a good thing for the country because of the tested and proven methods of keeping the inflationary mechanism under precise control. Regarding this proposal, I can only say that among the few things of which I am certain concerning economics—and I am certain of very few things—is that nothing is certain despite the experts.

Economic behavior is human behavior, and no one—not even the person himself—can predict what he is going to do under certain circumstances. We must not put our trust in any scheme involving the manipulation of money. For national stability and safety, there is no substitute for a balanced budget.

It might be well for me to state at this point that I do not propose that the Federal Government be stopped from the use of its credit. The intricacies of Government finances require a flexibility that can only come from the use of credit. But that use should be limited to 1 year.

My proposal, therefore, is that the Federal Government be required to retire any such debt during the 12-month period following its creation.

A question that naturally arises concerns the disposition of the existing Federal debt. In my opinion, this debt, or most of it, as well as the cost of servicing it, will have to be regarded as semipermanent factors in our economy.

At least one thing seems certain—the disposition of our existing debt is a problem for future Congresses—not this one. But regardless of what can be done concerning the sins of the past, we must pledge ourselves to sin no more.

v

I do not believe that I should try to include in these remarks any technical description of the monetary inflation process.

Among the supposedly popular advantages of money which becomes progressively cheaper, is that people who owe money can cheat their creditors. In other words, a person can build a house with borrowed money consisting of 100 cent dollars and pay off the loan with 50 cent dollars. I have never subscribed to this theory. I have always found Americans to be fundamentally decent and honest. And actually the theory itself does not apply to Americans. That procedure is difficult enough to understand even when studied from a book.

But there is one basic principle, understandable to everyone, that should be made a part of these remarks, the essence of which is that monetary inflation is unnecessary and benefits no one.

I should like to present this argument to the Senate in the phraseology I found in a little elementary primer on money.

The passage is entitled "The Cost of War Is Not Money," but it could read "the cost of government at any time is not money":

The economic cost of fighting a war, although measured in money, is not money: It is used up goods and services.

Certain things are needed by the armed services, and because they must be taken from the people, the Nation suffers a lower scale of living.

For example, in World War II, about 50 percent of the national production was purchased by Government.

But taxes were not 50 percent: They were only about 30 percent, leaving the people about 70 percent of their income.

If the people and the Government had been willing to face up to the real cost of war, that is, if taxes had been at the rate of 50 percent, the Nation would have been on a pay-as-you-fight basis, and there would be no war debt.

This pay-as-you-fight plan would not have penalized people because they could have bought the same quantity and quality of goods and services with the remaining 50 percent of their income as they bought with the 70 percent.

For Government to take away goods and services without taking away the money paid out for their production only conceals the true cost of Government and creates unnecessary debt.

Let us look at this problem from a different angle. In its effect the inflationary borrowing which supposedly relieves the people of taxes is, in itself, a tax.

Let us assume that instead of getting from the people the full cost of the budget, we borrow from the commercial banks an amount equal to 5 percent of the money supply. When this money is spent by the Federal Government departments, there is in the market $105 in search of every $100 worth of goods. So prices go up and the value of the dollar goes down.

The people will get only about 95 cents worth of goods for their dollars. This loss in purchasing power has the same effect as a tax or a capital levy.

I believe that it must be so considered, regardless of the technical explanations that may obscure the facts. To make matters worse, it leaves behind it an interest-bearing debt.

vi

One of the textbook maxims we learned concerning money is that it should be a safe store of value: In other words, people should be able to get as much for their money when they spend it as they gave up when they saved it.

Under our Constitution the responsibility and the power to make the United States dollar a safe store of value rests largely with the Congress.

The private actions of the people—such as undue expansion of private credit—may affect the value of money, but by and large, the control lies in the Congress.

For 20 years we have been manipulating—or at least we have been a willing agent in the manipulation of—the value of the dollar.

A person who had an income from salary or other sources of $5,000 in 1939 now has an income of less than $2,500, even though the number of dollars remains the same. In other words, the United States dollar has ceased to be a safe store of value.

The Federal monetary policy under which this has happened is known as the cheap-money policy, under which money becomes cheaper and cheaper.

We are told by some political experts that this is a popular policy—a policy that wins friends and influences voters.

There is no doubt that in a country where private debt is owned by a few rich people and the debt is owed by millions of poor people a cheap-money policy would be politically popular, but in America private debt is owned by almost everybody, at least everybody who has an insurance policy or a savings account or a Government bond.

For this reason, cheap money in America hurts more people than it helps.

I am convinced that the American people know that cheap money is not, and should not be, a vote getter.

As evidence I quote from a national survey that was made a part of the hearings before the Bricker subcommittee of the Committee on Banking and Currency in April of this year.

In this survey, which was conducted by the Opinion Research group of Princeton, N. J., the people were asked if they would rather get ahead by being able to buy more with their present income or by receiving more money.

Eighty-five percent said they would rather get ahead by being able to buy more with the money they now receive. That is a good American sign.

It is significant, I believe, that there was very little variation of this percentage in any vocational or geographic breakdown. It makes no difference where a person lives in America or whether he is a plumber or a carpenter or a textile worker or a painter, the reaction is generally the same.

vii

At the risk of seeming to be an alarmist, I should like to point out that the political situations surrounding the

chronic use of this interest-bearing charge account serve the purposes of socialism.

The fundamental appeal of socialism is the apparently magical handout from the kindly central government which has declared war on poverty.

The bottomless purse in the hands of a Socialist-minded bureaucracy is the ideal weapon with which to break down the virtues of thrift and industry and destroy the self-sufficiency and personal initiative of the people.

At the same time it is, as we have noted, a form of invisible taxation—a secret capital levy—upon all of the people which can be used to destroy the people's financial stake in their free economy.

Under this policy it is also possible to buy the people's votes with their own money without the people having any knowledge of what is going on.

This charge account policy which we have been following came to America by way of Socialist England.

Its master architect was the late Maynard Keynes, who mysteriously jettisoned a lifetime of sound economics to serve the Fabian Socialist welfare state.

The Keynes plan looks much better on paper than it looks on the record.

As its name implies—the name being compensatory spending—it is supposed to work both ways: when times are bad, the government taxes less than the cost of government and charges the rest; when times are good, government taxes more than the cost of government and uses the surplus to reduce the charge account. The theory is a fascinating one. It is an appealing one.

The only trouble with compensatory spending is that it is not compensatory—it works only one way.

The fact that Keynes, before he died, practically repudiated his own theory, does not seem to dampen the ardor of his American disciples.

VIII

It has been suggested that a balanced budget policy on the part of the United States would alarm our allies, who depend upon us to greater or lesser degrees for economic and military assistance.

I do not believe that this could be true of any well-informed and candid ally.

The basic necessity of a stable currency is certainly known to all, and no other country, except behind the Iron Curtain, would wish to see the United States weaken itself.

Regardless of what may appear in foreign capital newspapers, the foreign statesmen who are really in need of American assistance want America to stay strong and stable.

On a purely peacetime basis, the stability of the Yankee dollar is of tremendous importance to the stability of world trade.

In short, a balanced United States budget could not harm our friends and allies abroad.

IX

Last but not least, I should like to mention the spending pressure to which the Congress is subjected. It is known to every Member of the Senate.

One of the evils of this interest-bearing charge account is the difficulty we have experienced in resisting pressures for special consideration involving Federal expenditures.

As matters now stand, a pressure group or a Government bureau can approach the Congress with the full knowledge that if its story is good enough, it will not have to worry as to where the money is coming from.

I do not mean to infer that the Congress has succumbed to every eloquent spending group by which it has been approached, but I do say that we would be approached by far fewer and our resistance would be far higher if we were to close out our charge account.

A bill recently passed by Congress, which has just come to the attention of the Committee on Appropriations, allows the Committee on Appropriations no latitude whatever as to whether or not the committee shall recommend appropriations. It authorizes a department in the Federal Government to spend money, and to incur obligations which, if Congress failed to appropriate money, certainly would constitute a claim against the Government.

The bill was reported by a committee after hearings. It was passed by the Senate. Later, hearings were held in the House, and the bill was passed by the House. The bill went to conference and was signed by the President. Frankly, I did not know anything about that provision in the bill. I am not a member of the committee that reported the bill. I did not know anything about it until it came before the Committee on Appropriations.

That experience shows that Senators must not only resist pressure, but they must keep both eyes open and both ears open, and must read nine or ten thousand bills, or some such provision as that in the bill to which I have referred will be slipped over.

As matters now stand, there is little we can say concerning the evils of spending that would deter the spending groups.

Of the thousands of witnesses at the hundreds of hearings held by the Committee on Appropriations of the Senate, rarely—I could say almost never—except where a bill involves a local project and there is a local divided interest, do we have anyone appear before the Committee on Appropriations in opposition to big spending.

I see on the floor members of the Committee on Appropriations: The distinguished Senator from New Mexico [Mr. CHAVEZ], the distinguished Senator from Minnesota [Mr. THYE], and the distinguished Senator from Arizona [Mr. HAYDEN]. They will verify what I say, namely, that rarely, if ever, does a person appear before the Committee on Appropriations in opposition to an appropriation or in opposition to spending, unless it involves a controversy of a local nature, where two sides have developed with respect to a particular project. I ask the Senator from New Mexico whether I am correct.

Mr. CHAVEZ. Mr. President, will the Senator from New Hampshire yield?

Mr. BRIDGES. I yield to the Senator from New Mexico.

Mr. CHAVEZ. The Senator is correct. During some 14 or 15 years as a member of the Appropriations Committee I have noticed that there are always at the hearings the boys from the departments who will prove conclusively that it is necessary to give them everything they want. But I have yet to see a member of a department or someone appearing as a citizen who will say, "Yes, we should like to have this money, but for this reason we should not have it." It is a one-sided affair. The boys come up from the departments every year and usually make a fine showing, but we never have a representative of John Q. Public before the committee who will say, "This is very nice, but for this reason we should not do it at this time."

Mr. BRIDGES. The Senator is completely correct. That is the problem which we face. If the people knew that extra spending inexorably brings on extra taxes, the evils of spending would assume a personal significance. John Jones asks for funds for a particular project. He is probably a hero back home, where it is likely that someone who is egging him on and patting him on the back for coming to Washington and demanding big spending. But if he knew when he advocated the particular item of expense that it would bring on higher taxes, and the people back home would have to pay them, he would think for a second time before urging such an appropriation.

Mr. CHAVEZ. Mr. President, will the Senator from New Hampshire yield further?

Mr. BRIDGES. I yield.

Mr. CHAVEZ. Along the line of what the Senator is now discussing, permit me to speak of an instance which occurred in my own State and city. While a revenue bill was being considered by this body a gentleman representing a certain committee of the chamber of commerce in my city telegraphed requesting me to do everything possible to reduce taxes. I replied: "We have the Forest Service, the Soil Conservation Service; we have all kinds of governmental activities. Which one do you wish to cut out?" He did not wish to cut out a single one.

Mr. BRIDGES. That is a good example. I receive a letter from Mr. John Smith, who says, "Now, Senator BRIDGES, we demand that you stand for economy, and we urge you to cut the expense of Government." So I am complimented to hear from Mr. John Smith, and I feel he is taking an active interest in Government.

A few months later I receive another letter from John Smith. This time he wants me to vote for funds for some particular interest which is worthy and appealing to him, but he completely contradicts his original communication. I can produce from the files of my own office and from the files of the Appropriations Committee scores and scores of letters from persons who are well intentioned and who, time after time, urge economy by the letter route, but who later request the Senate to vote to support an appropriation for a particular project in which they are interested.

We must find some definite, particular, precise way to meet this situation. After years of seeing only occasionally, in the course of 2 or 3 decades, a possibility of balancing the budget, the distinguished Senator from Virginia [Mr. BYRD], who has made a study of this subject, and I are submitting a proposed constitutional amendment which we think will be the answer.

I have tried in these remarks to cover the following points:

First. Balanced budgets are essential to national defense.

Second. Balanced budgets are essential to the maintenance of the value of the people's savings.

Third. Balanced budgets do not add to the tax burden.

Fourth. Balanced budgets do not penalize our friends abroad.

Fifth. Balanced budgets would help Congress resist spending pressure.

Mr. President, I send to the desk an amendment for appropriate reference, proposed by the distinguished Senator from Virginia [Mr. BYRD] and myself.

The joint resolution (S. J. Res. 174) proposing an amendment to the Constitution of the United States to provide for the imposition of Federal taxes to provide revenues at least equal to appropriations, except in time of war declared by the Congress or when the United States is engaged in open hostility against an external enemy, introduced by Mr. BRIDGES (for himself and Mr. BYRD), was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. BRIDGES. Mr. President, before I close I should like to read one or two sections of the proposed amendment. It is very simple, and I think, if it could be adopted, it might at least maintain a solvent America. This is the only time I know of—and I have been in the Senate for 18 years—when there has been a concrete, specific, positive approach offered on the question. I read from the proposed amendment:

SECTION 1. On or before the 15th day after the beginning of each regular session of the Congress, the President shall transmit to the Congress a budget which shall set forth his estimates of the receipts of the Government during the ensuing fiscal year under the laws existing on such date and his recommendations with respect to appropriations to be made for such fiscal year.

Listen to this:

Except in time of war declared by the Congress or when the United States is engaged in open hostility against an external enemy, the total appropriations recommended by the President for any fiscal year shall not exceed the total of his estimates of the receipts of the Government during such fiscal year.

SEC. 2. In the event the Congress, except in time of war declared by the Congress or when the United States is engaged in open hostilities against an external enemy, makes appropriations for the ensuing fiscal year in excess of the total of the President's estimates of the receipts of the Government during such fiscal year reduced by any amount by which the appropriations made for all previous fiscal years beginning subsequent to the effective date of this article of amendment (except fiscal years during which the United States has been engaged in a war declared by the Congress or open hostility against an external enemy) have exceeded the actual receipts of the Government during all such fiscal years, it shall enact measures to raise during such ensuing fiscal year an amount of additional revenue at least equal to the amount of such excess.

I shall skip a little and read section 4:

SEC. 4. No motion in either House of Congress to adjourn for more than 3 days shall be in order during any period of time when the Congress has failed to perform its duty under section 2 of this article.

In other words, Mr. President, unless this country is at war declared by the Congress, or in open hostility against an external enemy, when Congress appropriates money beyond the receipts estimated or beyond the actual receipts of the Government for that year, the Congress of the United States cannot recess or adjourn for more than 3 days at a time until the necessary revenue is provided.

Mr. President and Senators, as I have said, this is a simple amendment. Many persons will attempt to tear it to pieces, but it is stated as simply as it can be stated. If the amendment should be adopted by Congress and ratified by 36 States of the Union, it can save America. If Senators have any love for their country, if they want to keep the United States solvent and stable, for their children and their grandchildren, they could not do better than to support this proposed amendment.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. BRIDGES. I yield.

Mr. CHAVEZ. With reference to the preparation of the amendment, which, in my opinion, has much merit, was consideration given to the practice of the executive departments coming before Congress after the regular appropriation bills have been passed, and seeking supplemental appropriations, in an effort to make up for or to secure what the regulation appropriation bills did not provide? I have experienced instances of that kind. Even now, as the Senator from New Hampshire knows, hearings are being held on a supplemental appropriation bill. In my opinion, this practice should not be allowed to continue. If the Budget Bureau has any recommendations to make, I see no particular reason why it should not make them in connection with the regular appropriation bills, instead of waiting until the last days of the session to come before the Committee on Appropriations with a request for supplemental appropriations, and seeking to obtain at the end of a session what they did not see fit to recommend at the beginning of the session. Was any consideration given to that condition?

Mr. BRIDGES. Yes. I agree with the distinguished Senator from New Mexico. He well knows, as I know, that the supplemental bills or deficiency bills, as they are sometimes called—there are two types—are the most dangerous measures which Congress must consider. If the proposed constitutional amendment were ratified, it would apply to and include all supplemental appropriations, as well as regular appropriations, because all the appropriations would have to be acted on within a fiscal year or before the adjournment of Congress.

But the distinguished Senator from New Mexico has hit upon a very great weakness in our system. Instead of appropriations being handled in the regular budget of a department or a bureau, with the approval of the Bureau of the Budget, a department or a bureau may make a request for supplemental appropriations. These are not considered at the time when the regular appropriations, which are frequently made to appear very low, are considered. So the Senator from New Mexico has struck at the nub of the question.

Mr. BYRD. Mr. President, I wish to congratulate the distinguished Senator from New Hampshire, who is chairman of the Committee on Appropriations, upon the very splendid speech he has made. I have been closely associated with the Senator from New Hampshire for a long time, and I join with him in his efforts toward establishing an economically sound Government.

I wish also to pay tribute to the Senator from New Hampshire for the exceptionally able work he has done as chairman of the Committee on Appropriations in reducing nonessential Government expenditures. I am most pleased to be associated with him in the effort which is now being made to improve the budgetary procedure of the Government.

For 25 years—a full quarter of a century—with only 4 exceptions, the Government of the United States has operated in the red, and a balanced budget is not yet in sight.

The deficit for the year ended June 30, 1954, was approximately $3 billion. In this new fiscal year the deficit will be larger because taxes have been reduced faster than expenditures.

It is imperative to stop deficit spending. I cannot conceive that the Government should operate on a permanent deficit basis. If that should happen, the Government would go over the precipice of financial disaster. I concede that the Government is operating on a permanent debt basis, but we must not continue to add to the debt.

In 25 years we have appropriated $1,200 billion or $1.2 trillion. Of this we have expended $900 billion, or $0.9 trillion, leaving unexpended balances on hand as of this date of $143 billion after excluding rescinded and expired appropriations.

At the same time we have taken $675 billion out of the pockets of the taxpayers and loaded $250 billion, or a quarter of a trillion dollars, in Federal debt on their backs within a period of 25 years.

It accomplishes nothing to say that much of this unhealthy fiscal condition was caused by depression and war emergency.

After all wars, except World War II, the war debt has been paid off. That happened following all wars, including World War I.

Actually, a substantial part of the debt we now owe was incurred during the nonemergency peacetime years. Whatever the occasion may have been, the debt is ours, and the full faith and credit of all of us are pledged to pay it

off. At this moment the debt is practically at its alltime high, approaching the $275 billion limit. The Government's contingent debt, embracing guaranteed obligations, is $200 billion, in addition to the direct debt. Some of this contingent debt must in time be paid out of the Public Treasury.

I join Senator BRIDGES, the distinguished chairman of the Senate Appropriations Committee, in sponsoring this resolution just introduced to amend the Constitution providing for a balanced budget, as the Federal fiscal situation is serious and dangerous, and the present legislative procedure for dealing with it is deplorable and inadequate. The need for reform is immediate and urgent.

The great men who framed and laid the groundwork for this great constitutional democracy never conceived of a condition such as has faced the United States during the past 25 years, when the Government has operated on a deficit spending basis, even in peacetime, with the exception of only 4 years. The Founding Fathers believed that excessive spending would be controlled by taxation, but that was something which it was not possible to provide or protect against in the great instrument, the Constitution of the United States, which governs us today. The framers of the Constitution did not conceive that the Government deliberately, year after year, would spend more money than it had, and thus add to the public debt for future generations to pay.

The proposed constitutional amendment attempts to correct that omission, and to require the Federal Government to levy taxes in proportion to the deficit which is caused by excessive appropriations by Congress. Under the amendment the Congress would be required to remain in session in order to raise the revenue essential to cover any deficit which might occur by reason of excessive appropriations. Such an amendment would be the strongest deterrent I can think of to extravagant, wasteful spending.

In simple language, this amendment prohibits deficit spending; if appropriations exceed revenue taxes must be raised to cover the deficit. This would be an effective deterrent to nonessential spending.

Under current legislative practices there is no such thing as a Federal budget in its entirety.

In its practices and procedures Congress overlooks completely the fact that any budget must have two sides, expenditures and revenue. Once the President submits his budget recommendations, Congress, under its present procedures, immediately proceeded to divorce the two sides and they are never reconciled thereafter in the legislative process.

Actually, the Congress never deals directly with the timing of expenditures in large segments of the budget. It acts exclusively on appropriations, which may be spent currently or deferred for years. Present procedures and practices make it extremely difficult, if not impossible, to control expenditures from appropriations previously enacted and not contained in current appropriation bills. By the same token, nearly half of the new appropriations are for expenditure in some future year, with the result that, in terms of current expenditures, congressional action on them is uncertain, and action by future Congresses, is in a measure bound.

In addition, Congress breaks up requests for new appropriations into a dozen or more unrelated bills, which are acted upon over a period of 6 months, with never an opportunity to consider them as a whole.

The effect of these practices and procedures is to destroy the fundamental budgetary objectives.

Congress, in this session, was asked to enact $56.3 billion in new appropriations. This will be added to $86.9 billion in carryovers, in unexpended appropriations previously made, making a total of $143.2 billion.

In this fiscal year expenditures out of new appropriations will total $36.4 billion, and expenditures out of old authorizations which are not before Congress this year will total $29.2 billion. That demonstrates the extent to which Congress lacks control over any current year's expenditure. The fact is that about 50 percent of this year's expenditures do not even appear in current appropriation bills. When we reduce an appropriation bill on the floor of the Senate, we do not know whether we are reducing the expenditures for this year, next year, or 2 or 3 years in advance. There is no way to ascertain that.

Beyond this, more than 35 percent of appropriations on which Congress is acting this year are not for expenditure in the current year.

For years I have advocated a single appropriation bill, so we could see at one time the entire picture of what was to be expended, could know, when we voted for the bill, how much more would have to be appropriated, and could provide in the bill control of expenditure obligations. More than half of the members of the Senate joined me in sponsoring the resolution for that reform. It has passed the Senate three times. It is now pending in the House of Representatives, and I am hopeful that the House will see fit to pass this much needed reform before it adjourns.

In conjunction with the single appropriation bill, I have advocated for years provision for the item veto. So far as I know, the Governor of every State of the Union has the authority for an item veto. I recall that during my service as Governor of Virginia time and time again I exercised that veto power.

I have introduced a proposed constitutional amendment for this purpose, and likewise an item veto bill in the event the objective could be reached by statute. A bill to that effect has been reported by a subcommittee of the Committee on the Judiciary.

I now join with the Senator from New Hampshire [Mr. BRIDGES] in introducing a proposed constitutional amendment which provides that Congress, before adjourning each year, must enact taxes equal to appropriations, plus any deficit carried over into the new year. In brief, it may be summarized as follows:

Under section 1, the President, at the opening of each session of Congress, would submit a budget setting forth both appropriation recommendations and revenue estimates, but the recommended appropriations shall not exceed estimated revenue under tax laws existing at the time.

That in itself would be a great deterrent to increasing the debt, because no one could argue that the Constitution does not provide that the President shall not send a budget to the Congress which is in excess of the revenues existing at that time, or without recommending additional revenues.

If, in any session, Congress enacts appropriations which, in combination with any deficit carried over from the previous year, exceed the revenue estimates, section 2 requires legislation raising additional revenue to cover the deficit.

Under section 4 neither the House nor the Senate may adjourn until estimated revenue and enacted appropriations, plus any previous year deficit, are in balance.

Appropriations are defined in section 3 so that the term covers annual expenditures out of debt receipts, etc., as well as ordinary appropriations.

The amendment, of course, is careful to provide that it is not applicable during periods when the United States is engaged in war declared by Congress or in open hostilities against an external enemy.

Remember that we have a debt of $275 billion, which is equivalent to the actual value of all the physical and tangible property in America, every acre of land, every house, every industrial plant, all the mines, and all wealth of that character. The present debt is equivalent to the full value of that wealth, not considering the contingent liability for other obligations which we have guaranteed on behalf of the Government, which, as I have previously stated, is approximately $200 billion. The latter is in addition to the $275 billion we owe directly.

The following is what I think must be done if we are to preserve the future fiscal security of the United States:

First. Balance the budget by reducing the spending. That is the only way to balance the budget.

Second. Hold the existing debt ceiling at $275 billion. This is more than enough for us to owe.

Third. Reduce taxes after reducing expenditures; it does not make sense to borrow money to reduce taxes.

Fourth. Short of national emergency, there can and should be a moratorium in all new spending programs until the Federal Government is showing a budget surplus.

To implement this program, we should do the following:

First. Provide for a single package appropriation bill as a substitute for the 12 appropriation bills we now have. This would clarify our appropriation procedure. This has already passed the Senate.

Second. Use more effectively the data obtained by outside commissions like the Hoover Commission.

Third. Reduce carryover funds now amounting to about $87 billion and simplify the whole budgetary machinery.

Fourth. Give the President the right to veto individual items in appropria-

tion bills. This has recently been favorably reported by the Senate Judiciary Subcommittee, as I have stated.

Fifth. Amend the Constitution to prohibit nonessential deficit financing, if it cannot be stopped otherwise. Such an amendment is proposed in the joint resolution introduced in the Senate today.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954

The Senate resumed the consideration of the bill (H. R. 5173) to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes.

The PRESIDING OFFICER (Mr. GOLDWATER in the chair). The Senator from Montana is recognized.

Mr. MURRAY. Mr. President, during the debate on the pending Reed bill, H. R. 5173, and upon the amendments to that bill offered by the junior Senator from Massachusetts [Mr. KENNEDY] and the junior Senator from Rhode Island [Mr. PASTORE], every Senator will have an opportunity to vote to increase the amount and extend the number of weeks' duration of unemployment-insurance payments to millions of unemployed workers. Should the Senate do this, it will be injecting into the bloodstream of our economy an estimated $2 billion a year of high-velocity dollars taken out of unemployment-insurance trust funds.

I have mentioned an estimated $2 billion a year. However, if the administration continues its wait-and-see policy of doing nothing about unemployment other than to offer more easy money to industrial and business interests, which are suffering not from a shortage of plant capacity but from a shortage of customers, unemployment may well increase by late 1954 or early 1955 to 7½ million workers. If that should occur, and we have had the good sense to vote for the amendments offered by the Senator from Massachusetts, then more than $4 billion will immediately be put to work to strengthen mass purchasing power and restore employment opportunities again.

Let it be clearly understood, Mr. President, that this figure of 7½ million unemployed is not mine; it is taken from Fortune magazine—an organ which has the respect and confidence of businessmen. If the administration's word merchants automatically pronounce me a prophet of gloom and doom when they see that I have used a figure of 7½ million unemployed, they will be sadly in error. They should apply such a title not to me, but to Republican Henry Luce, confidant of the president and publisher of the Fortune magazine.

Of course, Mr. President, Members of the Senate have another alternative. They can decide to do nothing about unemployment except to adopt the pending Reed bill as it now stands, thereby undermining the Federal-State unemployment-insurance system created under the Social Security Act of 1935, and insuring its eventual breakup and destruction. That system, I may remind my colleagues, inadequate as it now is, did ease the suffering and economic shock of unemployment during the mild recessions of 1938 and 1949, and during what Republican soothsayers call the rolling readjustment of 1953 to 1954.

Mr. President, I recognize the fact that doing nothing may seem attractive to those who at the 1952 Republican Convention cheered the pledge, given by the now senior Senator from Ohio [Mr. BRICKER], that in the event of a Republican victory the last vestiges of the New and Fair Deals would be destroyed. But my hope is that, face to face with large-scale, long-term unemployment that threatens to become chronic, we shall not wish to go through with the destruction that was pledged in the heat and enthusiasm of that convention and the campaign that followed. I prefer to believe that we shall take action here, by amending this bill, so as to strengthen, instead of weaken, the unemployment insurance provisions of the Social Security Act and the Unemployment Tax Act precisely along the lines recommended by President Eisenhower and Secretary of Labor Mitchell.

I favor the amendments of the Senator from Massachusetts [Mr. KENNEDY] to increase unemployment insurance benefits and extend the number of weeks duration not only because they match precisely President Eisenhower's 5-month-old recommendations but I also favor them and urge the Senate to adopt them because they are right. They are urgently needed not only to ease hardship and suffering among the unemployed and their families but also because the instant large increase in purchasing power that they will release will be as welcome to our economy as water on parched lands. They were right when President Eisenhower made them 5 months ago; they were right when Secretary of Labor Mitchell passed them on to the governors last February; they are right now, in July 1954, when the Senator from Massachusetts [Mr. KENNEDY] proposes that we do something about them before we go home to face our constituents, including between 3 and 4 million unemployed.

Mr. President, as one of the principal sponsors of the Employment Act of 1946 I was dismayed when, in the winter of 1953, President Eisenhower allowed the members and staff of the Council of Economic Advisers, created by that law, to be dispersed, and allowed their work, as required under that law, to lapse for a period of months. But I was somewhat encouraged when he later appointed new advisers who hired a new staff and, in their own way and fashion, resumed the work called for by the Employment Act of 1946.

Last January, I read with deep interest President Eisenhower's 1954 Economic Report to the Congress, called for by the Employment Act of 1946. Let me quote from that message sections bearing directly upon the subject and issue before us now:

> Unemployment insurance is a valuable first line of defense against recession. * * * But even as a first defense, the system needs reinforcement.

In other words, too much of the recession was breaking through the first line, the line of scrimmage, and was getting into the backfield, tackling the quarterback and the fullback and the two halfbacks before they could either pass or run with the ball. By that time, January 1954, the administration had found that simply easing the tight-money policy of the first 4 months of the Eisenhower administration was not enough, and had found that what our economy needed was purchasing power. Now, 5 months later, our economy still needs purchasing power; it needs customers with money to spend to meet their basic human needs.

What did President Eisenhower propose to do about "reinforcement" of the unemployment insurance system? He got quite specific; he got down to brass tacks. I quote again from his 1954 Economic Report, required under the Employment Act of 1946. In regard to the amount of weekly unemployment insurance payments, he said:

> It is suggested that the States raise these dollar maximums so that the payments to the great majority of the beneficiaries may equal at least half their regular earnings.

Clearly, in order to provide "the great majority" with payments equal to "at least half" their wages, the maximums would have to be increased to a level substantially above 50 percent of the average wage. This was spelled out later by Secretary of Labor Mitchell, as I shall show in a moment.

On the question of duration, President Eisenhower recommended:

> It is urged, therefore, that all of the States raise the potential duration of unemployment benefits to 26 weeks, and that they make the amounts available to all persons who have had a specified amount of covered employment or earnings.

Writing to the Governors February 16, 1954, Secretary of Labor Mitchell cited the fact that the Federal Advisory Council on Employment Security at its January meeting "took action supporting the President's recommendations on improving weekly benefits. The Council recommended that in each State, the maximum weekly benefit amount should be equal to at least 60 to 67 percent of the State's average weekly wage."

On duration, Secretary Mitchell told the Governors:

> The President has urged that all States provide 26 weeks of benefits uniformly to all eligible claimants, in order to assure that even in a minor business downturn most workers would remain protected by the program until they could find other jobs.

But today they are not being so protected, Mr. President. Now, 5 months later, we find that more than 600,000 workers exhausted their rights to unemployment insurance payments before finding other jobs—or being recalled to their former jobs. And more workers are exhausting their rights at the rate of 40,000 a week.

And on June 16, President Eisenhower, who knew in January 1954 that only 14 legislatures would meet in regular session in 1954, told his news conference

that he does not intend to call upon Governors to call special sessions of their legislatures to implement his own recommedation of last January and February.

So now, in July 1954, with employment in manufacturing continuing to fall steadily, with most economic indicators flying storm signals, the issue is up to us, to the Members of the United States Senate.

Shall we do, in the only way that was ever practical, what was suggested to the States last January and February by President Eisenhower and his Secretary of Labor, and which the States clearly would not and, as a matter of cold economic and political reality, could not do?

Or shall we turn our backs on the needs of the unemployed and their families, on the needs of our economy, on the need for strength of our Nation in terms of productive-force-in-being in these days of international tension, and go home empty-handed to tell the people in our States that the unemployment insurance part of President Eisenhower's legislative program was not really up to the Congress but is really a matter for individual State action, if not this year, then next year, or sometime?

Unemployment compensation laws in this country were the direct result of Federal action. The Social Security Act of 1935 made possible and led to the enactment of State unemployment compensation laws. That was its purpose. It was to eliminate the interstate competition which would have resulted had only scattered States passed laws.

In incorporating certain standards in the original act, Congress recognized the need of assuring that unemployment compensation laws were more than tax evasion devices. The Supreme Court in upholding the constitutionality of the act, stated:

> An unemployment law framed in such a way that the unemployed who look to it will be deprived of reasonable protection, is one in name and nothing more.

With increased unemployment, the Congress of the United States, which was responsible for the birth of unemployment compensation in this country, must against exercise responsibility to assure that unemployment compensation laws are more than laws in name only—that they afford workers protection by permitting them to maintain a reasonable and a decent standard of living during periods of unemployment and through this maintain purchasing power to prevent further unemployment.

That purpose would be accomplished by the Kennedy amendments. If the Kennedy amendments should be voted down by this body, the vicious trend toward transforming State laws into unemployment insurance laws in name only will not be maintained but accelerated because the enforcement of even the existing and weak few Federal standards will be undermined.

Mr. President, I have before me the text of a profound examination of the current battle that is on between two views of Government and society. It is an address delivered at Haverford College, June 13, 1954, by Solomon Barkin, economists for the Textile Workers Union of America, CIO. It is entitled "Governmental Action Necessary for Full Employment," and was delivered in a panel discussion held by the Labor Education Association at its 12th annual summer conference under the general title "A Labor Program for Full Employment."

I wish to quote excerpts from this address to show that the working people of this country are perfectly aware of what this fight is about here today in regard to the Kennedy amendments and to show my colleagues that the policies of this administration are not passing unnoticed but are being analyzed with great care and thoroughness by the labor unions, who take seriously their responsibility both to their members and to the national welfare.

Let me read some of the passages from this address which, it seems to me, are aimed at the center of the target in this debate. In the course of Mr. Barkin's address he stated:

> This country is divided on the level of unemployment which we shall tolerate and on the responsibility of our Federal Government to protect this number of jobs. Trade unionists and responsible liberal elements are lined up against the business interests and our national administration, callous to the high human costs of unemployment. The latter are quite tolerant, despite reluctant infrequent professions to the contrary, to the current volume of unemployment.
>
> This is not a new controversy. It is one which has divided our country during the postwar years. The attack on the welfare state and President Eisenhower's plea for taking the Government out of economics are made of the same matrix. The men who support this view defeated the full employment pledge proposed in 1946. The Employment Act as adopted merely demands that it shall be the "continuing policy and responsibility of the Federal Government to promote maximum employment, production, and purchasing power." The business community has not accepted its responsibility of developing a full-employment economy. It is satisfied with high employment and a continuing large group of unemployed.
>
> The battle is between two views of government and society. One places the preservation of the economic and personal vitality of the worker as the prime determinant of action; the other is indifferent to the sacrifices of these values, hopefully expecting private business to provide a continuing high level of employment discouraging severe political eruptions, without taxing its economic ingenuity.
>
> We stand in opposition to the present administration in its attitude toward unemployment. All persons willing to work should have an opportunity for employment. During the last 15 years, the Nation has urged all to work because we have had a shortage of workers to execute the tremendous production program. We learned that jobs can be designed to employ all who want to work. The handicapped and the older persons, hitherto placed on the scrap heap, can be profitably employed. Work can be fashioned to provide jobs for those who need part-time employment.
>
> Government must underwrite full employment. Without such governmental activity, we would not have had and shall not have full employment. The tremendous burden of the 40-year war to which President Eisenhower referred Thursday night can be eased by having everybody contribute their efforts and minds. How can we hope to assist undeveloped nations to build up sound and expanding economic and political systems if we waste our own resources through unemployment and idle capacity? Is it not wiser to stimulate physical output, to raise our standards and to facilitate our contributions to the peoples abroad than to concern ourselves with the paltry deficits which can be wiped out by a fair tax system?

> This conflict in views has been sharpened during the year by statements of the President, the Secretary of the Treasury, and particularly the Chairman of the Council of Economic Advisers. The latter has rejected the philosophy of the former Council Chairman, who assumed that the Council had not only to follow our current economic developments, but also to set the guideposts for legislative and administrative action on the basis of a growing, fully employed economy in which standards of living are being constantly raised. Our economic prowess was to be translated into a fuller life. The deficiencies in our opportunities and the substandard levels were to be eliminated. But the new Council Chairman will have none of it. He is a business economist who deals with indicators of activity which compare the present with the past, but omits any reference to our expanding population and productivity and the vision of progress so fundamental to the American philosophy. For truly, as Prof. Sumner Slichter has said, the present Council of Economic Advisers has accepted a "level of unemployment" which is "considerably higher than the people of the country will find tolerable."
>
> The administration is gambling with the well-being of millions of idle Americans suffering from the importunities of unemployment. It has continued to rely on economic stabilizers built into the economy by previous administrations. It awaits industrial growth, hopefully anticipated from the lavish bounties it has recommended. It relies on Congress to grant these bequests to business and property owners, for it knows that Congress is steeped in the tradition that the motive force of our economy is profits, whether gained from true enterprise, Government subsidy, or tax concessions and exemptions to monopoly powers. The big-business interests are risking our country's future on the chance that tax concessions to business and the governmental guaranties on housing loans will stem the tide. Instead, therefore, of addressing itself wholeheartedly to the problem of creating full employment, the administration has flooded us with words of faith, speeches exhorting patience, and news releases replete with glowing statements of confidence that the turn has come and the future is sure. Instead of a recession, we have been told we are experiencing a rolling adjustment, a transition, or a correction. While it no longer condemns critics as prophets of doom, it has not abandoned its deliberate efforts to talk us into a business recovery.

>
> Can we recover from our present recession through stimulation of investments? The administration looks at production figures

and compares them with the previous year's output. Is this the proper measure of success in our economy? We who are dedicated to a full employment economy cannot accept this test.

* * * * *

The May 1954 Census Bureau report shows the number as being 3,305,000. To this group we must add those people who technically have jobs, but are not at work because of layoffs and expecting future jobs; these number 848,000. Then, there are the people who have been counted out of the labor market, but who are, nevertheless, eligible for work; these number some 700,000 (the calculation is based on the May 1952 levels of work participation). We are, therefore, definitely confronted with the challenge of finding 4,930,000 more jobs than are being held at the present time.

* * * * *

Equally significant is the fact that 133 of the 145 labor market areas are now classified as labor surplus areas, and there are no areas with labor shortages. The United States Department of Labor has found it necessary to establish a new classification—"substantial labor surplus" (12 percent or more) for 6 cities; 3 of these are in Pennsylvania (Altoona, Johnstown, and Wilkes-Barre-Scranton), 2 in New England (Lawrence and Providence), and 1 in Wisconsin (Kenosha).

* * * * *

The economy now enjoys the benefits of some corrective devices which moderate the impact of unemployment and therefore serve as stabilizers. However, they are not stimulants of expansion. The unemployment insurance program provides a fallback for many workers, but the benefits tend to be small and run out quickly. Assistance to the needy is even more limited. Old age benefits have been increased and the present congressional action may expand them still further. But offsetting the former has been the marked rise in contributions, estimated at three-fourths billion dollars, and largely paid by lower-income groups, and the latter will also be accompanied by a higher volume of taxes. These payments are necessary brakes on contraction, but not activators of new industry.

Income tax reductions at the beginning of the year benefited many, but the lowest income group had it offset by the higher social security contributions. The new tax program is aimed at helping the higher-income groups again.

* * * * *

A. Programs necessary to stimulate greater purchasing power:

* * * * *

3. Adopt Federal minimum standard for unemployment insurance benefits requiring benefits equal to 50 percent of the State average weekly wage for 39 weeks.

I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks the full text of Mr. Barkin's address. In doing so, I urge my colleagues to give it their close and careful attention.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

This country is divided on the level of unemployment which we shall tolerate and on the responsibility of our Federal Government to protect this number of jobs. Trade unionists and responsible liberal elements are lined up against the business interests and our national administration, callous to the high human costs of unemployment. The latter are quite tolerant, despite reluctant infrequent professions to the contrary, to the current volume of unemployment.

This is not a new controversy. It is one which has divided our country during the postwar years. The attack on the welfare state and President Eisenhower's plea for taking the Government out of economics are made of the same matrix. The men who support this view defeated the full employment pledge proposed in 1946. The Employment Act as adopted merely demands that it shall be the continuing policy and responsibility of the Federal Government to promote maximum employment, production and purchasing power. The business community has not accepted its responsibility of developing a full employment economy. It is satisfied with high employment and a continuing large group of unemployed.

The battle is between two views of Government and society. One places the preservation of the economic and personal vitality of the worker as the prime determinant of action; the other is indifferent to the sacrifices of these values, hopefully expecting private business to provide a continuing high level of employment discouraging severe political eruptions, without taxing its economic ingenuity.

We stand in opposition to the present administration in its attitude toward unemployment. All persons willing to work should have an opportunity for employment. During the last 15 years, the Nation has urged all to work because we have had a shortage of workers to execute the tremendous production program. We learned that jobs can be designed to employ all who want to work. The handicapped and the older persons, hitherto placed on the scrap heap, can be profitably employed. Work can be fashioned to provide jobs for those who need part-time employment.

Government must underwrite full employment. Without such governmental activity, we would not have had and shall not have full employment. The tremendous burden of the 40-year war to which President Eisenhower referred Thursday night can be eased by having everybody contribute their efforts and minds. How can we hope to assist undeveloped nations to build up sound and expanding economic and political systems if we waste our own resources through unemployment and idle capacity? Is it not wiser to stimulate physical output, to raise our standards and to facilitate our contributions to the peoples abroad than to concern ourselves with the paltry deficits which can be wiped out by a fair tax system?

An era of full employment is not only financially and economically wise, but also is necessary to the mental health of our people. In the years gone by, when we enjoyed a minimum of unemployment, social tensions were reduced. We raised our individual and national well-being so that we provided a model for the rest of the world. Now, we shrink with apologies for our unemployment. Optimism then pervaded the American worker's outlook rather than the doubt and uncertainty which now corrodes his outlook, implanting feelings of insecurity.

People, in the era of full employment, could have jobs which suited them best. Employers tried then to place people on jobs which fitted them. Personnel policies became more generous. Collective bargaining operated in a favorable atmosphere. Social tensions were reduced and the barriers to minority groups were lowered. They favored the progress which brought the now-famous Supreme Court decision on segregation. These gains are now endangered by the discontent, pessimism, and suspicion engendered by the onrush of insecurity pervading our present society. Now we get rigorous selection of applicants and the signs of the scrap heap are beginning to appear.

Only a distorted sense of economy can tempt one to insist upon a balanced national budget in preference to a balanced national economy. Our economic balance must be measured not by such accounting devices as the state of the national budget, but by our success in utilizing efficiently and fully our resources and manpower. While there is unemployed manpower, we have an imbalance and a waste which should be more disturbing than any financial deficit recorded on a budget statement. A fully employed economy can easily, through legislation, eliminate any budget imbalance which may exist. The preachments of the budget balancers are no more than the outcries of the rich and the economically powerful against taxation of their income and wealth.

This conflict in views has been sharpened during the year by statements of the President, the Secretary of the Treasury, and particularly the Chairman of the Council of Economic Advisers. The latter has rejected the philosophy of the former Council Chairman, who assumed that the Council had not only to follow our current economic developments, but also to set the guideposts for legislative and administrative action on the basis of a growing, fully employed economy in which standards of living are being constantly raised. Our economic prowess was to be translated into a fuller life. The deficiencies in our opportunities and the substandard levels were to be eliminated. But the new Council Chairman will have none of it. He is a business economist who deals with indicators of activity which compare the present with the past, but omits any reference to our expanding population and productivity and the vision of progress so fundamental to the American philosophy. For truly, as Prof. Sumner Slichter has said, the present Council of Economic Advisers has accepted a level of unemployment which is considerably higher than the people of the country will find tolerable.

Full employment has not been mentioned in its report to the President. It speaks only once of reasonably full employment, which is an inadvertent reference rather than a specific declaration of responsibility. Nowhere in its report does it specify the levels of employment required to carry out the purposes of the Employment Act of 1946, although the act calls for such estimates.

The Council has failed to budget our national economic accounts. It has destroyed itself as an instrument for testing our national performance. It has become an apologist for delay and inaction. Along with the administration, the Council stands convicted of a desire to perpetuate partial unemployment. This goal has been earnestly sought by sectors of the American business community anxious to weed out the less efficient workers, to best the trade union movement in bargaining, and to reduce production operations to manageable proportions for higher internal efficiency.

The administration is gambling with the well-being of millions of idle Americans suffering from the importunities of unemployment. It has continued to rely on economic stabilizers built into the economy by previous administrations. It awaits industrial growth, hopefully anticipated from the lavish bounties it has recommended. It relies on Congress to grant these bequests to business and property owners, for it knows that Congress is steeped in the tradition that the motive force of our economy is profits, whether gained from true enterprise, Government subsidy or tax concessions and exemptions to monopoly powers. The big business interests are risking our country's future on the chance that tax concessions to business and the governmental guaranties on housing loans will stem the tide. Instead, therefore, of addressing itself wholeheartedly to the problem of creating full employment, the administration has flooded us with words of faith, speeches exhorting patience and news releases replete with glowing statements of confidence that the turn has come and the future is sure. Instead of a recession, we

have been told we are experiencing a rolling adjustment, a transition or a correction. While it no longer condemns critics as prophets of doom, it has not abandoned its deliberate efforts to talk us into a business recovery.

THE UNEMPLOYED

Can we recover from our present recession through stimulation of investments? The administration looks at production figures and compares them with the previous year's output. Is this the proper measure of success in our economy? We who are dedicated to a full employment economy cannot accept this test. We assume that the measure is the amount of unemployment and underemployment. Are we providing people with jobs? Are we increasing the number of our jobs to correspond to the rise in the number of job seekers? Are they all enjoying the benefits of rising productivity through higher living standards? These are the gages of success. The test is not past, but present needs.

Unemployment is intolerably high. The May 1954 Census Bureau report shows the number as being 3,305,000. To this group we must add those people who technically have jobs, but are not at work because of layoffs and expecting future jobs; these number 848,000. Then, there are the people who have been counted out of the labor market, but who are, nevertheless, eligible for work; these number some 700,000. (The calculation is based on the May 1952 levels of work participation). We are, therefore, definitely confronted with the challenge of finding 4,900,000 more jobs than are being held at the present time.

In addition, there were 8,344,000 persons working less than 35 hours per week. The May survey of the labor force reports that there were 3,550,000 workers who usually worked full time at their present job, but who were working part time. About one-half of these people ascribed the part-time schedule to economic factors. The number in May represents an increase of 100,000 over March and 430,000 over December 1953.

In the week of May 22, 2,078,731 workers were receiving unemployment benefits; they constituted 5.7 percent of the total covered employees. In addition, 76,593 persons were receiving unemployment benefits under the Veterans' Readjustment Assistance Act. Equally significant is the fact that large numbers of workers have exhausted their unemployment insurance benefits.

Even though there was a slight drop in the number of unemployed in May, it was smaller than the usual seasonal drop of preceding years. The reduction was due primarily to the pickup of 750,000 jobs in agriculture. Actually, in the nonagricultural employments, there was a decline of 124,000, localized primarily in the manufacturing, wholesale, and retail industries, where a drop of 274,000, was offset by a slight rise in construction, transportation, finance, and government.

There is general agreement that there was a rise in unemployment in June and that it will continue through the next few months.

Equally significant is the fact that 133 of the 145 labor market areas are now classified as labor surplus areas, and there are no areas with labor shortages. The United States Department of Labor has found it necessary to establish a new classification—"substantial labor surplus" (12 percent or more) for 6 cities; 3 of these are in Pennsylvania (Altoona, Johnstown, and Wilkes-Barre-Scranton), 2 in New England (Lawrence and Providence), and 1 in Wisconsin (Kenosha).

We are, therefore, faced with the huge challenge of finding new employment and doing it quickly. There are millions of people being demoralized and losing their work qualifications. Some one-third of those counted officially as unemployed have been out of work for 15 weeks or more. Unemployment is most severe among the oldest and youngest age groups, and among the nonwhite population.

CAN WE EXPECT SPONTANEOUS RECOVERY TO FULL EMPLOYMENT?

To evaluate our ability to restore full employment without vigorous governmental action, we must determine the factors which precipitated our current widespread unemployment, and whether they contain the roots of their own correction. After consideration of these factors, we will conclude that it is not likely that there will be such adjustments without substantial governmental aid and stimulation.

1. A factor given considerable prominence has been the contention that we are living through an inventory adjustment. Considerable plausibility was given this argument, since business went through an inventory boom at the beginning of 1953. Since then it has declined, so that after a building-up rate of $3 billion in the third quarter, inventories actually were shaved at a rate of $3 billion in the fourth quarter, and $4.8 billion in the first quarter of 1954. In the second quarter it is probable that inventories have remained about on par, with no signicant net movements. However, there are areas where inventories are still too high and other places where they are down to current-use level. In May, the National Association of Purchasing Agents reported that one-third of the firms are still paring their inventories. Seasonal buying is likely to drain inventories below workable levels in few areas, but these are offset by significant inventories in others.

At the end of April 1954, the overall business economy showed $1.67 of inventory for each dollar of sales. It was only 2 cents below September 1953 and 3 cents below November 1953 or February 1954. Inventories in manufacturing are at the level of $1.86 per dollar of sales, equal to September 1953, but below February 1953 when it was $1.95. Wholesale inventories per dollar of sales have been relatively stable at $1.29 per dollar of sales since September 1953. Significantly, the inventories at the retail level have dropped only conservatively, from $1.64 per dollar of sales in September 1953 to $1.59 in April 1954; this was representative primarily of the drop in inventories of durable goods from $2.24 inventory per dollar of sales in September 1953 to $2.11 in April 1954. Nondurable goods inventories per dollar of sales has been stable at about $1.31.

Inventories are not light. Nor do inventory shortages promise to provide the corrective. As a matter of fact, inventories of automobiles are very heavy for this time of year. Only a significant upsurge in buying will change the picture.

2. Consumer credit: Another factor which has been blamed has been the contraction in consumer credit. It is true that the excessive splurge has brought us face-to-face with the fact that over-extended personal debt leads to contraction. In 1953, consumer credit rose by $3.1 billion. In the first quarter of 1954, the drop was $380 million, or at the rate of $1.5 billion. In April it rose slightly, by $200,000, primarily in charge accounts which do not represent the lower income groups. This is primarily middle-class buying. Installment credit continues to decline. Repayments and reclamations on delinquencies continued to loom large. But the low rate of liquidation in view of shrinking national income has not opened up a real reservoir of potential debts.

With the large mortgage debt hanging over the American people and the continued high volume of consumer debt, the liquidation of consumer credit has not taken place at a rate which insures a corrective.

3. Defense and governmental expenditures: A markedly important deflator has been the reduction in governmental defense expenditures. During the first quarter they were down to $47 billion, a reduction from $53.5 billion in the second quarter of 1953 and $50 billion in the fourth quarter. It is probable that the second quarter of 1954 will show a further decline to the level of $45 billion, and that, in the next fiscal year, it will continue at this same amount. We can, therefore, only continue to expect the present level of defense expenditures.

Federal nonmilitary expenditures have been dropping and will continue to decline, but State government expenditures have been rising at times in sufficient volume to offset the drop in Federal Government nonmilitary expenditures.

We cannot look forward to any sharp reversal on expenditures in this area unless there are major changes in national policy.

4. Prices: Wholesale and consumer prices have remained relatively stable with wholesale prices rising slightly and consumer prices tapering off. A resurgence in buying power from a reduction in prices is not visible. Individual sales have shown buyers eager for bargains and lower prices. But the American business community is not ready for so radical a step as general price cuts. Despite its talk about competition, it is not competing on a price basis. Management offers alternative price lines without reducing its price margins. Even the automobile industry continues to maintain its prices, despite strong pressure from its distributors. The iron and steel industry, operating most profitably at a 67 percent level, with a break-even point below 50 percent of operations, talks of raising prices to compensate it for contemplated wage increases.

American management, which has enjoyed a tremendous largess in the form of the cancellation of excess-profits taxes has not passed this on to the American people. Even with respect to the reduction in excise taxes, there are many illustrations of prices being maintained to permit the sellers rather than the buyer to capture these benefits.

Our price structure has not reflected the rising productivity which has reduced costs of manufacture. They have increased management's ability to maintain highly profitable operations even at the lower levels of output.

This program of continued price rigidity, of course, spells further discouragement to our capacity for opening up new vast pockets of buying power through lower prices.

5. Expenditures on new plants and equipment: Much of the faith of the present administration in our economic future is dependent upon continued large expenditures on new construction and new plants and equipment. Truly, the present economic system could be kept at very high levels through industrial and production expansion. Essentially, this program can rest on either one of two factors: (1) The development of new, alternative products or more economical methods of production or (2) expanding consumer demand. The latter is not likely to be a vital force unless we maintain an expanding, full employment economy and invent new forms of consumer debt. In the words of the Wall Street Journal, we have built up an "industrial capacity * * * to cover not only [normal peacetime musts] but also accumulated shortages, the needs of a war and the very large requirements of a rapid industrial expansion program. * * * The Nation's productive system [has] ample room for the satisfaction of desires as well as needs." New products and methods must therefore be the primary determinant of the volume of new plant and equipment.

It is difficult to project the probable volume of new products and methods, but there are many indications that it is not currently of such magnitude as to make up for the decline in military expenditures or governmentally financed private expenditures. The Journal of Commerce for June 11, 1954, reports that the "short-range or intermediate term business picture is guid-

ing manufacturers in new plant and equipment investments to a greater extent than at any time since World War II." It reports that some manufacturers "have cut sharply on investments because they lack working capital and no longer can finance investments out of earnings." Moreover, the article adds that "mergers forced by competitive conditions are resulting in the release of surplus plants in some cities (which) is contributing to the slowing down of new plant construction. * * * On balance, sales of machinery are making a better showing than construction of plants."

These conclusions are in part reflected in the estimates of projected capital outlay released by the SEC and the Department of Commerce which indicate a probable decline in expenditures through the rest of 1954. The drop is occurring in every area except commercial and office buildings. Expansion in the latter fields is continuing primarily because of the more recent suspension of emergency controls and the opening of new communities and suburban areas.

The Government is counting on the stimulation expected from the new provisions for accelerated depreciation in the proposed tax law. While it will no doubt have some such effect in marginal cases, the end result will be quite modest in face of the contraction in civilian demand. The damage done by the shift in the burden of taxation and by the creation of more inequalities will far exceed the advantages from economic stimulation.

Only a large-scale program of atomic power development could have the multiplier effects for which the administration is looking. Moreover, the concurrent rise in man-hour productivity through the scrapping of older equipment and buildings and through more efficient machinery and operations probably mean lower employment in existing industries. This is the basis for the distress in the textile industry and divisions of the electrical manufacturing, and is the general threat which confronts us. The larger capital investment in machinery will compound our difficulties if the volume of capital and consumer expenditures does not compensate for the decline in Federal expenditures.

6. Housing construction: Residential housing construction has helped maintain our current level of economic activity. Last years' levels are being matched. It is substantially accounted for by the availability of new funds brought about by the granting of mortgages to veterans for 30 years with no downpayments. Interest rates, which had been rising, have returned to the former levels following the easier money policy instituted by the Federal Reserve Bank System. However, there is little likelihood of any marked rise in volume from this source, even with the possible approval of the modest 35,000 per year program of public housing. We shall be happy, under present circumstances to maintain the existing volume of new housing.

7. Wage increases: A real potential corrective factor is wage increases. This action could stimulate considerable new buying power. However, the volume of immediate buying power will be limited in that the sums being considered are in the range of 5 to 10 cents per hour. In addition, some part of the gains are in forms which do not create immediate buying power, such as pensions; funds of a guaranteed annual wage or reserves for benefit funds. Finally, large numbers of workers will receive smaller sums, and others none at all. Concurrently, there are other areas where the workers are being compelled to take wage reductions or limitations on benefits or other types of reductions in income. These are located primarily in the low-wage industries and marginal plants.

In the meantime technological improvements are curtailing employment and reducing the number of persons benefiting from the wage increases. Wage increases are significant stimulants, but are currently not large or widespread enough to turn the tide in and by themselves.

8. Current governmental action: With the exception of the influence of wage increases, State and local expenditures and capital improvements, we cannot rely upon the above factors to offset the large reductions in governmental expenditures so as to correct the present condition of widespread unemployment. Rather, we might well conclude that many of the above factors have not run their downward course, while others, like technological change, carry the causes of further reductions in employment.

The economy now enjoys the benefits of some corrective devices which moderate the impact of unemployment and therefore serve as stabilizers. However, they are not stimulants of expansion. The unemployment insurance program provides a fallback for many workers, but the benefits tend to be small and run out quickly. Assistance to the needy is even more limited. Old-age benefits have been increased and the present congressional action may expand them still further. But offsetting the former has been the marked rise in contributions, estimated at three-fourths of a billion dollars, and largely paid by lower income groups and the latter will also be accompanied by a higher volume of taxes. These payments are necessary brakes on contraction, but not activators of new industry.

Income tax reductions at the beginning of the year benefited many, but the lowest income group had it offset by the higher social security contributions. The new tax program is aimed at helping the higher income groups again.

9. Personal income: Personal income has been declining steadily in the current recession. From July 1953 through April 1954 income has dropped at an annual rate of $5.3 billion despite the rise in population. The primary cause has been the reduction in wage and salary income. Farm proprietor income has been only slightly lower as it has been propped up by large governmental purchases. Dividend and interest payments have been rising. The continued large scale unemployment will deter any increase in this critical sector of the economy.

Much comment has been directed to the large volume of retail sales. These have been sustained only slightly below the previous year's level but our population has risen so that per capita sales have actually declined. The critical fact is that May sales were considerably below April and the June reports are not reassuring. The impending summer slump months are going to remove even more of the bloom from the above reports.

GOVERNMENT ACTION HELPED MAINTAIN CURRENT ECONOMIC STABILITY

A review of the individual sectors of our economy indicates that there are few sources within it that can provide us with any real resources for spontaneous corrective factors to restore a state of full employment. The reliance on private action rests on a belief among some people that there is an untapped fount of new products or processes which will stimulate investment. We have already commented upon this view and have concluded that they do not provide us with a safe ground for a confidence in economic resurgence and in all probability will be inadequate. Others trust in consumer buying. They overlook the fact that shrinking income induces more cautious buying. The consumer is already overladen with mortgages and short-term debt. His savings are not in liquid condition and it is unevenly distributed so that the lower and middle income groups have a relatively small proportion.

Those who disapprove of governmental action must, of course, recognize that the present high economic level is being sustained by governmental economic programs, aids, subsidies, and incentives. The large governmental expenditures on national security as well as Federal and local governmental expenditures are major props for our current economy. Similarly we must add deposit guaranties. There are also mortgage guaranties which are stimulating residential housing construction. Accelerated depreciation benefits have helped initiate many current projects for industrial building and machinery expansion or replacement. Similarly tax exemptions and benefits have favored other industrial projects.

Unemployment and old-age security benefits and financial assistance programs are contributing substantially to maintenance of the incomes of millions of persons and families.

The major conclusion flowing from the above analysis is that the present private and public programs have been able to stabilize our economy but are hardly sufficient to induce the measure of recovery necessary to insure a rise in production and demand necessary for the full employment of the 4,900,000 unemployed.

These conclusions are corroborated by the results of a survey by Dun & Bradstreet reported in Dun's Review and Modern Industry for June 1954. It found that business on the whole expected a rise in net rates and profits whereas they predominantly expected no increase in employment, which in view of the rising population suggests a rising number of unemployed. Optimistic expectations for the third quarter of 1954 as compared with the third quarter of 1953 were held by 46 percent as to net sales, 38 percent as to net profits and 40 percent as to manufacturers' orders. As for selling prices the general outlook (74 percent) was for no change. Inventories would probably be leveled out. Eleven percent expected increases in employment and a like proportion reported probable reductions and 78 percent expected no change. (Dun's Review and Modern Industry, June 1954, p. 68.)

A PROGRAM FOR FULL EMPLOYMENT

We are herewith outlining a series of steps necessary to be undertaken by the Federal Government in order to realize the goal of underwriting an era of full employment with a rising standard of living for the people of this country.

A. Programs necessary to stimulate greater purchasing power

1. Increase the minimum wage from 75 cents to $1.25 and extend its coverage.

2. Liberalize the Federal old-age security system.

3. Adopt Federal minimum standard for unemployment insurance benefits requiring benefits equal to 50 percent of the State average weekly wage for 39 weeks.

4. Increase the personal exemption under the Federal income tax law from $600 to $800.

5. Repeal of the Taft-Hartley Act to support the extension of unionism and collective bargaining in areas not now organized.

B. Programs necessary to stimulate capital investment

1. Expand Federal, State, and local public works programs for schools, roads, hospitals, water and sewer systems, river valleys, and similar public functions.

2. Increase local resource study and development.

3. Promote basic research and development of atomic power experiments and application.

4. Financial and managerial aid to small business to encourage new enterprise.

5. Expand foreign aid programs to underdeveloped nations in need of capital.

6. Institute a more extensive public housing program.

C. Programs necessary to reduce excessive prices

1. Institute a system of public review of consumer complaints against excessive prices by a Federal trade agency to determine the levels on which specific prices may be properly reduced.

The adoption of the above programs is rightfully the responsibility of the Federal Government. For it to discharge its full obligations for the maintenance of maximum employment, it should not only determine the magnitude of the deficiency in jobs, but prescribe the desirable areas for promotion of activity and purchasing power. The above programs provide the framework for specific action whereby buying power may be stimulated either through higher income or lower prices, or both, and the promotion of new jobs through new capital developments undertaken by both private and public ventures.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY].

Mr. UPTON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. AIKEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

THE CURRENT NEED FOR ANTIRECESSION ACT

Mr. MORSE. Mr. President, I wish to discuss the pending legislation. I am fearful that the urgency of the need for improving the unemployment-compensation laws and bringing them up to date may be obscured by the steady stream of rose-tinted propaganda about the state of our domestic economy that has been flowing from the spokesmen of the Republican administration during the whole course of the Eisenhower recession.

In fact, Mr. President, I was a little amused this morning when I picked up the newspaper and read of the President's speech, via the Vice President, before the governors' conference in which he advocated a great road-building program which will cost between $40 billion and $50 billion. I ask the simple question, Where was the President on that issue early this year when the junior Senator from Oregon stood on the floor of the Senate and pointed out that what was needed, according to the testimony of every road expert who appeared before the Public Works Committee, was an expenditure of between $30 billion and $40 billion to put the highways of the Nation in proper shape. It was pointed out in the testimony that we cannot reduce by more than a small fraction in the murdering of between 38,000 and 40,000 people a year on the highways of America unless we are willing to build an adequate system of highways across the country, east and west, and north and south.

The President is great on promises, particularly, of course, as we are approaching a political campaign. We now have some Republican propaganda presented by the President before the governors' conference at New York with respect to a suggestion for a great highway construction program. However, the President should have been acting in support of that kind of program earlier this year when some of us were suggesting, as a step toward ending the recession from which the economy of the country has been suffering now for more than a year under Eisenhower, that we go forward with a road-building program which could really be called a road-building program. Instead, we adopted a program costing in the neighborhood of $1 billion, when, in my judgment, we should have gone forward this year with a program of at least $3 billion, and we should have made plans to go forward with a program of at least that amount next year, and more the following year.

I become a little weary, Mr. President, of this repetition of Republican promises. I heard them all through the campaign in 1952. The present majority party is strong on promises, but very weak on delivery. Yesterday the President was months late even in talking about a road-building program. If he meant it, why was he not giving support earlier this year to those of us who urged a road-building program in order to help to meet the Eisenhower recession?

THE FUNCTION OF UNEMPLOYMENT COMPENSATION

Mr. President, unemployment compensation is one of the measures enacted by Democratic administrations to mitigate the hardships of unemployment upon workers and their families. Its purpose also was to help to maintain the purchasing power of the people during a business letdown so that matters will not go from bad to worse.

Because we are now in the tenth month of a business recession of no small proportions, it is time to take a realistic look at the unemployment compensation system to see if any genuine help can be expected from it in combating the recession. When first enacted, the purpose of these laws was to give an unemployed worker compensation equal to 50 percent of the wages he would earn if employed. Many State laws still retain that principle, but only in words. In practice the principle is vitiated because the maximum compensation permitted under State laws now amounts to only about 30 to 35 percent of average weekly wages. Over the years prices have gone up, wages have gone up, profits for the few have gone up, rents and interest have gone up, but unemployment compensation rates have been tied to a post. Present compensation payments simply are not adequate to accomplish either of the two purposes for which we enacted this law nearly 20 years ago. They do not protect the worker or his family from hardship. They will not, and cannot, provide any substantial support to the economy against the kind of dangers that now threaten it.

THE CURRENT ECONOMIC SITUATION

I do not want the Senate to vote upon this important question under any misapprehension about how real those dangers are. I do not want Senators to act upon the false optimism that the spokesmen of the Republican administration are working so hard to persuade them to accept and rely upon.

THE SIGNIFICANCE OF CURRENT UNEMPLOYMENT FIGURES

We had a typical example of this only last Wednesday. On Wednesday the Departments of Commerce and Labor issued their joint report on employment and unemployment. Much was made in that report of the continuing decline which has taken place in the number of "insured unemployed." Who are the "insured unemployed"? They are the workers currently receiving compensation under the law which we are considering today. They are not all the unemployed. Oh, no, they are the unemployed who, in the first place, have passed the qualification tests—and in some States these are no mean tests to pass—and are receiving compensation benefits. In the second place, they are unemployed workers who have not yet exhausted their rights to receive compensation. I am told that the average duration of benefit payments, taking all the qualifications and limitations in State laws into account, is probably about 16 weeks. If a worker still has not found suitable employment when his benefit period comes to an end, he then ceases to be one of the "insured unemployed." He is just unemployed, period.

How much encouragement, therefore, are we entitled to draw from the fact that the number of the insured unemployed has been declining since about March 1? The Department of Labor would have us take great cheer from it. They publish the insured unemployed figure every week, and every time the figure has gone down they have taken pains to make it sound very hopeful indeed. But the number of workers who exhaust their benefit rights in the week they do not publish. These figures they publish only for a month as a whole, and tardily.

While Wednesday's release made so much of the continuing decline in the insured unemployed, the Department of Labor did not take pains to tell us that, while the figure has been reduced by 300,000 since the 1st of March, 457,000 workers exhausted their benefit rights in March, April, and May. It is true that some of these may later have found employment, and others have been returned to the unemployment insurance rolls at the beginning of what the States call a new benefit year. We have no figures on these. But by and large it is quite clear that the figures which the Department of Labor would encourage us to cheer about do not reflect an improvement in the condition of the unemployed to anything like the degree advertised by the administration last week.

"Out of sight, out of mind" may be a rule of conduct satisfactory to Government officials bent on obscuring from the public eye the seriousness of the recession we are in. But it is of no cheer to a worker who, after carrying his family along on inadequate benefits for 16, 20, or 26 weeks, as the case may be, then finds himself with no benefit payments and no job either.

IMPROVED UNEMPLOYMENT COMPENSATION NEEDED

It is my belief, Mr. President, that the time has come to look at the facts of this recession without blinking, and to insist that the Republican administration do something better to restore us to prosperity than the mere issuance of gilded statistical reports. One thing we can do in this body today is to vote for substantial improvements in our out-of-date and inadequate unemployment compensation system.

It is not my purpose, Mr. President, to put fear in the minds and hearts of our people. I know how cleverly the disciples of the administration's see-nothing, do-nothing program seek to protect their policy of inaction and evasion from criticism. They stand ready at a moment's notice to brand anyone who dares to look at a fact, see it as a fact, and talk about it as a fact, as an apostle of gloom and doom, a perpetrator of disaster—indeed as one very close to treason. With such character assaults they would strike down anyone who so much as dares to expose their refusal to act responsibly in the light of the facts and of experience.

I reject this philosophy of theirs and I repudiate their attack upon me before they launch it, as I know they will, because they did it all fall and winter. They do not speak for the rank and file of American people. Their fear of facts and their incapacity to act are not shared by the citizens of this country. We Americans are not like that. Given wise and bold leadership, our people will take the facts in hand and do what the situation requires to put things to rights. We proved that in 1933 when, under President Franklin D. Roosevelt, we picked ourselves up from the bottom and set to work rebuilding a way of life for ourselves and our children.

The national leadership today is in large measure reenacting the same escape from a responsibility to govern, the same willful blindness in the face of mounting distress for the mass of people, the same false optimism engendered by the prosperity of a few at the top, that led to the overwhelming economic tragedy of 1929. Now, as then, the policy is to close the eyes and wear a hopeful smile; to do as little as possible, and always promise that on some vague tomorrow action will be taken that is required today—indeed, action that was required yesterday.

PARALLELS WITH 1929

There are other disturbing parallels between the situation of today and that of 1929. Factory employment has been falling, the purchasing power of the people is far below what is necessary to provide markets for the output of full employment, yet at the same time corporation profits hold at a high level and day after day stock prices reach new highs in a strong bull market. This booming stock market in the midst of accumulating hardship should bring a chill to anyone who remembers 1929.

I do not say, and I do not believe, that we are today on the brink of a disaster of the proportions of 1929. The makings of that situation are present, but we have safeguards today which we did not have then. In addition to unemployment insurance, inadequate as it is, we have pensions for the aged, farm-price supports, insurance for bank depositors. These and other measures introduced under Democratic administrations stand today as a bulwark to protect our economy from the full effects of the Republican administration's misguided policies.

The indifference of Republican leaders to the widening spread of human misfortune in this country shows how great a reliance they place upon these safeguards which they had not the wit to set up in the first place and attacked so venomously when Democratic Congresses enacted them.

My mail tells me that Republicans throughout the country do not take the same view as that taken by the Republican leaders of this administration. In fact, this administration has increased the supply of only one thing—ex-Republicans.

I for one, Mr. President, am not content to let things drift from bad to worse simply because I have some assurance that we are protected from the kind of catastrophe that engulfed us in 1929. And I must say that this assurance is chilled somewhat when I hear proclaimed the same basic fallacy that played so large a part in bringing us to our economic downfall 25 years ago.

I thought we had learned 25 years ago that it was not enough to shape public policies for the enrichment of those who are already rich. I thought we had discovered 25 years ago that profits and dividends will not carry us along if the purchasing power in the hands of the people fails to keep pace with the growth of our population and the expansion of our productive power.

But here we are again. The Republican administration has forced through a tax bill which yields over 90 percent of its bounties to corporations and to the people at the top. We are told that this is the medicine our ailing economy requires.

Is the stock market not doing well enough without these bounties? Stocks go higher day after day while more and more people join the ranks of the unemployed. How much more of this deadly parallel with the last Republican regime must we reenact? How much longer do we do nothing to reverse this trend and start getting our people back to useful work?

ADMINISTRATION FAILURE TO COUNTERACT EFFECTS OF TIGHT MONEY POLICY

The administration imposed the tight money policy upon us in its first days in office.

Now, more than a year later, we are still feeling the consequences of that strangulation of the country's growth and expansion which the bankers told us was necessary to overcome inflation, although the basic conditions which cause inflation existed early in 1953.

For most small borrowers, the effects of the tight money policy still linger. Bankers will not lend to them; the RFC has been extinguished; the Small Business Administration, set up to replace it, is moribund—exactly as it was intended to be. The grassroots of American free enterprise have been burned out in a financial drought.

Has the administration done anything to counteract the effects of its tight money policy?

Tax reductions effective January 1, 1954, were already written into the law under a Democratic administration.

PRESIDENT HAS TAKEN CREDIT FOR DEMOCRATIC TAX REDUCTIONS

Yet on a series of occasions a Republican President, in statements to the people of the country, sought to take credit for the tax reductions of January 1, 1954, which had already been enacted by a Democratic administration.

I have said before, but it needs to be said again and again, because it is typical of the misrepresentations of the present administration, that the Eisenhower administration had not one single thing to do with the reductions in the income tax of January 1, 1954, and the President of the United States should have said so in his first pronouncement on the subject, but he did not. He left with the American people the impression that he had something to do with it under his administration, but he had nothing to do with it.

That is not the only example of doubletalk which characterizes this administration. It honeycombs the administration, and it is about time that we came to grips with some of the distortions, misrepresentations, and doubletalk of the Eisenhower administration.

Not only were the tax reductions which were effective January 1, 1954, already written into the law under a Democratic administration, but those reductions were not designed to provide a stimulant to a lagging economy. They were not written into the law for that purpose and they have not had that effect. Only 12 percent of the net tax reductions which took place on that date went to swell the purchasing power of the great number of American families who live on less than $5,000 a year. Wealthy families received 45 percent of the benefit. Corporations received 43 percent of the benefit, through the repeal of excess-profits taxes. That $2,300,000,000 shot in the arm for business was the same kind of hypodermic as the recently passed tax bill, and it had the same effect on stimulating recovery and reemployment of the unemployed as this bill will have—practically none.

No, there has been no action taken to return us to the full employment and prosperity which we were enjoying when this administration took over the reins. But there has been talk—indeed there has been talk; talk about how things are going to get better very soon; talk about how in some early month the turn will come, or, if not, then the hour of decision and action will have arrived. Things have not got better; fundamentally they are worse. And the months of promise have come and gone. And the days of decision have arrived, and each such day has given birth only to a new day of decision—a new promise of performance—later on.

Some of us forewarned of the danger in January, February, and March of this

year; and here is one Senator who is perfectly willing always to stand on the record and refer to the record. In those months of this year, I pointed out the need for action to be taken then, in order to meet the unemployment problem throughout the Nation. I pointed out then, as I do today, that there was bound to be a seasonal upturn, come May, June, July, and August. It always has happened in our economic history, at a time when we were confronted with serious unemployment. It happened every summer during the depths of the great depression. During that unfortunate period there was always a seasonal upturn in employment in May, June, July, and August.

But let us not be fooled by the Eisenhower administration into believing that the summer uplift in employment represents any basic improvement in the economic health of America, because to date this administration has not done one single thing which will be of any assistance come the cold months of November, December, January, February, and March. That will be when the question will be asked, Mr. President, "What did you boys do back in July?" What kind of answer will be given to that question?

In my judgment, one of the things which can be done is by way of proceeding to amend the unemployment insurance bill in such a way that it will deserve the title of an unemployment insurance bill. The seasonal increase in employment this year has been less than the usual seasonal rise from January to June. Factory employment has gone steadily downward.

ADMINISTRATION PROMISES

It was on February 18 that the President told his press conference that he would think that March ought to be the key month—the month when employment begins normally to pick up. If that did not happen, the President said, then it would be a very definite warning that would call for the institution of a number of measures.

March came and there was no upturn. Unemployment rose by 50,000; workers on temporary layoffs increased by 20,000; factory employment went down for the 7th month in a row; business failures reached their highest point of any month in the last 13 years. And there was no White House action.

In fact, there is a group of witnesses whom I should like to call some day before a congressional hearing. I should like to call the hundreds and hundreds of small-business men who have gone bankrupt since the Republicans came into power. They are the persons we should hear. We should hear their testimony as many of them have given it to me in my office, as to the failure of this administration to come to the assistance of small business in the United States. They have been driven to the wall, Mr. President—and by what? By a program which has resulted in the pyramiding of great economic combines in America to heights never before reached in our economic history.

In the automobile industry some of the greatest old-line automobile manufacturing corporations are finding themselves so badly pushed, as a result of the trend of monopoly which has grown by leaps and bounds under the Eisenhower administration, that, in their last gasps, in an effort to remain alive, they have merged into what is going to be a sort of independent organization of automobile companies, seeking at least to be able to compete against this intensified monopoly trend under the Eisenhower administration.

I should like to have placed on the public record the testimony of some of the hundreds of small-business men who know that the delay and the delay, the indecision and the indecision, of the Eisenhower administration have caused them to go to the wall, with the result that there now exists the highest percentage of bankruptcies in many years.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Missouri.

Mr. SYMINGTON. Is it not true that the largest industry employer in the United States excepting possibly an almost completely Government-subsidized industry, the aviation industry, is the automobile industry?

Mr. MORSE. I would say that is my impression, but I would not be able to raise my right hand and say that I knew for a statistical fact that that was true. I say that certainly it is 1 of the 2 or 3 largest single employers in this country, if not the largest single employer.

Mr. SYMINGTON. In support of the position of the Senator from Oregon, is it not true that even great automobile companies of the recent past, excepting the first three, believed they could not prosper without consolidating, which they have recently done?

Mr. MORSE. That is the position they took.

Mr. SYMINGTON. Does not that fact show a concentration of economic wealth almost unparalleled in the history of the United States?

Mr. MORSE. Strike the word "almost." It is unparalleled in our history.

Mr. SYMINGTON. If conditions are hard for companies which we know have recently merged in order to live, does not that simply accentuate the fact it is infinitely harder for the small-business man to live in competition with the great corporations, corporations which have been rapidly expanding under the supervision of this administration?

Mr. MORSE. That is the experience they are having, as I have found in talking with some of the small-business men. They are beginning to recognize they are not private entrepreneurs, after all, and that really their policies as so-called free enterprisers are dictated by monopolistic combines. What we had better do, and do quickly, is take a look at the antimonopoly laws on the books and start doing a job of revision there, because, in my judgment, there is a serious need for some really effective work in the field of checking monopoly. But the whole trend of the present administration is to strengthen monopoly. Look at its policy. I do not care where one chooses to look at the administration's policy, wherever it is touched will be seen a program intended to strengthen monopoly.

Look at what the administration is doing in the field of power resources. I have spoken on that subject recently, but not for the last time. The administration's power program and policy have permitted the turning over of the power resources to monopolistic combines. We should prevent monopolies in the AEC program. There we have an instance of the President's actually directing the signing of a contract which seeks to play into the hands of a monopolistic combine, and the forewarning of control by a monopoly of the people's heritage in the atomic-energy program.

Let me say, by way of emphasis, that the American people have spent billions and billions of dollars on the atomic-energy program, not with the idea in mind that it should be given away to a combine of monopolies, but that is exactly where the administration's program is leading. If we do not want the AEC bill, which soon will be before the Senate, to foster that condition, we should enact amendments which will check the White House in its obvious intent to turn over the power of atomic energy, under the name of private enterprise, to private monopoly. I respectfully say the administration has never demonstrated to the American people that it recognizes the difference between private enterprise and private monopoly.

While the Senator is present in the Chamber and on his feet, in view of the fact that I have said something about small-business men, by increasing hundreds, going to the wall in bankruptcy under this administration, I wish to pay to the Senator from Missouri a tribute which I think is due him. When he was the head of RFC I communicated and conferred with him on numerous occasions on behalf of some small-business men of my State. The Senator from Missouri showed he had an understanding of the importance to our free enterprise system of keeping small business in America alive. He understood the importance of small business getting a reasonable share of the contracts under the defense program. He understood that, after all, there will not be a private enterprise system unless necessary steps are taken to see to it that small business is able to prosper and make profits. Although we talk about big combines as being the employers of certain masses, the fact remains that it is the accumulation of small businesses which really results in the employment of a substantial percentage of workers in America. If small businesses are permitted to go into a decline, there will result a weakening of the earning power of hundreds of thousands of workers.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Missouri.

Mr. SYMINGTON. First, I thank the Senator from Oregon for his gracious remarks. I wish to assure him that during my career in the Senate I hope I do, and try to do, as much for small business as he has done.

Does not the Senator agree that with a constant centralization of economic power in this great Nation, we shall get close to a condition which someone has said is just a walk across the street from socialism, this as against the true concept of free enterprise, a concept which requires the strength of small business?

Mr. MORSE. The Senator from Missouri is completely accurate. So far as the economic freedom of the individual is concerned, the individual suffers as much more monopolistic control as he does under socialistic control. There is no economic freedom of choice for the individual under socialism, and there is no freedom of economic choice for the individual under an economy controlled by monopolistic combines. They are both forms of economic dictatorship.

Mr. SYMINGTON. In one case the people in the government make the decision, and in the other case the people in the back room make the decision. Is that not correct?

Mr. MORSE. In one case, State-minded Government officials make the decisions; in the other situation, monopolisitc-minded big-business dictators make the decision.

Mr. SYMINGTON. Would the Senator add the word "cartel-minded"?

Mr. MORSE. I do not have any objection to adding the expression "cartel-minded," except that I use the word "cartel" in connection with the internation monopolies which are dominated by the monopolists in the respective countries which enter into deals between and among themselves.

Mr. SYMINGTON. I am reminded of that word because I remember the magnificent job the distinguished Senator from Oregon did in breaking the world cartel on tin, which, as the Senate committee handled the matter, saved the Americarr taxpayer, on tin alone, about $500 million.

Mr. MORSE. I helped only in a relatively small way, although I did work quite hard on the problem. In my judgment, the real credit for the breaking of that international tin cartel should go to the present minority leader, who was then chairman of a subcommittee of the Armed Services Committee of which I was a member, and under his leadership we conducted the hearings which brought out the facts with regard to the tin cartel. We were successful, with the assistance of the Senate as a whole, in breaking that cartel.

Mr. SYMINGTON. I agree that the minority leader had a great deal to do with it, but I also remember what the Senator from Oregon said about it, and the fact that he was very much in favor of what the committee did under the chairmanship of the minority leader.

Mr. MORSE. The Senator is very kind.

Mr. President, I have pointed out that in March of last year, unemployment rose by 50,000; workers on temporary layoffs increased by 20,000; factory employment declined for the 7th month in a row, and business failures reached the highest point in any month in the past 13 years; and there was no White House action.

But before the facts about March were known, we were told by the press that "administrative sources" had disclosed that when the President said March, it should be taken to mean March and April—the spring generally.

THE ADMINISTRATION WAITED FOR SPRING

This spring-song theme has been sung by the Secretary of Defense as early as February 10. Asked about the outlook for automobiles, he said that Detroit "is well able to look after itself; I would not worry about it; come spring, it is going to be all right."

Charles Wilson could not know, of course, that even while he spoke those cheery spring words, unemployment was growing in Detroit from 107,000 workers in January, to 140,000 workers in February. Nor did he foresee that, "come spring," Detroit unemployment would remain above 130,000, as compared with a low point of 15,000 unemployed in the spring of 1953.

On March 22, the month of promise was postponed once more. The Secretary of the Treasury said he thought it might be May before the economy showed any particular upward change.

But on the very same day, March 22, the Secretary of Labor put off the good news from May until the fall. On a TV program, he conceded that unemployment might increase in March and April, but an upswing in employment would come by fall.

Nine days later, on March 31, the Secretary of Commerce restored our spring hopes. This, he said, is "just a little, average recession, nothing serious." He thought the country would "pull out of it by April."

Of course, that was quite a remarkable contribution by the Secretary of Commerce to the descriptive language concerning the economic condition that confronted us, because he was able to pry through his lips the actual pronunciation of the awful word "recession." That was one of the first times an Eisenhower administration spokesman was even willing to utter the awful word; and in that period the President himself, in a press conference, was able to get it out; at that time he, too, for the first time talked about the recession. On the other hand, many of us who in the preceding months had talked about a recession were called "the apostles of gloom and doom" because we dared forewarn the country of what was happening in terms of economic facts, and dared to do so months before either the President or the Secretary of Commerce would even utter the awful word "recession."

THE ADMINISTRATION WAITS FOR FALL

Then, on June 8, we were again put off until fall, and this time by the highest authority. Dr. Arthur Burns, Chairman of the Council of Economic Advisers, on that day held a press conference at which he looked hopefully to the future. He was, in effect, speaking for the President, for it was the President who sent the newsmen to him to get their answer to a question put to him at his own press conference on June 2. The President had been asked whether he would care to comment on a public statement that had been made a few days earlier by the eminent, and I must say conservative, Harvard economist, Sumner Slichter. Slichter charged the administration with "a surprising lack of initiative and enterprise" in fighting the depression. "Spokesmen for the administration," he said, "have said several times that the administration would act if and when action is needed, but the level of unemployment which the administration regards as justifying action seems to be considerably higher than the people of the country will tolerate."

Dr. Burns' forecast was that unemployment might go to 4 million in June, and higher in July, but that in October he would look for unemployment to go down. A rise in June or July to 4 million or above did not trouble him, because he said that would be seasonal. October was the month to look for a seasonal decline in unemployment, he said. An increase of $700,000 in the number of unemployed between May and June would have been far greater than seasonal, I may say, basing my opinion on the experience of post-war years. But what seems to me most significant in Dr. Burns' forecast is his apparent readiness to let things take their course, to ride the seasonal tides up and down, while more than 3 million people are recorded as unemployed, many more are on short hours, and uncounted others have been discouraged from even seeking employment, and therefore are not enumerated as jobless, though jobless they are.

CAN THE PEOPLE WAIT?

But can we afford to wait and wait and wait—in February, to wait for March; in March, to wait for May; in June, to wait for October? The problem that confronts us is not composed of statistical percentages and seasonal trends. That is not its substance. Its substance is people—human beings of flesh and blood and bone; people in trouble, breadwinners without jobs; young men and women coming out of school; farmers producing crops for a shrinking market; new and small business enterprises without a business opportunity; small-business men going into bankruptcy by the hundreds at the highest rate in a long period of years. That is the economic picture of today, and it is suggested by the administration that we ride out the economic tide.

HOW LONG MUST WE WAIT?

How long, I ask, Mr. President, will these people have to wait before something is done to restore to them at least a chance, at least an opportunity, to put their talents and their efforts to work fulltime, all the time, doing things that others want and will pay for? Do they have to wait until the growing sickness spreads up to where it touches the great corporations and the leading banks? Are their profits and their dividends the only considerations that will move this administration into action?

ECONOMIC DISTRESS IN CLEARFIELD, PA.

Mr. President, 2 or 3 weeks ago, I spoke at Clearfield, Pa., one of the economic disaster areas of the country. I spoke

at a meeting; and following it, a number of persons came up and talked to me about the economic plight that confronts so many of the workers in that disaster area, who today are relying for food on the surplus food which is made available to them by the Federal Government. If we consult the record, we find that it was not so many months ago that a little group of us on the floor of the Senate had to carry on the fight in order to awaken the administration to the need for the distribution of surplus food here at home, to our own people. Of course, we urged a food distribution program that would be of some help to the thousands of Americans unemployed as a result of the Eisenhower recession. I was in one of the areas where the food was being distributed. The principal question asked me by those unemployed persons was, "How long does Eisenhower think we should wait?"

Mr. President, I, too, ask the question: How long should the unemployed people wait for this administration to keep faith with the spirit and intent of the 1946 Full Employment Act, passed by the Congress of the United States?

Mr. KENNEDY. Mr. President, will the Senator from Oregon yield to me?

The PRESIDING OFFICER (Mr. BUTLER in the chair). Does the Senator from Oregon yield to the Senator from Massachusetts?

Mr. MORSE. I yield.

Mr. KENNEDY. The Senator from Oregon may have seen some statistics which were gathered by the Massachusetts Division of Employment Security. That division made a survey of 6,000 workers who, between 1948 and 1949, had exhausted their benefit credits.

As the Senator may know, the survey showed that—

Workers were much more liable to exhaust their benefits as they grew older. Some 34.3 percent of the male exhaustees were more than 54 years old.

Of those who remained in the labor market, some 4.0 percent reported having been reemployed within a week after exhausting their credits; 26.1 percent had gone back to work within 5 weeks, and an additional 13.3 percent within 10 weeks. On the other hand, some 45.1 percent remained unemployed 20 weeks or more. Of the workers who had exhausted their benefit credits more than 39 weeks prior to the date of the interview, some 30.8 percent of those remaining in the labor force were still without work at that date.

Over 41 percent of those interviewed reported one or more persons partially or wholly dependent upon them. Some 22 percent had dependents under 18 years of age.

After benefits had been exhausted, most of those without work relied for support on other working members of their own families, the women, of course, to a greater extent than the men, and the married women to a much greater extent than other women.

A large proportion of those interviewed furnished information on liquidation of savings and other assets during the postexhaustion period. Some 51.7 percent reported having turned savings, war bonds, insurance, etc., into cash. Nearly 40 percent of those who had relied on this source of support reported that their entire savings were used up. Nearly 50 percent reported that they still retained a fraction of their savings (of which the amount was not ascertained).

Some 22.5 percent of those answering the questions relating to credit indicated that they had had to resort to this means of support. Of those who had incurred debts, some 34.9 percent had fallen behind in rent, grocery bills, installment payments, etc. A large proportion (20.8) had borrowed from friends; another 25 percent had borrowed from lending agencies.

Only 8.2 percent of those replying to the questions relating to relief stated that they had been on relief rolls—either public or private. Private assistance was apparently an insignificant source of relief so far as these exhaustees were concerned.

In other words, public or private relief furnished a very small measure of support. This is a terrible story, it seems to me, of what happens to people who exhaust their benefits, and who are unable to find work. It has a multiplied effect throughout the entire community. As these people cease to be employed and their benefits are exhausted, they find that they must borrow from their friends. They must cash their entire war savings. They must run up grocery bills. The grocer is unable to pay his bills, and the whole community runs down into a chronic state of depression. It seems to me this is an issue of basic importance to all of us in the Senate, as the Senator from Oregon has pointed out, and we cannot ignore our responsibility in view of these statistics.

Mr. MORSE. I thank the Senator from Massachusetts very much. I had not seen this particular survey. However, the statistics which the Senator has just read fall within the pattern of other surveys with which I am familiar. That is exactly what happens when we let unemployment go unattended, as we have done for the past many months. As I indicated, referring to the unemployed in the Clearfield, Pa., area, they are tired of waiting for action on the part of the present administration. They are entitled to action by the administration, but apparently the administration follows the point of view that we had better require them first to use up their savings, and to follow the course of action which the Senator from Massachusetts has just cited in reporting on the Massachusetts survey.

Without going into the detail which I did yesterday afternoon on this particular point, I wish to invite attention again to certain economic facts which must not be lost sight of when we deal with the entire question of employment and unemployment.

I am asked by a goodly number of people why I am so strong for unemployment benefits. Why should the people as a whole pay benefits to people who are not working?—Of course, unemployment compensation is paid for by payroll taxes. Why should we not let the law of supply and demand operate?

Of course, my reply is that I am strong for unemployment benefits because when I work for unemployment benefits I am performing a service for the employed. I am performing a service for the employed which, from one point of view, is as important and vital to the unemployed as the unemployment insurance benefits are important and vital to the unemployed.

Why do I say that? Because we need somehow to do a better job of educating the American people in respect to the nature of our economic system.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. MORSE. In a moment. I wish to finish this point, and then I shall be glad to yield.

Somehow a great many people seem to think that our economic system is not dependent upon a pattern of interplay between and among all our people. We need constantly to drive home the point that when there are between 3 million and 5 million unemployed, we are confronted with the danger that the economic illness, of which unemployment is a symptom, will spread and make the whole body seriously ill. One thing about unemployment is that it does not remain static. Either by economic surgery we take it out of the body politic, or it spreads as a cancer throughout the entire economic system. It is about time to do a little surgery.

When I am fighting for unemployment benefits, I am fighting to protect the income of all the people in the economy—doctors, lawyers, dentists, businessmen, schoolteachers, and everyone else who has an income. The economic health of every individual is dependent on the economic health of the economy as a whole. We no longer can rely upon the economic jungle law of supply and demand, in the field of employment or any other economic field.

We need also to look at this vital statistic, namely, that our system itself, the capitalistic economy itself, is dependent for its survival upon production by workers—men and women who gross $2,500 a year or less. That is not much money, Mr. President. But if we take out of production the masses of our people who gross $2,500 a year or less, we would bring the American capitalistic system to a complete standstill within 6 months.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DOUGLAS. Is the Senator from Oregon aware of the fact that within the period from May 1953 to April 1954, the total amount distributed in wages and salaries fell by $8,200 million, whereas the total paid out in unemployment benefits was only about $1.6 billion—in other words, that only 19 percent of the wage decrease had been made good by unemployment insurance benefits, meaning that four-fifths of the fall in payrolls represented a net destruction in monetary purchasing power?

Mr. MORSE. I was not aware of those particular figures, to give the Senator an honest answer. I knew that some such proportion existed, which illustrates the very point I am trying to drive home now, namely, that the Senator from Illinois and I, and every other American, are dependent for our economic well-being upon the purchasing power of the masses of the people. If we do anything to destroy the purchasing power of large segments of the masses, all we do is to hurt ourselves, as well as the rest of our fellow Americans.

Mr. HUMPHREY rose.

Mr. MORSE. Before I yield further, let me crystallize this point a little. It is

a point which the American people, when they yield to the temptation of short-term personal selfishness, overlook. They forget that, after all, one of the cardinal principles of enlightened capitalism is the sound Biblical rule of human conduct, that we are our brother's keeper.

I am always surprised when I find people within our population who do not recognize that, after all, our economic system depends for its survival upon putting into practice the moral laws upon which our spirituality also is dependent. The moral law that we are our brother's keeper is a sound rule of enlightened capitalism. It happens to be one of the basic moral principles of an unemployment insurance benefit system. But it is extremely difficult to get selfish people to apply these moral laws outside of church on Sunday.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MORSE. The only time they want to apply it is when they are sitting in the pew in church and feel that at least they cannot argue with the minister. Mr. President, I am talking about taking this great moral principle and applying it legislatively. If we will follow that course of action, we will preserve what is called the American way. If we do not follow that course of action, we will destroy the American way.

That is why I wish again to emphasize this point, namely, that we have in our economy a group of workers who gross so little each year that none of us here would wish to try to raise a family on it. They gross as little as $2,500 a year. If anyone wishes to raise my figure, very well. Let us raise the figure to $3,500. I still make the same statement as to the $3,500 class.

There is no question about what would happen if we took out the $2,500 class. Our economy would collapse. That is true. I do not ask Senators to take that statement from me alone.

Mr. President, I do not want anyone to talk to me from any selfish standpoint about unemployment insurance benefits for the masses of people in the $2,500-a-year class. If anyone wants to look at it from the standpoint of an American citizen's individual selfishness, then he had better see to it that Congress passes unemployment compensation legislation which will provide that when such people are unemployed they will get not 50 percent of their wages, but practically their whole wages. Why? Because if they do not get practically their whole wages, they will be thrown on society as a whole. If they are thrown on society as a whole, without jobs and without unemployment-insurance benefits, there is created a tremendously serious social and economic problem within our body politic.

Mr. President, I am not afraid of some of the ugly words this administration throws about with such abandon, such words as "subsidy" and "creeping socialism." If anyone wants to call giving an unemployed man who grosses $2,500 a year, or less, practically full benefits equal to his weekly wage, either a subsidy or creeping socialism, I am for that kind of subsidy, and I am for that kind of creeping socialism. I know that when I am for that kind of assistance to fellow Americans, I am not only carrying out the moral law to which I have previously referred, but I am protecting my own interests and those of my family and those of Americans generally, because this economy cannot stand the loss of purchasing power of the masses of people who gross $2,500 a year or less, and survive.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield first to the Senator from Minnesota.

Mr. HUMPHREY. I thank the Senator. First of all, I wish to pay tribute to the Senator from Oregon for relating the issue of unemployment compensation to the total dimensions of our economy. It must be observed in the proper perspective.

I have in my hand a clipping from the St. Paul Pioneer Press of May 13, 1954. The article is entitled "Wisconsin Farm Buying Power Drops." Within the last month in my State of Minnesota farm purchasing power dropped 8 percent. The article I have in my hand reads—and I believe the Senator will find it apropos of his comments—as follows:

> The Wisconsin farmer's buying power was lower last month than at any time since October 1940, the Federal-State Crop Reporting Service said Wednesday.
>
> The Service said prices received by farmers have decreased an overall 26 percent, while there was a drop of less than 3 precent in the prices paid by farmers for production and domestic use.

Someone may ask, "How does that apply to unemployment compensation?" The fact is that when we see a decline in farm prices and farm income, we also see a corresponding decline in employment and a rise in unemployment. Statistics over the years show that farm income and workers' income run almost parallel up and down together.

Mr. President, we will soon be discussing in the Senate what should be adopted as a farm legislative program. I think it is crystal clear that if we legislate in the farm area and do not legislate in the area of unemployment compensation, the whole body politic will be weakened.

This is not a matter of charity. The Senator is making a case not only in behalf of unemployment compensation. This is a matter of economic survival.

What amuses me is that some of the loudest proponents of free enterprise are the ones who are giving it economic arsenic. They are the ones who are giving it just a little dose of poison by letting it die on the vine, so to speak. It is about time we realize that the capitalistic free enterprise system does not depend on how rich 2 people out of 100 are, but on how well the 98 are doing. If the 98 are doing all right, then the 2 will do all right, too. It is something like the passage in Scriptures to the effect that there is more rejoicing in heaven at the repentance of a single sinner than there is over 90-and-9 just persons who need no repentance.

What I am trying to say is that if we take out of our society those who are unemployed, we weaken the whole economic structure. That is what the Senator is talking about.

I should think we would have considerable support from the other side of the aisle for increasing unemployment compensation benefits, because the Republican Party stands for free enterprise. That is its great slogan, I may say. If the Republican Party does stand for free enterprise, it ought to make sure that those who have free enterprise will have a chance to keep their enterprise alive.

Mr. MORSE. I thank the Senator from Minnesota very much for his contribution, and I think his point of view is unanswerable. However, let me say to him that I have never understood that those who follow the reactionary economic philosophy really understand the meaning of free enterprise. It has always been my observation that it has been those of the liberal point of view who have really sought to protect the free enterprise system in keeping with its true meaning; just as this afternoon some of us on the floor of the Senate are trying to maintain free enterprise in relation to the purchasing power of the mass of American people. Unless we maintain their purchasing power at a reasonably high level, we will have no free enterprise system—the Senator from Minnesota pointed out the direct relationship which exists between farm prices and the wages of workers—because unless there is a high purchasing power among the masses of the American people, there is no purchasing power with which to buy the products of the factories of America, from which the wage earner gets his paycheck.

Mr. HUMPHREY. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. HUMPHREY. On Saturday of the past week I read an Associated Press dispatch which said that the International Harvester Co. had cut its employment rolls by another 450 employees. Why? Because farm machinery is not being sold. Whom does that hurt? It hurts not only the farmer who would like to have new machinery, though he may be able to get along with the old machinery for a while, but it hurts the International Harvester Co. and the 450 workers who have been laid off. It will also injure every drugstore operator, every telephone company, and every utility in America.

I should like to make this final point, Mr. President. I wonder what the unemployed workers of America are thinking today, as we debate unemployment compensation benefits in the Senate with such a sparse attendance. Over 3 million people in this Nation are without income today. By the way, that is only a statistical report, which is by far too conservative. Let me say that any Member of the Senate who goes back to his State and really talks to the people, generally, instead of merely to some of the people, will find that there is plenty of unemployment. Three million Americans, some of them with children, are literally at the end of their economic

lifeline, trying to pay their debts, trying to buy food for their families, trying to save their homes, or trying to keep their car on the time-payment schedule.

Where is the Senate? I do not know. Millions of people are in trouble, and yet we cannot even get a corporal's guard to attend this debate on one of the great economic issues of our time. It must appear to the American people that there is at times a callous disregard here for the economic well-being of millions of our citizens. This problem will be aggravated by the month. I am looking at my friend from Rhode Island [Mr. PASTORE], who is here to protect the well-being not only of the people of Rhode Island, but of every workingman and businessman in America. There is economic trouble in Rhode Island. It also exists in Illinois, in Massachusetts, in Oregon, and in Minnesota; and many, many other States.

When we discuss a matter which deals with the economic life of the people, we are not discussing some theoretical question. Unemployment compensation benefits have run out in many instances. I could exhibit to the Senator from Oregon a picture taken in my own city during the past week, showing, in a prosperous America, a soup line a block and a half long, composed of people marching into a kitchen to get something to eat. That is not a laughable subject; it is a tragic spectacle. I could not believe my own eyes until I took a cameraman along with me to make the picture. Those people are willing to work, but they have no jobs. They become a burden upon society from no desire of their own. A proposal has been advanced by the Senator from Massachusetts and some others of us who have joined with him to administer sound economic medicine for a sick economy; and this administration refuses to recognize the symptoms of economic illness.

Mr. KILGORE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. KILGORE. I should like to ask the Senator if his experience is the same as is my own. The Senator from Minnesota invited attention to the estimated unemployment figures. So far as my State is concerned, the estimated unemployment is 65,000, but I find that there are 81,241 persons drawing unemployment compensation, showing that the estimate, which is always said to be too big, is too little when it applies to a State like mine. Is it not a fact that the head of a family making $3,500 a year, with present costs, cannot put aside very much money for a rainy day?

Mr. MORSE. That is correct.

Mr. KILGORE. I should like to highlight one thing. In 1953 there were 46,361 persons drawing unemployment compensation. Of that number 6,444 had exhausted all their unemployment compensation benefits by the end of a 6-month period. Our law provides compensation payments for 23 weeks. Of the 81,241 persons, 11,525 had, as of June of this year, exhausted their unemployment compensation benefits, which meant that they had to go on relief. Stores are laying off clerks. I saw a big headline in 1 of our newspapers which reported that 1 firm had laid off 30 employees from maintenance duties. Unless the unemployment figures decrease in the State from which I come, we are going to have soup lines. There are already enormous numbers of persons on relief. That will break the merchants. It will affect dentists, physicians, and the whole economy, because on a normal scale the figures now represent a quarter of a million persons who have no source of income except unemployment compensation. When that is exhausted, they have nothing on which to live.

Mr. MORSE. I wish to thank the Senator from West Virginia, as well as the Senator from Minnesota, for the substantiating remarks they have placed in the RECORD, bearing out one of the major premises of my speech. I now yield to the Senator from Illinois.

Mr. DOUGLAS. Is not the nub of the political and economic question with which we are dealing the issue of whether the standards for determining the amount of benefits shall be left entirely to the States or whether the Federal Government has an obligation to prescribe minimum standards?

In that connection, I should like to ask the Senator this question: We now have given complete autonomy to the States with regard to the duration of benefits, the scale of benefits, the conditions surrounding eligibility, and so forth. But the States have also universally adopted a system of merit rating under which the amount which employers have to put into the State funds is determined according to the amount of benefits paid during the past year to their specific employees. Therefore, if the State increases benefits, extends duration, and liberalizes eligibility requirements, the result is that the employers in the State will pay a higher rate of assessment than they formerly paid and a higher rate of assessment than employers in other States pay. As a result, we have competition between the States in keeping standards low—the very thing which the original national act of 1935 was intended to prevent.

Is not the method proposed by the amendment of the Senator from Massachusetts one of prescribing minimum standards so that States will not compete against each other in lowness of benefits but will move together to provide adequate purchasing power to help make good the decrease in income?

Mr. MORSE. That is exactly the purpose of the amendment offered by the Senator from Massachusetts.

I thank the Senator from Illinois for pointing up this particular matter. Part of my thesis is that there are serious State responsibilities in connection with this question, and there are also national effects of unemployment. The people of my State have a very definite economic interest in the amount of unemployment in the State of Massachusetts, or in Illinois, or in Texas, because the economic effects of unemployment do not respect State lines. They extend throughout the Nation. I said yesterday that unemployment moves forward in economic waves of disaster. Disaster takes on a variety of characteristics. It causes a very serious effect on the purchasing power of persons who ordinarily buy goods manufactured in various States. If there is a great deal of unemployment in one State, the goods manufactured in another State will not have a market to the extent that unemployment has a causal relationship to the sale or nonsale of goods manufactured in another State. So I think the Senator is completely correct, and his statement is very helpful in pointing up this question.

Mr. LEHMAN. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I should like, first, to yield to the Senator from Oklahoma [Mr. MONRONEY], and I do so with an apology on my lips, because earlier I told him I would yield and then completely forgot about it when I had finished the point I was making.

Mr. MONRONEY. Mr. President, I thank the distinguished Senator from Oregon, and I wish to compliment him on his remarks in reference to the protection of private industry. I think one fundamental maxim is recognized by private interests, and that is that business cannot be done in an economic desert. When income begins to recede for a group, class, or section, then unemployment becomes progressive, as a landslide is progressive, and it gathers momentum until, instead of there being 5 percent unemployment, there will soon be 10 percent; and the increase will multiply by mathematical proportions until it becomes 20 percent, 40 percent, and so forth. Then major economic collapse occurs.

This program has stood the test of small economic crises, but the time has now come when it is necessary to consider strengthening the bulwarks to prevent a landslide of great proportions. In view of the plain economics of our country's prosperity, I think this program is one of the cornerstones of a continuing prosperous situation. We are not legislating a handout to the unemployed; we are not trying to hold the body together by soup-line methods. We are trying to insure sufficient fuel being in the carburetor to supply gasoline to all eight cylinders, in order to move the economic machine down the road at its normal efficiency and effective speed.

I wish to thank the Senator from Oregon for his yielding to me a brief moment in the discussion.

Mr. MORSE. I deeply appreciate the comments which have just been made by the Senator from Oklahoma.

I now yield to the distinguished Senator from New York.

Mr. LEHMAN. Mr. President, I had the privilege of rising several times yesterday in support of the amendment, which I think is a sound one. My conviction with respect to its soundness and necessity has been increased by the very useful and constructive remarks of the distinguished Senator from Oregon.

I think probably I have been able to watch the development of unemployment insurance in a State as long as any other

Member of the Senate. I was Governor of my State at the time the law was enacted by the Federal Government in 1935 and when the implementing measure was adopted in the State of New York in 1936. At the time the law was adopted a very, very small weekly sum was paid to those who were out of employment, and the period during which unemployment compensation was paid was a very short one. I believe it was as low as 16 weeks or, at the most, 18 weeks. Gradually, over the years, both the rate of compensation and the duration of the payments of compensation to the unemployed were increased.

Every time that was done, it resulted in increasing prosperity and the economic welfare of the entire State, in addition to giving to the unemployed an opportunity approximately to maintain, at least for a limited time, their families and their standard of living.

We have heard much about the merit system. The distinguished Senator from Oregon referred to it yesterday, and I know that his views and mine are similar. I have seen how such a system works in New York. Within 2 years after the unemployment insurance law was enacted in New York in 1936, bills were introduced to adopt a merit system for employers. I had the great pleasure of vetoing such a bill each session for 3 or 4 years.

Mr. DOUGLAS. Mr. President, will the Senator from New York yield?

Mr. LEHMAN. I yield.

Mr. DOUGLAS. As long as the Senator from New York was Governor of his State, there never was a merit system put into effect in that State. Is that not true?

Mr. LEHMAN. There never was; and it gave me very great satisfaction to veto a merit system bill every year, because I thought it was unsound, unfair, and contrary to the public interest. But when my last term of office as governor expired in 1943, a merit system came into being.

Mr. MORSE. The Senator from New York was then succeeded by a Republican administration; was he not?

Mr. LEHMAN. I was succeeded by a Republican administration, my successor being Thomas E. Dewey, who is now governor of the State.

There is no justification at all for a merit system. Those employers who benefit by a merit system deserve little credit for maintaining stable employment. They are usually firms whose product is in great demand and who, therefore, can operate continuously; they are not affected by the seasonal fluctuation of employment. But the fellow whose product sometimes falls off in demand, or the man whose business is seasonal, not only does not receive the recognition of the merit system, but also is put to a greater tax burden, which further jeopardizes the continuity of the fund, since large sums of money are being paid to those who under the law benefit by the merit system. If the merit system did not exist, considerably increased benefits, of course, could be paid to the unemployed.

The pending amendment is very moderate, being limited to a maximum of two-thirds of the wages and a minimum of one-half of the wages, with the duration being limited to 26 weeks. I cannot imagine anything more fair—and I emphasize—not only fair to the workers whose interests should be our main interests, but also to the great benefit of the entire economy of the State, because it stabilizes and, many times, increases the purchasing power of the consumers, who, after all, are the backbone of the economy of every unit of government.

TRIBUTE TO SENATOR LEHMAN

Mr. MORSE. I wish to say in reply to the Senator from New York—and I hope what I shall say will not personally embarrass him—something I have been wanting to say to him for a very long time on the floor of the Senate, and that is this: When we come to great pieces of humanitarian legislation—and that is what the amendment offered by the Senator from Massachusetts is—the Senator from New York makes me feel very humble, because there he stands, in my judgment, one of the great statesmen in American history of recent decades; as I have been heard to say once before, one of the great giants among the liberals, not of our day alone, but of our history; a man of tremendous wealth, a banker, but also a man who has always recognized the direct relationship of the major thesis which I am arguing for this afternoon, namely, the welfare and the purchasing power of the masses of the American people, and the perpetuation of the capitalistic system itself.

The junior Senator from New York is a man who has recognized that, after all, the masses of the American people are dependent for their political and economic freedom upon the perpetuation of an enlightened capitalism. This is a matter which works both ways. The people are dependent upon an enlightened capitalism; and enlightened capitalism is dependent upon the purchasing power of the masses of the people.

Here is a great statesman, who for years was the Governor of the so-called Empire State, and who, in the Governor's chair, fought for putting into legislative practice the moral law, to which I referred earlier in my speech this afternoon; namely, that we are our brother's keeper.

This is a society of free people for what purpose? Not for the purpose of advancing and enhancing the selfish interests of the individual, but for promoting the general welfare of all the people. This is the objective of this political society of ours.

But that objective is reached only if we are willing to translate into legislation the great moral laws upon which a free society is dependent.

I have been wanting, for a long time, to pay this tribute to the Senator from New York because, in my judgment, as I have said many times out of his presence, before audiences in America, he, by a life's work, has demonstrated American statesmanship at the highest level, and he has proved that there is no relationship between the personal wealth of an individual and the recognition of his responsibility to translate the moral law into legislation.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. LEHMAN. I am deeply grateful to the distinguished junior Senator from Oregon for his very generous comments with regard to my work and my principles and views. I fully know that I do not deserve the unusually complimentary remarks made by the Senator; but I want him to know that they have fallen on very welcome ears. I am glad and proud that I am only one of a very substantial group of Members of the Senate—in the forefront of which is my distinguished colleague from Oregon—who are dedicated to the public service, who wish to see justice done, who wish to see fair play for everyone, and who desire to make certain that all segments of our population share, at least to the extent which is possible, in the prosperity and blessings of our Nation.

I thank the Senator from Oregon very deeply, indeed.

Mr. MORSE. The Senator from New York is, on this occasion, as he is on all occasions, very sweet about the views expressed by his colleagues concerning him, but I am perfectly willing to let his colleagues be the judges as to whether or not the remarks I have made about him are not deserved on the basis of the great record he has made through a long lifetime of public service.

Mr. PASTORE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. PAYNE in the chair). Does the Senator from Oregon yield to the Senator from Rhode Island?

Mr. MORSE. I yield.

Mr. PASTORE. I should like to make a rejoinder to the observations expressed by the distinguished Senator from Minnesota [Mr. HUMPHREY] a short while ago. In considering the whole area of employment and unemployment, I am afraid we drift into the habit of making it a statistical or an impersonal discussion. The idea of working and not working involves a very human problem. It is of very little comfort to a man who has a family to support and who is out of work and looking for work, who is able to work but cannot find employment, to pick up a newspaper and read that in June a million more people were employed than were employed in May, the month before, because the fact that that particular individual is out of a job is a very personal problem to him.

The news of the increase in employment is very encouraging, and I trust that the number of employed will continue to rise and rise until every available person in the United States is working; but until that point is reached, I cannot forget that in my State 13 out of every 100 persons are out of work. They are people who are willing and able to work, but cannot find work. That is a human problem. For us to say it is the problem of that particular State I think begs the question a little, because more than 90 percent of the products

manufactured in my State are sold in the other 47 States. The unemployment means that a demand for the goods being produced in my State does not exist in the other States. It means that the people in the other States are not buying as much as they used to buy.

Even though the employment picture for the month of June may be more encouraging than it was in the month of May, the fact still remains that in my State 13 out of every 100 persons are unemployed. That presents a serious problem.

While I agree that the enactment of the amendment suggested by the distinguished Senator from Massachusetts would be a great boon to our economy, the fact of the matter is that I do not think it goes quite far enough. I believe we have to recognize the fact that even though we must set a Federal standard of raising the benefits and make it effective for a long time, some States which cannot meet the responsibility have to be backed up by the Federal Government, because there is a Federal concern involved. So long as there exists 1 bad situation in 1 State, it will be only a question of time before that situation creeps and creeps and creeps until it spreads all over the country, and until one day we will run smack into a depression. That is precisely what happened in the latter part of the 1930's.

Mr. MORSE. I wish to thank the Senator from Rhode Island for supporting me in the major premise of the case I have undertaken to present. That was the burden of my remarks.

Mr. President, while the Senator from Rhode Island has spoken respecting the situation in Rhode Island, I think it is appropriate, and I ask unanimous consent, to have printed in the RECORD at this point in my remarks a report of the State Unemployment Compensation Commission of the State of Oregon for July 1954, under the heading, "Unemployment Payments for 1953–54 Benefit Year Second Highest on Record; Tax Receipts Continue Decline, Dropping Reserve Fund $10½ Million."

There being no objection, the bulletin was ordered to be printed in the RECORD, as follows:

UNEMPLOYMENT PAYMENTS FOR 1953–54 BENEFIT YEAR SECOND HIGHEST ON RECORD; TAX RECEIPTS CONTINUE DECLINE, DROPPING RESERVE FUND $10½ MILLION

Payments to insured unemployed workers amounted to $23,430,100 during the 1953–54 benefit year, second highest in the history of Oregon's unemployment law. The increase was 33.1 percent over 1952–53 but was 9.8 percent lower than the all-time high of $25,962,151 in 1949–50. More than two-thirds (68.2 percent) of the annual total came during the past half-year with each of its first 3 months well over $3½ million. June payments of $1,125,393 were 30 percent higher than a year ago.

Claims were received from 115,000 persons during the year, and more than 88,000 were paid at least 1 check. Upward of 19,000 beneficiaries exhausted their 1953–54 compensation, and many of them have filed new claims based on their earnings during the calendar year of 1953. With the exception of the 1949–50 benefit year, all these figures are the highest reported under current provisions of the law. In 1948–49 with a benefit schedule calling for considerably lower duration, the number of exhaustees was slightly higher.

Balanced against these near-record payments were tax reecipts of $11,225,088 during the 12 months ending June 30. Interest from the Federal Government on the reserve fund fell under the $400,000 mark last quarter for the first time in several years, but the year's total was $1,679,020. The drop in the reserve fund was nearly $10½ million since July 1, 1953.

With average tax rates under experience rating declining, with taxable payrolls also beginning to drop, and with interest payments lower, income in 1954–55 is expected to continue a downward trend. Meanwhile the upward spiral in compensation shows little sign of abating. Payments in June marked the 33d consecutive month in which they have exceeded the corresponding period a year earlier.

Oregon benefit payments issued for week ending June 26, classified by local office and industry of last employment

Employment office	Area total	Forest and fishing	Construction	Food processing	Lumber and logging	Other manufacturing	Transportation and utilities	Trade	Finance and n. e. c.
Industry totals	9,175	162	955	879	2,166	1,462	447	2,076	1,028

LABOR DISPUTES AND LATE SEASON BRINGS INCREASE IN NUMBER OF JOBSEEKERS; CLAIMS FOR 1954–55 BENEFIT YEAR JUMP TO HIGHEST FIGURE SINCE 1947

Labor disputes and a late season were jointly responsible for a 6,300-increase in the number of jobseekers reported this month by 26 offices of the State unemployment compensation commission. About 38,900 persons were actively seeking work at the midyear as compared with 32,600 on June 1 and 25,500 a year ago. Only 620 unfilled job openings were counted by local office representatives as of July 1, lowest number at this period since the end of the war.

About 3,400 of the new jobseekers were among those out of work as a result of the dispute between lumber operators and employees. Several offices in the heart of the Timber Belt reported few of the strikers asking for agricultural and other temporary work, but most of those laid off as an indirect result of the tieup were in the labor market. The entire unemployment situation was expected to be clarified in the next week or two.

Eastern Oregon areas were affected but little by the tieup in fir lumber. The Dalles, La Grande, Baker, and Milton-Freewater reported many finding jobs in agriculture and industry, while Hillsboro and McMinnville made the best showing in the western part of the State. The Portland area had nearly 50 percent more jobseekers than a year ago.

New and transitional claims received from insured workers as a preliminary to the 1954–55 benefit year which started this month are the highest since the changeover to the midyear benefit year was made in 1947. More than 20,000 persons will have claims on record when first requests for compensation are possible July 12, it is anticipated. In the benefit year being closed up continued claims have been running about 12,000 a week since mid-May, well above recent comparable periods, but cut down considerably by the 19,000 who exhausted their 1953–54 benefit rights.

Employment and payrolls of covered employers, by main industry in 1953 as compared with 1952

	Number of employers	1953 average employment	Percent gain or loss, 1952	1953 payrolls	Percent gain or loss, 1952
Total	18,102	329,353	−1.0	$1,208,380,028	2.2

EMPLOYMENT AND COVERED PAYROLLS IN BASIC INDUSTRIES EASE OFF IN 1953; MOST OTHER GROUPS SET NEW HIGHS, COMPLETE REPORTS FROM 18,102 FIRMS SHOW

Payrolls covered by the unemployment law reached new highs for the year of 1953 but average employment dropped about 3,000 from the records established in 1951 and 1952, according to completed tabulations of 18,102 employers' reports. Losses took place mainly in construction, lumber and logging, transportation and utilities. The latter 2 groups, however, recorded small gains in payrolls for the entire calendar year.

Lumber and wood products firms dropped from 3,161 to 2,915 in 1953; average number of jobs from 82,839 to 78,945; and covered payrolls from $360 million to $351 million. Employment in this basic industry reached a peak of 84,061 in 1951 but payrolls were highest in 1952.

Employment in construction reached a high of 24,101 in 1951 and also set the payroll record of $104,141,426 for the same period. Miscellaneous manufacturing, trade, service, finance and other main groups recorded gains last year, establishing new highs in both average employment and payrolls.

Mr. HUMPHREY. Mr. President, will the Senator from Oregon yield at that point?

Mr. MORSE. I yield to the Senator from Minnesota.

Mr. HUMPHREY. In line with the remarks of the distinguished Senator from Rhode Island [Mr. PASTORE], I merely desire to make note of the fact that if the amendment which is pending, the Kennedy amendment, shall be agreed to and enacted into law, and employment shall be at a high level, the cost, of course, under the amendment, will be very nominal. If unemployment is at a high level, then the benefits which are authorized under the Kennedy amendment will be of significant proportions and of significant help so as to relieve the economic situation. In other words, here is an amendment which will help us coming and going. If the economic situation is good, it will not place any great economic responsibility on the State or the Nation for the unemployment compensation benefits, because the benefits and the beneficiaries will be in very limited number. But if the unemployment number is up, and if the situation, as the Senator from Rhode Island has pointed out, is such that 10 or 13 persons out of every 100 may be out of employment, then there will be obtained benefits which will be sufficiently important economically to have a stimulating effect on the economy, and which will also have a humanitarian effect upon the families involved.

I surely agree with the moral lesson which the Senator from Oregon has drawn. It is not merely a matter of economics or statistical evidence; it is a matter of fundamental moral purpose and concern, the matter of being one's brother's keeper—not simply for the love of it, but because of the great economic values involved, and also because of the humanitarian values involved.

I think we must not look at the amendment as a cost item. That is a subject which I am sure will be brought to the forefront; but the answer to that argument is that it involves an economy in which there is full employment. If we do not have a fully employed economy, then there should be provided benefits which will do some good. In other words, the answer to medical bills is good health. If one has good health, then he does not have to worry about the fee of the doctor and the cost of medicines; but if one is sick, he does not take a drink out of the creek; he gets a good

doctor and obtains good medicine, and the cost will be considered very low if he gets well.

Mr. MORSE. In the latter circumstance, I think he also should have some health insurance. I wish to thank the Senator from Minnesota, because his remarks, as do those of the Senator from Rhode Island, buttress the point of view which I am trying to support in the Senate this afternoon, namely, that we should follow the full intent and purpose of the Full Employment Act of 1946, which is what we are seeking to do by the Kennedy amendment. I think the Senator is quite correct when he says there should be other improvements. However, we should go at least as far as the Kennedy amendment proposes to go. I am willing to go further right now, before we dispose of the pending legislative proposal.

Mr. President, I now return to the thesis I was discussing prior to these very helpful interruptions. I wish to ask, just how much has the administration's laying-on-of-words, its playing at hide-and-seek with the calendar, done to put men back to work and to get us out of the trouble we are in? I say it has done nothing. We have not even been holding our own.

SEASONAL INCREASE BELOW NORMAL

Employment increased from January to June, but by far less than is usual for this season of the year. The rise this year was 2,345,000; the 1950–53 average was 3,706,000; the 1946–49 average was 4,089,000. Total civilian employment in June was 1,074,000 less than in June 1953. Employment on farms was 500,000 less, and in nonfarm occupations 570,000 less than in June 1953. This is not progress. It is not even holding still.

The report issued on Wednesday to the effect that unemployment increased from May to June by much less than is to be expected at this season of the year was played up by the Departments of Commerce and Labor as though here at last was a distinct sign of improvement. I say it was no such thing. Unemployment increased less than usual for this month because the number of persons in the civilian labor market increased less than usual. Had the normal number of new workers come on the market in the first week of June, unemployment would have come very close to 4 million workers, according to the statistical standards the administration uses. The labor market increase for May–June was 1,020,000; the 1950–53 average was 1,610,000; the 1946–49 average was 2,140,000. How anyone can spell good tidings out of this evidence that we have closed the doors of opportunity to more than half a million young people who otherwise would have been looking for work in June, I am not able to understand. But as I read my newspaper last Thursday morning, that is what I discovered the administration was trying to do.

STEADY DECLINE IN INDUSTRIAL EMPLOYMENT

Now, to get to the hard core of our industrial economy, here is a central fact that the administration's cheerleaders would like you to forget: Factory employment fell in June, for the 10th month in a row. The total reduction since last August has been 1,708,000 workers. Almost 10 percent of the jobs that were provided by manufacturing industries in that month had disappeared.

In addition to employing fewer workers, manufacturing industries were providing 1.1 hours less work per worker per week in June 1954 than in June 1953. Applied to a force of about 16 million workers, this reduction in the workweek is the equivalent of total unemployment for another 440,000 workers in the manufacturing industries.

INADEQUACY OF ADMINISTRATION UNEMPLOYMENT STATISTICS

Mr. President, I think this is a good place to point out how the administration's unemployment figures never have told an accurate story of the unemployment condition, because, as the people of the country should realize, the figures the administration has been giving them are based upon unemployment insurance benefit figures, and represent only the group of unemployed persons who are eligible for unemployment insurance benefits.

Let us consider the total unemployed class, because this is the group we must take into account if we wish to see what the unemployment picture is. Of course, there is the group the administration uses, which, during the past year, has ranged from 2½ million to almost 4 million persons, according to the administration's own figures. Then there is the group of those who have exhausted their unemployment insurance benefits. However, they are not carried in the statistics of any Department of Labor report, although they constitute a substantial number, comprised of many thousands of persons who have to be added to those who still are receiving their weekly unemployment insurance benefits. Then, of course, there are many other thousands who are not eligible for unemployment benefits, but are unemployed; they are without jobs. It is of as great importance to them that they work or that some purchasing power be supplied to them, so they can feed their families, as it is to those who are included in the administration's figures. Then there are the thousands to whom I have just referred, who have suffered as a result of reductions in the workweek. We have to add to the hundreds of thousands I have just mentioned, many thousands more who are working on 2-day or 3-day shifts each week, or, in some industries, 2 or 3 days every alternate week. They are not included in the administration's statistics, either.

Then there are the many thousands of potential new workers, who simply are not included at all in the figures because they never have gotten on a payroll, in the first place, and thus they are not eligible for unemployment benefits. That is why I have been heard to say so many times during the past year, in speaking on the floor of the Senate, that the American people have not been given an accurate picture of the unemployment situation at any time by the Eisenhower administration, because that administration has been quoting only partial statistics on unemployment.

I remember that at one time, when the figure was up to approximately 3½ million, on the basis of the Eisenhower administration's statistics, employment experts said the number undoubtedly was 5 million if one took into account the classes I have just enumerated.

I have not been able to obtain in recent hours a reliable estimate for the situation as of today; but I am satisfied that, as of last week, unemployment in the United States was well over the 4 million mark, if we take into account the classes of unemployed I have just enumerated.

Mr. President, that is not a healthy situation. I know there are reactionaries who think it is a good idea to have in the United States an unemployed pool of between 3 million and 5 million persons, as a disciplinary check upon labor; but those who take that view are playing with danger, the very real danger that unemployment may get out of bounds, once we let that kind of stagnant pool—if they think they can keep it stagnant—remain for a while, and once all the germination of social unrest and disorder really begins to develop in that pool of unemployed.

DECLINE IN INDUSTRIAL PRODUCTION

Therefore, Mr. President, I wish to stress another hard-core fact about the present state of affairs. The overall index of industrial production fell in March, and again in April, and held level in May. But by virtue of a seasonal adjustment applied to the May figure, a widely heralded upturn of 2 points in the index was brought forward. Reference to the May index of earlier years shows this to have been an unusual seasonal adjustment. This year it was adjusted 2 points up; last year 1 point up; the year before, 1 point down; but the fact is that the plain unadjusted index in May was 11 percent below the all-time high established in March of 1953, just before the new tight-money policy had begun to make itself felt and prosperity was forced to give way to Republican recession.

LOW PRODUCTION IN STEEL INDUSTRY

Steel production has risen slightly in recent weeks, but the industry is using only a little more than 70 percent of its capacity.

Mr. DOUGLAS. Mr. President, will the Senator from Oregon yield to me?

Mr. MORSE. I yield.

Mr. DOUGLAS. The figures the Wall Street Journal published today indicate that steel production for the present week will not exceed 65 percent, or about 5 percent more than for the past week.

Mr. MORSE. I think that is more accurate than the figure I used, but I have been indulging in understatement. I like to give the administration the benefit of every doubt. But even when that is done, there still remains an awful situation in the economy. Probably it is more accurate to state that the steel industry is operating at approximately 65 percent of capacity. However, I have used the figure 70 percent. Benjamin Fairless, of United States Steel, says the industry would remain close to that reduced rate for the rest of the year; and Eugene Grace, of Bethlehem Steel, says he will be satisfied if the industry can do that well. Mr. President, that is not very hopeful for steelworkers or for those

representing the States in which the great steel industry operates. This may be a cheerful prediction, as steel profits go; but it holds out little prospect of industrial recovery or for the remployment of industrial workers.

POOR PROSPECT FOR AUTOMOBILE INDUSTRY

Prospects in the automobile industry for the second half of the year cast some doubt on the steel industry's ability to do even as well as these low-level predictions might indicate. In the first 6 months of this year, 9 percent fewer cars and 12 percent fewer trucks were produced than in the same season of 1953. Total sales of from 4½ million to 5¼ million cars are predicted by the industry for this year. It produced 3 million by June 30. A one-third cut in production in the second half of the year appears inevitable. New cars on hand awaiting sale on May 31 had reached the very high figure of 638,000 contrasted with 430,000 at that date in 1953. What signs of an early upturn can anyone find in the automobile picture?

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DOUGLAS. The figures which the Senator from Oregon mentioned are correct so far as new cars in the hands of new-car dealers are concerned. However, in addition, there is a considerable volume of new cars in the hands of used-car dealers, which do not enter into those figures. Furthermore, there are large numbers of new 1953 models which have not been sold. If, in addition to those, it should be found that there are pools of produced cars which have not entered into normal distributive channels, the situation would be still worse.

Mr. MORSE. The Senator is quite right. The automobile situation is not healthy.

If I may flavor this speech with a bit of personal experience, I shall do so. I just finished a David Harum trade on a car, and I was quite surprised that I could do so well. I have traded horses for a great many years, and have not done so badly, but I did not think I could do so well in the car business.

Without citing any specific figures, let me say that I found the market to be a buyer's market. I found it possible finally simply to say, "This is my check for what I will pay toward a new car, plus my old car," and to my great surprise the check was accepted.

I am satisfied that the Senator from Illinois is quite right. The automobile industry is in the doldrums. It is clearly in a buyer's market, and there is no doubt about the fact that automobile manufacturers have already overproduced, although they have been reducing production. That is why I ask the question, What signs of an early upturn can anyone find in the automobile picture?

RECORD NUMBER OF BUSINESS FAILURES

The 4,812 business failures officially recorded in the first 5 months of this year topped failures in the same period of 1953 by 39 percent. Not since 1941, when the war shortage of materials forced many small outfits to the wall, have business failures come even close to the 1954 figure. The nearest was in 1950 when the 5 months' total was 4,239. These are small businesses; their liabilities averaged only $45,000. They fall by the wayside in record numbers at a time when profits and dividends in the world of large business, sown by the excess-profits tax repeal, continue to feed the fever of a big bull market.

I repeat, things did not get better in April, March, May, or June. Most certainly they did not. The improvement we were told to look for has not arrived. And still there has been no institution of a number of measures which the President on February 18 said would be necessary if there was no change for the better in March.

For the benefit of my colleagues in the Senate I ask at this point unanimous consent to have printed with my remarks in the RECORD two tabulations, one showing the fall of manufacturing employment by States over the past year, and the other listing, by States, the spread of labor surplus areas during the life of this administration.

There being no objection, the tabulations were ordered to be printed in the RECORD, as follows:

Number of wage and salary workers in manufacturing industries, May 1953 and May 1954

State	Number employed (in thousands)		Decline	
	May 1953	May 1954	Number (in thousands)	Percent
Alabama	232.6	224.0	8.6	3.7

Source: U. S. Department of Labor, Bureau of Employment Security, Division of Reports and Analysis, Area Classification Summary, January 1953 and May 1954.

Mr. MORSE. These tabulations should enable each Senator to see for himself how the problem I have been discussing reflects itself within his own State.

The first of these tabulations shows the number of workers employed in manufacturing in each State in May of 1953 and May of 1954.

Manufacturing employment dropped during this 12-month period in every State except Florida, North Dakota, Washington, and Wyoming. The fall was considerable in many States, as Senators will see. It was 208,000 in Michigan; 194,000 in Pennsylvania; 147,000 in New York. The number was substantial in my State of Oregon. In fact, at the beginning of this year Oregon had the highest unemployment percentage rate of any State in the Union, based upon the test used by this administration, namely, unemployment insurance benefits.

In the percentage rate of decline, Michigan and Rhode Island lead the list. One out of six of their 1,400,000 manufacturing jobs in May 1953 had disappeared a year later. The Indiana job loss was also more than 16 percent.

The other tabulation which I have placed in the RECORD lists, for each State, the labor market areas that are classified by the Bureau of Employment Security in the Department of Labor as "areas of substantial labor surplus." These are areas in which current and prospective labor supply substantially exceeds labor requirements. The most important criterion for placing a labor market in this classification was that 6 percent or more of the available labor was out of work and not awaiting early recall.

These so-called group IV areas are those which the Office of Defense Mobilization once considered to be in such difficulty as to entitle them to special assistance under Manpower Order No. 4. This order directed Government procurement officials, whenever feasible, to set aside portions of their procurement requirements for allotment to manufacturers in these areas, provided they would meet prices established on that part of the requirement which had been let on competitive bids. To date, however, the official reports indicate that procurement officers have quite generally ignored Manpower Order No. 4. Set-asides for areas of labor distress have been negligible, and certainly have accomplished nothing to relieve acute unemployment conditions anywhere.

With publication of the May 1954, listing, the marked increase in unemployment which has taken place was recognized in a new classification designated as "areas of very substantial labor surplus," applied to labor markets in which 12 percent or more of the available labor is out of a job.

In other words, the word "very" is added to the description of these distressed areas in order to focus attention and emphasis upon the labor problem. Here, at least, is one piece of evidence that the administration has not been totally unfamiliar with the worsening economic situation.

The listings of labor distress areas which I have placed in the RECORD span the Republican administration's term in office, from January 1953 to May 1954. In January 1953, 18 of the 182 major labor markets surveyed at that time were classified as areas of substantial labor surplus. An additional 19 smaller labor market areas received the same classification.

By May of 1954, 51 of the 149 major labor markets then surveyed were areas of substantial labor surplus, 7 of these being designated as having a very substantial surplus. In addition 73 smaller labor markets were found to have a substantial surplus, and in 31 of these it was found to be very substantial.

Thus it will be seen that distress labor conditions existed in 10 percent of the major labor markets surveyed in January 1953, coal mining areas accounting for the largest number of these, followed by areas of chronic distress in the New England textile industry.

ONE-THIRD OF MAJOR LABOR MARKETS IN DISTRESS CATEGORY

By May 1954, more than one-third of the major labor markets surveyed were in the distress category. Many areas from West Virginia, down through Kentucky, Tennessee and into the South now appear on the list. Michigan, which had 1 labor surplus area in the earlier month, now has 12, including the city of Detroit. Indiana, Illinois, Wisconsin, Iowa, and Missouri, which earlier had only 3 distress areas among them, now have a total of 24. The Southwest, Mountain, and Pacific Coast States contributed only Tacoma, Wash., to the listing in the earlier month, and have since added 4—Texarkana and San Antonio, Tex.; Albuquerque, N. Mex.; and Portland, Oreg.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DOUGLAS. If I may pursue the point which the Senator from Oregon has just made, I may say that the southern part of my State is virtually in a distressed condition, excluding the industrial section south of the city of St. Louis, which has appreciable unemployment.

In the region south, roughly, of the towns of Litchfield and Hillsboro, most of the manufacturing concerns have folded up or greatly curtailed operations, and the coal mines are operating at a greatly reduced scale. All of the regions in this part of the State, outside of East St. Louis, have just been put in class 4B, which is the worst of all, with an unemployment rate of over 12 percent.

In the southern one-sixth of the State, the St. Louis Post-Dispatch made a survey in February, and estimated that there was 20 percent unemployment for that half of the lower third of my State.

Almost immediately following the survey made by the St. Louis Post-Dispatch, a number of mines closed and several manufacturing concerns shut down.

Therefore, the region which is known as Egypt in my State I should say is in a superdistressed condition. In addition, there has been a drought there for approximately a year and a half. Therefore, when the Senator from Oregon speaks about distressed economic conditions, I can say that the people of southern Illinois know very well what is happening. Bearing out the remark of the Senator from Oregon, I have known of no defense contracts which have been siphoned into that area to help fill the void.

Mr. MORSE. I thank the Senator very much. It is further evidence of the pattern I have sought to describe in my speech, showing how widespread the Eisenhower recession really is, and pointing out again that we cannot feed people on slogans and promises, and that we can feed them only if we follow an economic policy that will get for them the spirit and intent of the 1946 Full Employment Act.

Up to this point, Mr. President, I have discussed the recession in the administration's own terms. Their standard, as we have seen, is that we do well enough in our economic life if we hold

to a level course. In fact, they don't mind too much if we slip a little below the level course; many of their industrial friends say that is a good thing for us to do every once in a while. It purges us of what is to them, apparently, the sin of sustained prosperity. Or perhaps what they fear is that if every man has a break, if every little man has a chance to better himself, a job he can count on, a small business he can build without fear of bankrutcy, a farm he can work without fear of the market place, then too many of these little "every-men" may get the dangerous notion that economic opportunity is something that all can share, regardless of their station in life.

NEED FOR AN EXPANDING ECONOMY

Whatever the explanation may be, the fact is that our present administration believes that to stand still is good enough, or at least good enough over quite a space of time. What they do not seem to see is that to stand still is to fall behind. A Nation like ours must have an expanding economy in order to have a healthy economy.

I do not say this on moral grounds alone. Although I am willing to stand on moral grounds alone so far as the issue I have been discussing this afternoon is concerned, I stand on those moral grounds also because they are sound economic grounds. It is about time the administration recognized the direct relationship between morals and economics, and recognized that if we are to have sound economics it should propose a program which will put people back to work, which is something it has not done to date.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DOUGLAS. The Senator from Oregon has correctly stated the point that in order to stay in the same place we must really go forward. That is true for another reason also, namely, that the labor force is increasing by approximately 700,000 each year. Therefore, unless the numbers employed increase by that ratio, the number of unemployed rises each year. When two things are happening, namely, a decrease in employment, accompanied by a steady increase in the working population, the situation is much worse than would be indicated by figures of employment alone. Is that not correct?

Mr. MORSE. That is true. I am very glad the Senator from Illinois has brought out the population point. It happens to be a vital statistic which the American people ought to recognize in respect to a great many issues, domestic and foreign, and it is something our people must look at from the standpoint of the direction we are going in, both in the field of domestic legislative policy and in the field of foreign policy.

The question of domestic population increase which the Senator from Illinois has pointed out, resulting in some 700,000 workers being added to the employable lists each year, means that by 1975 the average American family of 4 today will be a family of 5.

What the American people ought to recognize is that by 1975, by increasing the average American family from 4 to 5 there will be added to the population of the United States an increase of people equal to the present population of the following States. I ask Senators to listen to this statement. There will be added to the population of the United States by 1975, through the present population trend, the number of people equal to the number of people now living in the following States: Arizona, Colorado, Oklahoma, Washington, Oregon, California, Montana, Idaho, Utah, North Dakota, Missouri, South Dakota, Nevada, Wyoming, Kansas, Nebraska, New Mexico, and Texas.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DOUGLAS. Even more people than in Texas?

Mr. MORSE. Even more people than in Texas. I may have omitted a State or two, but approximately that is the correct figure. I cite it because I think it helps to dramatize the issue the Senator from Illinois raises this afternoon, namely, that we must see now, before it is too late, the direct relationship between the need for the kind of legislation we are arguing for this afternoon and the population needs of the country in terms of providing employment. That is why the Senator from Illinois is so dead right, and why I think our argument is so unanswerable. We must follow a legislative course of action which provides for an expanding economy, because if we do not do so we are headed for economic disaster in America.

That is why I am wryly amused, Mr. President, by the economic reactionaries who talk about a laissez faire economy and the unfettered operation of the law of supply and demand. They are economic illiterates. They need to go back to economic kindergarten and look at a few facts. We cannot solve these problems by Republican slogans. We must solve them by coming to grips with the kind of economic data which the Senator from Illinois has just referred to in his very helpful remarks.

Mr. President, I yield to the Senator from Rhode Island.

Mr. PASTORE. Is it not a fact that apart from the question of increase of population, our technical progress is such that less man-hours are required for the same operation as time goes on?

Mr. MORSE. That is correct.

Mr. PASTORE. And that gap has to be filled in.

Mr. MORSE. The Senator is correct. There is another facet to that subject which I wish to mention. We have the problem brought about by technological developments, resulting in the use of more and more labor-saving devices, which I am all for, but I wish to point out that in our economy we still have the human element to take into consideration.

It was not so many years ago when great liberals stood on the floor of the Senate, such as the then senior Senator from Wisconsin, Senator La Follette, and the great Senator from Nebraska, Senator Norris, and pleaded for a 10-hour day, and then for an 8-hour day. They were castigated as being great radicals and dangerous Socialists. Now everyone admits they were correct.

At the present time a similar problem is developing, and we are soon going to be far beyond the time when it is safe for the economy to have, by law, an 8-hour day requirement. We shall have to lower it and increase the wages for less work in order to keep healthy the economy of the Nation. I happen to be one, Mr. President, who contends that within the lifetime of every Member of the Senate who is 55 years of age or under we shall see the necessity for a 6-hour standard working day in the Nation if we are going to keep our economy healthy.

Mr. LANGER. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield.

Mr. LANGER. The distinguished Senator mentioned the name of Robert La Follette, and some of the names he was called. I wonder if the Senator remembers that when Senator La Follette made a major speech in the East in his campaign, the eastern newspapers called him an anarchist.

Mr. MORSE. They not only called him an anarchist—that was almost a polite word—but they had a tendency to use some adjectives in front of the word "anarchist."

The Senator from North Dakota having interrupted me—and I always appreciate his interruptions—I should like to say that I know of no man in politics, probably in the past 50 years, who has been called so many unpleasant names as has the Senator from North Dakota, because he has stood for the major thesis for which I have been arguing on the floor of the Senate; namely, that we apply the moral law to legislation, that we translate into legislation the moral law, and that we seek to pass legislation which will better the lot of the mass of the American people so that our economy can survive.

I wish to pay my respects to the Senator from North Dakota for the great liberal course of action that has characterized his whole record in the field of economic legislation in the United States.

Mr. LANGER. I thank the distinguished Senator from Oregon.

Mr. MORSE. Mr. President, I said I intended to say something else about the population problem and its relationship to the field of foreign policy. For purposes of emphasis, let me put it this way: If you were to ask me, Mr. President, to name the one fact, the one phenomenon, I thought would exercise the greatest influence on American foreign policy for the next 100 to 300 years, I would say it would be the growth of world population. We can talk about foreign policy to our heart's content, but the immutable law which will determine more than any other one thing the course of American foreign policy will be the trend of world population. Let us take a look at it.

In 1750 there were 660 million human beings on the face of the earth.

In 1850, approximately 100 years ago, there were 1,200,000,000 persons.

In 1950, just yesterday, figuratively speaking, there were 2,100,000,000 persons.

Where was the increase? It was not in the countries of western civilization, Mr. President, in any such proportion as in the so-called backward areas of the world, in areas where the problem of longevity raised by the Senator from Illinois a few minutes ago has a very interesting application in another respect. Do not forget, Mr. President, that today in the backward areas of the world the average life span of the teeming millions of persons is from 36 to 38 years, as compared with our 60 years. That life span is going to increase as their conditions improve from decade to decade. Population experts tell us that conditions are going to improve until eventually other peoples will reach our span of longevity, which today is averaging 60 years. So we are going to get two types of population increase in the world, as the Senator from Illinois pointed out, from the standpoint of the number of employables. We are going to get an increase in population through the increase of the average longevity of the individuals living in the so-called backward areas, and we are going to get a tremendous increase in individuals numerically.

Some of us in the Senate remember that not so long ago in one of our seminars for the liberals, as we call them, one of the every-other-Monday-night seminars, where a group of liberal Senators meet together and try to learn something about their legislative responsibilities in the Senate in relation to specific legislation, we received a briefing on Asiatic problems. A point was made by the expert who was briefing us which some of us challenged. He said he expected to be challenged on it. He said he himself did not believe it when he first heard the statement, but that if we would look into the matter we would find that it was true.

I have discussed it with enough experts so that I am satisfied that it is substantially true. We have already done such a remarkable job in Formosa by way of American aid in improving the health and sanitary conditions on that island and bettering the area generally, that if a healthy young couple in Formosa should marry today at the age they usually marry in Formosa, which is from 16 to 18 years of age, and if the couple lived until they were 80 years of age and had a normal birth rate, between themselves and among their descendants, by the time they reached the age of 80 years, they would have 1,000 descendants.

Mr. President, world population statistics are so full of implications as to the course of action which foreign policy is bound to follow in the decades ahead that I think we should stop and ponder it, when we consider the foreign policy which is pursued by the Congress of the United States. We had better ask ourselves the simple question, What kind of heritage are we going to leave to American boys and girls 300 years from now, if we do not follow a course of action which will result in the great increases in numbers of people in the backward areas, living on the freedom side of the Iron Curtain? What kind of heritage of freedom, Mr. President, shall we be leaving to American boys and girls if, during the course of 300 short years—and that is no time at all, in terms of historic time—we do not follow a foreign policy course of action which will result in those masses supporting the cause of freedom? If there is to be that result, we had better translate the moral laws and principles, about which I have been speaking this afternoon, into economic formulas. We had better recognize the direct connection between freedom and economics. We had better recognize, I repeat, the direct relationship between moral principles and economics as applied to foreign relations. We had better recognize that there is not a single thing which the United States could do, if she tried to do it, to prevent those teeming masses from bettering their way of life. They are going to do it with or without our assistance. All we could possibly do would be to slow it up. There are some things which are inevitable; and, in my judgment, one of the inevitabilities is the gradual evolution of economic standards in the backward areas of the world, on the part of the teeming millions, already so far in excess of our numbers that we had better consider whether or not we are going to leave a heritage that will permit the white boys and girls in the world, in the so-called western civilization, to have an opportunity to live in a world of freedom.

Oh, I know the common reaction of most people, because I have heard this subject discussed in many places. It is, "Well, I am concerned about the present. If we take care of the present, we will leave the responsibility to future generations to take care of their present."

There is neither statesmanship nor morality in that point of view, Mr. President. What an unfortunate plight the United States would be in today if that point of view had been taken by our constitutional fathers. They were interested in the kind of political heritage they were leaving to us. I happen to be one who believes that we have a tremendous responsibility in our lifetime to be of maximum service to the American boys and girls who are going to walk this earth 300 years from now, which, as I say, is really but a second in the life of civilization.

But how the reactionaries can face these problems, both domestic and foreign, without coming to grips with the kind of facts I have just brought out in the debate, is beyond my comprehension, because these facts really are the warp and the woof of the pattern of civilization which we shall weave for future generations of American boys and girls. It is extremely important that in our service in the Senate we keep the faith by translating these moral purposes into humanitarian legislation.

I have dwelt on the subject because, in my judgment, the Senator from Massachusetts [Mr. KENNEDY] is making a great contribution by offering to the pending unemployment-insurance legislation, his amendment, which I think amounts to naught but putting into legislative practice the moral principles which we all agree to when we discuss them in generalities. But the test of our statesmanship is whether or not we are willing to agree to them by practicing them through our votes in the Senate on amendments of the type proposed by the Senator from Massachusetts.

As I was saying, whatever the explanation of this administration may be for its unwise course of action to date, the fact is that the present administration believes a standstill is good enough, or at least good enough over quite a space of time.

I am fighting this afternoon for this kind of legislation, not alone on moral grounds, but also because it can be supported by the simple arithmetic of our industrial way of life. I had pointed out that the number of persons in need of useful occupation has increased every year in the recent past by 700,000 a year, and that soon it will reach 800,000, according to the Census Bureau. This increase in the work force of our Nation is caused by the arrival of young people at the age of maturity. This is not a stream that can be turned off and on to conform to the conditions of our economy or the policies of the party in power. The process of growing up is involuntary, and youth, somehow, is very insistent about it. We may deny these young people a chance to get their start in life at the time they are ready for it, but when we do we deny ourselves the greater wealth which these newcomers want to help us create, and we warp and misshape the lives of these young people in their most critical years. I hold therefore, Mr. President, that if we can manage our economic affairs so as ever to keep on the upgrade, always ready with job opportunities for the increasing number who want work, then in the name of commonsense and out of regard for our fellow men, this is what we should do. We should vote for the Kennedy amendment. I am not saying that it will always be easy to keep ourselves on a steadily rising course, but I do say that those who content themselves with merely holding to a level course, and those who find all manner of reasons for proclaiming that a downward course is the road to a sound economic system, have missed the whole meaning of America and stand in contempt of the genius of the American people.

To provide these job opportunities for an increasing labor force, we shall have to expand our output of goods and services at an even greater rate than the labor force expands. The acquisitive and inventive qualities of our managers and engineers is forever finding easier and better ways of doing things, as the Senator from Rhode Island [Mr. PASTORE] and the Senator from Illinois [Mr. DOUGLAS] have just pointed out. A 3-percent annual increase in output per manhour of employment is now quite unusual. It has been as high as 6 percent in some years. There is no doubt whatever that productivity will rise more rapidly in the future than it has in the past, perhaps at a rate that we would now deem fanciful. As the productivity of labor increases year by year, we must provide jobs for those whom the improved technology displaces by increasing our total output

at a more rapid rate than our labor force is growing.

All this is elementary and self-evident. I am surprised that the reactionaries so customarily overlook it. But it is sometimes forgotten by those very people and on precisely those occasions when it would do most to throw light upon the matters under consideration. Let me return, for my example, to Dr. Burns at his press conference of June 8. Toward the close of that session he was explaining to the newsmen that the gross national product, the total output of goods and services of this country, had fallen by 3.7 percent since the second quarter of 1953.

He was then asked, "Is that small or large?"

Dr. Burns' answer was, "I cannot answer that question; I do not know."

I am sure he did not mean this to be taken as a genuine response to the question. Dr. Burns knew very well that this 3.7-percent decline in the total economy was accompanied by a 29-percent drop in steel production, a 9-percent drop in car and truck output, a 10-percent drop in textiles, and, for that matter, a drop of 11 percent in industrial production as a whole. And these are no small matters, even for those who expect our economy to do no more than to hold its own.

But Dr. Burns is not one of these. He knows that we must expand in order to prosper. How easy it would have been for him to have replied, "This drop of only 3.7 percent in gross national product resulted in a loss of goods and services in the amount of $13½ billion, annual rate. Furthermore, during the year when this reduction took place we could have been expanding our output by an approximately equal amount, had we maintained full employment. So the real loss we have suffered over the past year is in the neighborhood of $25 billion to $30 billion of annual ouput." This would have been a realistic answer, in accordance with the economic facts.

But the Republican top policymakers seem not to know these things, and it grieves me that Dr. Burns, who knows them so well, does not instruct them.

LACK OF ADMINISTRATION INITIATIVE AND ENTERPRISE

How are they able to ignore the vast potential wealth that we are throwing away by letting things drift month after month, not even maintaining the levels that were reached more than a year ago? This question was also in Dr. Slichter's mind when he charged the administration with surprising lack of initiative and enterprise in fighting the recession. "I do not know the answer," he said, "but I suspect that it is attributable to the influence of the Treasury, which seems to be more interested in keeping the cash budget in balance than in limiting the drop in production and employment." I might add here that the Treasury's interest in budget balancing was at low ebb when the tax benefits to large corporations and stockholders were being drafted and enacted by the Congress.

To these men, the budget deficit which we shall have this year is of far greater moment than the current economic deficit of $25 bililon to $30 billion. The former is a dollar deficit on the books of account; the latter is a human deficit—a throwing away of work that wants to be performed, but will not be; a loss of the good things of life that will be neither produced nor enjoyed by our people. A budget deficit can be wiped out by a surplus, but a human deficit will never be reversed. What we might have produced today, but did not, we shall never produce; that lost portion of our national wealth is gone forever.

These cashbox men, who value account books above human well-being, defeat their own purpose. It is easily demonstrable, I believe, that the right steps taken in time by the Government, and with sufficient vigor, to get us back to full employment, would contribute far more revenue to the Treasury than it would cost to get the job done. If they would attend more seriously to the human aspects of the problem, they might find, to their surprise, that the budget situation would be greatly improved.

But this curious concentration on cash is not, I think, the only explanation for the official policy of letting nature, however well-intentioned, take its course in the Eisenhower recession. I think there is this further important factor: That the makers of this policy belong to, and favor, the few who sit at the top of the economic heap, and have convinced themselves that what serves the interests of the few, will somehow prove best for the many, in the long run.

So long as profits and dividends are plentiful, this recession, in their view, is not too serious. Money can be made for the few out of the present low level of performance. This is being demonstrated to us right now, as it was demonstrated in the depths of the great depression. In fact, in the depths of the great depression, stock dividends were maintained at a remarkably high level. But the $25 billion to $30 billion of wealth we are throwing away comes, for the most part, out of jobless workers, out of small-business men and farmers who are being deprived of opportunities they could share in if that extra margin of wealth were being produced.

This concern for the few, and the unconcern for the many, that goes with it, will long be remembered as characteristic of the last Republican administration, whose policies delivered both the few and the many into disaster, 25 years ago. Now, again, we see the same bias shaping national economic policy. Whether it will go the whole way again, only time will tell. But one thing can be said with certainty: The longer the needs of the many are disregarded and neglected, the more sure it becomes that the few will be drawn down, also.

To illustrate how that may come about, let me refer to an article in the May issue of Fortune magazine, dealing with the prospect for unemployment in 1955 if the curve of production does no better than halt its decline and hold to a level course. In that case, says this magazine, the 900,000 added workers who will enter the labor market this year and the 1,500,000 workers who will be displaced by rising productivity will join the ranks of the jobless and will bring unemployment to a total of nearly 6 million workers by early in 1955.

This prospect is based on a 3-percent annual increase in labor productivity, which is the postwar average. But, says Fortune magazine, productivity may spurt, as it did from 1948 to 1950, and may rise at a rate of 6 percent, this year. In that event, another 1,500,000 workers would be displaced, and we would enter 1955 with 7½ million workers unemployed.

Mr. President, I am not forecasting that this will happen. I am reciting only a calculation of what is possible; and the calculation was made, not by me, but by Fortune magazine.

I raise this possibility, however, in order to point out that the present policy of letting our national economy take its course must, in the end, and will, in the end, defeat itself, unless by good luck some unforeseen and unpredictable forces come out from their present hiding place and save the day for us. Profits and dividends appear to be holding up well with 3,300,000 unemployed at the present time, according to the administration's statistics. Profits and dividends may survive even a further increase in the ranks of those who have no place to go. But to those who can enjoy their wealth at this cost, I speak a warning that they dare not play their luck too far. I doubt that the unemployment of 6 million, which Fortune magazine says may be coming our way, will leave even the strongest corporations unscathed; and I am convinced that the 7½ million of unemployed, which Fortune magazine says is possible, would topple those at the top, just as surely as it scourges those at the bottom.

THE OBLIGATIONS OF THE FEDERAL GOVERNMENT

Government has an obligation to avert such a catastrophe of human suffering. Government has an obligation to avert such a blow to the national economy that could cripple our resistance to international communism.

The decision appears to have been made, I most sincerely regret to say, to take a gamble on good luck and mismanagement to carry us up and out of the mess we are in. Meanwhile, it is no game for those who cannot find work, or for those who work with the specter of the layoff haunting their workbench. So I say to those who have made this choice, if you will not be moved by the hardship of those whom your policy has discarded, then be moved at least by the danger you run in cutting the ground from under your own well shod and prosperous feet. Give over, at long last, the attempt to govern by incantation. Assume the responsibilities of government, and take the steps that are clearly indicated to get the whole people buying again, working again, and producing again, so that by their own labors they can put our economy back on the road to full employment and prosperity, where your Republican administration found it in January of 1953.

Mr. President, in closing, I say the Senate now has an opportunity to support the amendment of the Senator from Massachusetts [Mr. KENNEDY], which in my judgment simply will implement and seek to put into practice the moral and economic principles I discussed earlier

in the course of my speech this afternoon. The amendment will give the Senate an opportunity to translate into legislation the very sound Biblical teaching, which is also sound economics, namely, that we truly are our brother's keeper.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed, without amendment, the bill (S. 3480) to amend section 24 of the Federal Reserve Act, as amended.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954

The Senate resumed the consideration of the bill (H. R. 5173) to provide that the excess of collections from the Federal unemployment tax over unemployment compensation administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Massachusetts [Mr. KENNEDY], on behalf of himself and other Senators.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY].

Mr. KENNEDY. On the amendment which the Senate is now considering, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I shall not detain the Senate very long in discussing the pending amendment. I am very appreciative of the remarks of the Senator from Oregon [Mr. MORSE], who I think illuminated this entire area.

I should like to emphasize three points with respect to this amendment.

First. I remind the Senate that this is not a partisan issue. We merely seek to put into effect recommendations which President Eisenhower made on January 28, that dollar maximums on unemployment compensation benefits be raised "so that the payments to the great majority of the beneficiaries may equal at least half their regular earnings."

This recommendation was reiterated by Secretary of Labor Mitchell and Assistant Secretary of Labor Siciliano on February 16, when they wrote that the Tripartite Federal Advisory Council on Employment Security supported the President's recommendations and recommended that in order to permit the great majority of workers to obtain benefits equal to at least half of their regular earnings, "the maximum weekly benefit amount should be equal to at least 60 to 67 percent of the State's average weekly wage, in line with the President's Economic Report." The 20th National Conference on State Labor Legislation, with governors' delegates from State labor departments and organized labor in 41 States unanimously adopted a resolution supporting President Eisenhower's recommendations for maximum benefit amounts not less than two-thirds of the average weekly wage in covered employment. What is even more important, they unanimously urged their adoption by Congress as amendments to the social-security law.

On January 28, the President further recommended that—

> The potential duration of unemployment benefits (be raised) to 26 weeks. * * * A 6-month period would not prevent exhaustion of benefits in a severe slump; but in a minor downturn it should be adequate for a great majority of the claimants. During the 1949 depression, almost 2 million persons exhausted their rights, most of them in less than 4½ months.

The February 16 letters from the Department of Labor urged "26 weeks of benefits uniformly to all eligible claimants in order to assure that even in a minor business downturn most workers would remain protected by the program until they could find other jobs. The effectiveness of the program in relieving unemployment distress and as a counter-recessionary device will be greatly strengthened." The unanimous resolution of the Conference of Governors' Delegates on Labor Legislation also urged this standard by congressional action. The President's recommendations concerning both benefits and duration were unanimously commended by the Joint Congressional Committee on the Economic Report.

It seems to me, therefore, that with respect to amount and duration, we really seek to write into the Social Security Act the recommendations which the President suggested last January and February—recommendations which have not yet been acted upon by the 19 State legislatures which have met since the President's recommendations were made.

Second. I wish to remind the Senate that this is not a radical departure from our present unemployment compensation law. Each State would still administer its own law, and determine eligibility benefits in the same way it has always done. The range of benefits above this basic nationwide minimum would still be established by State law. This amendment simply continues the principle adopted by the authors of the original Social Security Act of imposing only those minimum standards which are necessary to prevent injury to any State as the result of its more progressive program, and to assure basic uniformity of action against a nationwide problem governed by nationwide economic forces. Such an amendment was anticipated by the Committee on Economic Security in 1935, when they stated that the plan would "require numerous changes with experience. Congress can at any time increase the requirements which State laws must fulfill." Experience clearly indicates that only by congressional action will benefit and duration standards be restored to the levels recommended by the authors of the original act and adopted by all States at that time. This amendment, in keeping with those basic principles, will not federalize the system. The system will be federalized only when it breaks down as the result of inadequate protection and interstate warfare.

Third. I wish to remind the Senate that the cost of this amendment can easily be borne by our unemployment-compensation systems as they are presently financed, with few, if any, exceptions. The Eisenhower standards, which are also the standards of the 1930's, are not so burdensome as to impair the solvency of any State fund or impose a heavy tax burden on any employer. On the average, present costs under this amendment would increase by no more than 40 percent, an increase which would make only an insignificant dent in idle State reserves, which are from 6 to 26 times as high as the amount of benefits paid out in an average year. Nor would it affect the average contribution rate, which is now 1.3 percent, well below the normal rate of 2.7 percent anticipated in 1935. Surely the costs of public assistance and relief, of decreased purchasing power and productivity, and of inadequate living standards for families of unemployed workers are far more expensive to the Nation.

Finally, I wish to remind the Senate that this amendment makes no changes and detracts in no way from the existing provisions of H. R. 5173; but that nothing in that bill would assist unemployed workers or strengthen our Federal-State unemployment insurance system. Nothing in the bill would aid the 40,000 workers a week who today are exhausting their rights under inadequate duration of benefit payments. Nothing in that bill would further President Eisenhower's recommendations of higher average weekly unemployment benefits, which today are less than 33 percent of average weekly wages, thus reducing the worker's ability to pay his bills and buy his groceries to a level millions of dollars below that prevailing in 1938. Nothing in that bill would help the unemployed worker pay his family's rent, medical bills, and food bills, which are just as high as when he is working. This amendment, not to be confused with the earlier substitute amendment, simply seeks to add to H. R. 5173 a recognition of these needs. Other provisions of the bill are not affected. The only issue presented to the Senate by this amendment is whether it favors better unemployment compensation benefits.

Therefore, it seems to me that this amendment is in line with the Presi-

dent's recommendations. I believe it should have bipartisan support.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. SYMINGTON. As I understand from reading the Senator's typically fine address yesterday, and also listening to his remarks today, the intent of his amendment is really to carry out the principles of the 1935 law. Is that correct?

Mr. KENNEDY. That is correct. It was assumed at that time that benefits would be 50 percent of the average weekly wage. As a matter of fact, benefits were much higher from 1935 to 1939 or 1940, but since then wages have gone up and benefits have not increased proportionately.

Mr. SYMINGTON. I understand also that the amendment offered by the distinguished Senator from Massachusetts requests those standards also now requested by President Eisenhower and his Secretary of Labor. Is that correct?

Mr. KENNEDY. That is correct.

Mr. SYMINGTON. In my State there are towns which we call dead towns, towns which unfortunately have lost industry, sometimes permanently, sometimes temporarily.

The good people of these towns must shift for themselves until they get additional work to do. A mine may run out, or a defense order taken away, and so forth.

There are several such towns in Missouri. Would not the Senator agree that 26 weeks of unemployment-insurance benefits, as against the lower standards in some States, would be of great help to the people of those towns all over the Nation?

Mr. KENNEDY. I should certainly say so. As I pointed out in my remarks, 40,000 workers a week are exhausting their benefits. The number was even more substantial during the recession in 1948 and 1949.

The distress which occurs to people whose benefits are exhausted is a most unsatisfactory thing from a personal point of view, and obviously is against the public interest. They are compelled to sell their war bonds. They go on relief. They depend upon other members of their family. It is a most unsatisfactory situation when some States, by offering minimum benefits, can use that fact as an attraction to industry to come to those States, while States which try to do a fair job are penalized.

That is the reason why the offset was provided in 1935. It was felt that no State could afford to put into effect an adequate unemployment-compensation system if it were to be subjected to pressures from States which did not have to bear such a tax burden.

The whole idea was that there would be a degree of uniformity. Therefore I believe what we are talking about is in complete keeping with the public interest and with President Eisenhower's recommendation.

Mr. SYMINGTON. Mr. President, I have read and listened to the remarks of the distinguished Senator from Massachusetts as well as the fine remarks made by the distinguished Senator from Oregon [Mr. MORSE], the distinguished Senator from Illinois, and the distinguished Senator from Rhode Island. As a businessman, I believe the suggested amendment is practical and wise. I intend to vote for it because I believe it would be of help to the future of our economy.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the junior Senator from Massachusetts [Mr. KENNEDY] on behalf of himself and other Senators.

Mr. MILLIKIN. Mr. President, H. R. 5173 would strengthen the Federal-State employment security program by providing that all taxes collected under the Federal Unemployment Tax Act shall be used exclusively for employment security purposes.

Under present law the proceeds of the three-tenths of 1 percent tax retained by the Federal Government go into the general fund of the Treasury. The hearings and committee reports at the time the Federal unemployment tax was adopted in 1935 clearly indicate that this revenue was intended to finance the administrative costs of the program. Under present practice, however, the Congress appropriates funds for grants to the States to cover the administrative expenses of the program on the basis of estimated administrative needs in the various States and not on the basis of collections of the Federal unemployment tax.

The income from this tax that has been paid into the general fund greatly exceeds the costs of financing the Federal and State administrative functions relating to employment security. Collections since the program was initiated have yielded, depending upon the method of calculation, $700 million to $1 billion in excess of the funds that have been disbursed to meet Federal-State administrative costs.

The committee is of the opinion that this Federal profit is unjustified. The bill would put a stop to the present practice of using the proceeds of a tax levied on payrolls to meet general expenses of the Government.

Under the bill the excess in tax collections over the administrative expenditures would be used to meet two basic needs of the employment security program:

First. Protection of State trust accounts against the contingency of insolvency, and

Second. Greater flexibility in State administrative operations.

Yesterday I outlined to the Senate the principal provisions of H. R. 5173 which are designed to achieve these objectives.

The amendment to H. R. 5173 offered by the junior Senator from Massachusetts would impose Federal standards on the States as to the amount and the duration of benefits so that:

First. The maximum primary benefit payable under State laws shall be not less than two-thirds of the State's average weekly wage. Subject to this maximum, each individual's primary benefit shall be not less than 50 percent of his weekly wage, and

Second. Benefits shall be payable to all unemployed insured individuals in all States for a period of not less than 26 weeks.

The amendment offered by the Senator from Massachusetts would alter the existing division of responsibility between the Federal and State Governments. Under this amendment the Federal Government would be cast in a new role—one of compelling the States to provide benefits at a prescribed level and for a definite period of time.

Historically, unemployment insurance has been primarily a State program. Although I believe the problem of unemployment should always be one of national concern, I also believe the geographic variations in economic conditions and in employment practices make it essential that we retain the principle of having the actual implementation of an unemployment-insurance system carried out by State action.

Thus far the Congress has left to the States the determination of the amount of benefits and the duration for which benefits should be paid. As recently as last Thursday, the question of whether the Federal Government should impose standards on the States as proposed in the amendment offered by the junior Senator from Massachusetts, was before the House of Representatives when it was considering another unemployment insurance bill; that is, H. R. 9709. On a motion to recommit the bill to the Committee on Ways and Means with instructions to report it with amendments imposing Federal standards on States as to the amounts and duration of benefits the motion was defeated by a vote of 241 to 110.

This was the answer given by the House of Representatives to those seeking to deny to the respective States the right to determine what is the proper benefit level and how long a period of time benefit payments should be made to the unemployed in the State.

I think the House of Representatives acted wisely in defeating the proposal that is now before us. The level and duration of unemployment benefits should be left to the respective State legislatures. To infringe on these rights that historically have been vested in the States would be the opening wedge toward the elimination of State responsibility for unemployment insurance.

Under the amendment Federal standards would be imposed on the States for benefit levels and duration. If these Federal standards are enacted into law, many of the States would be required to increase the unemployment-insurance tax levied on employers. If the Federal Government assumes the role of compelling States to levy taxes to meet benefit disbursements resulting from Federal standards we shall be inviting the shift of the responsibility for financing unemployment insurance from the States to the Federal Government. In my opinion, if the Federal Government tells the States how much must be paid in benefit payments then it is logical to have the Federal Government assume the responsibility for financing the cost of such payments. I fear that if the amendment is adopted we would begin moving in the direction of more Federal responsibility and control, with the final

result being the establishment of a Federal unemployment-insurance system.

I urge that the amendment be rejected. In leaving to the States the right to establish the amount and duration of benefits we would be following the recommendations of President Eisenhower as set forth in the Economic Report of the President of January 1954. The President with respect to benefits stated:

> It is suggested that the States raise these dollar maximums so that the payments to the great majority of the beneficiaries may equal at least half their regular earnings.

As to the duration of benefits he said:

> It is urged * * * that all of the States raise the potential duration of unemployment benefits to 26 weeks.

In conclusion, may I say that we should give the States an opportunity to implement the President's recommendations which he made last January. Many of the legislatures have not been in session this year. I am hopeful that in 1955 the State legislatures that have not acted to strengthen and improve their unemployment-insurance system this year will give careful consideration to the President's recommendations.

Mr. KENNEDY. Mr. President, will the Senator from Colorado yield?

Mr. MILLIKIN. I yield.

Mr. KENNEDY. Is it not a fact that the recommendations as to duration and the amount of benefits are those which the President recommended the States adopt and are the ones contained in my amendment?

Mr. MILLIKIN. It is a fact that the States will adopt standards similar to those which I understand the Senator is proposing, but the President did not recommend that the Federal Government do it.

Mr. KENNEDY. But the standards, so far as duration and amount are concerned, are those which the President recommended the States apply. Is not that correct?

Mr. MILLIKIN. I understand that on those two points the Senator is correct, but I again emphasize that the big question is whether the Government should do it or whether the States should do it.

Mr. FERGUSON. Mr. President, will the Senator from Colorado yield?

Mr. MILLIKIN. Let me finish, first, please, with the questions of the Senator from Massachusetts.

Mr. KENNEDY. If the Senator agrees that the duration and the amount are those which the President recommended, is it not also a fact that 19 State legislatures have met since the President made his recommendations and that none of them has taken action to implement the President's recommendations?

Mr. MILLIKIN. I am not prepared to answer that question. I do not know the facts.

Mr. KENNEDY. Is it not a fact that a substantial number——

Mr. MILLIKIN. There are many States which have not met that standard, but I am assuming that those in the States who have an interest in the question, both employers and employees, are as active and diligent as we are. I do not want to hurt anyone's feelings, but I believe the States are thoroughly qualified to handle the situation in each State according to its own situation. It would be a mistake to put the matter into a straitjacket from a Federal standpoint.

Mr. KENNEDY. The reason why the system was adopted in 1935 and the reason why we have this offset tax for the States was the feeling that no State, if it had to do it by itself, would ever put into effect an unemployment compensation system. That is the reason why an unemployment compensation system was established on a Federal basis at the beginning.

Mr. MILLIKIN. One of the reasons for doing it in that way in the beginning was to make a constiutional tax which the Federal Government could levy, and thus make out of it a Federal-State relationship. But that, I suggest, has no pertinency to the question of whether we should take the power from the States and give it to the Federal Government. I am not one who believes that all the wisdom in the world is in the Federal Congress. I have a great deal of respect for the State legislatures.

Mr. KENNEDY. There was mention of the fact that a State could put in a system and compete with a State which did not have a system.

Mr. MILLIKIN. The purpose was to have a State-Federal system operating in a way that would make a constitutional tax.

Mr. KENNEDY. And it would be uniform to the extent that every State would be obliged to have a system.

Mr. MILLIKIN. Every State has one.

Mr. KENNEDY. The point I am trying to make is that as of the present time no State can afford to move its benefits up to the point recommended by the President unless every State does so, because manufacturers in a certain State would then be at a disadvantage in attempting to competé with employers who maintained a low standard.

Mr. MILLIKIN. I do not think it is as broad as the Senator suggests. If we will look at the situation in the States we shall find great variations.

Mr. KENNEDY. That is the point.

Mr. MILLIKIN. The States do vary. They are different. They have different economies. The State government finances are different. They are different in the nature of the work that goes on. If we were writing this bill again we would probably leave it to the States as we did before. We would not get as rapid results in that way as we might like, but we would get results more acceptable to the people and they would sustain the system longer. I do not think the people want the Federal Government to be centralizing this particular activity, so that we, in our wisdom, may say the standard shall be 22, or 34, or whatever the duration should be. I do not think we can fix a correct standard for every State in the Union. That is the reason why we leave a great part of the problem to the States, as I can assure the Senator.

Mr. KENNEDY. I am pointing out that the recommendations which we are attempting to put into effect were made by President Eisenhower. He did not say in his message to the Congress that because every State had a different economy, therefore the duration should be different. He said each State should adopt its minimum standards.

Mr. MILLIKIN. As I read it, I did not read any qualifications, but I can see that the President was trying to get the States to improve their standards. There has been improvement.

Mr. KENNEDY. He did not say "as best they can." He suggested 26 weeks or one-half the average pay.

Mr. MILLIKIN. Will the Senator permit me to suggest of my own mind the statement that the President and his advisers are wise on State-Federal relationships, and since he asked the States to do something, I think it must be accepted that he asked them to do it subject to their conditions. I do not think he was against a Federal standard, but he did not say he was asking us to impose it.

Mr. KENNEDY. Nineteen States have had an opportunity to take advantage of the President's recommendations, and they have not done so. The direct question is, Is it in the public interest that the United States Congress should insist that the States adopt minimum standards for unemployment compensation as they have with reference to minimum wages, public assistance, and so forth?

Mr. MILLIKIN. I do not think it was in the interest of the United States or of the States to do that, and I suggest that the analogy does not hold up.

Mr. FERGUSON. Mr. President, will the Senator from Colorado yield?

Mr. MILLIKIN. I yield.

Mr. FERGUSON. The State of Michigan has complied with the suggestion of the President as to the time and as to the amount.

Mr. KENNEDY. I would except the State of Michigan as a State which has taken action, but not up to the President's standards.

Mr. MILLIKIN. I do not think we should attribute to ourselves as much wisdom as our egos might suggest to us. I do not think we can establish standards for every State.

Mr. KENNEDY. The only point I should like to make is that there are tremendous difficulties facing any State attempting to improve its standards of benefits or duration, because it means that the employers within the State have to bear a heavier load. Therefore, if we permit each State to set its figure, there would be a premium on the State which keeps its tax the lowest and keeps its benefits and duration the lowest. Therefore, the best way to accomplish the President's recommendations is to insist that the Federal Government shall see that the standards are met. Otherwise, there would be a competitive advantage to keeping the standards lower.

Mr. MILLIKIN. I assume that with the different changes which have been made in the various States, the competitive factor has been presented. I thoroughly agree that in the final decision it is better to leave it to the States operating in their ways of life than to leave it with this body, although I have great respect for the Congress of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY], for himself and other Senators. On this question the yeas and nays have been ordered.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gillette	McCarran
Anderson	Goldwater	Millikin
Barrett	Gore	Monroney
Beall	Green	Morse
Bennett	Hayden	Mundt
Bowring	Hendrickson	Murray
Bricker	Hennings	Neely
Bridges	Hickenlooper	Pastore
Burke	Hill	Payne
Bush	Humphrey	Purtell
Butler	Ives	Reynolds
Byrd	Jackson	Robertson
Capehart	Jenner	Russell
Carlson	Johnson, Colo.	Saltonstall
Case	Johnson, Tex.	Schoeppel
Chavez	Johnston, S. C.	Smathers
Clements	Kefauver	Smith, Maine
Cooper	Kennedy	Smith, N. J.
Cordon	Kilgore	Sparkman
Crippa	Knowland	Stennis
Douglas	Kuchel	Symington
Duff	Langer	Thye
Dworshak	Lehman	Upton
Ervin	Lennon	Watkins
Ferguson	Long	Welker
Flanders	Magnuson	Wiley
Frear	Malone	Williams
Fulbright	Mansfield	Young
George	Martin	

The PRESIDING OFFICER. A quorum is present.

The question is on agreeing to the amendment in the nature of a substitute, offered by the Senator from Massachusetts [Mr. KENNEDY] for himself and on behalf of other Senators. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. SALTONSTALL. I announce that the junior Senator from Wisconsin [Mr. MCCARTHY] is absent on official business.

The Senator from Illinois [Mr. DIRKSEN] and the Senator from Michigan [Mr. POTTER] are necessarily absent.

If present and voting, the junior Senator from Wisconsin [Mr. MCCARTHY] would vote "nay."

Mr. CLEMENTS. I announce that the Senator from Texas [Mr. DANIEL], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan-American Highway Congress at Caracas, Venezuela, and, if present, would vote "nay."

I announce further that on this vote, the Senator from Texas [Mr. DANIEL] is paired with the Senator from Oklahoma [Mr. KERR]. If present and voting, the Senator from Texas would vote "nay," and the Senator from Oklahoma would vote "yea."

The result was announced—yeas 30, nays 56, as follows:

YEAS—30

Aiken	Hennings	Magnuson
Anderson	Hill	Mansfield
Burke	Humphrey	Monroney
Chavez	Jackson	Morse
Douglas	Johnston, S. C.	Murray
Fulbright	Kefauver	Neely
Gillette	Kennedy	Pastore
Gore	Kilgore	Sparkman
Green	Langer	Symington
Hayden	Lehman	Young

NAYS—56

Barrett	Ferguson	Mundt
Beall	Flanders	Payne
Bennett	Frear	Purtell
Bowring	George	Reynolds
Bricker	Goldwater	Robertson
Bridges	Hendrickson	Russell
Bush	Hickenlooper	Saltonstall
Butler	Ives	Schoeppel
Byrd	Jenner	Smathers
Capehart	Johnson, Colo.	Smith, Maine
Carlson	Johnson, Tex.	Smith, N. J.
Case	Knowland	Stennis
Clements	Kuchel	Thye
Cooper	Lennon	Upton
Cordon	Long	Watkins
Crippa	Malone	Welker
Duff	Martin	Wiley
Dworshak	McCarran	Williams
Ervin	Millikin	

NOT VOTING—10

Daniel	Holland	McClellan
Dirksen	Kerr	Potter
Eastland	Maybank	
Ellender	McCarthy	

So the amendment offered by Mr. KENNEDY for himself and other Senators was rejected.

Mr. MILLIKIN. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. KNOWLAND. Mr. President, I move to lay on the table the motion of the Senator from Colorado.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from Colorado.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. PASTORE. Mr. President, I call up my amendment, designated 7–7–54–A.

The PRESIDING OFFICER. The clerk will state the amendment.

Mr. PASTORE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with, and I shall explain the amendment.

The PRESIDING OFFICER. Without objection, the amendment will not be read, but will be printed in the RECORD at this point.

The amendments offered by Mr. PASTORE (for himself, Mr. GREEN, Mr. MURRAY, Mr. NEELY, Mr. KILGORE, Mr. HUMPHREY, Mr. KENNEDY, Mr. LEHMAN, and Mr. MORSE) are as follows:

On page 8, line 4, it is proposed to strike out "1202" and insert "1201."

On page 11, beginning with the word "Any" in line 7, it is proposed to strike out down through line 23 on page 12 and insert in lieu thereof the following:

"Any amount transferred to the account of any State under this section shall be treated as an advance, without interest, to the unemployment fund of such State and shall be repaid to the Federal unemployment account from the unemployment fund of that State to the extent that the balance in the State's account in the Unemployment Trust Fund, at the end of any calendar quarter, exceeds a sum equal to the total contributions deposited in the Unemployment Trust Fund under the unemployment compensation law of the State during that 1 of the 2 calendar years next preceding such day in which such deposits were higher. The Secretary of the Treasury shall, after the end of each calendar quarter, transfer from the unemployment account of each State in the Unemployment Trust Fund to the Federal unemployment account the amount required to be repaid from the unemployment fund of such State at the end of such quarter under this subsection."

On page 13, beginning with line 5, it is proposed to strike out over through line 18 on page 14.

On page 16, line 3, it is proposed to strike out "1202" and insert "1201."

On page 16, line 17, it is proposed to strike out "1202" and insert "1201."

Mr. PASTORE. Mr. President, the amendments which I am proposing have to do only with the repayment features of the pending bill. The bill provides that once the money has been borrowed by a State, the State is obliged to begin repaying it to the trust fund by a year from the following January, whether or not the economic situation in the borrowing State has improved. If the borrowing State has not accumulated in the meantime a surplus sufficient to pay back the loan, then a graduated increase is imposed upon the contribution payment made by industry at the rate of 5 percent per annum.

First of all, no State should or will apply for a loan, under the bill, unless its own fund is in jeopardy of becoming insolvent. By requiring that State to pay it back so soon after the loan is negotiated at the penalty of increasing the contribution on the part of industry, we would in fact be aggravating a situation which is already bad.

If it is the intent of Congress that the money advanced to the State shall not be a grant, but shall be paid back, then I submit to the Senate the fair and proper way of doing it is under the plan which was originally conceived by the distinguished Senator from Georgia [Mr. GEORGE] and enacted into law in 1944, as a result of a study by the Special Committee on Postwar Economic Policy and Planning of the United States Senate made in that year.

The George formula, while it imposes upon the borrowing States the responsibility to repay the loan, does so in a fashion which is more in keeping with the spirit of helping those States which find themselves in distress through no fault of their own. The George formula requires that the State pay the money back when it is better able to do so.

In short, as my amendment proposes, and which is, in fact, the George formula, a borrowing State would be compelled to pay back to the extent that the balance in the State's account in the unemployment trust fund at the end of any calendar quarter exceeds a sum equal to the total contributions deposited in the unemployment trust fund under the unemployment compensation law of the State during that one of the 2 calendar years next preceding such day in which such deposits were higher.

In order to make the amendment clear, Mr. President, let me say that it would avoid requiring a State to raise its tax

or imposition upon industry over and above 2.7 percent. In the case of most States, when reserves exceed 2.7 percent of the highest payroll in the last 2 years, the State would begin to pay back.

I should like to emphasize that this idea was originally adopted by Congress in 1944, and was known as sections 401 and 402 of Public Law 458 of the 78th Congress, 2d session. At that time an appropriation was authorized for the fiscal year 1945, and Congress saw fit to extend the provisions of the 1944 act until January 1, 1950, and then renewed the authorization for an appropriation. Again, on August 28, 1950, Congress extended the provisions of the act until January 1952, when the act finally expired.

There has never been criticism of this repayment provision. Although it is true that occasion did not arise to necessitate a State drawing on the Gorge loan fund, but the fact remains that precisely the same situation as was then contemplated prevails today, and if the law had been extended, it would be applicable.

In other words, if my amendment should be adopted, I know of no State that at this time could borrow money under the provisions of the amendment. The States would have to wait until such time as their surplus fell below the contributions collected during the previous year, which is the present provision of House bill 5173. I submit that if it is the intent of Congress to strengthen our unemployment compensation law, we should not impose upon industry in a State a requirement that when the economy of the State is in a depressed condition the State must repay its obligation within a period of 2 years; and that if it does not do so, a 5-percent penalty will be imposed on the depressed industry of the State, thereby adding insult to injury.

Mr. President, this amendment is a reasonable one. We have previously had experience with it. The idea encompassed in the amendment is not original with me, but was conceived in 1944 in the mind of the distinguished senior Senator from Georgia [Mr. GEORGE]. So I think the amendment should at least be approved by the Senate and taken to conference by the distinguished Senator from Colorado [Mr. MILLIKIN].

Mr. MILLIKIN. Mr. President, under the amendment offered by the Senator from Rhode Island [Mr. PASTORE], the provisions of House bill 5173 requiring that advances to States be repaid by a decrease in the 90 percent allowable credit rate against the 3 percent Federal employment tax would be deleted. Under the amendment, an advance to a State "shall be repaid to the Federal unemployment account from the unemployment fund of that State to the extent that the balance in the State's account in the unemployment trust fund, at the end of any calendar quarter, exceeds a sum equal to the total contributions deposited in the unemployment trust fund under the unemployment-compensation law of the State during that 1 of the 2 calendar years next preceding such day in which such deposits were higher."

It appears that under the amendment there would be no requirement that the State would ever have to levy any particular level of tax. Therefore, it would seem that the State would never have to repay the advance, under the provisions of this amendment, if the State did not increase the tax levied on its employers so as to replenish its unemployment reserve to the level required by the provision of the amendment I have just quoted. In other words, as I read the amendment, the States that were not in trouble might very easily be called upon to meet the requirements of a State that, let us say without disrespect to any State, does not make maximum efforts to carry its part of the program.

Mr. President, I think the amendment is a bad one, and should be rejected.

Mr. PASTORE. Mr. President, will the Senator from Colorado yield to me?

The PRESIDING OFFICER (Mr. BUSH in the chair). Does the Senator from Colorado yield to the Senator from Rhode Island?

Mr. MILLIKIN. Certainly.

Mr. PASTORE. Is it not a fact that the formula I have suggested, by means of my amendment, is not new to the Senate, but that the Senate has previously had such a provision before it, and has approved it? Is not my amendment, in essence—in fact, word for word, in part—the amendment which was adopted by the Senate and was reenacted several times until 1952, having originally been proposed by the Senator from Georgia [Mr. GEORGE]?

Mr. MILLIKIN. No; I do not have that impression of the amendment of the Senator from Georgia.

Mr. PASTORE. Insofar as the repayment features are concerned, my amendment is word for word the same as the law which was passed in 1944.

Mr. MILLIKIN. In my reading of the George amendment and of the amendment submitted by the Senator from Rhode Island, I find that a very important part of the George amendment is omitted.

Mr. PASTORE. Will the Senator from Colorado be so kind as to state the important part that is omitted?

Mr. MILLIKIN. I shall read to the distinguished Senator the part of the George amendment which I understand was omitted:

SEC. 1201. (a) In the event that the balance in a State's account in the unemployment trust fund on June 30, 1947, or on the last day in any ensuing calendar quarter which ends prior to January 1, 1952, does not exceed a sum equal to the total contributions deposited in the unemployment trust fund under the unemployment compensation law of the State during that 1 of the 2 calendar years next preceding such day in which such deposits were higher, the State shall be entitled, subject to the provisions of subsections (b) and (c) hereof, to have transferred from the Federal unemployment account to its account in the unemployment trust fund an amount equal to the amount by which the unemployment compensation paid out by it in the calendar quarter ending on such day exceeded 2.7 percent of the total remuneration which was paid during such quarter and was subject to the State unemployment compensation law.

Where does the amendment of the Senator from Rhode Island refer to a 2.7 percent tax?

Mr. PASTORE. My amendment is even stronger, because the committee has amended the bill, so that it will be possible to borrow without imposing the maximum rate of 2.7 percent. The committee has watered down the bill. But I submit that the substance of what the Senator from Colorado has just read is the same as the substance of my amendment. Under my amendment, in no case will a State be obliged to repay until the surplus has reached 2.7 percent.

The committee has amended the bill by watering down the imposition provision which was placed in the law in the House of Representatives. I refer to the requirement that before money could be borrowed under the provisions of House bill 5173, it would be necessary to raise the rate to its maximum extent. The committee deleted that provision of the bill. That is the only reason why there is a slight difference. But I submit that my amendment is, if different in any way, even stronger than the George amendment.

Mr. MILLIKIN. Mr. President, if the committee has watered down the bill, certainly that is no reason for watering it down again.

As I view the matter, the difference between the amendment of the distinguished Senator from Rhode Island and the bill as reported by the committee is that the bill as reported requires a repayment, whereas the amendment of the distinguished Senator from Rhode Island in essence does not.

Mr. PASTORE. Mr. President, will the Senator from Colorado yield for a question?

Mr. MILLIKIN. Yes.

Mr. PASTORE. Does not the Senator from Colorado feel that it is unreasonable to provide that a depressed State, that can borrow money only if the amount collected in the preceding year is less than the contribution made in that State, must recover within a period of 2 years, in order to pay back the obligation without having this penalty imposed?

Mr. MILLIKIN. Does the Senator from Rhode Island wish to extend it for, let us say, 3 years?

Mr. PASTORE. If the amendment should be rejected, at least that should be done—although to perhaps 4 years, not 3 years. I understand that even the administration has recommended 4 years.

But it is ridiculous for us to assume that the economy of a State will in any event—short of a war—recover within a period of 2 years. In our economy there is no magic or hocus-pocus that would result in accomplishing that feat within a period of 2 years. That is the point I have made right along in connection with the bill.

In the bill we state a very pious intention. I think we mean to do good to some of the States which need help, but by the very language of the bill we defeat our purpose, because any State which wishes to borrow this money would be better off to raise its ceiling beyond the 3-percent point from the beginning,

and not come to the Congress or to the United States Treasury at all.

Mr. MILLIKIN. I suggest that if any of the States get into a situation of the type described by the Senator, we shall have a great deal of legislating to do in the social-security field. We cannot go to heaven in a simple jump.

Mr. PASTORE. I realize that. Perhaps we cannot go there in two jumps, but the fact still remains——

Mr. MILLIKIN. Let me finish. I submitted that remark as a preliminary background remark against the effort which we often make to achieve complete, lasting perfection in a single bill.

The trouble with the Senator's amendment is that there is no real provision for repayment. If he wishes to lengthen the period to 3 years, I should be delighted to take such an amendment to conference. However, if a depressed condition in a State cannot be cured in 3 years, I should say that we would be in pretty bad condition.

I come back to the point I mentioned earlier. We shall be here again, enacting legislation to meet the situation which confronts us. If the Senator wishes to allow a period of 3 years for the purpose of repayment, let him put it in an amendment, and I shall be glad to take it to conference.

Mr. PASTORE. The provisions of the bill are not as far-reaching as the Senator implies. First of all, before a State can borrow money under the provisions of the bill, the surplus of the State must be reduced to the point of 2.7 percent of taxable payroll. There is no State in the Union today operating on a basis below 3.9 percent of taxable payroll. When a State wishes to negotiate a loan under this amendment, it is in a desperate condition. For us to say that the State must pay back the loan in 2 or 3 years, with a penalty of 5 percent, is, I fear, going too far.

Mr. MILLIKIN. If we follow the Senator's reasoning to its conclusion, we may arrive at a period of 3 years, 4 years, 5 years, 10 years, or 20 years. There is no bottom to that argument. If the Senator thinks 2 years is too short, and that 3 years is more reasonable, let us say 3 years. I will take such an amendment to conference.

Mr. PASTORE. Will the Senator accept 5 years?

Mr. MILLIKIN. I would accept 4 years.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island [Mr. PASTORE].

Mr. PASTORE. Mr. President, I wish to modify my amendment so that wherever the word "second" is used, the word "fourth" will be substituted, so as to carry out the intent.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

Mr. MILLIKIN. I do not believe that part is in the Senator's amendment, is it?

Mr. PASTORE. No; it is not. It is an entirely different thing. The Senator's suggestion is an amendment of the present bill. My amendment is an entirely different procedure with respect to repayment.

Mr. MILLIKIN. Let me suggest that the Senator use the proposed amendment which I hand him.

Mr. PASTORE. Does it provide for a period of 4 years?

Mr. MILLIKIN. Yes.

Mr. PASTORE. If the Senator proposed, on his own initiative, to change it to 4 years, he is quite a horsetrader to try to get me to agree to 3 years. [Laughter.]

Mr. MILLIKIN. I never start the trade by giving my best figure.

The PRESIDING OFFICER. The question is on agreeing to the modified amendment offered by the Senator from Rhode Island [Mr. PASTORE].

Mr. KUCHEL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. Is the Chair correct in understanding that the Senator from Rhode Island has modified his amendment?

Mr. PASTORE. I modify my amendment so as to state precisely what is stated in the language handed to me by the Senator from Colorado.

Mr. MILLIKIN. Worded in the proper way so as to conform to the language of the bill.

The PRESIDING OFFICER. The modified amendment will be stated.

The LEGISLATIVE CLERK. On page 13, line 23, it is proposed to strike out "second" and insert in lieu thereof "fourth."

The PRESIDING OFFICER. The question is on agreeing to the modified amendment offered by the Senator from Rhode Island.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. KUCHEL. This is a rather technical subject. Before the debate began today I was discussing the original amendment proposed by the Senator from Rhode Island. I think it is not asking too much to request that we have a word or two of discussion on the basis of the modified amendment. I do not understand what it proposes to do.

First, may the clerk read the proposed amendment, as modified?

The PRESIDING OFFICER. The modified amendment will be stated.

The LEGISLATIVE CLERK. On page 13, line 23, it is proposed to strike out the word "second" and insert in lieu thereof the word "fourth."

The PRESIDING OFFICER. The Chair advises the Senator from California that this is the amendment as modified.

Does the Senator from Rhode Island wish to respond to the question of the Senator from California?

Mr. PASTORE. Will the Senator from California restate his question?

Mr. KUCHEL. I wish to know the reason prompting the Senator to modify his amendment.

Mr. PASTORE. As the bill is now written, the loan must be paid back within a year after the next January. My modified amendment would make it necessary to pay it back within 4 years after the next January. In other words, it would give the State an opportunity to recover from its depressed economic condition before it was compelled to pay back the loan.

Mr. KUCHEL. And in the 4-year interval it would be within the discretion of the State to make repayment to the Federal Government?

Mr. PASTORE. I suppose if it could make the repayment sooner, it would do so.

Mr. KUCHEL. That ought to be pretty clearly indicated. It would be within the discretion of the State government, would it not?

Mr. PASTORE. This is the maximum of the responsibility. I think, without saying so, that is very clearly implied.

Mr. KUCHEL. Under the Senator's amendment, as modified, using the word "fourth", instead of "second", when a loan is made to a State in distress, the State is given 4 years in which to repay to the Federal Government that which it has borrowed?

Mr. PASTORE. That is correct—instead of 1 year.

Mr. MILLIKIN. Or 2.

The PRESIDING OFFICER. The question is on agreeing to the modified amendment offered by the Senator from Rhode Island [Mr. PASTORE].

The amendment, as modified was agreed to.

Mr. KENNEDY. Mr. President, I offer the amendments which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendments offered by the Senator from Massachusetts will be stated.

The LEGISLATIVE CLERK. On page 7, line 23, it is proposed to strike out "(1)";

On page 7, lines 24 and 25, it is proposed to strike out "except as provided in paragraph (2)";

On page 8, it is proposed to insert quotation marks at the end of line 2;

On page 8, beginning with line 3, it is proposed to strike out over through line 7 on page 9;

On page 14, beginning with line 19, it is proposed to strike out over through line 18 on page 15;

On page 15, line 19, it is proposed to strike out "(b)" and insert "Sec. 5. (a)"; and

It is proposed to redesignate subsections (c) to (f), inclusive, as subsections (b) to (e), respectively.

The PRESIDING OFFICER. Does the Senator from Massachusetts wish to have the amendments considered en bloc?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

Mr. KENNEDY. Mr. President, I should like to ask the Senator from Colorado [Mr. MILLIKIN] one or two questions.

Is it not a fact that the Congress now has the responsibility, under the Social Security Act, for appropriating to the States the cost of administration of this program?

Mr. MILLIKIN. That is correct.

Mr. KENNEDY. The Congress allows the State administrators enough each year to administer their program.

Mr. MILLIKIN. Under the State-Federal program.

Mr. KENNEDY. Is it not a fact that the $60 million excess which has been developing every year, and which since 1935 we have put in the General Treasury, under the provisions of the bill before us would be built up to $200 million over a period of 3 years, we assume? That will be put in a fund available for loans, and after that each year $60 million will be turned back to the State accounts for benefits and administration. Therefore, is it not possible that the State administrators will not only have the sums which the Congress allows them for administering this program, but will also have additional funds if they can persuade the State governments to grant them?

Mr. MILLIKIN. I think the answer to that question is "Yes." The bill provides that before the State government uses these particular funds for administrative purposes it must appeal to its legislature and obtain permission of the legislature.

Mr. KENNEDY. Is it not a fact that Mr. Folsom, Acting Secretary of the Treasury, opposed this provision, and the administration opposed the provision, in both the House and Senate?

Mr. MILLIKIN. I understand that the Department of Labor opposed it before the Senate Committee.

Mr. KENNEDY. I quote from a letter from Mr. Folsom, Acting Secretary of the Treasury, to the Senator from Colorado, dated Washington, D. C., July 25, 1953:

> At present the Congress has the responsibility for determining what is necessary to the proper administration of the unemployment compensation system and the public employment service, and for appropriating adequate funds for this purpose. Enactment of the bill would mean that after the Congress had made these decisions, additional amounts would nevertheless be available to the States for the same purpose. Moreover, the States would be appropriating tax revenues which they had no responsibility for raising. Such practices would seem to militate against sound administration.
>
> Administrators of State employment security systems have complained that funds made available in the past by the Federal Government have sometimes been inadequate for efficient administration or for desirable innovations in administration. However, this is a problem which should be met directly by the Congress through the appropriation procedure. The Congress has already taken an important step in this direction by providing a contingency fund appropriation of broad scope which will afford greater flexibility in meeting the needs of the States.

Therefore, it seems to me that it is not only the Labor Department opposing this provision, but it is the Treasury also.

Mr. MILLIKIN. The money is raised by the States. Therefore, I do not believe there is much to that argument.

Mr. KENNEDY. It is raised through a Federal tax.

Mr. MILLIKIN. But it comes from the States.

Mr. KENNEDY. Yes; in the sense that it is paid as a tax by the people of the States.

Mr. MILLIKIN. Yes; and they get it back for administrative purposes if they can get the consent of the legislature. We had quite a bit of experience with that administrative question. It seems that some of the States want to carry on studies, and things of that kind, which may not be provided for in the Federal allocation, and one of the questions which the State legislatures should decide is whether such charges are a proper administrative expense. I do not believe there would be much abuse, because benefits have a stronger appeal than do administrative expenses.

Mr. KENNEDY. The Senator will recall that Mr. Brown, of New Hampshire, gave an example of how he would spend the money, which the Senator from Colorado stated was not a satisfactory example.

Mr. MILLIKIN. It was not a satisfactory example. I venture to say with almost certainty that if Mr. Brown will get the Legislature of New Hampshire to go along with his program—I was going to say that I would eat the Senator's hat, but I will take a nibble at it.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. RUSSELL. I may say that I doubt whether it is possible to get any changes made in a bill reported by the Committee on Finance at this late date. However, I agree completely with the Senator from Massachusetts that it is very unfortunate to have administrative funds flowing to a State agency from two different sources. Anyone who has been connected with a State government knows something about the difficulty of keeping up such a process. Heretofore, as I understand, the administrative funds have been determined by congressional appropriations. They have not quite amounted to the full three-tenths of 1 percent. I am not completely familiar with this legislation, but I believe that is the amount the basic law allows. I care not whether it is the New Hampshire Legislature or the legislature of any other State, when the argument is made before a State committee, "This is not going to cost the State treasury anything, and it is not going to cost the State's taxpayers anything, because we are going to pass a State law whereby the Federal Government is going to have to give us $200,000 or $300,000," that argument is absolutely irresistible to a State legislature.

No man need deceive himself that a State legislature will not appropriate the money under those circumstances.

I regret very much that such a provision is in the bill. I think it is an unfortunate provision. I hope an amendment will be offered to strike it out, so that I may have an opportunity to support the amendment of the Senator from Massachusetts.

I spent 10 years in the Legislature of Georgia, and I have also been privileged to serve as Governor of my State. When it comes to the question of getting Federal funds in a State for administrative purposes, I know it is one of the easiest things the head of any State department can undertake.

Mr. KENNEDY. I appreciate what the Senator has stated. I do have an amendment at the desk which provides that the money shall be available only for benefits, not for administration.

Mr. MILLIKIN. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. MILLIKIN. In the first place, we are not taking Federal funds. The money is by that time in a State trust fund. It is kept in the Treasury, but it is State money, and therefore the question before the local authorities is, "Shall we use it for benefits, or shall we use it for administrative expenses, or both?"

I have never been a member of a legislature, but I have had a great deal to do with them. I suggest again that benefits will have a much greater popular appeal than will an administrator who is squandering money.

Mr. RUSSELL. That depends on the situation. If there happened to be a call for benefits, the legislature would undoubtedly consider benefits. However, in periods of high employment, when there is no demand for benefits, and when the funds are not going to be spent for that purpose, any man who has had any political experience at all knows that the legislature will give this fund to the administrator for administrative purposes.

As a member of the Appropriations Committee of the Senate, I have had some little experience with appropriations for administrative purposes. We have had some difficulty in some States. Where Federal funds were available for administration, instances have occurred of a State government paying a clerk or a stenographer a considerably higher salary than would be paid if the money was raised from purely State tax sources. Of course I know that all the money comes from the States, but a State cannot get the money until it is appropriated by Congress. However, I should like the present condition maintained, with the exception of the provision for a $200 million fund which the bill establishes.

Of course those funds can never be shaken loose again once they are dedicated to administrative purposes, no matter what the need may be. I should vote to have them impounded for benefits, but I am confronted with that narrow alternative; therefore I shall support the amendment of the Senator from Massachusetts.

Mr. KENNEDY. I thank the Senator.

Mr. MILLIKIN. I should like to suggest that the money in question will be in the State trust funds. If the money were spent in a way the State did not think was proper, or if the money were spent for administrative purposes wastefully, then the State would confront the necessity of raising more money from the taxpayers.

Mr. RUSSELL. I had understood—and I confessed at the beginning that I was not an expert—that all of this money came from the three-tenths of 1 percent tax.

Mr. MILLIKIN. That is correct.

Mr. RUSSELL. Which, by the basic social-security law, is dedicated to this purpose. Heretofore, we have not appropriated the full amount. There is remaining in the hands of the Federal Government as trustee for the States a

trust fund, or something in the nature of a trust fund. Is that not correct?

Mr. MILLIKIN. I would say that in effect it is not that way at all. The Federal Government takes the cost of administering the system from the money it gets from the States.

Mr. KENNEDY. The money does not come from the States. It comes from a Federal tax.

Mr. MILLIKIN. But all of it comes from the States.

Mr. KENNEDY. In the sense that the people of the States pay it. But this is not a State tax; it is a Federal tax we are going to turn over to the States for benefits and administration.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. GEORGE. We levy a tax of 0.3 percent on the employers of the States, and the employers in each State are the men who are faced with this tax, if they are covered by the law. We permitted a deduction of three-tenths of 1 percent to cover the administrative costs. I am not going back to the time when we originally considered this act. The three-tenths of 1 percent was transmitted to Washington, just as the remaining moneys were transmitted to Washington. It all went into the Treasury. The entire fund is paid by the employers in the States under a Federal levy, it is true, but also under a State levy, because the State must make the same levy.

The three-tenths of 1 percent resulted in the accumulation of a fund over and above the administrative costs. What this bill does is to recognize that three-tenths of 1 percent accumulation as State money, belonging to the State. It become a State fund. It is put into the Treasury of the United States, but it is still separated and segregated as a State trust fund. That is all there is to it.

This bill also provides for the establishment of a revolving loan fund. It will require about 4 years to get it underway. If it turns out that there is something wrong with the bill before the 4 years have expired, certainly we can correct it. But the money which is in the Federal Treasury to the credit of each State can be taken out if the trust fund has been made up and there is still a surplus, but it can be taken out only by an act of the legislature of a State. The legislature of the State would be dealing with a State trust fund. This bill would stop the Treasury from using it for general purposes. It would earmark it. It is strictly a trust fund, but it can be taken out.

Permit me to say to my colleague [Mr. RUSSELL] and to other Senators that it may be recalled that the employer group in each State is certainly watching this trust fund, because the higher it becomes, the less will be the tax on them. What is used for administrative purpose would not be of very much help to them.

This fund to the credit of State aid is usable and is available for the payment of additional administrative costs, if the legislature, by resolution or act, approves the payment and can justify it, or the fund is payable for benefits under the Social Security Act. Many States have reduced the cost to their employers by good administration and by the application of what they call the experience-benefit rule, which is authorized in the organic act, so that many States do not levy 3 percent or 2.7 percent for the payment of benefits, and there is constant pressure on the administrative agency of the State to hold the expenditures down. It may be that that should not be, but the tax of the taxpayer in the State is lightened if expenditures are held down.

Mr. RUSSELL. Of course, I recognize that my colleague has correctly outlined the history of the social-security law and its effect of it, but does not this bill grant to the States, even though it be out of their own trust fund, a source of administrative funds not today available to them?

Mr. GEORGE. No. It would be available to them now, if they could satisfy the agency in Washington. That is the nub of the difficulty.

Mr. RUSSELL. I thought it was the Congress of the United States in an appropriation bill rather than an agency in Washington.

Mr. GEORGE. That is true, and if the agency represented that a State was entitled to so much for administrative costs, the Appropriations Committee would very likely grant it. But if the agency said, "No; we have scrutinized this administrative setup, and it should not be so high, should be cut down," the Appropriations Committee probably would ordinarily follow that recommendation, but not necessarily so.

Mr. RUSSELL. The Appropriations Committee in times past has reduced the amount requested by a Federal agency to be allocated to the States for administrative purposes.

Mr. GEORGE. That is true. The amount may have been increased in some instances.

Mr. RUSSELL. I do not gainsay that; I do not know, as a matter of fact. My only point is that, as a matter of policy, it is a bad idea for a State agency which is handling this fund, covered under Federal law as well as State law, to have two sources of funds for administrative expenses. I submit that the ordinary legislative body meeting for 30 or 60 days a year, with a great press of business, cannot keep up with the administration of an agency if it has to trace some of the money all the way back to Washington in connection with appropriations by the National Congress. We should make all the funds for administration within the States available by an act of the State legislative body, or we should retain the funds where they are today and have the money appropriated by the National Congress. I submit that, as a matter of policy, it would cause trouble if we made available to a State agency administrative funds from two separate sources, and the funds were merged.

Mr. GEORGE. The source is the same, exactly the same. It is the State's money. It has always been so recognized. Yet, the Federal Government said, "Since you did not spend it for administrative purposes and since you are accumulating a fund which is, in one instance, $100 million and in another instance $600 million, it should be devoted to general purposes."

The temptation is to cut down on the State administrator because every dollar cut from the State administrator is put into the general fund, and it goes into the general Treasury. It is from the same source. There are two methods of dealing with it, but, in the first instance, the method is directed, under the present law, strictly by the Congress.

Mr. RUSSELL. I did not understand the bill proposed to do away with congressional appropriations.

Mr. GEORGE. No; I do not think it does.

Mr. RUSSELL. But it adds a source of revenue by providing that legislatures may likewise take the funds for administrative purposes.

Mr. GEORGE. Only out of the surplus which is placed to the credit of the States. The important check is the vigilance of employers who watch this fund very carefully, since the fund is placed to the credit of the States and is available for the payment of administrative costs if they can be justified. Payment of benefits was begun under the Unemployment Compensation Act. It seems to me we have as good a check on it as we can possibly have. I think the States and all the employers in the States will soon learn, if they have not already learned—and a great many of them have been pressing us to approve this proposed legislation—that the employers are not trying to build up a lot of machinery for administrative purposes. They are trying to hold down taxes. I think it is a matter of gratification that in many States, indeed in a great many States, through the experience rating which the organic law recognizes, employers themselves have been able to perform the real functions of the Unemployment Compensation Act by keeping more people on their payrolls for a longer period of time without drastic reductions in wages. They are always watchful in an effort to reduce, if possible, the costs, because the tax involved falls on them whether they are in the red or in the black. They have to pay it. It seems to me there is no great difficulty about it, because they have this additional method of getting some part of the surplus, if a surplus should accrue.

Let me say that a surplus over and above the loan fund cannot accrue for at least 3½ or 4 years. In the meantime, certain "bugs" might be discovered, and the law could be corrected.

Mr. RUSSELL. Mr. President, if my colleague will indulge me 1 more minute, I believe in the fullest measure of autonomy for the State governments, as a usual procedure. I have constantly opposed any effort which would saddle upon the several States a Federal system with reference to payments, the length of time payments are to be made, or the conditions of payment.

I believe I recall that at one time the distinguished Senator from California [Mr. KNOWLAND] led a fight in the Senate to preserve that doctrine, and I fought shoulder to shoulder with him.

If it is proposed to make this purely a State function, and to let the State governments, from the allocation, say what they intend to devote to administration, I shall be very happy to support such a proposal. But I cannot support a system which is based partly upon appropriations for administration from the Federal Treasury, and partly upon giving to the legislatures of the States the authority to appropriate funds for administration. I believe that is something entirely within the efforts of coordination between the Federal Government and the States. In my judgment, it will lead to confusion, if not to scandals, in some States, to have the funds coming from the two sources.

Mr. KENNEDY. I thank the Senator from Georgia.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. HUMPHREY. Is it not true that in a number of instances some States have received for administrative costs more money from the Federal Treasury than they actually have paid in?

Mr. KENNEDY. Yes; that is a fact. I think that demonstrates that these are State funds. For example, the State of North Dakota has received 194 percent of what it has paid in under the tax. The State of Georgia has received only 77 percent of what it has paid in. So it is obvious that some States are carrying the load for other States.

It is a question of what decision the Department of Labor and the Committee on Appropriations will reach as to what the States need. As the Senator from Georgia has said, to permit the States to have a further remedy, in order to appeal for funds beyond the Committee on Appropriations, would be a mistake.

Mr. HUMPHREY. So what we have, in this instance, is that this Federal tax collectible goes into the Federal Treasury and is earmarked for specific purposes, and is placed in trust funds. However, if a State needs more than the Federal tax yields, the State gets the additional amount for purposes of administration.

Mr. KENNEDY. That is correct.

Mr. HUMPHREY. If those taxes are greater, it cannot be State revenue, because one cannot take out of a State revenue receptacle more than is in it. What it really amounts to is the designating of Federally accumulated funds in State compartments for State administrative purposes; and when that money has been exhausted, they reach out and take more from somewhere else.

Mr. KENNEDY. Yes. I conclude by saying that the money is redistributed, not in accordance with what each State may receive for administration, but according to the percentage which a State's payroll bears to the total amount of the payrolls. This demonstrates that there is no real connection between the amount which a State pays in to the fund and the amount which will be available to it under this plan.

Mr. MILLIKIN. Mr. President, I simply wish to say again that I think the amendment should be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY].

Mr. KENNEDY. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. KENNEDY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, on this amendment I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY]. On this question the yeas and nays have been ordered.

Mr. DOUGLAS. Mr. President, before the Senate proceeds to vote, I wish to point out that the amendment offered by the Senator from Massachusetts is precisely what has been recommended by the administration. I read from a letter to the Senator from Colorado [Mr. MILLIKIN] under date of July 17, 1953, signed by M. B. Folsom, Acting Secretary of the Treasury, which appears on page 13 of the hearings on the bill. I read the salient paragraph:

> In view of these considerations, it would seem reasonable and appropriate that the excess Federal unemployment tax collections allocated to the States be used only for benefit purposes.

Mr. HUMPHREY. Mr. President, will the Senator from Illinois yield before leaving that point?

Mr. DOUGLAS. I yield.

Mr. HUMPHREY. On page 12 of the committee hearings, the Senator will observe a colloquy between the chairman of the committee, the Senator from Colorado [Mr. MILLIKIN], and Assistant Secretary of Labor Siciliano. I call attention to the following:

> The CHAIRMAN. What is the State responsibility in the raising of these funds?
>
> Mr. SICILIANO. To answer your question, the State has no responsibility for raising three-tenths of 1 percent tax.
>
> The CHAIRMAN. No administrative machine?
>
> Mr. SICILIANO. None, sir.
>
> The CHAIRMAN. It is completely controlled by congressional legislation?
>
> Mr. SICILIANO. Yes, sir. I might say that the total tax is 3 percent; 90 percent of that 3 percent, or 2.7, is raised by the States for their own benefit program, but this three-tenths of 1 percent is paid indirectly into the Federal Treasury. That is a Federal tax.

My point is that this is exactly what the Senator from Massachusetts has been contending, namely, that these are not State funds; they are funds which are raised by a Federal tax. The administration says that these funds, if they are to be used, or if they are to be in excess of need, should be for benefits.

Furthermore, Mr. Folsom, in the letter from which the Senator from Illinois has just quoted, was quite adamant in his position that if the bill now before the Senate be passed without the Kennedy amendment, the opportunity will be opened up for excessive abuse of the funds for administrative purposes.

I summarize by saying that we are about to vote on one of the recommendations by the present administration to protect the integrity of the funds raised by the Federal tax.

Mr. DOUGLAS. The Senator from Minnesota is exactly correct.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts [Mr. KENNEDY]. On this question the yeas and nays have been ordered, and the Secretary will call the roll.

The Chief Clerk called the roll.

Mr. SALTONSTALL. I announce that the junior Senator from Indiana [Mr. JENNER] and the junior Senator from Wisconsin [Mr. MCCARTHY] are absent on official business. The senior Senator from Wyoming [Mr. BARRETT], the junior Senator from Wyoming [Mr. CRIPPA], and the Senator from Illinois [Mr. DIRKSEN] are necessarily absent. If present and voting, the junior Senator from Indiana [Mr. JENNER] would vote "nay."

On this vote the junior Senator from Wisconsin [Mr. MCCARTHY] is paired with the Senator from Texas [Mr. DANIEL]. If present and voting, the junior Senator from Wisconsin [Mr. MCCARTHY] would vote "nay" and the Senator from Texas [Mr. DANIEL] would vote "yea."

Mr. CLEMENTS. I announce that the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Texas [Mr. DANIEL], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Iowa [Mr. GILLETTE], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], the Senator from Arkansas [Mr. MCCLELLAN], and the Senator from Virginia [Mr. ROBERTSON] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan-American Highway Congress at Caracas, Venezuela, and if present would vote "yea."

I announce further that on this vote the Senator from Virginia [Mr. BYRD] is paired with the Senator from Oklahoma [Mr. KERR]. If present and voting, the Senator from Virginia would vote "nay," and the Senator from Oklahoma would vote "yea."

I announce also that on this vote the Senator from Texas [Mr. DANIEL] is paired with the Senator from Wisconsin [Mr. MCCARTHY]. If present and voting, the Senator from Texas would vote "yea," and the Senator from Wisconsin would vote "nay."

Mr. GOLDWATER. Mr. President, how am I recorded?

The PRESIDING OFFICER. The Senator is recorded as voting in the negative.

Mr. DUFF. Mr. President, how am I recorded?

The PRESIDING OFFICER. As voting in the negative.

Mr. SALTONSTALL. Mr. President, how am I recorded?

The PRESIDING OFFICER. The Senator is recorded as voting in the negative.

Mr. FERGUSON. Mr. President, am I recorded?

The PRESIDING OFFICER. The Senator is recorded as voting in the negative.

Mr. DOUGLAS. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOUGLAS. For whom are we waiting?

The PRESIDING OFFICER. The Chair advises the Senator that that is not a parliamentary inquiry.

Mr. PAYNE. Mr. President, how am I recorded?

The PRESIDING OFFICER. As voting in the negative.

Mr. BENNETT. How am I recorded?

The PRESIDING OFFICER. As voting in the negative.

Mr. BEALL. Mr. President, how am I recorded?

The PRESIDING OFFICER. The Senator is recorded as voting in the negative.

The result was announced—yeas 31, nays 48, as follows:

YEAS—31

Anderson	Johnson, Tex.	Morse
Burke	Johnston, S. C.	Murray
Clements	Kefauver	Neely
Douglas	Kennedy	Pastore
Fulbright	Kilgore	Russell
Gore	Kuchel	Smathers
Green	Langer	Sparkman
Hennings	Lehman	Stennis
Hill	Magnuson	Symington
Humphrey	Mansfield	
Jackson	Monroney	

NAYS—48

NOT VOTING—17

Barrett	Eastland	Kerr
Byrd	Ellender	Maybank
Chavez	Gillette	McCarthy
Crippa	Hayden	McClellan
Daniel	Holland	Robertson
Dirksen	Jenner	

So Mr. KENNEDY's amendment was rejected.

Mr. MILLIKIN. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. KNOWLAND. Mr. President, I move to lay on the table the motion of the Senator from Colorado.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. HUMPHREY. Mr. President, I merely wish to keep the record straight. Today we have had 2 yea-and-nay votes on 2 amendments. I am very proud to say that both the amendments were highly recommended by President Eisenhower and the administration. I regret very much that both the amendments have been rejected, although I am delighted to be able to say that a few of us have been glad to support them. So the record should be clear in showing that the Eisenhower administration has suffered two defeats this afternoon.

Mr. SMITH of New Jersey. Mr. President, in answer to the Senator from Minnesota, let me say he is entirely mistaken. I have checked with the White House, and the President was opposed to the Kennedy amendment.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. KNOWLAND. Mr. President, on this question I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SALTONSTALL. I announce that the junior Senator from Indiana [Mr. JENNER] and the junior Senator from Wisconsin [Mr. MCCARTHY] are absent on official business. The senior Senator from Wyoming [Mr. BARRETT], the junior Senator from Wyoming [Mr. CRIPPA], and the Senator from Illinois [Mr. DIRKSEN] are necessarily absent.

If present and voting, the junior Senator from Indiana [Mr. JENNER] and the junior Senator from Wisconsin [Mr. MCCARTHY] would each vote "yea."

Mr. CLEMENTS. I announce that the Senator from New Mexico [Mr. CHAVEZ], the Senator from Texas [Mr. DANIEL], the Senator from Mississippi [Mr. EASTLAND], the Senator from Louisiana [Mr. ELLENDER], the Senator from Iowa [Mr. GILLETTE], the Senator from Oklahoma [Mr. KERR], the Senator from South Carolina [Mr. MAYBANK], the Senator from Nevada [Mr. MCCARRAN], and the Senator from Arkansas [Mr. MCCLELLAN] are absent on official business.

The Senator from Florida [Mr. HOLLAND] is absent by leave of the Senate, attending the Sixth Pan-American Highway Congress at Caracas, Venezuela, and if present, he would vote "yea."

I announce further that if present and voting, the Senator from New Mexico [Mr. CHAVEZ], the Senator from Texas [Mr. DANIEL], the Senator from Iowa [Mr. GILLETTE], and the Senator from Oklahoma [Mr. KERR] would each vote "yea."

The result was announced—yeas 78, nays 3, as follows:

YEAS—78

Aiken	Bricker	Byrd
Anderson	Bridges	Capehart
Beall	Burke	Carlson
Bennett	Bush	Case
Bowring	Butler	Clements
Cooper	Johnson, Colo.	Payne
Cordon	Johnson, Tex.	Potter
Douglas	Johnston, S. C.	Purtell
Duff	Kefauver	Reynolds
Dworshak	Kilgore	Robertson
Ervin	Knowland	Russell
Ferguson	Kuchel	Saltonstall
Flanders	Langer	Schoeppel
Frear	Lehman	Smathers
Fulbright	Lennon	Smith, Maine

NAYS—3

Green	Kennedy	Pastore

NOT VOTING—15

Barrett	Eastland	Kerr
Chavez	Ellender	Maybank
Crippa	Gillette	McCarran
Daniel	Holland	McCarthy
Dirksen	Jenner	McClellan

So the bill (H. R. 5173) was passed.

The title was amended, so as to read: "A bill to provide that the excess of collections from the Federal unemployment tax over employment security administrative expenses shall be used to establish and maintain a $200 million reserve in the Federal unemployment account which will be available for advances to the States, to provide that the remainder of such excess shall be returned to the States, and for other purposes."

Mr. MILLIKIN. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. KNOWLAND. Mr. President, I move to lay the motion of the Senator from Colorado on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

The motion to reconsider was laid on the table.

Mr. MILLIKIN. Mr. President, I move that the Senate insist upon its amendments, request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate; also, that the Senate amendments be numbered.

The motion was agreed to; and the Presiding Officer appointed Mr. MILLIKIN, Mr. MARTIN, Mr. WILLIAMS, Mr. GEORGE and Mr. BYRD conferees on the part of the Senate.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, notified the Senate that Mr. KELLEY of Pennsylvania had been appointed a manager on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7434) to establish a National Advisory Committee on Education, vice Mr. BARDEN, excused.

The message also notified the Senate that Mr. KELLEY of Pennsylvania had been appointed a manager on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the

bill (H. R. 7601) to provide for a White House Conference on Education, vice Mr. BARDEN, excused.

The message further notified the Senate that Mr. KELLEY of Pennsylvania had been appointed a manager on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 9040) to authorize cooperative research in education, vice Mr. BARDEN, excused.

The message also notified the Senate that Mr. BAILEY, of West Virginia, had been appointed a manager on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes, vice Mr. BARDEN, excused.

ENROLLED BILLS SIGNED

The message announced that the Speaker had affixed his signature to the enrolled bill (S. 3378) to revise the Organic Act of the Virgin Islands of the United States, and it was signed by the President pro tempore.

CONSTRUCTION OF FOSTER CREEK DIVISION OF CHIEF JOSEPH DAM PROJECT, WASHINGTON

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CORDON. I move that the Senate insist upon its amendment, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. CORDON, Mr. MILLIKIN, Mr. WATKINS, Mr. ANDERSON, and Mr. JACKSON conferees on the part of the Senate.

SALE OF CERTAIN LAND IN ALASKA TO HARDING LAKE CAMP, INC., FAIRBANKS, ALASKA

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 2900) to authorize the sale of certain land in Alaska to the Harding Lake Camp, Inc., of Fairbanks, Alaska, for use as a youth camp and related purposes, which were, to strike out all after the enacting clause and insert:

That the Harding Lake Camp, Inc., an Alaska nonprofit corporation, of Fairbanks, Alaska, is hereby authorized for a period of 1 year from and after the effective date of this act to apply for the purchase of, and the Secretary of the Interior is hereby authorized and directed to convey to the organization, for use as a youth camp and related purposes, the following-described land situated in Alaska: Southeast quarter of the southeast quarter and all of lot 5, section 7, township 6 south, range 5 east, Fairbanks meridian, Alaska, United States survey 1901, Salchaket townsite plat.

SEC. 2. That the conveyance shall be made upon the payment by the said organization for the land at its reasonable appraised price to be fixed by the Secretary of the Interior. The conveyance shall be made only if the Harding Lake Camp, Inc., makes the total payment due within 5 years after notification by the Secretary of the amount due: *Provided*, That the conveyance hereby authorized shall not include any land covered by a valid existing right initiated under the public land laws.

And to amend the title so as to read: "An act to authorize the sale of certain land in Alaska to the Harding Lake Camp, Inc., an Alaska nonprofit corporation, of Fairbanks, Alaska, for use as a youth camp and related purposes."

Mr. CORDON. Mr. President, I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. CORDON, Mr. WATKINS, Mr. KUCHEL, Mr. JACKSON, and Mr. LONG conferees on the part of the Senate.

AMENDMENT OF THE ATOMIC ENERGY ACT OF 1946, AS AMENDED

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of calendar 1710, Senate bill 3690.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California.

EMPLOYMENT SECURITY ADMINISTRATIVE FINANCING ACT OF 1954—RESOLUTION

Mr. DOUGLAS. Mr. President, I intend to ask unanimous consent that I may be permitted, out of order, to submit for immediate consideration a resolution on behalf of the junior Senator from Oregon [Mr. MORSE], the junior Senator from Minnesota [Mr. HUMPHREY], and myself. The resolution reads as follows——

Mr. KNOWLAND. Mr. President, I wonder if the Senator would have any objection to having the Atomic Energy bill made the unfinished business. I shall be glad to keep the Senate in session long enough to give the Senator an opportunity to speak.

Mr. DOUGLAS. Since it so appropriately follows the action just taken by the Senate, I request that the resolution be read by the clerk now.

Mr. KNOWLAND. Mr. President, I have a motion pending.

Mr. DOUGLAS. Is not the Senator's motion debatable, and is it not in order to submit a unanimous consent request?

Mr. KNOWLAND. It is, but I will say to the Senator that I think the procedure is a little irregular. I have made a motion to proceed to the consideration of Senate bill 3690.

Mr. DOUGLAS. I understand; but when I first came to this body I heard a motion to proceed to the consideration of a bill debated for several weeks. I have always thought that under the rules of the Senate a motion to proceed to the consideration of a bill was debatable.

Mr. KNOWLAND. I will say to the Senator that it is the intention to keep the Senate in session for at least an hour. The Senator will not be foreclosed from making his unanimous consent request, but at this time I would have to object to it.

Mr. DOUGLAS. I have not yet made the unanimous consent request. I have merely stated that it is my intention to make the request and I have asked that the resolution in question be read at the desk so that Senators may be informed of its content and of its obvious merit. When the unanimous consent request has been completed, it would then seem to me to be in order for the Senator from California to object.

The PRESIDING OFFICER. The Chair advises the Senator from Illinois that unanimous consent is necessary to have the clerk read the resolution.

Mr. DOUGLAS. May I then read it myself?

The PRESIDING OFFICER. The Senator has that privilege.

Mr. KNOWLAND. Mr. President——

Mr. DOUGLAS. The resolution with respect to which I shall submit the unanimous-consent request for immediate consideration reads as follows:

Whereas President Eisenhower in his 1954 Economic Report last January suggested to the States that they act to increase unemployment-insurance benefits to at least 50 percent of the insured worker's regular wages, up to a maximum of 66⅔ percent of the average wage in the State, and at the same time extend the duration of weekly payments to 26 weeks for all persons qualifying for receipt of any such payments; and

Whereas Secretary of Labor Mitchell, in his February 16, 1954 letter to Governors implementing President Eisenhower's suggestion, made similar suggestions and cited supporting actions by the Federal Advisory Council on Employment Security; and

Whereas the majority in the House and Senate have now successfully opposed efforts to implement President Eisenhower's and Secretary Mitchell's recommendations and by amending the Federal Social Security Act and Unemployment Tax Act, to establish the standards recommended last winter by the Eisenhower administration; and

Whereas none of the legislatures meeting in regular session in 1954 carried out the Eisenhower administration recommendations; and

Whereas more than 600,000 insured workers have exhausted their benefit rights under existing standards in State laws and are exhausting benefits at the rate of 40,000 a week; and

Whereas since, in President Eisenhower's words, unemployment insurance is a "valuable first line of defense against recession"

and is going to be of maximum usefulness in restoring and maintaining mass purchasing power necessary to the economic health of the Nation: Now, therefore, be it

Resolved, That the Senate of the United States, having voted against implementing President Eisenhower's recommendations by Federal action, recommends to the Governors now in session at Bolton Landing, N. Y., that they pay attention to President Eisenhower's recommendation, now 6 months old, by either convening their legislatures in special session for immediate action to increase weekly unemployment-insurance payments and number of weeks duration or, at the very least, by making such action the No. 1 item of business when the legislatures next convene in regular session.

I now ask unanimous consent for the immediate consideration of the resolution I have just read. I suggest that the popular term for the resolution be "The Last Mail for Bolton Landing."

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. KNOWLAND. Mr. President, I object, and I renew my motion that the Senate proceed to the consideration of Calendar No. 1710, S. 3690, to amend the Atomic Energy Act of 1946, as amended, and for other purposes, so that it may be made the unfinished business.

Mr. DOUGLAS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. BUSH in the chair). The Senator from Illinois will state it.

Mr. DOUGLAS. What is the business before the Senate?

The PRESIDING OFFICER. The Senator from California just proposed the business before the Senate, and the question is on his motion.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. DOUGLAS. Mr. President——

Mr. KNOWLAND. Mr. President, I have not yielded the floor.

The PRESIDING OFFICER. The Senator from California has the floor.

LEGISLATIVE PROGRAM

Mr. KNOWLAND. Mr. President, a number of Senators have inquired about the legislative program and what it is planned to do for the remainder of the week. This evening the Senate will continue in session for the next hour or hour and a half, for the opening of the debate on the atomic energy bill. I understand that several speeches are to be made this evening in addition to the consideration of the unfinished business.

There are a number of bills with respect to which I should like to give notice that they may be taken up later in the week, although not necessarily in the order in which I give them.

The bills are:

Calendar No. 1315, S. 2910, providing for the creation of certain United States judgeships, and for other purposes.

Calendar No. 644, H. R. 6287, to extend and amend the Renegotiation Act of 1951.

Calendar No. 1720, S. 3706, to amend the Subversive Activities Control Act of 1950, to provide for the determination of the identity of certain Communist-infiltrated organizations, and for other purposes.

Calendar No. 1794, S. 880, to amend the license law of the District of Columbia.

Calendar No. 1797, S. 2601, to provide for Federal financial assistance to the States and Territories in the construction of public elementary and secondary school facilities.

We plan to have a Saturday session, both for the purpose of completing consideration of the pending business that may be carried over from Friday and for a call of the calendar of bills to which there is no objection, from the point where the last call of the calendar was concluded.

I hope that this week also we will have before us the conference report on the housing bill. I understand the conferees on the tax bill are either meeting or are about to meet, and I hope that before the end of the week we will perhaps have before us the conference report on the tax bill.

I hope also that we may be able to reach consideration of the agricultural bill next week, probably by Tuesday.

I make this announcement so that Senators may be advised as far in advance as possible as to the legislative program. I shall keep the minority and the Senate as a whole advised of additional bills which will be set for consideration by the Senate.

Mr. HICKENLOOPER obtained the floor.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield me 2 or 3 minutes? I shall not take more than 3 minutes.

Mr. HICKENLOOPER. I shall be glad to yield, provided I do not thereby lose the floor.

The PRESIDING OFFICER. Without objection, the Senator from Iowa yields to the Senator from South Carolina with the understanding that he will not lose the floor.

POSTAL RATE INCREASES

Mr. JOHNSTON of South Carolina. Mr. President, this final session of the 83d Congress is rapidly drawing to a close. From both sides of the aisle we hear statements that Congress will adjourn on July 31, or at the latest by August 7.

Mr. President, that is just 2½ weeks away, yet I am hearing persistent rumors that the President is insistent that the Congress take affirmative action on legislation designed to increase postal rates.

One year ago, almost to the day, I addressed this body regarding the very same subject—postal rate increases—and called attention to the fact that hearings on rate legislation had not been held. I stated to the Senate at that time that I, as ranking minority member of the Senate Post Office and Civil Service Committee, would insist that full and adequate hearings and study be made of this most important proposal before any action be taken. I repeat that statement today.

But, so far, the Senate Committee on Post Office and Civil Service has given but 1 day of study or hearings to this vital and far-reaching proposal.

Mr. President, as Senators are only too well aware, postal rate legislation is highly serious and a technically complicated affair.

I understand that the rate legislation reported by the House Committee on Post Office and Civil Service, and now pending before the rules committee of that body, provides for an increase in the first class letter rate of 1 cent and also calls for a further increase of 1 cent in the air mail rate. I also understand that the postmaster general, Arthur E. Summerfield, proposed and fully endorsed this 1 cent increase in air and first class letter rates. I assume, therefore, this is the rate increase the administration will ask in the Senate.

Mr. President, when we ask the people of this country to pay a substantially higher rate of postage on their letter mailing privileges, we are dealing with major legislation.

Never before, certainly not to my knowledge, has the Senate of the United States been requested by any administration to take arbitrary action on such controversial legislation without full and adequate study and hearings. To do so now would be to establish a highly dangerous precedent.

Mr. President, I simply cannot bring myself to believe that the Senate will be asked to vote on an issue as vital and controversial as this one without adequate and proper study and investigation.

If, as rumors report, the administration considers higher postal rates as must legislation, I am confident that my colleagues on the minority side as well as many on the other side of the isle, will join with me when I say that the Senate had better be prepared to remain in session as long as is required to give this proposal the scrutiny it certainly deserves. Full and complete hearings cannot be concluded in less than 30 days and I most certainly shall insist that the people most affected by this proposed tax increase be given ample opportunity and accorded a just and proper hearing before the Committee on Post Office and Civil Service prior to a bill being reported to the Senate.

PROBLEMS OF WATER UTILIZATION

Mr. WATKINS. Mr. President——

Mr. HICKENLOOPER. Mr. President, I yield to the Senator from Utah, with the understanding that I do not thereby lose the floor.

Mr. WATKINS. Mr. President, the Committee on Interior and Insular Affairs now has before it for consideration the upper Colorado River storage project bill. Because of the importance of this project to the people of the States of Colorado, Wyoming, Utah, and New Mexico, and because I know that my colleagues in the Senate have not had the opportunity to study this type of legislation, it has been deemed advisable and justifiable to explain that project in a series of short, nontechnical statements. Today I should like to explain our problem of water utilization and how it is different from what may be the

physical facts presently existing in the home States of my colleagues.

Mr. President, I ask unanimous consent that the remainder of my statement be printed in the body of the RECORD at this point.

There being no objection, the remainder of Mr. WATKINS' statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR WATKINS

A divine providence placed upon this earth a rich abundance of natural resources and raw materials for us to use and develop. Throughout this great Nation we can find abundances and shortages of various of these resources. This fact was emphasized by recent devastating floods in the Central States, and the corresponding drought and dust storms of the West and Southwest. Man could master a great resource problem were he able to transport water from geographic areas with an overabundance of rainfall to areas suffering, as we in the upper basin States do, from a lack of sufficient water.

That problem of water conservation and utilization is our No. 1 problem and one that we seek to solve by this reclamation project.

Specifically the problem is twofold: The first and most important problem is that of providing water for consumption use in agriculture, in industry, and in communities. The second is the production of hydroelectric power, also badly needed in the area.

In many States the waters of a stream are subject to private ownership. This is not so in Utah and the other upper basin States. As an example: The Utah code and constitution provide that water belongs to the State of Utah as trustee for the beneficial use by the people of the State. Under this water law the individual can acquire only a use right.

This principle of beneficial use was paramount in the laws of the States which signed the Colorado River Compact of 1922, with a slight variation in the State of California. That compact was ratified by Congress, thus acknowledging not only the division of water between the upper and lower basin States, but also the principles of water use which those States as a region endorsed and followed. Under that ratification and the subsequent 1948 upper basin compact ratification, the United States has recognized the ownership of the waters of the Colorado River to be the property of the people of the States wherein it flows.

In the West, priorities of water use are recognized, the first being consumptive uses in the following order: Domestic and municipal, agricultural (irrigation), and industrial (processing). Then follows the nonconsumptive uses, such as power, recreation, navigation, and so forth. This makes any water developed for irrigation and industrial use available for subsequent domestic use if the need arises. People, therefore, who assess this project purely on the basis of irrigation costs per acre, are maliciously overlooking the obvious fact that the water developed for agricultural purposes is available for industrial and culinary use, and that when such use is dictated by necessity, the water development will be justified at almost any cost.

The 1922 Colorado River compact divided the first 15 million acre feet of water annually at Lee Ferry equally between the upper and lower basins. In 1948 the upper Colorado River Basin compact divided the 7,500,000 acre feet annually allocated to the upper basin for consumptive use among the upper basin States.

The Colorado River is a wild, unique river, characterized by a widely variable flow and a deep gorge through which it flows for several hundred miles in Wyoming, Colorado, and Utah. The diversions of water for consumptive uses in the upper Basin must be made on the upper reaches of the stream so that the water may be conveyed by gravity from the river or its tributaries to the points of use.

Before such diversions can be made in the upper basin to utilize the basin's share of the Colorado River, storage must be provided to regulate the flow of the river so that the water available during the wet cycle of years may be put into storage for use during the dry periods. These storage reservoirs required for stream regulation, such as the Glen Canyon Reservoir, are below the irrigated land in the upper basin. No water out of the Glen Canyon Reservoir will be used for irrigation in the upper basin. This reservoir is nevertheless an irrigation reservoir because it will provide water for irrigation uses in exchange for the water from the high tributaries that will be diverted by gravity for consumptive uses in the upper basin.

In addition to their use for river regulation and to provide water for irrigation by exchange these storage reservoirs in the deep canyons of the Colorado provide sites for huge hydro powerplants, the energy from which will furnish revenues to help pay for the project costs.

Power is essential to the development of the raw materials and industrial resources so abundant in the upper basin. Tremendous quantities of energy are available in the falling water at each of these dams. This great natural, recurring water and power resource should and must be developed for the benefit, in perpetuity, of the local people, the States, and the Nation.

The users of power from this project are essentially the same people as the users of water. The use of power revenues, therefore, to help pay for the costs of the irrigation features of the project is, therefore, an equitable way to assess for the indirect benefits from the project construction.

The upper Colorado project envisions the construction of a series of holdover storage reservoirs on the upper Colorado River and its tributaries to enable the upper basin to meet its delivery commitments to the lower basin States.

There will be little direct diversion of water from these storage holdover reservoirs for irrigation because of the topography of the river, as described previously. Instead of costly pumping, the project plan provides for a series of participating units which are designed to catch the water as it comes off the mountain watersheds, and distribute it by conduits and canals to communities and to the irrigable areas.

Wherever these canals provide natural fall, power generators will be installed to take advantage of the generation potential and to furnish the power needed for regulating the water flow in these distribution and conduit canals.

The surplus power generated will be available for purchase by public utilities at a rate set for sale of power throughout the entire basin.

This is a new step in reclamation planning, financing, and accounting. We have, as a result of 50 years of study, come up with what is called the basin account. By this we mean that this surplus power, produced throughout the basin, will be sold to private utilities, REA's, municipal power companies, and other power users and distributors at a basin rate which will be uniform throughout the four States. The proceeds will go into a basin-account fund where they will be pooled.

The revenues from irrigation, industrial and other water uses likewise will find their way to and be comingled with this same power-pool fund. Repayment of all reimbursable costs then will be drawn from this basin account fund and deposited in the United States Treasury.

I don't want the Members of the Senate to misunderstand. This basin account is not just a big pot that is dipped into at will to repay any project. Rather, the revenues from each project will go to repayment of its particular reimbursable costs first. Then, after the Treasury has received 100 percent of the reimbursable costs on that project, the new power proceeds in the pooled fund will then go to help repay the other costs which are in excess of the irrigator's ability to repay.

When the vast project is completed, after nearly 100 years of progressive construction, the Colorado River will be completely controlled. Its flow in the upper basin will be regulated for maximum water utilization. The resulting productivity of the area served by the project, besides providing the money to repay all the reimbursable project costs, also will furnish tax revenue estimated to be far in excess of the total cost of the project every 50 years.

In 100 years, the people of these upper basin States have put to use only one-third of their allocated share of this river. We have exhausted our ability to harness this river under private, municipal and State enterprise. We do not seek Federal aid to provide that which we can do ourselves. We only ask aid to accomplish that which we are unable to do ourselves, and we are willing to pay the bill ourselves.

The upper Colorado River storage project is self-liquidating. Income from the irrigation water users, fixed by their ability to pay, from a conservancy district ad valorem tax, and from power revenues will pay all costs allocated to irrigation in a period of 50 years, and the costs of power and municipal facilities will be repaid with interest in the same period of time. After 50 years from construction, the net revenues from Echo Park and Glen Canyon plants alone will yield to the United States Treasury annually from $15 to $20 million a year.

CONTINUATION OF COMMITTEE ON SMALL BUSINESS IN THE 84TH CONGRESS

Mr. FERGUSON. Mr. President——

Mr. HICKENLOOPER. Mr. President, I yield to the Senator from Michigan, with the same understanding.

Mr. FERGUSON. Mr. President, today the policy committee of the majority party adopted the following resolution:

Resolved, That it be the sense of the Republican policy committee that the Committee on Small Business is of value to the work of the Senate, and that it be continued in the 84th Congress; that the Vice President in appointing its membership be requested to follow the recommendation of the committee on committees, and that said committee on committees give careful consideration to those Members of the Senate who have served on said committee, and are desirous of continuing that service.

Mr. President, as a member of the Small Business Committee and also as chairman of the majority policy committee, I wish to make this report and say that I share the view that the work of the Small Business Committee is very important to the work of the Senate.

SUPPLEMENTAL VIEWS ON SENATE BILL 3114

Mr. MURRAY. Mr. President, will the Senator from Iowa yield?

Mr. HICKENLOOPER. I yield, with the understanding that I do not thereby lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURRAY. Mr. President, yesterday in reporting Senate bill 3114 from the Committee on Labor and Public Welfare, a bill to improve the public health by encouraging more extensive use of voluntary prepayment method in the provision of personal health services, the Senator from Connecticut [Mr. PURTELL] asked unanimous consent that permission be granted other members of the committee to submit supplementary views not later than today. Inasmuch as I have been extremely busy with other legislative matters, I have not been able to complete my separate views. Therefore, Mr. President, I ask unanimous consent that I may be permitted to file my views and have them printed as a separate document at such time as they are completed. I wish it understood that the granting of the request will not in any manner interfere with action on the bill if my separate views are not in print at the time the bill comes before the Senate for action. I shall not ask for any delay. I have discussed the matter with the Senator from Connecticut, and he has no objection.

Mr. KNOWLAND. Mr. President, reserving the right to object—and I shall not object—I understand that while the Senator desires permission to file his minority views without putting on them the time limit of today, which was the date set in the unanimous-consent request of yesterday, he will not ask that the consideration of the bill be in any way delayed.

Mr. MURRAY. That is absolutely correct.

Mr. KNOWLAND. Because this is a slightly unusual procedure, may I assume that the views of the Senator will be filed within the next week or 10 days?

Mr. MURRAY. Yes.

Mr. KNOWLAND. I do not think it should be completely open ended.

Mr. MURRAY. That is correct.

Mr. KNOWLAND. Would the Senator be willing to file his views within a week?

Mr. MURRAY. Between now and next Monday.

Mr. KNOWLAND. With that understanding, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

A STANDING LEGISLATIVE COMMITTEE FOR INDEPENDENT BUSINESS

Mr. DOUGLAS. Mr. President, will the Senator from Iowa yield?

Mr. HICKENLOOPER. I yield, with the understanding that I do not thereby lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOUGLAS. Mr. President, I believe the time has arrived when the Senate must come to an immediate decision. We must show by our actions a definite determination that the Members of the Senate are alarmed at the increasingly serious plight of independent business in this Nation, and that the Senate will act and act now to protect this important segment of our economy.

The test of our sincerity is at hand. There is pending in the Senate, before the Rules Committee, Senate Resolution 213 which provides standing committee status for the present special Small Business Committee. If passed this would permit the committee to report legislation to the Senate.

I am honored to join with 49 other Senators in full support and sponsorship of the Resolution.

I concur wholeheartedly in the splendid statement made by the chairman of the Small Business Committee at the time of the introduction of this resolution February 16, 1954, when he said:

> During the past 4 years the Select Committee on Small Business has been on trial. I feel that it has served its apprenticeship and should now be reconstituted as a standing committee.

There should be no question in the minds of the Senate as to the justification for action on Senate Resolution 213. Recent statistics compiled by the Senate Small Business Committee disclose that 9 out of every 10 retail, wholesale, and service establishments are independent businesses, 7 out of every 10 employees in retail, wholesale, and service trade are employed by independent businesses. Are these to be destroyed or reduced—thus adding to vacant stores and greater unemployment?

I am sure, Mr. President, of the valuable work which has been accomplished by this committee during its short history and the preceding committees of small business in the Senate. In no small degree their actions have been a deterrent to many planned actions by large corporate interests which would destroy the business life of over 4½ million small business institutions.

Let me call to the Senate's attention that it will be found from the record and to the credit of the National Federation of Independent Business, a group which I believe is truly representative of Nation's small business, that it has conducted a direct nationwide vote of its members on the issue of Senate Resolution 213. In this poll, which reached over 100,000 independent business and professional men, the federation presented the proposition for a standing committee of small business in the Senate. The result of this poll showed 87 percent of the members were for the proposition, 9 percent against, and 4 percent not voting. I understand that all Members of Congress have been advised of the result of this nationwide poll. Mr. President, the Members of the Senate should not overlook the fact that it comes from the "grass roots" which is the heart of the economy of this Nation.

The National Federation of Independent Business, through its executive vice president, George J. Burger, has also urged, at the respective national conventions of both the Democratic and Republican Parties in appearances before the platform committees in 1948 and 1952, that the small business committees of the Congress be made standing committees. Were this to be done, small business would be placed on a parity with all other segments in our economy such as labor, farm groups, and others.

It is significant to note that when it comes to both labor and farm groups, these segments of our economy are recognized in the Congress through standing committees with power to report legislation, and are not relegated to a subcommittee of a standing committee. Thus small business is not asking for any special consideration when they ask the Senate to give the same recognition to the independent businesses of this Nation.

We should recognize that the Senate, through the operation of this committee, has alerted all Federal agencies to the problems of small business. As a result, these Federal agencies became more active on these problems. I may add further, Mr. President, that the invaluable action of our Select Committee on Small Business has been very helpful as a deterrent to ever-increasing monopoly and concentration in our overall economy.

What are we to tell our independent businesses throughout the many States when we return home this summer? They will ask what happened to the small-business committee resolution which provided standing committee status for the committee. Are we to tell them that although this resolution has been pending in the Rules Committee since February 16, 1954, and although 49 Senators were in full support of that resolution, the Rules Committee did not conclude it was important enough to act on, but instead let it wither on the vine?

I wonder what small business of the Nation will say if we have to make such a report when we journey back to our home States. Such action, Mr. President, would show a regrettable lack of willingness on the part of the Senate of the United States to act in the best interests of small business. It will result in our offering mere lip service instead of substantial action to protect small business of the Nation.

Destroy the independent businessman, and we end up in greater and greater concentration of industry.

When one reviews the history of the regimes of Hitler, Mussolini, Stalin, and in fact most European nations, we find that when independent business is destroyed, it almost certainly ends up in dictatorship.

I make the plea, Mr. President, that the Senate take immediate action on Senate Resolution 213, and let us give the message to the small businessmen of the Nation that we are going to make certain that they remain an important major part of our economy.

ORDER FOR RECESS

Mr. KNOWLAND. Mr. President, will the Senator from Iowa yield?

Mr. HICKENLOOPER. I yield, with the understanding that I do not thereby lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that when the Senate complete its labors this evening,

it stand in recess until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

Mr. HICKENLOOPER. Mr. President, S. 3690, and its companion bill, H. R. 9757, represent the first major revison of the Aatomic Energy Act of 1946. Heretofore amendments in the nature of corrections or improvements in the original legislation have been adopted, but as time has gone on the development of the atomic-energy program has been such that, in the opinion of the joint committee and of the Atomic Energy Commission and of public and private groups generally, revision of the act of 1946 is desirable and in fact essential in the national interest. Indeed, the original act, as passed in 1946, contemplated that such changes from time to time would be indicated as we learned more about the program and as the practical uses for atomic energy became increasingly apparent.

The Atomic Energy Act of 1946 was passed after months of study of the problem by a special Senate committee established under Senate Resolution 179 of the 79th Congress, second session. At that time it was impossible to evaluate the possibilities of the utilization of atomic energy because of the novelty of the development and the lack of any experience in peacetime uses.

Due to the fact that in 1946 the proven practical use was almost entirely in the field of weapons, although the envisioned peacetime uses seemed limitless, it was considered necessary to establish, for the time being, a strict Government monopoly and control over the use and application of atomic knowledge. At that time the United States had exclusive possession of all of the data that had been developed. Other nations, notably Great Britain and Canada, had through their scientists made substantial contribution to the development of this program, but they did not possess all of the information. Also at that time we were the exclusive possessors of atomic weapons, and we undertook not only a stewardship of the weapons, but also of the information on their production and development as a force which could maintain peace and prevent, for as long a time as possible, any other nation with predatory intentions from securing the know-how and threatening the security of the world.

In the original act, as pointed out above, it was contemplated our objectives would eventually be to open up as rapidly as possible the opportunities for private initiative to develop peacetime phases of this science, and that as rapidly as possible the Government monopoly, except in the weapon field, would be abandoned and free enterprise in this country and abroad would be given the opportunity to attack the problems of peacetime development.

We did not retain our exclusive knowledge in atomic energy for very long. At no time did we assume that no other nation would ever succeed in making atomic weapons or in developing atomic knowledge independently, but we learned all too soon that traitors and spies had disclosed much of our fundamental information to the Kremlin which enabled Russian scientists, with the essential cooperation of German scientists who had been taken to Russia after World War II, to make atomic weapons several years earlier than under their own independent efforts.

In addition, British scientists and science, having contributed substantially to our own development program, were able to go forward with their own program and make atomic weapons. This, of course, is no surprise because of the recognized high degree of competence and development of British scientists and British science. Canada, while apparently electing not to accentuate the weapon phase of atomic energy, nevertheless has done important work in research and development pointed toward peacetime applications.

So that I may not be misunderstood, I want to emphasize that while the United States devoted vast amounts of money and effort toward the development of weapons, we have devoted a very substantial portion of our effort toward research and the development of peacetime uses in the fields of biology and medicine and industrial applications; in fact, many times the effort in these fields of all other countries of the world put together. So, again, I want to make it clear that our military research and development has not excluded the research and development in the humanitarian and economic fields.

We still possess vast superiority in weapon power, in spite of the fact that other nations can make atomic weapons. By the same token there is no doubt in my mind when I say that we also are more advanced than any other nation in the exploration and knowledge of the peacetime possibilities of atomic use.

So far as weapons are concerned, 8 years ago, they were considered to be only strategic weapons, to be used at long range and against limited strategic targets. Today, the concept has altered substantially and while the strategic use is still one of the most important, the practical tactical use of atomic weapons in support of the operation of ground forces is an important part of our military plan. Indeed, today we have atomic weapons of varying degrees of power and effect in our arsenal, which are available for use both tactically and strategically, and we have developed the means for their delivery.

Also 8 years ago the prospects of useful atomic power for the production of electricity in all of its varied uses seemed to be very remote indeed. The problems of military security and the vast expense involved in experimentation then were practical deterrents for private investment. Today, however, the use of atomic power in the economy of this country and in other countries is much more clearly envisioned. While competitive power probably will not be a reality for a number of years, even with the advanced knowledge which we now possess, nevertheless, we believe that the time has come when the way to reduced costs has probably been pointed out sufficiently to justify private investment and experimentation with reasonable chances—in fact, I think I may be safe in saying with practical certainty—that the genius of private enterprise and free competition can develop economically sound competitive power plants much sooner than was earlier considered possible.

The Joint Committee on Atomic Energy has, as directed in the original act, maintained constant studies of the entire program. This committee has unique powers and authority for access to information and has assumed a great responsibility to the other Members of the Congress and to the American people. This responsibility has been accentuated because of the essential secrecy involved in the program. It has been my privilege, along with the junior Senator from Colorado [Mr. MILLIKIN], the senior Senator from Colorado [Mr. JOHNSON], and the Senator from Georgia [Mr. RUSSELL], to serve on this committee, and on the special committee which reported the original act, at all times since late 1945. Representatives COLE of New York, DURHAM, HINSHAW, HOLIFIELD, VAN ZANDT, and PRICE have likewise served continuously on the joint committee since its creation. The other members of the joint committee have served for substantial periods. I would be remiss in my statement to the Congress if I did not say that this committee has been free from partisan political motivation in the discharge of its responsibilities, and while the partisan membership has altered slightly from time to time, nevertheless, I can envision no situation where unpartisanship and nonpartisanship have been more in evidence than in the 8 years' history of the joint committee's operations.

In this bill, S. 3690, and its companion bill, H. R. 9757, there are at the present time certain areas of disagreement which are set forth in the dissenting views of various members of the committee. It no doubt is a practical impossibility to get complete agreement on every sentence, paragraph, and section of a bill of such complexity as the Atomic Energy Act, but I assure my colleagues that any views of individual members are presented with the utmost impartiality so far as any partisan influences may be concerned, and they express their own views as they see them in the broad public interest.

With respect to the names of Members of Congress who have served continuously on the Joint Committee on Atomic Energy, to which I made reference a moment ago, I wish to say that while the distinguished senior Senator from California [Mr. KNOWLAND] did not enter the Senate until 2 or 3 months after the committee began to function, he has, nevertheless, served continuously on the committee since he entered the Senate, and so, for all practical purposes, should be included in the list of Members who have continuously served on the joint committee.

Under all the circumstances and as a result of the years of experience and developing of information which has come to the joint committee, the committee concluded last year that the time had come when a comprehensive revision of the basic Atomic Energy Act should be undertaken. Accordingly hearings were held throughout the latter part of last year and for over 3 months of this year. For many weeks past the committee has taken the results of these hearings and its accumulated information, and has worked long and diligently in attempting to perfect S. 3690 and H. R. 9757, the bill which is before us today.

The basic aim of S. 3690 endeavors to bring the Atomic Energy Act of 1946 into harmony with the realities of 1954. It endeavors to keep our legislative controls over atomic energy in step with the changing problems our Nation faces in this field—problems not only in the realm of science and technology but in the realm of economics and international political relations as well. It protects our vital military secrets but it proposes to open the opportunities for peacetime uses to our own people as well as to others.

The members of the joint committee have not been alone in believing that a revision of the organic law is now desirable. On February 17, President Eisenhower submitted to the Congress a series of recommendations for amending the Atomic Energy Act of 1946. His message said that the changes proposed by the executive branch had the "purpose of strengthening the defense and economy of the United States and of the free world." Toward this end, the President sought to accomplish the following:

First, widened cooperation with our allies in certain atomic energy matters;

Second, improved procedures for the control and dissemination of atomic energy information; and

Third, encouragement of broadened participation in the development of peacetime uses of atomic energy in the United States.

The bill now before the Senate will achieve these three objectives set forth in the President's message. In addition, the bill is designed to effect an overall modernization of the organic law, changing it wherever the members of the joint committee—who have been in daily touch with our atomic program since 1947—have concluded that revisions would advantage our Nation.

In response to the first recommendation in the President's message—increased cooperation with our allies in certain atomic matters—the bill permits such cooperation in both the peacetime and military fields, under carefully stipulated safeguards. On the peacetime side, it authorizes the negotiation of bilateral agreements for cooperation. Under such agreements, the Commission may transfer and exchange restricted data dealing with nonmilitary uses of atomic energy with other nations. The Commission may likewise transfer atomic materials in quantities needed for peacetime uses to another nation which is party to such an agreement for cooperation.

Furthermore, this legislation authorizes the President to enter into international arrangements with a group of nations toward the end of atomic cooperation in the peacetime field, and subsequently to cooperate with such a group of nations pursuant to agreements for cooperation. In this manner, the bill would permit our Government to join in a peacetime international atomic pool plan, such as the President described in his United Nations speech last December 8.

In the area of military applications, the legislation permits the Department of Defense to give another nation, or a regional defense organization to which we are a party, sharply circumscribed restricted data concerning the tactical employment of atomic weapons. The legislation would thereby permit more realistic defense planning among the NATO forces. This bill does not authorize any exchange of information which would reveal important data on the design or fabrication of the nuclear part of atomic weapons, nor does it permit the disclosure of detailed engineering information on other sensitive parts of our weapons.

I believe it is accurate to say that no portion of S. 3690 has received—and rightly so—closer committee attention than those sections dealing with international cooperation. Experience teaches that whenever some particular safeguard against the disclosure of classified information to another nation proves unnecessary, it can always be relaxed. Contrariwise, the act of surrendering exclusive control of some item of information is final, and we cannot call back these data, even if we would subsequently wish to. As a result the joint committee has been cautious in the extreme in its approach to this portion of the bill, and it has recommended carefully delineated changes only in those instances where the need and desirability for increased international cooperation have appeared clear and demonstrable.

In response to the second recommendation of the President—improved procedures for the control and dissemination of atomic information—S. 3690 incorporates a series of revisions which, I believe, will increase the total effectiveness of our program for safeguarding sensitive atomic data.

Presently, all personnel of the Atomic Energy Commission or its contractors who have access to restricted data are given the same background check as to their character, associations, and loyalty—whether such employees have access to large quantities of extremely sensitive information, or whether they require access to only a small quantity of relatively insensitive data. S. 3690 would permit the Atomic Energy Commission to relate the scope of background investigations to the amount and sensitivity of the data which an employee would receive while on the job—thus allowing our investigative agencies to concentrate their efforts on the areas where extremely painstaking checks are most vital. Presently also, much restricted data relates to the military untilization of atomic weapons. Nothwithstanding this, the Atomic Energy Commission is responsible for the control of all restricted data. S. 3690 gives the Department of Defense a larger share of responsibility in both safeguarding and declassifying data which relates primarily to the military utilization of atomic weapons.

It is my conviction that the information-control procedures recommended in S. 3690 do not represent an actual weakening of our security system. I believe, in fact, that the very opposite is true. By revising these procedures in the light of 8 years of experience, S. 3690 should afford our Nation more effective guaranties against the disclosure of sensitive data than it now possesses.

In response to the third recommendation of the President—encouraging broadened participation in the domestic development of peacetime atomic energy—the pending bill authorizes private persons to possess and use special nuclear materials, and to own and operate atomic reactors capable of producing or utilizing such materials. Title to such materials, however, would be retained by the United States Government.

Overall, the Atomic Energy Commission and its contractors have already done a good job in pressing toward economical atomic power. Indeed, it is only because of their impressive achievements that we can now look forward to such power in the relatively near future. But as the Atomic Energy Commission has itself maintained, research and development carried on purely under governmental auspices will no longer suffice to enable us to achieve practical peacetime power at the earliest possible date. Optimum progress now requires that governmental research and development, using the public's money, be supplemented by private research and development, using private money. S. 3690 would encourage such increased private participation in the atomic power field.

Realizing that relatively few companies may participate in this effort during the next few years, the joint committee has exhaustively explored the question of how to guard against the dangers of restrictive patent practices. The majority of the committee has recommended that, in the case of all such patents which are applied for during the next 5 years, the holders of patents or inventions primarily related to peacetime uses of atomic energy be required to license such patents to others in return for just compensation.

In making its recommendations on the subject of peacetime power development, the joint committee has been keenly aware of its responsibility to write legislation which will benefit all the American people, and which will not permit one group of Americans to benefit unduly at the expense of the rest of our national community. I sincerely believe that the proposed legislation will accomplish that purpose.

Taken in its entirety, S. 3690 is a complicated and highly technical bill. It is complex because the problems we face in atomic energy are complex. Notwithstanding that fact, the basic philosophy which motivated the joint committee

in its consideration of the proposed legislation is straightforward and easy to describe. Our guiding principle has been this: Which type of legislation will best promote the security and the well-being of our Republic? We do not expect every Member of the Senate to agree with every single provision of the pending bill. During the course of our deliberations on the bill, I believe that every member of the joint committee at one time yielded on some specific point or another. Yet none of us has compromised on fundamentals, and I think the fact that the committee has come into substantial accord on the essentials of the proposed legislation speaks well for it.

S. 3690 does not pretend to represent the final answer to the unfolding problems of atomic energy. Just as I believe the original Atomic Energy Act is now in need of revision, so also would the proposed legislation now before the Senate require subsequent revision from time to time.

I cannot close my remarks without repeating the warning contained in the report accompanying S. 3690. No legislation, no matter how carefully drafted, can itself guarantee our Nation a flourishing atomic-energy program. There is no legislative substitute for wise administration of our atomic enterprise, for continuing support of the objectives of our program in the Congress, and for an enlightened public opinion in atomic matters.

Up to now, the elementary requirements of survival have forced our Nation to concentrate on military applications of the atom. We must still give top priority to strengthening our atomic arsenal. Yet the time is now at hand when we can prudently afford to increase our work on beneficent applications of the atom, thereby bringing closer the day when our countrymen and like-minded peoples throughout the world can realize the true promise of atomic energy.

I know it is the deepest hope of every Member of this body that the time will come—even though perhaps only our children, or their children, will live to see it—in which the awesome force of the split atom can and will be used solely to elevate the dignity of man.

Mr. President, I further call the attention of the Senate to the fact that on last Friday the two volumes of the hearings of the Joint Committee on this subject were delivered to the Senate, and copies were made available to each Member of the Senate, together with the report of the joint committee on the bill and the dissenting views of about, I think, four Members on various portions of the bill. That report is on the desks of the Members of the Senate. Both the hearings and the report contain a great deal of information, which may answer many questions which may be in the minds of Senators. As the debate proceeds, I hope that either I or other Members of the Joint Committee who may be present may be able to give the answers to any questions which may occur to Senators concerning the various provisions of the bill.

Mr. GOLDWATER. Mr. President——

The PRESIDING OFFICER (Mr. UPTON in the chair). The Senator from Arizona is recognized.

Mr. GOLDWATER. Mr. President, for the past several days I have listened to a great deal of debate on the floor of the Senate, and have had called to my attention several news articles and editorials in connection with the President's recent action in instructing the Atomic Energy Commission to contract with a group of privately financed electric companies for some 600,000 kilowatts of capacity.

I do not pose as an expert on electric power system operations, nor have I been a close student of the Tennessee Valley Authority. I shall not take up the time of the Senate by arguing the relative merits of a contract with either the privately financed utilities or TVA for atomic energy power requirements, and I shall not attempt to analyze TVA's future power requirements. At the same time, however, I am not at all sure that those criticizing the President's action are power experts, either, or that they have any first-hand knowledge of TVA's future requirements.

There is one thing of which I am certain, though: The critics have made many statements which I cannot accept either as a businessman or as a Member of the United States Senate interested in a sound administration program.

At the outset, my mind goes back to the election campaign of 1952, at which time I told the people of my State of Arizona that the question of States' rights and private enterprise versus Federal supremacy was one which was ultimately going to have to be resolved by the citizens of this country in order that we might ascertain the future pattern of our National Government. I do not believe that this issue is going to be the all-important one in the campaign of 1954, and I do not think that it will necessarily be the overriding question in the campaign of 1956. Yet, sooner or later, Mr. President, this issue is going to rise to its singular significance, and the choice that is made by the American people will determine the future course of the great republican form of government which is ours.

At this point my mind goes back also to several months ago, when this body was considering proposed changes in the National Labor-Management Relations Act. At that time, in speaking here on the floor for a States rights amendment to that law, I pointed out, in effect, that the question of these rights was of infinitely greater significance than—and far transcendent to—any considerations of the Taft-Hartley law, as such.

I think, Mr. President, that, in this present connection, the question of the rights of free enterprise can also be measured in a far broader sense than as it is applied to the matter of public versus private power alone. This administration was elected on a pledge to return to the States the rights which, over 20 years of New Deal and Fair Deal administrations, were taken from them by the grasping tentacles of an all-powerful Federal Government. This present administration's policy relative to Federal power is to work with the local interests and to assist them in every way to meet their needs. It is a policy of partnership and cooperation.

Here, Mr. President, I am tempted to digress once more, and to suggest that the whole problem of power is one which is literally "as big as all outdoors," for it goes quite beyond the material, manmade aspects of our civilization, and concerns the qualities of the universe which are God-given, and which, therefore, must be treated with the reverence which is always accorded the Almighty.

Yet, there are those who argue that because electric power is God-given, it should be as free, as water and air are free. Those who say that, do so just because we cannot see electric power and handle it and go down to the store and buy it in a package; but they fail to realize that, despite its essentially celestial origin, it becomes, when it reaches the practical life of a nation, a manufactured product, just as much as a can of beans on a shelf in a grocery store. Electric power is manufactured in a plant designed for that purpose, and with equipment which is constructed and created by private enterprise; and the power is delivered to the consumer over copper wire, instead of in a delivery van.

In the handling of any Divine quality, however, even the hand of man is stayed by the recognition of the fact that we cannot treat lightly or with subversive intent the bountiful blessings which God has bestowed upon us. We cannot act toward them with motives and by means which are antagonistic to the methods and purposes of God.

In accordance with this interpretation, therefore, it is unquestionably the responsibility of the local people, the individual citizens, the separate human beings whom God has created, to provide this adequate power, and not the manmade monstrosity of an all-supreme Federal Government. The Federal Government is at the very best a necessary evil designed to stabilize the goodness in man, and this explains Thomas Jefferson's remark that "the best government is the least government." Indeed, all through the course of our history the American people have been guided by this principle, as enunciated by Abraham Lincoln—namely, that the Federal Government should not attempt to do anything for the individual citizens or for the States which the individual citizens and the States can best do for themselves.

This is the principle which has been set forth by this Republican administration. This is the principle which was spelled out time and time again by President Eisenhower and other Republican candidates. It is the principle by which this administration must stand, if it is to remain true to its own convictions and if it is to keep faith with the American people.

Mr. GORE. Mr. President, will the Senator from Arizona yield?

Mr. GOLDWATER. I am glad to yield.

Mr. GORE. I was very much interested in the quotation from Abraham Lincoln the Senator from Arizona has just given. Will he repeat it?

Mr. GOLDWATER. Abraham Lincoln said, in effect—I did not quote him verbatim—that the Federal Government should not attempt to do anything for the individual citizens or for the States which the individual citizens and the States could best do for themselves.

Mr. GORE. Is the able Senator from Arizona aware that there exists in United States history any precedent whereby the Federal Government reimbursed a private company for all its tax payments—municipal, county, State, Federal, excise, ad valorem, and income?

Mr. GOLDWATER. I am not acquainted with any situation of this sort, other than the one I intend to discuss.

Mr. GORE. I should like to inform the Senator from Arizona that I have had the legal section of the Congressional Library search the records, and they are unable to find such a precedent. I have asked the office of the Comptroller General whether they know of any precedent of that sort, but they know of none. Yet General Nichols testified before the Joint Committee that the Atomic Energy Commission proposed to pay the taxes, whatever they might be, however high they might be assessed, or of whatever nature they might be, for or on behalf of this company, or to reimburse the company for such taxes.

On the basis of all the authorities I can find, it seems to me that such a course would be unprecedented in United States history, and it seems to me it would constitute a very dangerous precedent.

Mr. GOLDWATER. I would agree with the Senator from Tennessee if I felt that the substance of the remarks of General Nichols had been correctly quoted. I have not read the hearings, but I have read reports regarding that particular statement. He referred to the fact that this company during its lifetime would, by means of the collection of rates and moneys, have the funds with which to pay the taxes.

Mr. GORE. Mr. President, if the Senator from Arizona will yield a little later, as soon as I find the testimony of General Nichols, I shall be glad to read it.

Mr. GOLDWATER. I shall be very happy to yield.

Mr. President, it is no more appropriate for the Federal Government to assume responsibilities for supplying the power needs of an area than it is for it to assume the responsibility for supplying drinking water, sewage service, police protection, or even transportation. Yet these are all necessary utilities, just as electric power is. They can be, however—and they should be—supplied locally. Our object, the object of this administration, is to let the people decide. That is the course of Republican government.

Mr. President, the Federal Government is in the power business, in keeping with the laws of Congress, simply and only as a byproduct of flood control, navigation, reclamation, and so forth. For being in this power business, in which the Federal Government, greatly extended, now finds itself, however, there is nowhere in our Constitution or in the laws of our land, expressed or implied, authority for the Federal Government to compete with private enterprise, which is the very lifeblood of a free economy.

This proposal by the administration has stirred the aggressive impulses of those who seemingly oppose all free enterprise and have consistently stood for Federal control and domination of our business institutions, whatever they may be. A great hue and cry are being raised from some quarters that the TVA is being undermined and that the sole purpose of the President's order is to maim the great Federal project upon which vast sums of money and energy have already been expended. The misinterpretation and misunderstanding of these critics could not be greater. It is a deliberate misconstruction in the interest of those who would make further strides toward the socialization of our country's Government and industries.

These opponents are crying, Mr. President, because they see a project, in which the Federal Government has over the years assumed a vested interest, now threatening to revert to its proper place in our economic system. Indeed, I think this, above all else, has been and is the great tragedy of TVA. It was an enormous project undertaken by the Government, in a time of crisis, to provide jobs, to stimulate the economy, and to bolster the energies of our people, whereby they would be enabled to move forward and to resume their course of free citizenship under an economy devoid of regulations, controls, and Federal restrictions.

Still, today, we find that the lofty purposes of TVA's inception have been discarded in the wake of our gallop to socialized state, industry, and life.

Mr. President, I suppose there will be those who will look with dismay upon a freshman Senator from a far western State who speaks forth so loudly and so severely on a subject which is geographically quite distant from his own immediate interests. Mr. President, my interests are the interests of our country, as well as those of my own State; and certainly I cannot, in my great loyalty to Arizona, blind myself to my even greater loyalty to the freedoms of all our people. If, in this course of rapidly growing centralized Federal power, any State or any region in our country is injured and deprived of the benefits of the free enterprise-States rights principle, then my own State is as intimately affected as though it were the very State wherein this menace first took hold.

It must not be forgotten in any of our deliberations, whether the question concerns labor, farming, public power, taxes, or any other subject affecting American life, that the people still rule; and it is our responsibility as their representatives to see to it that, in exercising the prerogatives of public office, we do not take from them the very rights and privileges which have enabled them to endow us with this great privilege and this high purpose.

In my State of Arizona, we have a project called the Salt River Valley Water Users Association. I like to bring up this fact when I discuss the question of power with my colleagues, inasmuch as some of them may be inclined to ignore my views because they may feel that my lack of experience, either in this body or in the general field of public power, might tend to render my thinking on the subject unreliable. Then, too, my opponents in this particular controversy may feel that my lack of technical knowledge should foreclose me from speaking on this subject which so vitally affects all Americans. I admit, quite frankly, that I am not an expert in this field, and that I am not thoroughly versed in all the complicated technicalities of this particular project. However, I cannot unhesitatingly concede that I am alone in my statistical shortcomings, and that is why I have no particular fear in defending the overriding principle that is involved.

In 1903, the Federal Government, under the Reclamation Act, assisted the Salt River Valley Water Users Association by the construction in Arizona of the Theodore Roosevelt Dam and some canals conducting water to lands irrigated in Maricopa County. It happened that there was a power installation at this development which produced some reasonably cheap power.

Mr. GORE. Mr. President, will the Senator yield?

Mr. GOLDWATER. I am very happy to yield.

Mr. GORE. On page 949, in the second paragraph, I read from the testimony of General Nichols, General Manager of the Atomic Energy Commission:

> The proposal provides for reimbursement by the AEC for all taxes, licenses, and fees, State, local, or Federal; paid or payable by the new corporation during the term of the contract, except that taxes arising out of the use of facilities for purposes other than the supply of capacity and energy to AEC will not be paid by the AEC.

Mr. GOLDWATER. May I ask the Senator if that reduction in taxes would be reflected, or if there is any indication that it would be reflected, in a lowered rate?

Mr. GORE. This is not a reduction of taxes.

Mr. GOLDWATER. The Senator misunderstood my question.

Mr. GORE. It is proposed to reimburse the private contractor for profit, whatever taxes he may pay out.

Mr. GOLDWATER. The Senator misunderstood my question. Is there any statement in the testimony which would indicate that a lower rate would be expected from the private company because of the payment of taxes by the AEC? It is of benefit to the company.

Mr. GORE. I cannot put my hand on it. I think that would surely follow.

Mr. GOLDWATER. I should suspect that that would follow.

Does the Senator have more to read at this time?

Mr. GORE. No.

Mr. GOLDWATER. I thank the Senator.

Because of this, the association became involved in producing and distributing electricity to its members and other users in south central Arizona. At one time, it was the largest producer and distributor of power in Arizona.

As its power requirements increased, it was necessary to build additional dams and some steam plants. The association did not come to Washington asking Uncle Sam to build these dams and steam plants. It floated its own bonds and used the proceeds for this purpose. It also worked out agreements with the private electric company operating facilities adjacent to its own which assisted in the financing.

As of today, there are produced in Arizona for use in Arizona 1,042,000 kilowatts, 605,000 of which are produced by Government agencies, including that of a Federal operation at Hoover, Parker, and Davis Dams on the Colorado River, some of which are sold to privately financed companies, and 437,000 kilowatts produced by the private companies.

Since 1946, the private companies have built or have under construction 420,100 kilowatts of fuel-fired capacity, and Government agencies—and by Government agencies I refer to such agencies as the Salt River Valley Water Users' Association—constructed 97,500 kilowatts of fuel-fired capacity. This expansion has taken place without assistance from Uncle Sam.

Mr. President, I am not an expert, but I am acquainted with what can be done and this is my answer to those who advocate a greater Federal investment in these power projects.

Why is it that the Government power proponents denounce the partnership policy of the present administration? Most of them contend that they favor private enterprise in general, and some even say that they favor permitting privately financed electric companies to construct whatever they are willing and able to do. I think, however, that this is only lipservice, because when the chips are down their actions belie their words.

The partnership arrangement has been working out very well in my State for a good many years. The publicly owned and privately financed utilities have been working together supplying the electric needs of the State. By energy purchase contracts they have assisted one another in financing the expansion of electric facilities. They have a coordinating committee headed by a full-time executive financed by the public and privately owned utilities, whose duty it is to keep constant tab on electric requirements of the State and predict and coordinate future expansion. The Federal, local, and private facilities are fully integrated to supply power to where it is needed and I might add that 98.9 percent of the farms of my State have electric service, which is a good deal better than some of my distinguished opponents can say for their States, with all their Federal monopoly.

We have a State power authority in Arizona only because we were forced to it by Federal Government development. When Hoover Dam was built, Arizona was entitled to a certain amount of the falling water with which to produce electric power, but the State and only the State could obtain this power. Therefore, it was necessary to set up a State authority to obtain it. That authority has been trying to purchase transmission lines owned by the Federal Government in Arizona and has run into opposition to this effort from some of the Federal power proponents. I may say that there are bills pending in both Houses of Congress to purchase these lines for a sum approximating $33 million. Does their obstruction spring from their fear that the Government will reduce its operations and thus delay the day on which all power in this country will be under Government ownership?

On the face of it, they will answer that this is not so; but I repeat, Mr. President, when the chips are down their actions belie their words. The President, by instructing the Atomic Energy Commission to enter into a contract with privately financed electric companies, has been accused of going back on his campaign promise to keep the Tennessee Valley Authority operating at maximum efficiency. In fact, as I have indicated, to listen to TVA proponents one would think his action was designed to ruin TVA. Actually, it was just the reverse. The action was taken to assist TVA. TVA claimed that, in addition to the steam plants now under construction, it needed several new starts in order to meet its normal load growth. The Congress, in its wisdom, decided on no new starts in steam plants for TVA. No doubt the majority of us believed that it was high time for the people of Tennessee to start standing on their hind legs and make provisions locally for their power requirements just as the rest of the country had to do.

Since the Congress refused to appropriate funds for new starts, the President came to the rescue of TVA by requiring AEC to procure some of its power requirements elsewhere, thus making available to the Tennessee Valley Authority for other purposes some 600,000 kilowatts now being supplied to the Atomic Energy Commission. How can such action be construed as anything but helpful to TVA?

Yet, this is the argument of the Federal power advocates, and it is more than I can understand; and I must say, Mr. President, that I do not attribute my lack of understanding on this phase of the problem at least, to any deficiencies in my own technical understanding of great public power problems. It is a simple matter of logic and the argument of the Federal power advocates fails to meet its requirements.

Statements have been made both publicly and before congressional committees by members of the TVA staff and other proponents of TVA that a large portion of TVA's power was being taken by the AEC and other defense agencies—that TVA had not sought these loads but had been requested by the Government to supply them. The furor now being raised certainly belies any intimation that these people did not want these defense loads. It seems to me as if they want this and all additional AEC or other defense plant loads they can get. In fact, I am not sure but that they have used national emergencies to build up their great Federal power monopoly.

I realize the people of Tennessee are disappointed that some $100 million is going to be spent for a steam plant in Arkansas rather than in Tennessee. It seems that when you get used to eating at the Government trough it is hard to give it up.

Much to do has been made of the fact the privately financed companies propose to build their plant near Memphis, some 200 miles from the AEC plant. They propose to dump their power into the TVA system at Memphis and let TVA deliver it to AEC at Paducah. There is nothing strange about this. TVA wanted to build a steam plant of approximately the same size at Memphis because they needed power at that end of their system, so it is more sensible for the new plant to be built there than to build another plant near Paducah, and have TVA push power from their steam plant near Paducah back into the TVA system and from there down to Memphis, where they claim to need a large block of power. Construction of the plant near Memphis would actually save TVA losses in pushing power from their present generating plants to the Memphis area. In reality this is nothing but a wheeling agreement with TVA doing the wheeling. This is exactly the same arrangement that the Government has been forcing on privately financed electric companies for several years in the southwest, the southeast and elsewhere by threatening to build paralleling, duplicating transmission lines if the companies refused to wheel the power. How anyone can advance the idea that this makes a power broker out of AEC is beyond me. AEC is no more a power broker than an REA cooperative purchasing power that private electric companies wheel from some Federal dam.

Statements that the proposed contract is nothing but a subsidy for the private power firms, and a means by which they can grab greedy profits are clearly semantic distortions indulged in for political spite. Anyone qualified to even discuss this subject knows that private electric companies are highly regulated and allowed to earn only a nominal return on money they invest in facilities. Since when has it been a crime in this country to earn a nominal rental on invested capital or a nominal fee for services rendered? I have always thought that was a very fundamental part of our economic philosophy—of our way of doing business.

A great deal has been said about the additional money a contract with private companies would cost AEC and therefore the Federal Government. Any claim to saving by purchase from TVA is fictitious at best. If TVA paid interest on money it obtains from the Treasury, and taxes—local, State, and Federal—equivalent to those paid by private industry, there would be no saving. I am sure that no one who has had deal-

ings with Government is naive enough to think that, all things being equal, a governmental agency can do business more economically than private industry. TVA engineers may be very competent, but they have no magic means of designing, constructing, or operating steam electric plants or any other power-producing facilities more economically than private industry. I am sure that no branch of Government could operate a business as efficiently as private enterprise. In fact, all things being equal in taxes, interest, and so forth, private enterprise could operate a business at a profit and compete with Government operating one at cost. Of course, if the Government wrote off a large part of the original cost, financed and operated with interest-free money, made only token payments in lieu of local taxes, and paid no Federal taxes, private enterprise might have a hard time competing with them. But I submit that the price at which the Government could sell merchandise under such conditions would offer no yardstick for determining the price private enterprise should charge for merchandise.

It is interesting to note that in comparing rates public power proponents usually compare production rates when the highest cost of supplying electric service to the ultimate consumer is in transmission, distribution, and services. In comparing rates and trying to promote additional authorities I have heard public power proponents compare the TVA wholesale rate with the delivered rate in some other sections of the country, thus leaving the impression that the TVA wholesale rate would be available to the consumers of the other section if only they had an authority. Such a saving would have very little influence on that customer's standard of living. If it is necessary for the Government to do something to subsidize the cost of living—and I do not think it is—I would suggest thinking about the food situation. A 10-percent saving on the grocery bill of the average American family would pay their electric bill in its entirety for a period of from 1 to 2 years. So why be so enthusiastic about shaving the cost of electricity to the consumer when it is already the cheapest thing he is buying? I may say that the percentage that the consumer pays of the cost of all household utilities—gas, oil, coal, and electricity—is a fraction of a point above 3 cents out of each dollar.

The purpose must be a great deal deeper than the average public power proponent either believes or is willing to admit. I cannot forget, however, that if the Government controlled power, it would have an iron grip on industry and even on our domestic life. That is one of the isms I do not want the Government to have.

It has been interesting to note during the debate on this subject that some Democrats from northern industrial areas have championed the TVA position. How anyone from northern industrial areas can advocate using tax funds collected from their constituents to build federally subsidized power facilities in the Tennessee Valley to help them compete on a more favorable basis for northern industries and still think that they are representing the best interests of their constituents is beyond me. The only reason I can see for such action is that they believe in nationalization of the electric industry, and encourage it in the Tennessee Valley with the hope that some day it will be national in scope.

I am afraid that the contract proposed for the AEC between it and the privately owned public utilities is in danger of being mired down in the swamp of TVA politics, if we are to judge by the loose and reckless statements made on the floor of the Senate and in the press during the past several days.

Several other points strike me as particularly significant when the issue between public and private power arises. To me probably the most important one is that the proponents of Government power, and in particular those of Federal power, seem to recognize no intermediate or middle ground. They are just like the adherents to so many of the isms in their adamant stand that theirs is the only way, that all of the private power industry is bad, and that the only good in the electric-power industry can come from Government, and particularly Federal Government power developments.

Furthermore, when Federal power is developed at any of our dams, they want all of it, every kilowatt-hour. They refer to it as a natural resource belonging to all the people, which, therefore, should go only to those purchasing power from governmentally owned and operated distribution systems, which serve less than 20 percent of the people. They are perfectly willing for privately financed companies serving 80 percent of the power users to use temporarily and pay for all of the power Government distributors cannot use, but they want this power sold on temporary or withdrawal contracts, so that the Government-financed distributors can get it when and if they need it.

Some public power proponents cannot understand that we have two ways of getting things done in this country, one by Government and one by business; that both are part and parcel of the people, in fact are the people, and that our present strength lies in the fact that so far we have substantially limited government to doing only those things for the people that they are unable to do for themselves, with its primary function that of governing, leaving the field of free-enterprise activities to private initiative.

If we do not keep government primarily in the field of regulation, but permit it to expand into the field of construction and operation of activities that can and should be free enterprise undertakings, we will drag ourselves down to the economic level of those countries we are now having to use our tax dollars to support.

The trend in the last 20 years toward dependency on Government, especially in the electric-power field, has been at an alarming rate. It should make every one of us who truly believe in our free-enterprise system realize that we as a nation are not immune to deteriorating into a nation controlled by bureaucracy which is an ism of one kind or another, but in reality all the same.

One of the most ferocious fallacies forced upon us by the Government power advocates is that all we need is cheap power to promote industry. As a matter of fact, the ratio of cost of power to cost of the end product in the average industry in the United States is less than 1 percent. A few industries such as aluminum, magnesium, some of the chemicals, and other electrometallurgical operations are large power users, and power does influence the cost of the end product. These industries are not necessarily desirable for promoting the industrial welfare of an area in that they use a very high number of kilowatt-hours per man-hour of employment. An area would be much better off with smaller diversified industries using a larger amount of employment to consume their electricity. The average industry is interested in an adequate dependable power supply but the cost of power has a very minute influence on location of the average American industry.

While talking about the influence of power on the location of industry, one thing that always amuses me is that Government power proponents seem to think it is a terrible thing for a privately financed power company to receive power from a Federal development and distribute it at a regulated profit, yet these same people try to influence industries whose profits are not regulated into Government power areas, using as a promotion feature the availability of cheap power. As a matter of fact, they advance industry needs as an argument for promoting additional Government power. Now what kind of reasoning makes it a sin for a privately financed industry, whose earnings are regulated to handle Federal power and at the same time a virtue for industries whose profits are unregulated, to receive benefit of federally subsidized power rates?

We are told that the subsidized rates at Government power developments have forced investor-owned companies to lower their rates. A little research will quickly show that the selling price of electric energy has been decreasing ever since the industry was established and that the decline was more rapid prior to the advent of TVA and other public-power developments than it has been since that time. Electric power is about the cheapest thing in our family or industrial budget today. It is the only thing I know of that a 1953 dollar will buy more of than did a 1939 dollar. It is not the influence of Government competition that has resulted in these rate decreases, because rates have decreased proportionately in sections of the country that could not possibly have been influenced by Government power. The utilities have been able to reduce rates through engineering achievements, improvements in operations, and well directed sales efforts.

Another thing that has been interesting yet frightening to me has been to watch the public-power proponents' use of flood control, navigation, and the

war effort to increase public-power operations. In the beginning flood control and navigation were the primary objectives and power was considered only a byproduct. Today we have built and are building hydroelectric projects that are in reality power developments only; we have TVA building steam plants to the extent that within the next year or two their ratio between steam and hydroelectric facilities will be approximately 60 percent steam and 40 percent hydro. And projected into the future, the ratio for steam will be ever-increasing as the hydroelectric potential of the area has been virtually exhausted. We have reports from Federal bureaus contemplating construction of forty-odd steam plants in the Missouri Valley area. We have had requests in the Congress for steam-plant construction in the Southwestern Power Administration area, and when this was refused a connivance between the SWPA and REA where REA funds were used for the construction of steam plants in that area. We have public power proponents objecting to privately financed industry building dams at the Hells Canyon site in Idaho and power facilities at the Niagara site in New York, neither of which has flood control, navigation, or irrigation benefits, but are entirely power developments.

I doubt that there would have been very many votes in Congress for the Tennessee Valley Authority Act if it had been known then that TVA was to be turned into a large Federal power monopoly; in fact the only large power monopoly that exists in the United States today. It was sold to the people as a navigation and flood-control development during a time of economic distress, as a worthwhile make-work project, but it has turned out to be essentially an electric power monopoly. What value does it have as a flood-control project? It has permanently inundated more rich valley land than was ever subjected to infrequent floods prior to its existence. The city of Chattanooga is still not adequately protected from floods, and the Army engineers have not reduced their expenditures for flood protection one iota on the Mississippi River because of facilities provided by TVA. From the standpoint of navigation, according to the Army engineers, adequate navigation facilities could have been provided for a small fraction of the cost that has gone into TVA. I suspect that the increase in river traffic TVA boasts about is largely due to TVA's own activities in hauling construction materials for new construction and coal for its steam generating plants. In my opinion TVA was conceived in the minds of socialistic planners, born in a period of economic distress and nurtured and expanded in deceit. Its greatest achievement to date has been in spreading propaganda—with Federal tax funds, of course—eulogizing its accomplishments.

I noticed in the CONGRESSIONAL RECORD of yesterday that during a colloquy which occurred in the Senate some reference was made to socialism. A man who is, I believe, an eminent authority on socialism, Mr. Norman Thomas, stated, in connection with TVA, in the Chattanooga Times of February 15, 1935:

> TVA is the only genuine socialistic act of the New Deal, a flower in the midst of weeds.

Mr. GORE. Mr. President, will the Senator from Arizona yield?

Mr. GOLDWATER. I yield.

Mr. GORE. Not even Norman Thomas called it creeping socialism.

Mr. GOLDWATER. He called it by its full name. He did not say "creeping socialism" or "galloping socialism." He called it socialism.

The same gentleman said, in 1944:

> The TVA exemplifies what socialism might be and the technique it would use in the process.

So said Mr. Norman Thomas who is, I think, the best expert on socialism in the country and who commented on the subject which I am discussing.

When private utilities attempt to develop a water resource for hydroelectric power the public power proponents immediately set up the cry of "give-away" of a natural resource. To listen to this wail one would think that the Government was giving away the water, that this private industry was depriving the people of the use of it. The accusation is made that a great natural resource belonging to all the people is taken from them and exploited by greedy individuals for exorbitant profit. People making such accusations know better than that. In the first place the water is not given away and none of it is consumed or sold as such. The power company simply gets the rights to spend its money in building facilities to utilize the water temporarily for producing electricity and then turns the water back into the stream. The private company cannot capitalize as an asset the value of this water. All it can do is earn a regulated nominal return on the capital invested to provide the facilities. If it makes any savings in cost which increase its earnings above the amount allowed by law, the savings must be passed on to the ultimate consumer in the form of rate reductions. What is the difference between using the water as an unexpendable fuel and using coal, oil, or gas which are also natural resources, as expendable fuels? The only thing I can see is that it deprives the Government power proponents of the opportunity of producing power at the particular site under the guise of flood control, navigation, or some other recognized public undertaking.

The tax situation is a much discussed issue in debate on public versus private power. Public power operations pay no taxes. Some of them make token payments in lieu of taxes to State and local government, but no contribution to the Federal Government. TVA is a good example of this. When it makes payments to State and local governments in lieu of taxes it publicizes a statement to the effect that its payment is more than was paid by the owners of the land acquired by TVA and the private electric utility companies when they were operating in the area, which has been 15 or more years ago. This statement is obviously intended to infer that the State and local governments are better off taxwise than they would have been without TVA. Such a statement is ridiculous on the face of it. In the first place, well over a billion dollars has been invested in expanding the properties since TVA took them over, and certainly taxes have greatly increased since 1939. So, had private industry invested these monies in power facilities in the area, under present tax conditions they would certainly be paying many times the taxes they were at the time TVA took over the properties.

I should like to comment at this point that anything in the budget of the United States or in any of the statements issued in Washington concerning the financial condition of TVA reminds me of a word which the late Maury Maverick originated—"gobbledygook"—in reference to confusing words which did not mean much to him. I should like to point out that the financial statements of the Federal Government in relation to some of its agencies might be called "gobbledyaudit," because it is almost impossible to find out where the money comes from. I am saying that with reference to some remarks I wish to make on taxes.

In fiscal 1952 TVA made payments in lieu of taxes of $3,036,000. Its distributors for the same period made payments of $4,672,000, or a total of $7,708,000. This is based on a net plant investment of $1,116,681,000. During this same period the Southern Bell Telephone and Telegraph Co., with a net plant investment of $898,653,000, operating in approximately the same territory, paid Federal, State, and local taxes in the amount of $67,734,387. If TVA and its distributors had paid taxes at the same rate as Southern Bell, they would have paid $35,734,000 in State and local taxes and $48,464,000 in Federal taxes, or a total of $84,198,000—about 11 times what they actually paid.

Another statement the public power proponents make is that privately financed utilities pay no taxes, that they just act as a tax collector charging taxes to the consumers. Where does anyone get money to pay taxes except from the ultimate consumer of the goods they sell or the services they render?

That is one of the fallacies of all taxing bodies. They assume they are going to relieve the taxing power. But the ultimate payer of all the costs of government is the consumer. We are not fooling anybody but ourselves when we say anything to the contrary. The merchant passes on taxes to the consumer, the doctor passes on taxes to the patient, and the lawyer passes on taxes to the people whom he serves.

TVA pays no interest whatsoever on money advanced by the Federal Government for constructing its facilities. It has been paying interest at less than cost to the Federal Treasury on bonds it issued in the amount of $65,072,000 for purchase of private electric facilities, of which there is now $14 million still outstanding. It pays no interest during construction, and it now has several hundred million dollars of steam plants under construction.

The Natural Resources Department of the National Chamber of Commerce issued a report this year entitled "The Countinuing Cost of TVA." This report was prepared by C. J. Green, a retired engineer-accountant, who served 20 years with the Federal Power Commission, and David J. Guy, now retired, who was formerly manager of the Natural Resources Department of the Chamber of Commerce of the United States. This was the second report that these two men had prepared for the National Chamber and was based on a careful study and analysis of TVA's operations since its inception. Both men are highly competent engineers, thoroughly qualified to analyze the operations and prepare such a report. Their conclusion was that TVA was not paying its way and that if it was put on a basis of operation comparable to that of the private electric industry, it would have to approximately double its present wholesale rates in order to pay its way.

It is also interesting to note that the Government power proponents are the ones raising the biggest objection to broadening AEC legislation to permit private industry to participate with AEC in developing atomic energy for peaceful purposes. Can it be that they think atomic energy may be a future low-cost method of producing electric power and want only the Government to develop this electric power so as to further inject the Government into this field? The argument that the Government did the development work which made atomic energy possible and therefore should not release this information for use by private industry makes no better sense than to say that farmers should not be permitted to use hybrid corn seed and increase their yield and in turn their profits from same because it was developed by the Government, or to make any number of other similar comparisons.

The Government has spent or has authorized for expenditures, close to $2 billion for TVA and has spent several billion dollars in the atomic energy plants at Oak Ridge and Paducah. No area could keep from gaining somewhat from such tremendous Federal expenditures. However, TVA has not improved economically as well as some of its neighboring States. For example, in comparison with its 10 neighbors, the scoreboard shows:

In population Tennessee stood fourth in 1930 and fourth in 1950.

In postal receipts Tennessee stood third in 1933 and fourth in 1951.

In cash receipts from farming it stood fifth in 1933, eighth in 1950.

In new business incorporations Tennessee stood fifth in 1946, fifth in 1951.

In business volume per capita Tennessee stood fifth in 1939, fifth in 1951.

In payment of wages and salaries Tennessee stood fourth in 1933, fifth in 1951.

In retail sales Tennessee stood first in 1935, fifth in 1948.

In retail-sales payrolls Tennessee stood third in 1935 and fifth in 1948.

In percent of total income taxes paid Tennessee stood sixth in 1933, fifth in 1951.

In addition to the above, whenever unemployment is prevalent in the United States, Tennessee and the Pacific Northwest are usually classified as critical areas. At present several cities in Tennessee and the Pacific Northwest are high on the critical list; yet those are areas high in the power field.

From the above it is hard for me to see how Tennessee has been improved greatly by the advent of TVA. As a matter of fact TVA may offer some detriment to the future economic welfare of the State.

I have answered a part of the absurd argument that TVA is paying its way by discussion of the tax and interest-on-money situation, but we are also told that TVA is paying back the money it gets from the Government for construction of power facilities. TVA has been a full-fledged electric utility for at least the time since it took over the private electric companies, a period of 15 years. The Government has advanced or authorized appropriations to TVA in the amount of $1,900,000,000. TVA, to date, has paid back $82 million. At this rate, it would take the Government several hundred years to get its money back if it stopped advancing money now. But TVA wants more money now—over $100 million—to build a plant near Memphis which private industry is ready to build, besides publicly stating that it expects to request several hundred million dollars each year in the foreseeable future for additional expansion.

The argument that because the Federal power monopoly is owned by the Government, therefore the Government should not be required to pay itself back, is frequently advanced by TVA proponents. The answer is that although it is a federally owned monopoly, it benefits only a small local area which is furnished a subsidized service that other areas of the country provide for themselves without Federal assistance.

It seems that the minute the Federal Government provides some electric power to an area as a byproduct of developments ostensibly intended for flood control, navigation, or other benefits, Government power proponents expect it from that time forward to take on the obligation of supplying all the power requirements of so-called preference customers, preference customers being that privileged minority of 20 percent of the people of this country who receive their electric power from facilities owned and operated by some segment of Government.

What kind of philosophy have we developed in this country when we seize upon the fact that we are fortunate enough to have a development in our area which makes available some low-cost power, although it is always subsidized, in order to be able to argue that the Government has taken on an obligation from then on in perpetuity to continue to supply us with this subsidized power? Of course, keeping the people from wanting additional benefits of this type is something like trying to quarantine Santa Claus.

One of these days the people are going to wake up to the realization that they are the Government and therefore they are Santa Claus. Some day, somehow, somebody will wake up to the fact that the great Federal bureaucracy which has been built up in the last 20 years must be curbed—unless our children and their children are prepared to go into debt for years to come. The time has come, it seems to me, to turn at least a portion of the job over to private enterprise, which is fully prepared and financially qualified to take care of it for the benefit of all the people, because the major risk will be assumed by the contractors, not by the Government; power will be made available in the Memphis area, where it is needed, not at Paducah, where it could become a liability; there will be no windfall to the contractors. The additional charges to the Government will benefit local taxing authorities and taxpayers; there is no significance in the location of the proposed plant 200 miles from the AEC installation. This is simply a method of replacing power that TVA itself has used in supplying AEC needs; interested parties have had ample notice and opportunity to make offers to supply the Government's needs.

The rejected proposal was on a cost-plus-fixed-fee basis involving substantial risk and no satisfactory guarantee to the Government.

The alternative of construction of a steam plant by TVA has consistently been rejected by the Congress.

Mr. President, in closing, I wish to pose one question for the advocates of public power to think about. It has always been one of the basic tenets of the American free-enterprise system that free enterprise should develop the natural resources of the United States. If that is not a true tenet, then I ask, why is not Russia the dominant economic country in this world? She develops all her natural resources. She works her land and her mines, and utilizes her rivers for electric power. Yet Russia is far down the list in the economic scale, while the United States is dominant. I think one of the reasons why our country is dominant is that we have been allowed, as freemen, to develop the Nation's natural resources. Now the administration steps in and says, "We want to do it on a partnership basis. Where a State can afford to do it, the Federal Government will assist it. But the Federal Government will not stand up and say who, what, where, when, and how, with respect to the power which is to be sold.

I apologize for speaking at this time, in view of the lateness of the hour. I wish to thank the members of the staff who have been forced to remain this late, and I also thank my colleagues who have seen fit to remain until this late hour.

Mr. ANDERSON and Mr. KEFAUVER addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Tennessee.

Mr. KEFAUVER. Mr. President, I think the Senator from New Mexico desires to speak very briefly.

Mr. ANDERSON. I expect to take a few minutes.

Mr. KEFAUVER. Will the Senator allow me to proceed for about 3 minutes?

Mr. ANDERSON. I yield.

Mr. KEFAUVER. Mr. President, during the last few days, I have talked with a great many people in the Tennessee Valley area. They are not hard to get along with. They have a long and prized tradition of hospitality and friendliness. But, Mr. President, I wish to report to the Senate that those people are angry today, and I feel that they have pretty good cause for feeling that way.

They are disturbed—indeed, some of them are aghast—that the Government of the United States would seriously consider such a proposal as has been produced in the negotiations between the Atomic Energy Commission and the Dixon-Yates utility syndicate.

Members of this body must be familiar with that name by this time—Dixon-Yates. Yet I believe that if Senators had time to read the transcript of hearing on July 1 and 2 before the Antitrust and Monopoly Subcommittee, they would be as disturbed as are the people of Tennessee.

The Tennessee Valley Authority is a household word throughout our whole great seven-State area. As an agency of the Federal Government, it has worked hand in hand with State and local governments in what is the finest example of democracy in action I know of. By its fruits, the people of the Valley know the TVA. They are proud of the fine contribution TVA has made to the economy and the defense of the entire Nation.

The people of the Valley understand full well what the proposed Dixon-Yates contract is. It is a crowbar which the private power lobby, working through the administration and the Atomic Energy Commission, is trying to wedge into the side of TVA.

Once they get the splitting process started, they feel they can chip TVA up into little pieces. They feel they can destroy its unity and its concept of area development, and again impose the choking, growth-killing monopoly they enjoyed for so many years before TVA's advent.

Mr. President, this is Dixon-Yates in a nutshell. The administration is telling its tool, the AEC, to go out and contract for some power from the private utility syndicate, a very special syndicate, as the subcommittee hearings have disclosed.

Yet AEC is not to use this power for itself at the Paducah works, where it is needed. Dixon-Yates' power is to be turned into the TVA system at Memphis, 200 miles away from Paducah.

The Tennessee Valley Authority will continue to supply the needs of the great AEC plant at Paducah, just as it has been doing.

The people of Tennessee are asking, Mr. President, what right AEC has to become a power broker for the city of Memphis, when Memphis has been doing pretty well over the years in dealing with the TVA for its own electric power.

I should now like to discuss briefly the cost of Dixon-Yates. The Atomic Energy Commission has told us that acceptance of the Dixon-Yates terms will cost $3.6 million more a year than if AEC continued to deal directly with TVA. Over the life of the contract, that means a Federal give-away of about $100 million to Dixon-Yates. But that is only AEC's estimate.

The TVA, which has had more experience in building power facilities than any other agency in the world, estimates the additional cost to be more than $5.5 million a year—or perhaps $140 million over the life of the contract.

Add to this the outlandish arrangement which apparently has been accepted by the administration: That the Government will pay all of Dixon-Yates' State and local taxes, Federal taxes, and allow rapid amortization. The Dixon-Yates plant, in Arkansas, will be the property of the private utility group.

Another proposal was made to the Atomic Energy Commission by another private group, headed by Mr. Walter von Tresckow. But from all evidence, AEC gave the Von Tresckow proposal only short shrift.

Under this proposal, the necessary generating facilities would have cost exactly what it would cost TVA to do the work, plus a $4 million fee for financing. And at the end of the contract period, the Government would own the facilities.

Mr. President, the Antitrust and Monopoly Subcommittee last week passed a resolution asking the AEC to refrain from further negotiations on the Dixon-Yates contract, because of its plainly objectionable features.

One of the earliest virtues of public power anywhere was that it would serve as a yardstick—a guide by which the public could know if its electric rates were justified by production costs. That has been a great value of the Tennessee Valley Authority.

Yet if the Dixon-Yates contract goes through, the TVA power yardstick will be destroyed the day they make the connection with the new plant. TVA is then going to have to pay at a rate much higher than that at which they have been producing power for 20 years.

As a witness before the subcommittee pointed out:

> The day TVA is forced to buy a kilowatt of power that it does not own the facilities for producing and does not control the rate of production, the cost of production, TVA, as it has existed, is a dead duck.

From time to time, I shall continue to make known to the Senate the feeling of the people of Tennessee on this subject. I hope and I am confident that this awful contract can be stopped if enough light is thrown on it.

I am glad the distinguished Senator from New Mexico is going to speak on the bill and offer an amendment to it, which I shall be very happy to support. I thank the Senator from New Mexico for yielding to me.

Mr. ANDERSON. Mr. President, when I listened to the announcement of the majority leader this evening as to what the program would be for the remainder of the week, I thought perhaps he had overlooked the fact that the bill now pending is an important piece of legislation, because he talked about bills he was going to take care of, and then he said it was planned to have a Saturday session both for the purpose of completing on Saturday pending business which may be carried over from Friday and also for a call of the calendar of bills to which there is no objection.

It is my opinion that if he shall succeed in having disposed of by Saturday the pending bill which proposes amendments to the Atomic Energy Act, he will have unduly crowded the Senate's schedule. I say that because, so far as I know, there is no intention on the part of Senators to grant unanimous consent for a limitation of debate on this very important measure. I think it would be only fair to say that if an effort is made to limit debate during the remainder of this week, it will encounter a great deal of difficulty.

To give some indication of the task involved in the consideration of the bill, I think it should be pointed out that when the joint committee had finished with the hearings, which occupy more than 1,150 pages, it then sat down and, day by day and hour by hour, carefully went over the bill, and I may say to those few Members of the Senate who remain that the committee spent an entire day in the discussion of one single word.

Mr. GORE. What was that word?

Mr. ANDERSON. The word was "willfully." I say to the Senator from Tennessee it had to do with a section which was very dear to the hearts of members of the press and various other persons, the language dealing with the question whether they had willfully given out any improper information.

When a group works as hard as I have indicated the joint committee worked to try to make sure that it reports a bill which has been carefully considered, it seems to me highly improper that the Senate should try to rush through the bill between lunch and tea time some afternoon. The Senate should spend some time upon the bill.

It seems to me that in dealing with a matter in which the people of the United States have already invested $12 billion, and which can easily change the course of industrial history in the entire Nation in a very few years, it might be worthwhile for the Senate to spend a little bit of time upon the bill.

I think it ought to be worthwhile also to spend a little time trying to decide whether the Atomic Energy Commission is truly an independent agency, or whether it must bow to an edict to go through with a contract against the judgment of three members who have been confirmed by the Senate of the United States, and thereby are presumed to be able to pass upon the business of the Commission.

I do not know that there is anything sacred in the term "independent," but it seems to me that if they are independent, if they have once been confirmed by the Senate of the United States, then they should be able to pass upon matters which come to them, without getting from some other source an edict that they must thereupon bend their will to that of another, and not do what they

have taken an oath to do, but do something entirely different.

I wish to remind Senators who may be called upon to consider this matter that electric current is not only handled by the TVA, and these contracts do not concern themselves only with matters in the State of Tennessee and do not concern themselves only with the Atomic Energy Commission. There is in the State of Tennessee the Tullahoma Air Base, the Arnold Research Laboratory, which I understand has something to do with wind tunnels. Many States tried to have that wind tunnel project located within their borders. The project was placed in the State of Tennessee because great quantities of electric power were available in that State—not available by means of some private industry, but available by means of the TVA.

Furthermore, I wish to say there may be involved in this discussion those of us who are not primarily concerned with the fate of TVA or the success of any public power project which may exist in the Tennessee Valley. It may be that they are concerned with this matter because they are interested in the form of contract, and are not at all disturbed by the claims that the proposed procedure might destroy the TVA.

I wish to assure the Members of the Senate that I am not nearly so concerned with the TVA, as such, as I am with the principle underlying this proposal, that a contract can be given to a private group, which can be called private enterprise, and that the Government of the United States will underwrite all the risk, and will permit a group with an investment of $5 million to make profits of $75 million, and call that private enterprise.

Mr. GORE. Mr. President, will the Senator from New Mexico yield to me?

The PRESIDING OFFICER (Mr. GOLDWATER in the chair). Does the Senator from New Mexico yield to the Senator from Tennessee?

Mr. ANDERSON. I yield.

Mr. GORE. And, in addition, give the same concern or corporation immunity from the payment of all taxes—local, State, Federal, excise, ad valorem, or income, and also from the payment of licenses or fees.

Mr. ANDERSON. Yes. I wish to say to the Senator from Tennessee that is why we need to spend some time discussing this matter. I do not believe the Congress of the United States has ever previously decided that a private concern can be organized and be given by the Federal Government a contract providing for the sale of its power and providing that it shall have certain definite rights in case of cancellation of the contract—to which provision I do not object—and also providing, in addition to all the other rights and privileges, that it shall be absolutely immune from taxes.

I object to such a provision because if that can happen in the case of a public utility providing power for the Atomic Energy Commission, the next logical step is to provide that it shall apply to any group. In short, once such an arrangement is made, there is no reason why a similar arrangement should not apply to General Motors when it contracts for the delivery of trucks to the armed services or why such an arrangement should not apply to any organization whatever in the United States which might be engaged in any industrial enterprise for the common good, because, once such a precedent were established, the same sort of tax treatment could be given to any group or organization. Provision could be made that it would not only be exempt from local taxes in the particular county in which it might be located—because the Federal Government would pay those taxes—but, in addition, that the Federal Government would pay its State taxes, whatever they might be, to any State in which the organization's plant or plants might be located, and, furthermore, that the Federal Government would stand ready to pay whatever Federal income tax for which the organization might be liable.

I wish to suggest that before we conclude this discussion, we shall see those who are advocating this step search by the hour through the lawbooks of the Nation, but still never find a case in which the Government of the United States ever before said to a private organization, "In recognition of your taking a defense contract, we will pay your local taxes, and your State taxes, and your Federal taxes."

Mr. President, when we talk about taking steps down the road in the direction of socialism, it is going a very long way when the Federal Government undertakes to pay the taxes of private business.

Mr. GORE. Mr. President, will the Senator from New Mexico yield again to me?

Mr. ANDERSON. I yield.

Mr. GORE. In the statement released by the Bureau of the Budget, they dwelt at length upon the tragic consequences to private enterprise, relating that private enterprise laid the gold egg and paid the taxes. If in this case the Government reimburses for the taxes, where is the golden egg, and who is the goose?

Mr. ANDERSON. I am not able to say who is the goose. [Laughter.] But I certainly am able to say to the distinguished Senator from Tennessee that I can follow that tax process with a great deal of interest, because if suddenly we are to decide that that can be done in this instance, then if the day should come when we were again engaged in a world war such as World War II—which heaven forbid—and if we were to have an excess-profits tax, and if we wished to have a certain organization take a contract, all we would have to do would be to go back to the excellent precedent of the Dixon-Yates contract, and say, "When you build this new factory to manufacture shells—or guns, tanks, planes, or whatever else might be needed—the Federal Government will pay to the local taxing authority whatever you may owe, and will pay to the State in which your plant is located any State taxes you may owe, and, in addition, will pay any Federal taxes—income taxes or otherwise—you may incur."

I wish to say that in the limited experience I have had in Washington in 14 years, I never heard of such a proposal; and I doubt whether the able Senator from Tennessee [Mr. GORE], who was in the House of Representatives when I became a Member of it, and who served with me on the Appropriations Committee of the House, ever heard in all his life of an example of such a proceeding.

Mr. GORE. I say to the Senator from New Mexico that I have never heard of such an example. I have asked the Congressional Library to search the annals of our Government, and they failed to find any such precedent. Neither could the General Accounting Office find such a precedent.

Does not the Senator from New Mexico think that the establishment of such a precedent would have very dangerous potentialities for the future, inasmuch as the bill provides for the power to license a concern to generate electricity by means of the use of atomic energy, and for the power to give patents?

Does not this bill constitute the very threshold of the generation of electrical energy by means of the use of atomic power?

Mr. ANDERSON. Yes; and on a subsequent day I intend to discuss that phase of the matter.

My purpose this evening is to place in the RECORD some of the material which should be before us when we begin to discuss such a contract.

Mr. President, the committee report is a fairly complete one. I did not sign any minority views, because I recognize the tremendous amount of work put into the bill by members of the staff and by members of the committee. However, I wish to call attention to the fact that the separate views alone run from page 94 to page 138—44 pages of separate views. It took me more than 2 hours to read the separate views of Representative HOLIFIELD and Representative PRICE.

I imagine that as we discuss this matter tomorrow and during the ensuing days, there will not be a single Member of the United States Senate, other than perhaps 1 or 2 members of the committee, who will have read even the report, to say nothing of the separate views on international activities, as submitted by the able Senator from Rhode Island [Mr. PASTORE], or the very carefully documented separate views submitted by Representative HOLIFIELD and Representative PRICE. These represent a tremendous amount of work.

On the question of taxation let me say this plant will cost only $107 million. However, if by any chance—knowing that Uncle Sam was going to pay the bill—the local taxing authorities in the State of Arkansas were to decide that the plant should be assessed at somewhat its true value, the Government of the United States might pay in taxes to the State of Arkansas not $1,500,000 a year but $3 million a year, because in many parts of the United States 30 mills is not an exorbitant tax rate.

If that should happen, the Federal Government, in a 25-year period, would be paying $75 million to the State of Arkansas in taxes. I can understand

why it would not like to have that arrangement made.

Mr. GORE. Except in this case, I believe, it is proposed that the Atomic Energy Commission shall reimburse the corporation for whatever taxes it pays.

Mr. ANDERSON. Surely. I am trying to say that it would pay these taxes. Then Uncle Sam would reach out and seek to pay them back to the Dixon-Yates group. If they have made their profit—and there is provision for a guaranteed profit of 9 percent—their taxes to the Federal Government are to be paid as well. It is a very fine situation.

On Friday, July 9, the junior Senator from Arkansas [Mr. FULBRIGHT] discussed the matter of the President's directive to the Atomic Energy Commission through the Director of the Budget to enter into a contract for 600,000 kilowatts of electric energy with the so-called Dixon-Yates group. He is temporarily off the floor and I do not seek to take advantage of his absence but want to put material into the RECORD at this time so it will be available for Members as the bill is debated.

The proposal of the Dixon-Yates group is to construct a powerplant of the above capacity on a site across the Mississippi River from Memphis, Tenn., known as West Memphis, Ark., and transmit on its own transmission line to a point midway across the Mississippi River. From that point on, according to the terms of the proposal, the Tennessee Valley Authority must assume the responsibility of accepting delivery of this amount of current which it will carry on its transmission lines into its system.

The Senator from Arkansas sets out as one of his arguments in favor of this arrangement the fact that the cost to the Government would not exceed $282,000 difference after the payment of full taxes to the State of Arkansas. He pointed out that this was in stark contrast with the repeated claims of other individuals, who have stated in the past that the cost to the Government would be in the neighborhood of $5,500,000 per year more than if the TVA were permitted to supply this same amount of power.

My attention has been called to the table inserted in the RECORD on page 9644, which the Senator from Arkansas uses as the basis for his statement that the net difference in cost to the Government including State tax, but excluding Federal tax, would be $282,000 per year. These figures, the Senator from Arkansas states in his discussion, were prepared by the Bureau headed "Statement outlining proposals received by the AEC from the sponsors—Middle South Utilities, Inc., and the Southern Co.," distributed by the Bureau of the Budget approximately 2 weeks ago. These figures are contained in the voluminous document which I hold in my hand, and I note on page 8 of the report a table of cost comparisons between the present TVA-Paducah contract and the Dixon-Yates revised proposal, dated April 10, 1954. The figures contained on this page are identical in every respect with those introduced into the RECORD by the Senator from Arkansas. It does, however, contain somewhat more information than the condensation used by the Senator in his discussion.

I ask unanimous consent that the statement outlining the proposal may be incorporated in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OUTLINING PROPOSAL RECEIVED BY THE AEC FROM THE SPONSORS, MIDDLE SOUTH UTILITIES, INC., AND THE SOUTHERN CO.

On December 24, 1953, Mr. Hughes, then Acting Director of the Bureau of the Budget, requested the AEC to see if we could work out with private utilities a proposal for the supply of 500,000 to 600,000 kilowatts of power in order that the AEC could reduce existing commitments of TVA to the AEC by a like amount.

It was recognized that the AEC had a firm contract with TVA for the supply of power to the Paducah plant from the TVA-Shawnee plant, the major portion of which was justified for and funds were appropriated to provide facilities to satisfy the contract load of 1,205,000 kilowatts which will result when presently authorized AEC plant now in operation and under construction will be completed in approximately April of 1955.

In exploring ways to obtain the additional capacity, consideration of the problems involved in further concentration of additional capacity in the Paducah area indicated that the most economical method for accomplishing the objectives stated in the budget message would be to provide additional capacity in the Memphis area. Accordingly, proposals were received on the basis that TVA would continue to deliver power to AEC at Paducah where it is needed by AEC, but would receive in replacement power purchased by AEC from private sources in the Memphis area, where power is needed by TVA. This method would avoid a further concentration of generating capacity in the Paducah area essential to continuity of power from the standpoint of national defense, provide TVA with power from a new plant located near a major load center, and assure AEC of continuity and reliability of power from the plant built specifically to serve its needs.

On April 10, 1954, the sponsors submitted a revised firm proposal to furnish 600,000 kilowatts of firm power. This proposal has been reviewed by the AEC, Bureau of the Budget, and Mr. Frank Adams, Director of Power of the Federal Power Commission, in a consultant capacity to the Bureau of the Budget.

Under the proposal, the sponsors have offered, subject to securing financing on the basis covered later—

(a) to form a new company sponsored by Middle South Utilities, Inc., and the Southern Co.;

(b) to secure the necessary capital requirements presently estimated at $107,250,000, by subscribing $5,500,000 or approximately 5-percent equity capital which will bear a return of 9 percent and issuing 30-year bonds to institutional investors for the remaining $101,750,000 or approximately 95 percent based on an interest rate of 3½ percent;

(c) to build a 650,000-kilowatt steam-electric station near West Memphis, Ark., to provide transmission facilities from the sponsors' new facilities to the middle of the Mississippi River between Shelby County, Tenn., and Crittenden County, Ark., including modifications to existing river-crossing interconnections between TVA and Arkansas Power & Light Co. and its existing and future points of connection between subsidiaries of the Southern Co., Mississippi Power & Light Co., and TVA; and

(d) to enter into a contract with the AEC for a term of 25 years from date of commencement of commercial operation of the first unit with provisions for two 5-year extensions.

The principal provisions of the proposal are:

(a) An annual base capacity charge, exclusive of taxes, of $8,775,000, which is equivalent to $14,625 per kilowatt-year (1.69 mills per kilowatt-hour), subject a variation—

(1) up or down in case of increase or decrease in actual cost of construction compared with present estimate, with a maximum annual increase of $285,000 or 47.5 cents per kilowatt-year;

(2) up or down for changes in cost of fuel from 19 cents per million British thermal units for the fuel component included in the base capacity charge required to keep the plant in operation under no-load conditions; and

(3) upward only for power factor correction of less than 93 percent.

(b) An energy charge of 1.66 mills per kilowatt-hour subject to adjustments up or down in case of increase or decrease in fuel costs from 19 cents per million British thermal units and for increases or decreases in labor rates based on the hourly earnings of production workers in gas and electric utility industries as compiled by the Bureau of Labor Statistics, using $1.97 per hour as a base.

(c) Reimbursement by the AEC for all taxes, licenses, and fees—State, local, or Federal paid or payable by the new corporation during the term of the contract except that taxes arising out of use of facilities for purposes other than supply of capacity and energy to AEC will not be paid by AEC.

(d) Cancellation may be made only by the AEC and is provided for as follows:

(1) For TVA to continue to receive and AEC to pay power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA, if required, to make other arrangements for the meeting of the requirements of the Memphis area.

(2) After termination, company shall have first call on the capacity and will absorb as rapidly as load growth will permit, but in any event not less than 100,000 kilowatts per year. Costs associated with capacity absorbed by the sponsors will be borne by the sponsors.

(3) Any capacity not absorbed by the sponsors after the 3-year notice period may be assigned to another governmental agency at an increased price to be approved by FPC.

(4) In event no capacity is used during the notice period, the base capacity charged will be reduced by $1,500,000 and proportionally in case of partial reductions. After termination, the base capacity charge less the $1,500,000 will be reduced proportionately to the capacity absorbed by the sponsors.

(5) The total maximum cost of cancellation to the Government, assuming the plant is idle from date of notice of cancellation, is estimated at $40,012,500 plus fair and reasonable expenses payable to third parties.

(e) The making of appropriate arrangements by the AEC with the TVA for the receipt by it and delivery to the AEC in kind of power and energy to be supplied as indicated above.

The base capacity charge is subject to adjustment for changes in the cost of construction from an estimated total capital requirement, including cost of plant, substation, transmission, interest during construction, working capital and cost of financing, of $107,250,000 or $165 per kilowatt of capability; or for plant only an estimated cost of $89,076,000 or $137 per kilowatt of capability. Under the formula provided in the proposal, AEC shares on a 50–50 basis with the sponsors any decrease or increase

in actual costs. In case the actual cost of the facilities is greater than $107,250,000, AEC shares the increase in cost up to a maximum actual cost of $117 million, $180 per kilowatt of capability, which would result in the maximum annual increase of $285,000 to the capacity charge. Costs greater than this must be paid in their entirety by the sponsors.

As to taxes in (c) above, the proposal provides that since the capacity and energy charges do not include taxes except those included in other reimbursable costs, i. e., social security taxes, etc., the AEC will pay such additional amounts for Federal, State, and local taxes, licenses, fees, and other charges so the seller will have the same net operating revenue as though he were not required to pay such taxes, etc. Those tax liabilities arising out of use of facilities for others than AEC will not be included in additional tax charges for capacity and energy to AEC. The sponsors state that, based on present tax laws, the additional amount to be added to the capacity and energy charges is estimated at $2,319,000 (.446 mill per kilowatt-hour) of which $1,499,000 represents State and local taxes, including $83,000 State income taxes, and $820,000 represents Federal taxes on income. The sponsors have indicated that if a favorable ruling is secured from the Treasury Department to the effect that $262,000 included in the capacity charge for replacements is not to be considered as revenue for tax purposes, the taxes estimated above will be reduced by approximately $313,000, resulting in a total of $2,006,000 (.384 mill per kilowatt-hour).

Mr. Frank Adams, in his capacity as technical consultant to the BOB, has made a comparative analysis of annual cost to the Government for power supply delivered to the TVA system in the Memphis area through increasing TVA capacity or accepting this proposal. The AEC has participated in this analysis and is in agreement with his findings.

In considering this proposal there are several significant points to bear in mind:

(a) By utilizing private utilities, the United States would save a capital outlay of at least $100 million over the next 3 years, the cost estimated by TVA for the construction of equivalent capacity at the Fulton site.

(b) The proposal is a firm offer with a stated maximum capital cost reflected in the demand charge whereby a ceiling is placed on maximum liability on capital cost to the Government whereby the sponsors bear one-half of any possible increased cost from an estimated cost of $107,250,000 to $117,000,000 and all of the cost above $117,000,000. In addition, if the plant is built for less than $107,250,000 the Government will share 50 percent of the saving.

(c) There is no guaranty as to the ultimate capital cost of a TVA plant even though that agency has a favorable construction record in recent years. Data on actual cost of TVA plants is limited to information published by TVA without detailed information on how the costs are derived.

(d) In the case of this proposal there is a guaranty and a real incentive on the part of the sponsors to assure that capital costs do not exceed $107,250,000. As an example, if the cost should go to $117 million, the interest on the equity capital in the amount of $5,500,000 would reduce from 9 percent or $495,000 to $210,000 or 3.8 percent. If the capital cost exceeded $117 million, interest on equity capital would rapidly reduce to zero. Thus, the sponsors have a real risk under the proposal offered and a compelling reason to keep capital costs below the estimated cost of $107,250,000.

(e) In addition, the plant is not completely amortized at the end of the 25-year contract. There is 24.6 percent of the debt not retired at the end of 25 years so the rate under the proposal does not provide for completely amortizing the plant over the 25-year period.

(f) To obtain a fair comparison of the merits this proposal with cost of power to AEC under the TVA-Paducah contract, the same cost of fuel, 19 cents per million B. t. u. should be used and would result in the following comparison:

Comparison of annual cost for power supply from Dixon-Yates proposal versus cost to AEC of power from TVA at Paducah, using 600 megawatts capacity, 5.2 billion kilowatt-hours per year or 98 percent load factor and 19 cents per million British thermal units fuel cost

	TVA—Present Paducah contract	Dixon-Yates—Revised proposal Apr. 10, 1954
1. Production and transmission:		
Capacity	$8,208,000	$8,775,000
Mills per kilowatt-hour	(1.578)	(1.688)
Energy	11,648,000	9,688,000
Mills per kilowatt-hour	(2.24)	(1.863)
Total	19,856,000	18,463,000
Mills per kilowatt-hour	(3.82)	(3.551)
2. Difference, Paducah versus Dixon-Yates		(1,393,000)
3. TVA transmission required to primary point of delivery		[1] 177,000
4. Total (excluding taxes)		18,640,000
Mills per kilowatt-hour		(3.584)
5. Taxes (Federal, $820,000 plus Arkansas State and local $1,499,000)		2,319,000
Mills per kilowatt-hour		(.446)
6. Total (including taxes)	19,856,000	20,959,000
Mills per kilowatt-hour	(3.82)	(4.03)
7. Difference, Paducah versus Dixon-Yates		1,103,000
8. Less Federal taxes		820,000
9. Difference, Paducah versus Dixon-Yates less Federal taxes		282,000

[1] Represents difference in TVA annual transmission cost to deliver power from Fulton and Johnsonville plants ($430,000) and their corresponding costs from the receiving point for Dixon-Yates power ($607,000).

Thus, under a fair comparison using the same fuel costs, the cost of power delivered to the TVA transmission system under the Dixon-Yates proposal in comparison with the cost to AEC under our present contract with TVA at Paducah using the same fuel cost is $1,103,000 per annum. Excluding Federal income taxes in the amount of $870,000 the difference is $283,000 which is more than offset by State and local taxes in the amount of $1,499,000.

(g) In the cost comparison of annual costs to the Federal Government for power supply delivered to the TVA system in the Memphis area, it was estimated that the cost of increasing TVA capacity versus accepting the Dixon-Yates proposal would result in an additional cost to the Government per annum of $3,685,000 for 600,000 kilowatt capacity and 5.2 billion kilowatt-hours per year. It should be noted that this is a comparison between cost of power delivered under the Dixon-Yates proposal and estimated costs of TVA to deliver the same amount of power. It does not represent what TVA would charge the AEC for the same amount of power. Using the TVA-Paducah contract as a base, TVA would charge AEC approximately 3.82 mills per kilowatt-hour or $19,856,000 per annum. This would result in a cost to the AEC as follows:

Total annual cost—Dixon-Yates proposal (including taxes)	$20,959,000
Estimates total charges to AEC using TVA-Paducah contract as a base	19,856,000
Difference	1,103,000
Less Federal income taxes	820,000
Difference	283,000

This again shows that on a basis of estimated charges TVA would make to AEC, using the Paducah contract as a base, the difference is more than offset by Arkansas State and local taxes in the amount of $1,499,000.

(h) TVA stated they would change the estimated cost of increasing TVA net capability to supply 600,000 kilowatts demand and 5.2 billion kilowatt-hours per year from $16,884,000 per annum, or 3.25 mills per kilowatt-hour, to $15,414,000 per annum, or 2.96 mills per kilowatt-hour. Correcting the 2.96 mills per kilowatt-hour from 18.4 cents per million B. t. u. fuel costs (used in arriving at the 2.96 mills) to the estimated fuel cost of 15½ cents that TVA indicated should prevail in the Paducah area and would be used as a basis for calculating charges to the AEC after January 1, 1956, would result in an estimated cost to TVA of 2.84 mills per kilowatt-hour for power furnished by TVA to AEC at Paducah. Under the TVA-AEC contract at Paducah at a fuel cost of 15½ cents the charge to AEC would be 3.47 mills per kilowatt-hour, or a difference of 0.63 mill per kilowatt-hour. However, a fair comparison of cost to TVA versus charges to AEC at Paducah was calculated using 35-year amortization, 2½ percent interest, excluding interest during construction, insurance, and working capital, and using a higher heat rate of 9,947 B. t. u. per kilowatt-hour for the less efficient units in the Kingston plant would result in a difference of 0.58 mill per kilowatt-hour. For 5.2 billion kilowatt-hours per year, this would result in a charge to AEC over and above TVA costs of approximately $3 million per year.

By July 1, 1956, the AEC demand at Paducah under the present contract with TVA will be 1,205,000 kilowatts. Thus, after that date charges to AEC over and above estimated costs to TVA will be approximately double the $3 million, or $6 million per annum. This places TVA in a position, at the expense of AEC, of subsidizing other users of the TVA system at the expense of the taxpayers in the balance of the country.

This applies only to the TVA-AEC contract for the Paducah area. A similar analysis of the TVA-AEC contract for the Oak Ridge area for the 1,030 kilowatts of demand would undoubtedly reveal a similar picture.

Summary of Proposal Received by AEC From Von Tresckow Group

The AEC has received a second proposal for supplying 600,000 kilowatts of firm power to be delivered into the TVA system in the Memphis area.

This second proposal has been submitted by a group composed of the following: Walter von Tresckow, financial and economic consultant, New York City; Harvey Weeks,

of New York City; John N. Mitchell; Salomon Brothers and Hutzler, investment bankers of New York City; George H. Schwartz, of Schwartz, Nathanson & Cohen, attorneys, New York City; Zelig Nathanson, of Schwartz, Nathanson & Cohen, attorneys, New York City; and Robert W. Larrow, of MacNamara & Larrow, attorneys, Burlington, Vt.

This group has submitted a proposal to form a Tennessee corporation which would assume responsibility to finance, design, build, and operate a steam plant with a net capability of 620,000 kilowatts on TVA's Fulton site under a no-risk contract with AEC and/or TVA. Such a plant would be fully integrated into and become a part of the TVA system. The financing would be 100 percent debt financing on mortgage revenue bonds at 3½ percent interest. These bonds would be 35-year bonds with amortization over a period of 30 years, beginning the sixth year. The design, construction, and operation of the plant would be on a cost basis with no limit on liability of the Government and no risk on the part of the proposed corporation except for a $20 million bond to protect the Government against increases in construction costs from $200 per kilowatt to $233 per kilowatt for a 3-unit plant of 600,000 kilowatt nameplate rating; the Government would bear the full cost of plant construction up to $200 per kilowatt and any costs in excess of $233 per kilowatt. The Government would pay for power at the rate of 5 mills per kilowatt-hour, and at the end of each year would receive a patronage dividend representing the difference between the 5 mills rate and actual cost of operation including production, management expense, taxes, interest, and amortization of debt. In discussion the group indicated willingness to consider downward adjustment in the 5-mill rate as long as any adjusted rate resulted in maintaining sufficient margin to adequately cover debt service charges. The group has submitted an estimate of capital costs ranging from $90 million to $100 million.

As compensation the sponsors would receive a fee of $4 million, which under the original proposal was to be paid during the fourth and fifth year of the contract period, i. e., prior to commencement of amortization debt payments. They have also proposed an alternate method of payment which would provide for payment of $1 million in the fourth year; the balance of $3 million would be paid at such times during the period of the contract that the Government might suggest, with interest at the rate of 4½ percent per annum on any unpaid balances after the fourth year.

The sponsoring group propose a contract with AEC for a period of 25 years following the commencement of delivery of power under the contract. They further propose a subsidiary contract with TVA on the same terms as the AEC contract for a period of 32 years from the commencement of delivery of power to AEC, deliveries under the TVA contract to start at the expiration of deliveries under the AEC contract (at the end of 25 years), or at an earlier date if AEC cancels prior to the end of its contract term.

They further propose at the end of 30 years to turn over to TVA for 1 dollar the plant, together with all working capital and other assets of the corporation, if at that time TVA will assume all remaining outstanding bonded indebtedness and current obligations. An alternate discussed in the June 3 meeting would provide that the Government, either through AEC or TVA, could in the event of cancellation take title to the plant and also assume all outstanding liabilities of the corporation.

The estimates submitted as part of the proposal are based on a plant having net capability of 620,000 kilowatts delivering 4.73 billion kilowatt-hours per year. The group has given a low and high estimated annual cost ranging from $17,226,000 (3.64 mills per kilowatt-hour) to $20,957,000 (4.43 mills per kilowatt-hour).

The sponsoring group indicates that a separate management corporation would be organized to operate the plant. They have advised us that this management corporation would be staffed with properly qualified individuals. However, they preferred not to divulge at this time the identity of the individuals being considered for key jobs in the management corporation.

In consideration of this proposal there are several significant points to bear in mind:

(a) Complete risk for all cost is assumed by the Federal Government and there is no ceiling on maximum liability except as may be covered by the performance bond previously discussed.

(b) The proposal appears practicable only on the basis of cooperation by TVA, the execution of a contract by TVA to purchase power after expiration or on termination of the AEC contract and integration of the plant into TVA's system.

(c) The estimates used are quite general and as far as we have been able to ascertain are not based on any preliminary engineering studies or any firm commitments for fuel supply.

(d) Realization of the estimates depends entirely on the ability and skill of the groups who will design, build, and operate. There are no other safeguards to insure reasonable limitation on costs.

(e) It is doubtful that AEC has legal authority to enter into such a contract unless TVA undertakes the commitments expressed in the proposal. We are not familiar with TVA's legal ability to undertake their part of the proposal.

(f) The essential difference between this proposal and a direct appropriation to TVA is that a capital outlay by the United States of approximately $100 million, the cost estimated by TVA for construction of equivalent capacity at the Fulton site, would not be necessary. Under this proposal the capital would be provided by privately issued bonds at 3½ percent, the full interest and amortization on which, together with a $4 million fee, would be paid ultimately by the Government.

(g) On the basis of the very general estimates and the limited information on which these estimates are founded, and the lack of definite knowledge that there would be a competent, skillful operating organization, it is difficult to conclude that one could safely assume any savings to the Federal Government under this proposal in its present form as compared with the Dixon-Yates proposal.

We feel that an approach such as this, if considered reasonable, should not involve any AEC participation. There is nothing to be accomplished through joint AEC–TVA participation that could not be done better by TVA entering into such a contract alone.

Mr. ANDERSON. It is an interesting thing that not only was this statement prepared and submitted by the Bureau of the Budget, but certain persons started to check it, and it was noticed that the statement prepared by the Bureau of the Budget did not agree with the statement prepared by the Atomic Energy Commission and submitted to the Joint Committee on Atomic Energy. The Joint Committee on Atomic Energy received from the Atomic Energy Commission the statement that the difference in cost would be $3,600,000, roughly. There was the Bureau of the Budget, testifying that the cost would be $282,000.

I am reminded, upon reviewing this table, that on Thursday, June 17, 1954, Mr. Kenneth D. Nichols, General Manager of the Atomic Energy Commission, appeared as a witness before the Joint Committee on Atomic Energy, which was holding hearings on this important matter. At that time Mr. Nichols read into the record a letter, then unreleased, to Chairman SALTONSTALL of the Appropriations Committee from Mr. Rowland Hughes, Director of the Bureau of the Budget, setting forth the decision of the President to instruct the Director of the Bureau of the Budget to direct the Atomic Energy Commission to accept as a basis for negotiation the proposal set forward by the Dixon-Yates group in preference to the only other proposal submitted by the so-called von Tresckow group. That letter is now fully released and is now in the printed hearings.

It is interesting to me that in his testimony immediately after reading Mr. Hughes' letter to the chairman of the Appropriations Committee Mr. Nichols went on to testify as to the AEC's own breakdown of the difference of costs between the Dixon-Yates proposal and the TVA estimate of its costs for doing the same job. I am now quoting from page 957, part II of the published hearings on S. 3323 and H. R. 8862 before the Joint Committee on Atomic Energy:

> Analysis of the proposal from the standpoint of cost to the Government, including State or local taxes but excluding Federal income taxes, as compared with the estimate for constructing a plant near Memphis by TVA, shows an annual cost to the Government of $20,569,000 for the private companies as compared with $16,884,000 estimated for the TVA plant. The difference of $3,685,000 is due to the following items. I give it in dollars and percent.
>
> State and local taxes, $1,499,000, which represents 41 percent of the total. The difference in the cost of money, money bearing 2½ percent interest (Government borrowing) and money bearing 3¾ (private borrowing), is $1,059,000 or 29 percent of the total. The extra fuel transportation cost, which is noted in Mr. Hughes' letter, there is some question about this $309,000, or 8 percent.
>
> Difference in operating cost, $211,000, or 6 percent. So the total adds up here $3,078,000 or 84 percent. Then there is increased transmission cost to TVA of $607,000, or 6 percent. So the total additional cost of 100 percent is $3,685,000.

In view of the authentic ring of Mr. Nichols' current analysis of the differences in cost, I believe that the junior Senator from Arkansas did not have in his possession the most recent and accurate information on the economics of this proposal. My interest in this matter has been increased by the second report released by Representative CHARLES R. JONAS over the weekend, which he described as "the official statement of the administration on the merits of accepting the Dixon-Yates proposal." I hold in my hand a copy of the report, originating from the Bureau of the Budget, which Representative JONAS released. On page 3 of the section of this report entitled "Detailed Analysis of the Middle South-Southern Proposal" I am struck by the similarity of the figures presented which show identically the same breakdown, as I mentioned a few minutes ago, as was given by Mr. Nichols, General Manager of the Atomic Energy Commis-

sion, before the joint committee fully 3½ weeks ago. From a very detailed analysis, it gives a difference in cost of $3,685,000 more to the Government if it accepts the Dixon-Yates proposal than the cost estimated by TVA for doing the same job at the Fulton steam-plant site.

I ask unanimous consent that this document be inserted in the RECORD at this point.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

BASIS FOR ACTION BY THE ADMINISTRATION TO MEET ADDITIONAL NEEDS FOR GENERATING CAPACITY IN THE TENNESSEE VALLEY AREA

The President's decision to provide for the 1957 expansion of power consumption in the Tennessee Valley area through facilities to be constructed by private enterprise will—

1. Provide for national defense needs, which are paramount.

2. Promote the best interests not only of the people of that area but of all the people.

3. Permit amortization of the cost of the facilities over a 25-year period, thus averting an immediate capital outlay of $100 million and reducing pressures against the ceiling on the national debt.

The President's action, as he stated at his press conference on June 30, 1954, will meet the immediate needs and allow additional time for study of the question as to how the future power needs of the area should be met. The President's statement on that occasion emphasized that the Tennessee Valley Authority would be supported to carry out the purposes written into the law. It is a complete refutation of any suggestion that the present proposal is part of a plan to dismember the Authority.

The history and form of the transaction is abundantly clear. The President's decision was taken only after the matter had been subjected to the most careful consideration. The attempts to distort the purposes and effect of the contemplated arrangement cannot change the essential facts. A brief review of the development of the present proposal, and of the considerations which guided the decision, will demonstrate clearly that it is the best possible solution to the immediate problem.

In his message transmitting the 1955 budget, the President stated that arrangements were being made to reduce TVA commitments to the Atomic Energy Commission in order to provide for reasonable growth in industrial, municipal, and cooperative power loads in the TVA area through the calendar year 1957; and that the question of additional generating units for the Tennessee Valley Authority would be further considered in the event these arrangements could not be consummated.

The statement in the President's budget message is an alternative to the proposed construction by the Tennessee Valley Authority of a steam plant at Fulton, Tenn., near Memphis. A significant factor in connection with this proposed steam plant is that the Congress on four separate occasions in the current session and the preceding session has voted down amendments to provide funds to the TVA to start construction.

Further, the construction of the Fulton steam plant by TVA would create the risk of a large block of surplus power if AEC's needs should decline. A shift of part of AEC's requirements to private utilities would spread the risk of disposing of this surplus. Approximately 30 percent of TVA's capacity is committed to AEC and the Government would be in a better position if it could share with private power interests the responsibility for disposing of the surplus which would result if AEC operations were to be curtailed.

The construction of the Fulton plant as proposed by TVA would require the Federal Government to make a capital outlay of approximately $100 million during the next 3 or 4 years, which would serve to increase pressures upon the debt limit at a time when every effort is being made to limit the size of the national debt. An alternative source of power, the cost of which could be amortized over a period of 25 or more years, would reduce the pressure on the debt limit and thus be highly desirable from a standpoint of sound fiscal management.

Further, the Fulton steam plant would be on the periphery of the TVA area, 80 miles outside the Tennessee River Basin. As the President indicated at his press conference, the question whether the Government should continue to construct plants on the periphery of the basin, contemplating delivery of power far beyond the TVA area, involves a major question of public policy which was and is under study by the administration. A feasible alternative to immediate construction of the Fulton plant by TVA would provide time for completing the study of this question.

There was ample opportunity for interested parties to come forth with proposals to supply the Government's needs. Prior to the transmission of the budget message, discussions had been held with the private utility groups presently supplying power to the Atomic Energy Commission, and with representatives of other private utilities. Although the Government issued no formal invitations for bids for its additional power needs, the statement in the President's budget message received wide publicity in the general press and the trade publications and was a matter of public knowledge, particularly in the Tennessee Valley area. The suggestion that bidding was restricted is entirely without foundation.

The obvious alternative to construction of a steam plant by TVA to serve its needs and those of the Atomic Energy Commission would be to extend the existing practice of having the Commission purchase a substantial portion of its needs from private utilities operating near its Paducah installation. Preliminary discussions with these suppliers soon developed the fact that it would be imprudent to place any further concentration of power supply in the Paducah area because of the difficulty of finding a market for such a large block of power in the event of a decline in AEC needs. Further explorations by AEC indicated that the difficulty of disposing of any such residue of power would be minimized if generating facilities were constructed in the Memphis area. Also, the TVA need is in the Memphis area, rather than at Paducah. Construction of facilities by private interests near Memphis would benefit both TVA and AEC, since any surplus resulting from a decline in AEC needs could best be disposed of in the Memphis area.

In February 1954 the Commission received a proposal from Middle South-Southern utilities for construction of a plant in the Memphis area for power to be delivered to the TVA system for the account of AEC. This arrangement would, as contemplated by the President's budget message, reduce TVA's commitments to AEC and thus permit the Authority to devote more of its capacity to other users. This proposal, however, was believed to involve excessive costs to the Government. After extensive discussions, the Middle South-Southern group submitted a revised proposal on April 10, 1954. It is this revised proposal which the administration approved on June 16 when the Atomic Energy Commission was instructed to proceed with negotiations looking toward the signing of a definitive contract with the Middle South-Southern group. (A detailed analysis of this proposal is attached.)

In comments in the press and elsewhere considerable attention has been devoted to the fact that this proposal contemplates construction of a steam plant at West Memphis, Ark., 200 miles from the Commission's Paducah installation. However, the fact that the proposed plant would be located some distance from Paducah is entirely consistent with the practice followed by TVA in the construction of steam plants to serve the Commission. In many instances these plants are widely separated from the installations of the Commission. For example, funds for TVA's generating plant at Widow's Creek and unit 4 of its Johnsonville steam plant were justified to Congress in 1949 in connection with supplying the needs of the AEC installation at Oak Ridge. Oak Ridge, however, is 200 miles away from the Johnsonville steam plant and 100 miles from the Widow's Creek generating plant.

The practice followed both in that instance and in the present proposal involves the replacement method of power supply, under which power is fed into a large integrated system at locations which bear only an incidental relationship to the locations at which the power is used. No exact relationship is possible because power fed into such a system loses its identity just as water from streams which feed into a lake cannot be identified with a particular stream. (There is attached a statement which explains in detail the replacement method of power supply which is presently used by TVA to meet AEC power requirements.)

Another feature of the proposed contract with the Middle South-Southern utilities group which has received considerable attention is the cost of the proposal as compared with estimated costs if additional generating capacity were to be constructed by TVA. Under the TVA estimates, the annual cost to AEC would be $16,884,000 for 600,000 kilowatts of capacity. (Although TVA cost estimates have been sufficiently accurate to afford a satisfactory base for comparison, it should be noted that the proposal for construction of additional generating capacity by TVA would afford no guaranty as to the ultimate cost of power to AEC.)

Using TVA estimated costs as a yardstick, the Middle South-Southern proposal would cost the Government approximately $3,685,000 more per annum than the purchase of power from TVA. Of this amount, approximately 70 percent ($2,558,000) constitutes State and local taxes and interest on borrowings which is at a higher rate than interest on money borrowed by the Federal Government. The remainder ($1,127,000) is due to additional transmission costs to bring the power across the Mississippi, and to a difference between estimated operating costs. The latter item will be greatly reduced if the sponsors can obtain fuel at Fulton at the same price as TVA, as responsible suppliers have indicated would be the case.

Taxes, of course, will not inure to the benefit of the contractors but will merely reimburse them for amounts which they must pay to the governmental entities involved and which will ultimately benefit the other taxpayers concerned. In fact, the only element of profit in this proposal is the return to the sponsors on their $5,500,000 of equity capital. This would amount to $495,000 annually.

While reported cost is necessarily an important factor, it cannot be the deciding factor in comparing the operations of a Federal agency with a private organization. There are many activities now performed by private enterprise for the Federal Government which the Government, because of its freedom from taxes and its enormous credit resources, could seem to perform more cheaply under a concept that nonpayment of taxes by the Federal Government is a true saving in cost. This concept ignores the consideration that when a commercial-type operation does not pay taxes, it leaves a larger amount of taxes to be absorbed by other taxpayers. If this concept were accepted and it

were also considered sound to provide funds through Government borrowing, the Government might propose to take over these activities on the grounds that they would cost less under Government operation. Such action would be contrary to our basic conception of a private-enterprise economy.

On May 26, 1954, while the proposal of the Middle South-Southern group was under consideration, another proposal was submitted by a group headed by Walter von Tresckow of New York City. Under this proposal, the group would construct and operate a steam plant at Fulton which would be fully integrated into and become a part of the TVA system.

The von Tresckow proposal contemplates that the Government would acquire ownership of the plant after 30 years, subject, however, to assumption by the Government of liabilities of the contractor which would still be outstanding at the end of that period under the amortization plan contemplated by the proposal. The arrangement would be, in effect, a cost-plus-fixed-fee contract under which the sponsors would receive a flat fee of $4 million for their services. Annual costs to the Government are estimated at a range between $19,346,000 and $22,022,000 as compared with the estimated annual cost of $20,569,000 under the Middle South-Southern utilities proposal. (A detailed analysis of the von Tresckow proposal is attached.)

While the two private proposals are sufficiently dissimilar as to make exact comparison impossible, the Von Tresckow proposal is unsatisfactory because the Government would assume the entire risk of any increases in construction costs above those estimated by the sponsors, and the organization to accomplish the work does not exist. On the basis of the very general estimates and the limited information on which these estimates are founded, and because of the lack of definite knowledge that there would be a competent, skillful operating organization, it could not be concluded that there would be any less cost to the Government under this proposal than under the Middle South-Southern proposal; in fact, the Von Tresckow proposal could result in substantially greater cost.

On the other hand, the Middle South-Southern proposal is a firm offer with a stated maximum capital cost; the proposed charges are reasonable in comparison with those of TVA when considered in connection with the fact that a private utility must pay State and local taxes and a higher rate of interest than that paid by the Federal Government; and the use of privately generated power will avoid an outlay of approximately $100 million of Federal tax revenues for capital investment over the next several years.

In view of the misunderstandings which have been created by comments in the press and elsewhere in recent weeks, it is important to emphasize the following facts:

1. The major risk will be assumed by the contractors, not by the Government.

2. Power will be made available in the Memphis area—where it is needed—not at Paducah, where it could become a liability.

3. There will be no windfall to the contractors. The additional charges to the Government will benefit local taxing authorities and taxpayers.

4. There is no significance in the location of the proposed plant 200 miles from the AEC installation. This is simply a method of replacing power that TVA itself has used in supplying AEC needs.

5. Interested parties have had ample notice and opportunity to make offers to supply the Government's needs.

6. The rejected proposal was on a cost-plus-fixed-fee basis involving substantial risk and no satisfactory guaranty to the Government.

7. The alternative of construction of a steam plant by TVA has consistently been rejected by the Congress.

Detailed Analysis of the Middle South-Southern Proposal

On April 10, 1954, Middle South Utilities, Inc., and the Southern Co., as sponsors, submitted to the Atomic Energy Commission a firm proposal to furnish 600,000 kilowatts of firm power for the account of AEC. Under this proposal, a revised version of one submitted to AEC on February 25, 1954, they offered, subject to securing financing on the basis covered later:

1. To form a new company sponsored by Middle South Utilities, Inc., and the Southern Co.;

2. To secure the necessary capital requirements estimated at $107,250,000, by subscribing $5,500,000 or approximately 5 percent equity capital which will bear a return of 9 percent and issuing 30-year bonds to institutional investors for the remaining $101,750,000, or approximately 95 percent, based on an interest rate of 3½ percent;

2. To build a 650,000 kilowatt steam electric station near West Memphis, Ark., and to provide transmission facilities from the Sponsors' new facilities to the middle of the Mississippi River between Shelby County, Tenn., and Crittenden County, Ark., including modifications to existing river crossing interconnections between TVA and Arkansas Power & Light Co. and its existing and future points of connection between subsidiaries of the Southern Co., Mississippi Power & Light Co., and TVA; and

4. To enter into a contract with the AEC for a period of 25 years from date of commencement of commercial operation of the first unit with provisions for two 5-year extensions.

The principal provisions of the Middle South-Southern proposal are as follows:

1. An annual base capacity charge, exclusive of taxes, of $8,775,000, subject to variation as follows:

(a) Up or down in case of increase or decrease in actual cost of construction compared with the estimate of $107,250,000 ($165 per kilowatt), with a maximum annual increase of $285,000;

(b) Up or down for changes in cost of fuel from 19 cents per million B. t. u. for the fuel component included in the base capacity charge required to keep the plant in operation under no load conditions; and

(c) Upward only for power factor correction of less than 93 percent.

2. An energy charge of 1.86 mills per kilowatt-hour subject to adjustments up or down in case of increase or decrease in fuel costs from 19 cents per million B. t. u. and for increases or decreases in labor rates based on the 6 months average hourly earnings of production workers in gas and electric utility industries as compiled by the Bureau of Labor Statistics, using $1.97 per hour as a base.

3. Reimbursement by the AEC for all taxes, licenses, and fees, (State, local, or Federal) paid or payable by the new corporation during the term of the contract except that taxes arising out of use of facilities for purposes other than supply of capacity and energy to AEC will not be paid by AEC.

4. Cancellation may be made only by the AEC and is provided for as follows:

(a) For TVA to continue to receive and AEC to pay for power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA, if required, to make other arrangements for meeting the requirements of the Memphis area.

(b) After termination, the company shall have first call on the capacity and will absorb it as rapidly as load growth will permit, but in any event not less than 100,000 kilowatts per year. Costs associated with capacity absorbed by the sponsors will be borne by the sponsors.

(c) Any capacity not absorbed by the sponsors after the 3-year notice period may be assigned to another governmental agency at a price to be approved by FPC.

(d) In the event no capacity is called for during the notice period, the base capacity charge will be reduced by $1,500,000 and proportionately in case of partial reductions. After termination, the base capacity charge less the $1,500,000 will be reduced proportionately to the capacity absorbed by the sponsors.

(e) The total maximum cost of cancellation to the Government, assuming the plant is idle from date of notice of cancellation, is estimated at $40,012,500 plus fair and reasonable expenses payable to third parties.

5. The making of appropriate arrangements by the AEC with the TVA for the receipt by it and delivery to the AEC in kind of power and energy to be supplied as indicated above.

A comparison of annual cost to the Federal Government for power supply delivered to the TVA system in the Memphis area for the account of AEC is attached (attachment 1).

Analysis of the Middle South-Southern proposal from the standpoint of its net cost to the Government, including State and local taxes, as compared with the estimate for constructing a TVA plant near Memphis, shows an annual cost to the Government of $20,569,000 for the private companies' proposal, as compared with $16,884,000 estimated for the TVA plant. The difference of $3,685,000 is due to the following items:

	Amount	Percent of total
State and local taxes	$1,499,000	41
Difference in cost of money	1,059,000	29
Extra fuel transportation costs	309,000	8
Difference in operating costs	211,000	6
Total for Middle South-Southern	3,078,000	84
TVA transmission costs	607,000	16
Total additional costs	3,685,000	100

The difference in cost due to taxes is self-explanatory. The difference in cost of money is between 2½ percent for Government borrowing as compared with about 3¾ percent for private financing, a reasonable rate for the private corporation. These 2 items make up 70 percent of the total difference and reflect the lack by the private group of special advantages available to TVA as an agency of the Federal Government.

The item for extra fuel transportation costs recognizes the possibility of increased costs because the Memphis location is some 55 miles farther from the sources of coal supply than Fulton. However, if, as the private group has been assured by responsible suppliers, coal can be supplied for the same cost as at Fulton, this difference in cost would disappear.

The difference in operating costs is due to TVA's estimate that it can operate its plant at a lower cost than the company.

The extra transmission costs are due to higher estimated costs for transmitting the company power for midriver delivery point to the TVA system as compared with transmission of Fulton plant power into the system.

The comparative cost to AEC is shown on a second analysis comparing Middle South-Southern costs with the cost of power to AEC at Paducah from TVA's Shawnee plant. This analysis is attached (attachment 2).

The annual cost to AEC, excluding taxes, would amount to $18,640,000, compared with $18,036,000 that AEC would pay TVA under the terms of the present arrangement at

Paducah for an equivalent amount of power. The difference of $604,000 is more than accounted for by a calculated higher cost of coal at the new plant because of added distance from the source of supply. It should be noted that the new Fulton plant, proposed by TVA, would be in the same area and would have to meet an added cost of coal possibly as great as mentioned above.

TVA has suggested a number of adjustments in both the above-mentioned analyses which would show higher costs to the Government and to AEC, respectively. However, expert and unbiased opinion is that the comparisons shown are fair and reasonable and that the adjustments suggested by TVA should not be accepted.

There are several significant considerations in connection with this proposal:

1. By utilizing private utilities, the Federal Government will save a capital outlay of at least $100 million over the next 3 years, the cost estimated by TVA for the construction of equivalent capacity at the Fulton site.

2. The sponsors' proposal is a firm offer with a stated maximum capital cost reflected in the demand charge whereby a ceiling is placed on maximum liability on capital cost to the Government. The sponsors bear one-half of any possible increased cost from an estimated cost of $107,250,000 to $117 million and all the cost above $117 million. In addition, if the plant is built for less than $107,250,000, the Government will share 50 percent of the saving.

3. There is no guaranty as to the ultimate capital cost of a TVA plant even though that agency has had a favorable construction record in recent years.

4. The proposal provides a guaranty and a real incentive on the part of the sponsors to assure that capital costs do not exceed $107,250,000. Thus, if the cost should go to $117 million, the return on $5,500,000 of equity capital would be reduced from 9 percent ($495,000) to 3.8 percent ($210,000). If the capital cost should exceed $117 million, return on equity capital would rapidly reduce to zero. Thus the sponsors have a real risk under the proposal offered and a compelling reason to keep capital costs below the estimated cost of $107,250,000.

5. In addition, the plant is not completely amortized at the end of the 25-year contract. There is 24.6 percent of the debt not retired at the end of 25 years so the rate under the proposal does not provide for completely amortizing the plant over the 25-year period.

6. Acceptance of the proposal will help spread the risk in the event of future reduction in the AEC power requirements, which will in 1957 amount to about 30 percent of the TVA power supply.

ATTACHMENT 1

Comparison of annual cost to Federal Government for power supply delivered to TVA system in Memphis area

(For 600,000 kilowatts of demand and 5.2 billion kilowatt-hours a year)

ESTIMATED COST OF INCREASING TVA NET CAPABILITY 650,000 KILOWATTS

(At Fulton or at Fulton and Johnsonville)

Fixed costs: plant and transmission facilities (interest 2½ percent, 30-year amortization, replacements, insurance, and fixed operating costs)	[1] $7,580,000
Variable costs (fuel cost 18.4 cents per million Btu)	[1] 9,304,000
Total	16,884,000
Cost to Government: Per year	16,884,000
Per kilowatt-hour (mills)	3.25

[1] Distribution of total cost to "fixed" and "variable" components made on basis comparable to Dixon-Yates "demand" and "energy" charges.

ATTACHMENT 1—Continued

Comparison of annual cost to Federal Government for power supply delivered to TVA system in Memphis area—Continued

DIXON-YATES PROPOSAL

(New plant of 650,000 kilowatts net capability at West Memphis, Ark.)

Demand charges: interest 3½ percent, 30-year amortization, 9 percent return on equity, replacements, insurance and fixed operating costs)	$8,775,000
Energy charges (fuel cost 19 cents per million Btu)	[2] 9,688,000
Total, Dixon-Yates charges	18,463,000
TVA transmission costs (from point of interconnection at middle of river to TVA Memphis substation)	607,000
Cost to Government (excluding taxes):	
Per year	19,070,000
Per kilowatt-hour (mills)	3.67
Taxes:	
Arkansas—State and local	1,499,000
Federal income	820,000
Subtotal	2,319,000
Cost to Government (including taxes):	
Per year	21,389,000
Per kilowatt-hour (mills)	4.11
Less: Federal income tax	820,000
Net cost to Government:	
Per year	20,569,000
Per kilowatt-hour (mills)	3.96
Additional cost to Government per year	3,685,000

[2] If coal can be delivered by barge to Memphis site of Dixon-Yates, 55 miles downstream from Fulton, at same cost as at Fulton (as assumed by Dixon-Yates), then this cost would be reduced by $309,000.

ATTACHMENT 2

Comparison of annual cost of power supply for the AEC Paducah project

(For 600,000 kilowatts of demand and 5.2 billion kilowatt-hours per year)

TVA—PADUCAH CONTRACT

Demand charges	$8,208,000
Energy charges (fuel cost 15½ cents per million B. t. u.)[1]	9,828,000
Total cost:	
Per year	18,036,000
Per kilowatt-hours (mills)	3.47

DIXON-YATES PROPOSAL

Demand charges	$8,775,000
Energy charges (fuel cost 19 cents per million B. t. u.)[1]	9,688,000
Additional TVA transmission costs	[2] 177,000
Total cost (excluding taxes):	
Per year	18,640,000
Per kilowatt-hours (mills)	3.58

[1] Presently available coal prices were used, with an assumed transportation cost differential of 80 cents a ton (equivalent to 3.5 cents per million B. t. u.) between the Shawnee plant and the Dixon-Yates site. Such transportation differential would result in fuel costs in the amount of $1,820,000.

[2] Represents the difference in TVA's annual transmission costs to deliver power from the Fulton and Johnsonville plants ($430,000) and their corresponding costs from the receiving point for Dixon-Yates power ($607,000).

ATTACHMENT 2—Continued

Comparison of annual cost of power supply for the AEC Paducah project—Continued

Taxes:	
Arkansas—State and local	$1,499,000
Federal income	820,000
Subtotal	2,319,000
Total cost (excluding taxes:	
Per year	20,959,000
Per kilowatt-hours (mills)	4.03
Additional cost per year	2,923,000

DETAILED ANALYSIS OF THE WALTER VON TRESCKOW PROPOSAL

This proposal was submitted by a group composed of the following: Walter von Tresckow, financial and economic consultant, New York City; Harvey Weeks, New York City; John N. Mitchell; Salomon Bros. & Hutzler, investment bankers of New York City; George H. Schwartz, of Schwartz, Nathanson & Cohen, attorneys, New York City; Zelig Nathanson, of Schwartz, Nathanson & Cohen, New York City; and Robert W. Larrow, of MacNamara & Larrow, attorneys, Burlington, Vt.

This group proposed to form a Tennessee corporation which would finance, design, build, and operate a steam plant with a net capability of 620,000 kilowatts on TVA's Fulton site under a no-risk contract with AEC and/or TVA. Such a plant would be fully integrated into and become a part of the TVA system. The financing would be 100 percent debt financing on 35-year mortgage revenue bonds at 3½ percent interest with amortization over a period of 30 years, beginning with the sixth year. The design, construction, and operation of the plant would be on a cost basis with no limit on liability of the Government and no risk on the part of the proposed corporation except for a $20,000,000 bond to protect the Government against increases in construction costs from $200 per kilowatt to $233 per kilowatt for a 3-unit plant of 600,000 kilowatt nameplate rating. The Government would bear the full cost of plant construction up to $200 per kilowatt and any costs in excess of $233 per kilowatt.

The Government would pay for power at the rate of 5 mills per kilowatt hour, and at the end of each year would receive a patronage dividend representing the difference between the 5 mill rate and actual cost of operation, including production, management expense, taxes, interest and amortization of debt. The group indicated willingness to consider downward adjustment in the 5 mill rate as long as any adjusted rate resulted in maintaining sufficient margin adequately to cover debt service charges. The group submitted an estimate of capital costs ranging from $90 million to $100 million.

As compensation, the sponsors would receive a fee of $4 million to be paid during the fourth and fifth years of the contract period, that is, prior to commencement of amortization debt payments. An alternate method of payment was also proposed which would provide for payment of $1 million in the fourth year; the balance of $3 million to be paid at such times during the period of the contract that the Government might suggest, with interest at the rate of 4½ percent per annum on any unpaid balances after the fourth year.

The sponsoring group proposed a contract with AEC for a period of 25 years following the commencement of delivery of power under the contract, and a subsidiary contract with TVA on the same terms as the AEC contract for a period of 32 years from the commencement of delivery of power to AEC, with deliveries under the TVA contract to start at the expiration of deliveries under

the AEC contract (at the end of 25 years), or at an earlier date if AEC cancels prior to the end of its contract term.

They further proposed at the end of 30 years to turn over to TVA for $1 the plant, together with all working capital and other assets of the corporation, if at that time TVA will assume all remaining outstanding bonded indebtedness and current obligations. An alternate proposal would provide that the Government, either through AEC or TVA, could in the event of cancellation take title to the plant and also assume all outstanding liabilities of the corporation.

The sponsoring group indicated that a separate management corporation would be organized to operate the plant. They advised the AEC that this management corporation would be staffed with properly qualified individuals. However, they preferred not to divulge the identity of the individuals being considered for key jobs in the management corporation.

The estimates submitted as part of the proposal are based on a plant having net capability of 620,000 kilowatts delivering 4.73 billion kilowatt-hours per year. The group has given a low and high estimated annual cost on this basis, ranging from $17,226,000 (3.64 mills per kilowatt-hour) to $20,957,000 (4.43 mills per kilowatt-hour).

As indicated previously, the Von Tresckow proposal is a cost-type proposal with all risk being assumed by the Federal Government, and therefore a direct cost comparison with the Dixon-Yates proposal, which includes elements of risk and limitations on Government liability, is not valid. However, an analysis has been made to outline the possible differences in cost between the two proposals. This analysis is attached. (Attachment 1.)

For purposes of comparability, this analysis is based on provision of 600,000 kilowatts of capacity and 5.2 billion kilowatt-hours per year, an average heat rate over the 25-year period of 9,674 btu and a fuel cost of 18.4 cents per million btu which is TVA's estimate of the cost of fuel delivered to the Fulton site. On this basis the comparative costs range from a low estimate of $19,346,000 (3.72 mills) to a high estimate of $22,022,000 (4.24 mills) as compared to $20,569,000 (3.96 mills) for the Middle South-Southern proposal.

The analysis also shows that annual cost could increase as much as from $20,977,000 (4.03 mills) to $23,653,000 (4.55 mills) due to increased construction costs, as compared to $20,854,000 (4.01 mills) for the Middle South-Southern proposal.

On the basis of the very general estimates and the limited information on which these estimates are founded, and the lack of definite knowledge that there would be a competent, skillful operating organization, it could not be concluded that there would be any savings to the Federal Government under this proposal as compared with the Middle South-Southern proposal.

Following are several significant considerations in connection with this proposal:

1. Complete risk for all cost is assumed by the Federal Government and there is no ceiling on maximum liability except as may be covered by the performance bond previously discussed.

2. The estimates used are quite general and as far as can be determined are not based on any preliminary engineering studies or any firm commitments for fuel supply.

3. Realization of the estimates depends entirely on the ability and skill of the groups who will design, build, and operate. There are no other safeguards to insure reasonable limitation on costs.

4. The essential difference between this proposal and a direct appropriation to TVA is that a capital outlay by the United States or approximately $100 million, the cost estimated by TVA for construction of equivalent capacity at the Fulton site, would not be necessary. Under this proposal the capital would be provided by privately issued bonds at 3½ percent, the full interest and amortization on which, together with a $4 million fee, would be ultimately paid by the Government.

ATTACHMENT 1

Comparison of cost to Federal Government for power supply delivered to TVA system in Memphis area

(For 600,000 kilowatts of demand and 5.2 billion kilowatt-hours per year)

	Von Tresckow estimate		Dixon-Yates proposal, firm contract
	Low estimate	High estimate	
Federal capital investment required:			
1. For generating plant	None	None	None
2. For transmission lines	$10,156,000	$10,156,000	$9,840,000
Total	$10,156,000	$10,156,000	$9,840,000
Annual cost to Federal Government:			
1. Estimated base cost before taxes	$19,196,000	$20,922,000	$19,070,000
2. State and local taxes	$150,000	$1,100,000	$1,499,000
3. Federal income tax			$820,000
4. Total, including taxes	$19,346,000	$22,022,000	$21,389,000
Mills per kilowatt-hour	3.72	4.24	4.11
5. Credit for Federal income tax			$820,000
6. Net cost to Federal Government	$19,346,000	$22,022,000	$20,569,000
Mills per kilowatt-hour	3.72	4.24	3.96
7. Possible increased cost (due to capital cost exceeding the estimate)	$20,977,000	$23,653,000	$20,854,000
Mills per kilowatt-hour	4.03	4.55	4.01
8. Sponsors guaranty against further increase	None	None	(1)

[1] Contract guaranty.

EXPLANATION OF REPLACEMENT METHOD FOR MEETING AEC POWER REQUIREMENTS

Under the Dixon-Yates proposal the Atomic Energy Commission would procure power to meet its needs from a privately owned plant which would be located at a considerable distance from the AEC plant for which the power would be purchased.

This is not a new method of supplying AEC loads. It is a practice employed by TVA since 1949 when it began adding capacity to its system to serve AEC. In the past, whenever AEC requested additional power, the TVA has not (except for the initial load at Paducah) added the full capacity requested in the immediate vicinity of the AEC plant requiring the power. Instead, TVA has, with congressional and Bureau of the Budget approval, placed such capacity in its interconnected power system as much as 200 miles away from the AEC load.

TVA therefore has been practicing what is now proposed, namely, supplying the AEC requirements by replacement. The following examples, which include the major requests made by the AEC for additional power since AEC began expansion of facilities in 1949, illustrate this point:

The first major expansion of AEC facilities was authorized for Oak Ridge in 1949. To supply power to these new facilities TVA submitted a request to the Congress to build the first 2 units of the Widows Creek steam-generating plant and unit 4 of the Johnsonville steam plant. This request was justified on the basis that part of the capacity was needed to supply the increased AEC load. The Johnsonville steam plant is located approximately 200 miles away from Oak Ridge, or a greater distance than the proposed Dixon-Yates plant is from Paducah. The Widows Creek plant is approximately 100 miles from Oak Ridge. The logical conclusion is that TVA located the Johnsonville and Widows Creek units so as to best meet the needs of its system and thus replace power supplied to AEC from plants nearer Oak Ridge.

The next AEC expansion was authorized in 1951 at Paducah; the requirements for it were contracted on a 50–50 basis, with TVA and EEI to supply 500,000 kilowatts each. Late in 1952 it again became necessary to expand AEC facilities. TVA was requested to supply an additional 1,030,000 kilowatts for Oak Ridge and 705,000 kilowatts additional for Paducah.

To serve the Oak Ridge load, TVA requested appropriations for the construction of 2 units at Kingston, 2 units at John Sevier, and 2 units at Gallatin. The Kingston plant is located adjacent to Oak Ridge, and, when completed, can be expected to supply all the Oak Ridge additional requirements, even though only 2 of the 9 units in this plant were justified to the Congress for AEC load growth. The John Sevier plant is 70 miles from Oak Ridge, and the Gallatin plant is 150 miles away. Here again TVA obviously planned the additional units at those plants to serve the needs of its system and to replace power which would be supplied Oak Ridge primarily from the Kingston plant.

The TVA Shawnee plant, located adjacent to Paducah, is a similar example. Congress appropriated funds for the first four units of this plant to meet the 1951 AEC expansion and the location of the plant outside the Tennessee River Basin was justified on the basis that it would be located adjacent to the point of consumption at Paducah. Later, two more units were requested, not for AEC, but for normal load growth. Finally, 4 more units were requested in May 1952, on the basis of AEC's last request that TVA supply an additional 705,000 kilowatts at Paducah. In addition to the 4 units at Shawnee, TVA also requested part of 2 units at Gallatin to meet the additional Paducah load. Gallatin is approximately 130 miles from Paducah and the power supply for Paducah will not come from Gallatin, but from Shawnee, only 6 miles away. Here, again, is an instance of replacement in that units 5 and 6 at Shawnee, which were justified to supply the load growth in the western part of the TVA system, will be used in part to supply AEC, and a part of the normal growth of the area will be supplied by new generators at Gallatin justified on the basis of AEC added requirements.

The Dixon-Yates proposal to supply 600,000 kilowatts to the TVA system at Memphis as replacement for TVA power furnished AEC at Paducah, is similar to the several previous arrangements on the TVA system described above. By providing for additional generating capacity at West Memphis to be fed back into the TVA grid in an amount which is necessary to assure delivery of the Commission's requirement at Paducah, this

contract can properly be considered as a contract for electric-utility service to installations of the Commission.

Mr. ANDERSON. When that document is perused it will be noted that the first page of the official report by the Bureau of the Budget begins:

The President's decision to provide for the 1957 expansion of power consumption in the Tennessee Valley area through facilities to be constructed by private enterprise will—

And so forth. There is not a word about the Atomic Energy Commission on that page of the document.

Included in the basis for action by the administration to meet additional needs for generating capacity in the Tennessee Valley area which I have just asked to be placed in the RECORD, there is a comparison of annual cost to the Federal Government for power supply delivered to TVA system in the Memphis area. It shows an additional cost to the Government of $3,685,000 per year. This material is also carried as a document to a letter from the Acting Comptroller General of the United States and therefore will not be included again. However, I ask permission to include in the RECORD at this point a copy of a letter addressed by Frank H. Weitzel, Acting Comptroller General of the United States, to the Honorable CHET HOLIFIELD, a member of the Joint Committee on Atomic Energy as one of the Members from the House of Representatives, and sent to him under date of June 1, 1954.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, June 1, 1954.

Hon. CHET HOLIFIELD,
House of Representatives.

DEAR MR. HOLIFIELD: This is in reference to your letter of May 28, 1954, requesting information concerning the so-called Dixon-Yates proposal to supply electrical energy to Tennessee Valley Authority under a contract with Atomic Energy Commission.

In the President's budget message (p. M84 of the 1955 budget) it was suggested that TVA's power commitments to AEC be reduced by 500,000 to 600,000 kilowatts by arrangements for furnishing these load requirements from other sources. Accordingly, it appears that the proposal to AEC was pursuant to the President's suggestion and a request of the Bureau of the Budget that AEC explore such a possibility.

The reason, apparently, that AEC appears in this proposal as an intermediary is that AEC, under the provisions of section 12 (d) of the Atomic Energy Act of 1946, as amended (42 U. S. C. 1812 (d)), may enter into long-term (25 years) power contracts, and that such a long-term contract would tend to lower the cost of money to the sponsors of the proposal. This reason is cited by the sponsor. Also, it is pointed out that since the power involved would be utilized by the Government for a purpose related in the main to defense, the sponsors assert that they would be able to finance with a larger proportion of long-term debt than would be permitted by regulatory authorities in a normal public-utility situation. See page 12 of the offer.

The General Accounting Office has not been a party to any of the negotiations relating to this proposal. Pursuant to an informal request by a member of the staff of the Joint Committee on Atomic Energy a comparison of estimated costs under the proposal with costs under existing AEC power contracts, including that with TVA, was delivered to the committee staff on May 12, 1954. The information for this cost comparison was obtained by GAO auditors from officials of AEC. A copy of the comparison is enclosed.

Except for a copy of the proposal itself, dated April 10, 1954, and a copy of the letter of the Chairman, AEC, to the Director, Bureau of the Budget, dated April 15, 1954, referring the proposal for consideration by higher authority, this cost information is all the data available in this Office. I understand that the Federal Power Commission has been requested to examine the proposal, but I have no knowledge of its findings.

The General Accounting Office is in agreement with the position expressed by AEC (pp. 7 and 8 of the AEC letter to the Bureau of the Budget) that any costs (subsidies) involved in the Dixon-Yates proposal over and above the cost of power to AEC under its present contract with TVA should, in accordance with all good accounting and budgetary standards and congressional control, be borne by the latter. Indeed, absent such an arrangement, it would appear necessary for the President to invoke the extraordinary contracting authority of section 12 (b) of the Atomic Energy Act (42 U. S. C. 1812 (b)), or the AEC to resort to the First War Powers Act for authority to enter into a contract such as proposed by Dixon-Yates. It is suggested, also, that if an arrangement similar to the Dixon-Yates proposal is to be consummated, consideration be given to the feasibility of letting the contract to the lowest bidder after advertised bids.

If I can be of further service in this matter, please call on me.

Sincerely yours,
FRANK H. WEITZEL,
Acting Comptroller General of the United States.

Mr. ANDERSON. Mr. Weitzel included, as I have said, attachment No. 1, which the Bureau of the Budget has included in its latest analysis, but he also included a breakdown of the additional cost of Dixon-Yates power and the adjustments which TVA would make. I ask unanimous consent to include those figures in the RECORD at this point.

There being no objection, the figures were ordered to be printed in the RECORD, as follows:

The additional cost of Dixon-Yates power is due to the following:	
State and local taxes	$1,499,000
Extra cost of money (2½ percent versus 3½ percent interest) (return on equity 9 percent)	1,059,000
Extra fuel costs [1]	309,000
Extra operating costs	211,000
Total for Dixon-Yates	3,078,000
Extra TVA transmission costs	607,000
Total	3,685,000
Increasing TVA net capability 650,000 kilowatts: Cost to Government, per year	16,884,000
Adjustments TVA would make:	
Decreases:	
1. Use of 35-year amortization instead of 50 years	521,000
2. Use of plant efficiency of 9,350 instead of 9,917 B. t. u.'s per kilowatt-hour	548,000
3. Credit for Federal income tax from bondholder	$391,000
Total	1,470,000
Cost of Government with TVA adjustments	15,414,000
Accepting Dixon-Yates proposal (new plant of 650,000 kilowatts net capability): Net cost to Government, per year (excluding Federal income taxes)	20,569,000
Additional cost to Government	3,685,000
Increases:	
4. Cost of standby power with 2 units out	200,000
5. Increased TVA off-peak transmission losses	186,000
6. Amortization of special costs at Shawnee	200,000
7. Credit for Federal income tax from bondholders	(174,000)
Total	412,000
Cost to Government with TVA adjustments	20,981,000
Additional cost to Government based on TVA adjustments	5,567,000

[1] If coal can be delivered by barge to Memphis site of Dixon-Yates, 55 miles downstream from Fulton, at same cost as at Fulton (as assumed by Dixon-Yates), then this cost would be reduced by $309,000.

Mr. ANDERSON. The memorandum of the General Accounting Office contained also some comments giving reasons for not accepting the TVA adjustments and I think it no more than fair that these comments should be reproduced in the RECORD at this point and I, therefore, ask unanimous consent that they may be so printed.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

COMMENTS

REASONS FOR NOT ACCEPTING TVA ADJUSTMENTS

Adjustment 1: Costs under the Dixon-Yates proposal are based on 30-year amortization of its bonds and a direct comparison with Fulton-Johnsonville combination can be made only on same amortization.

Adjustment 2: The Dixon-Yates proposal was predicated on an estimated plant cost, using 4 units, with estimated plant efficiency over the 25-year period of 9,917 B. t. u.'s per kilowatt-hour. To obtain a realistic comparison it seemed equitable and proper to assume the same number and size of units and the same thermal efficiency.

Adjustment 3: The adjustment for Federal income taxes from bondholders was not included because the amount cannot be readily determined and in many respects is an intangible figure.

Adjustment 4: The Dixon-Yates proposal is predicated on a firm delivery of 600,000 kilowatts with 1 generating unit (of a 4-unit plant) out of service, the necessary reserve capacity to be supplied from the systems of the sponsoring companies. Normal practice on many utility systems is to determine system requirements on the basis of an outage of the largest generating unit.

Adjustment 5: With increasing loads in the Memphis area, these losses would be diminished.

Adjustment 6: These costs are based on the assumption of a continuation of the present Paducah contract after the present term with an adjustment to the demand charges for special costs incurred during construction of the Shawnee plant.

Adjustment 7: See explanation for adjustment 3.

Mr. ANDERSON. One further comment would seem to be desirable. The cost used by the General Accounting Office in this analysis is based upon coal at 19 cents per million British thermal units delivered at Fulton and East Memphis.

Before we go any further with this discussion, it might be well to pause here and point out an additional factor. Dixon-Yates, so far as we are advised, does not have any contract for the purchase of coal at East Memphis. Mr. Dixon and Mr. Yates are merely two individuals who have submitted a proposal, and, so far as I have been able to learn, have no contracts for the fuel to be supplied at West Memphis.

On the other hand, TVA is a going business, and it does have firm contracts which would be applicable to the delivery of coal to the Fulton plant. They know what their coal costs them now and they can make a fairly accurate estimate as to what their coal will cost them by 1957.

In the tabulation used by the Acting Comptroller General of the United States and by the Bureau of the Budget coal is figured at the cost of 19 cents per million British thermal units for both Dixon-Yates and TVA. This puts them both on equal terms when in fact they are not as of today. Bear in mind that TVA, as a large buyer of coal, has a contract under which the coal is currently costing them 18.4 cents rather than 19 cents and by the terms of their present contract the coal cost per million British thermal unit at Fulton by 1957 should be between 15 and 16 cents.

Many Members of the Senate have asked me how the Atomic Energy Commission ever got in the business of guaranteeing the investments of private industry for the generation of power to be supplied to atomic energy plants. It seems to me that it would be worthwhile to quote a few words at least from the report, No. 676, in the House of Representatives accompanying H. R. 4905.

In the background information carried on page 2 of the report there are these words:

> In order to provide the Commission plants with this power, the AEC has negotiated with 3 electric utilities who are willing to invest over $1 billion in new plants, major expansions to existing plants, and in new transmission lines. These facilities will have a generating capacity of over 5.5 million kilowatts. This is enough power to supply the needs of the combined States of Ohio, Tennessee, and Kentucky, all of the needs of the New England States, 35 percent of the needs of Great Britain, or 50 percent of the needs of Canada. This capacity will be 6 percent of the entire capacity of the United States. The power will be supplied as follows:
>
> Oak Ridge, 1,730,000 kilowatts from Tennessee Valley Authority.
>
> Paducah, 1,205,000 kilowatts from Tennessee Valley Authority; 735,000 kilowatts from Electric Energy, Inc.
>
> Portsmouth, 1,800,000 kilowatts from Ohio Valley Electric Co.
>
> The delivered price of the power to the Commission wil be about 4 mills per kilowatt-hour, an extremely low price for electric power generated from coal.
>
> This power is to be used for the operation of the gaseous diffusion plants at the three sites specified.

I skip the remainder of the paragraph from which I have been quoting and begin quoting those portions of the report which deal with cancellation and what would happen in the event of cancellation and why it is necessary to protect private contractors against the hazards of cancellations:

> The estimated normal growth of power use in the three geographic areas is about 6 percent per year, and these suppliers probably could not immediately absorb the extra capacity. Therefore, some adequate cancellation payment provision is needed in the event that the Government should cease to purchase the power from these facilities.
>
> The AEC needs authority to commit the Government to cancellation charges. Under the proposed contracts, these charges can amount to a maximum of $340 million. Under the Supplemental Appropriation Act of 1953, cancellation payments for the new facilities are specifically authorized but limited to $57 million. The utilities cannot enter into the power contracts with this limit on cancellation charges, since they cannot arrange financing with such a small cancellation charge guaranteed. The maximum charge of $340 million is figured on a most unlikely set of circumstances, namely, having each new gaseous diffusion plant shut down immediately upon the completion of the new generating facilities. The more likely cancellation charges are considerably less than the above.

The language which I have included from the report shows what the Joint Committee on Atomic Energy was seeking to recommend and why it was doing it. These plants were to cost more than $1 billion. The Atomic Energy Commission did not have the authority to commit the Government to the cancellation charges. Without the specific language of the amendment under discussion the Atomic Energy Commission would have been in violation of the so-called antideficiency statute.

I do not desire to take a long time relating history but at the time this matter was before the Joint Committee, the Atomic Energy Commission was really under the gun both timewise and moneywise. The supplemental appropriation act authorized cancellation payments of only $57 million and no private entrepreneur could be found who wanted to risk his venture capital in the construction of $1 billion worth of plants and face the possibility that a change in the program or the development of a new type of nuclear fuel would make outmoded the gaseous-diffusion processes and hence render unnecessary the need for such an enormous installation.

On the other hand, the Congress was insistent that the Atomic Energy Commission and particularly the thermonuclear development should move ahead and the Atomic Energy Commission was under Presidential mandate to build a hydrogen bomb and to be able to keep it in production once it was developed. Therefore, the Atomic Energy Commission, the Joint Committee on Atomic Energy and the Congress rose to their responsibilities and passed legislation which made it possible for private enterprise to invest its money and its talent in assisting in this gigantic defense program.

The junior Senator from New Mexico has no intention of leaving this point without reading into the RECORD item after item to show that the members of the committee were hesitant to act upon legislation which did not seem to provide limits which might be exercised as to scope and money. Let us look at some of these declarations.

From the hearings on H. R. 4905, at page 12, I ask unanimous consent to include a question asked by the Senator from Colorado [Mr. MILLIKIN] and the answer by Mr. Boyer, the General Manager of the Atomic Energy Commission, pointing out: "The only thing they do not want us to do is to go into the retail sale of power."

There being no objection, the excerpt from the hearings was ordered to be printed in the RECORD, as follows:

> Senator MILLIKIN. Let me put a case to you that we touched on a while ago. Supposing that the next day after cancellation we have another installation someplace in the area within feasible distance of this power source, and the power is at once diverted to that other installation. Obviously, they have not lost any power market.
>
> Mr. BOYER. You are speaking now of a Government installation?
>
> Senator MILLIKIN. That may not be a good analogy, but let's assume it.
>
> Mr. BOYER. We have the right to sell to other Government installations. I believe that is correct. I would like to check with Mr. Cook.
>
> Mr. COOK. Yes.
>
> Mr. BOYER. We have the right to sell to other Government installations. The only thing they do not want us to do is to go into the retail sale of the power.

Mr. ANDERSON. Mr. President, Representative HINSHAW realized that the cancellation charges might be too great even for an emergency situation, and suggested that we might buy out their $20 million equity, assume the Government-guaranteed bonds, and own the property. He found that private enterprise would not stand for that. Here, from pages 12 and 13 of the hearings, are the answers. I ask unanimous consent that they be printed in the RECORD at this point.

There being no objection, the excerpt from the hearings was ordered to be printed in the RECORD, as follows:

> Representative HINSHAW. How would it be if an additional safeguard should be placed in the language to give you the right to pay that $20 million equity capital and assume the bonds and own the property?
>
> Mr. BOYER. They will not agree to that.
>
> Representative HINSHAW. Are you sure they won't agree to it?
>
> Mr. BOYER. You mean to take over the unamortized portion of the plant and paying the outstanding costs?
>
> Representative HINSHAW. No. Take over their equity capital and assume their bonds and, of course, acquire the property.
>
> Mr. BOYER. You are talking about recapture, about paying the unamortized cost of the investment? We have asked to do that and have not been given that right.
>
> Representative HINSHAW. I am not talking about doing that. I am talking in the event of cancellation about taking over their equity capital, saving them from any losses, reimbursing them 100 percent on the equity capital, and then, of course, that would also mean an assumption by the Federal Government of bonds, would it not?
>
> Mr. BOYER. That is right. They would not agree to that.

The answer is this, Mr. HINSHAW, and I think it is logical: Here is this big potential

powerplant down in their system, and they would like to have the control of that.

Representative HINSHAW. Of course, but then you have a total estimated AEC cancellation cost in here of $139,630,000.

Mr. BOYER. That is right.

Representative HINSHAW. And it is nearly all the cost of the plant.

Mr. BOYER. No, the cost of the plant——

Representative HINSHAW. Half of it anyway.

Mr. BOYER. The investment here is roughly about $400 million.

Mr. ANDERSON. Mr. President, we have been hearing a great deal about windfall profits on housing deals. The senior Senator from Colorado [Mr. JOHNSON] sensed that there might be some windfall profits in this private enterprise deal, and from page 16 of the hearings, I quote his question, and Mr. Boyer's answer:

Senator JOHNSON. Suppose Du Pont goes in there the day after you cancel the contract and they sell all their power to Du Pont. They have received the money from you that they were supposed to have lost, which they have not lost, and they are getting from Du Pont the cost of the operation. So they have a windfall, have they not?

Mr. BOYER. Right.

Mr. President, in other words, they could sell every kilowatt of power at exactly the same price at which the Government had intended to buy it, and they would still get $57 million from the Government, and still sell the power and still get all that money. If that is not a windfall of substantial size, I do not know what it is. In the case of the two plants already built it could run to $400 million.

I say that before authority is given for the plan of the Dixon-Yates group, if such authority is to be given, we ought to find out what they are going to do in this matter. If they are going to sell this power, in case there is a cancellation by the Government, at the same rate the Government expected to pay for it, they are not financially damaged because of the Government cancellation, and they should not be able to receive the $40 million of their $100 million. It is not their $100 million, because they put up only $5 million. The rest of the money would be obtained because of the Government guarantee. They could sell every kilowatt of the energy at prices at which they expected to sell it to the Government, and get all the money from the new purchaser, and $40 million besides, on their $5 million investment, on which they received a return of 9 percent, with the taxes paid to the Government. If that would not be a windfall, I do not know what it would be.

Let us consider this statement by the General Manager of the Atomic Energy Commission at the time this legislation was being considered, which appears at page 22 of the hearing:

Mr. BOYER. If you notice the language we are proposing: "The Atomic Energy Commission is authorized in connection with the construction and operation of the Oak Ridge, Paducah, and Portsmouth installations of the Commission, without regard to section 3679 of the Revised Statutes."

In other words, it is limited to the power requirements for those three installations. It is not a wide-open authority.

Then, Mr. President, let us notice how careful Representative HINSHAW was, as reported at pages 36 and 37 of the hearings. I ask unanimous consent that the excerpt from the hearings be printed in the RECORD at this point as a part of my remarks.

There being no objection, the excerpt from the hearings was ordered to be printed in the RECORD, as follows:

Representative HINSHAW. Mr. Chairman, this appears to be an authorization to the Atomic Energy Commission existing in law from now on to enter into new contracts and revise contracts, and so forth, in connection with supplying of power for any activity the Commission undertakes.

I do not think that the committee is ready to go that far, that they have been considering the power situation in the vicinity of Portsmouth, and also in the Tennessee Valley, but I doubt that the committee is ready to give a carte blanche over the entire system as being presently operated by the Atomic Energy Commission, and to be unlimited as to the dates, the times in which such contracts can be entered into, and their termination, the cancellation costs or anything else.

That is all I have to say. I personally would object to such legislation on that ground.

Chairman COLE. I take it that your point is that you object to the omission of specific reference which was contained in the bill as originally introduced to the granting of this authority in connection with Oak Ridge, Paducah, and Portsmouth.

Representative HINSHAW. Certainly. And also a time limit.

Chairman COLE. Let us get through with one thing at a time. Would your objection be met if those specific installations were again enumerated?

Representative HINSHAW. I think the legislation ought to contain a limitation that it applies to these particular contracts that are to be issued and which have been brought before the committee and the committee has had a chance to look at and criticize. That is not saying anything about any future contracts that may be entered into.

The committee has, or will, I presume, by this action given approval to these contracts that have been entered into. As to future contracts and termination costs, I think we would be under very great criticism on the part of the Congress if we should enter into them in blank.

Mr. ANDERSON. Representative VAN ZANDT, who, with Representative HINSHAW, was one of the early members of the Joint Committee on Atomic Energy, was not satisfied. He wanted to tie down the promise that the law would be used for providing power for Oak Ridge, Portsmouth, and Paducah only. Therefore he tried to obtain answers to his questions and to develop a legislative history. I ask unanimous consent that his questions and the answers be included in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Representative VAN ZANDT. Mr. Chairman, I wonder if a member of the staff could tell us in a few words what section 3679 of the revised statutes provides?

Chairman COLE. Mr. Boyer can answer that.

Mr. BOYER. That is the antideficiency act, which says you shall not enter into an obligation without the funds to pay for the obligations you assume.

Representative VAN ZANDT. This bill would set those limitations aside?

Mr. BOYER. The idea is to have language here which would satisfy the contractor and the insurance companies, and not have to tie up the large sums that might be required to cover the cancellation.

Representative VAN ZANDT. Is there anything in the basic Atomic Energy Act that provides that you bring these contracts here to Capitol Hill for review by this committee?

Mr. BOYER. Well, we have always been faced with the problem of getting the money for these contracts that we execute.

Representative VAN ZANDT. That would be reviewed by the Appropriations Committee?

Mr. BOYER. That is right.

Representative VAN ZANDT. This committee would also make a review of it in the preliminary study we make of the appropriation requests before they go to the Appropriations Committee?

Mr. BOYER. Yes, sir. The record will show that we pointed out the last time we were up here that we are here at the suggestion of Senator SALTONSTALL and Congressman PHILLIPS, and we introduced this language before Mr. PHILLIPS' committee, and both he and Mr. SALTONSTALL felt that it should be referred to this committee since it was essentially legislation and not appropriation of funds.

Representative VAN ZANDT. The reason I asked the question was in connection with Mr. HINSHAW's statement on the bill, that we have actually reviewed every contract that you make.

Mr. BOYER. No; you do not review every contract we make, because that would keep the committee rather busy.

Representative VAN ZANDT. I mean contracts of this size, because if my memory serves me correctly, you did come up here and discuss these contracts with us.

Mr. BOYER. We came up and discussed with you the need for the power and this 25-year contract to avoid the investment of large sums of Federal money for powerplants.

Representative VAN ZANDT. Would not you do that in the future?

Mr. BOYER. I think this type of contract we have to come up and get the funds appropriated or language.

Representative VAN ZANDT. When Mr. HINSHAW made his point, I thought probably his point would be taken care of by the fact that we do have a chance to review these contracts because you are bringing them to us and you ask our opinion of them.

Senator PASTORE. Does this review take place before the contract is consummated or after it is consummated?

Mr. BOYER. What Mr. VAN ZANDT is saying is that, in effect, you are reviewing it now, because the last time we appeared before the committee, we went into considerable detail as to the nature of the cancellation portions of the contract.

Representative HINSHAW. If this bill is passed, it is the last time we will review it, and there will never be any other review or requirement for review in 100 years.

Chairman COLE. Not necessarily.

Representative HINSHAW. There is no limitation on that act.

Chairman COLE. You are forgetting the provision of the law which says the Commission shall keep the committee informed on everything it does.

Representative VAN ZANDT. Why not write it in here, "subject to review of the committee"? We write it in in other bills, in the Armed Forces Committee.

Chairman COLE. I am sure the Commission does not have any objection to reinserting specific reference to Oak Ridge, Paducah, and Portsmouth.

Mr. BOYER. None whatever.

Mr. ANDERSON. I also ask unanimous consent that a further excerpt from page 41 of the hearings, be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Representative VAN ZANDT. Mr. Chairman, could we insert language in this bill that would make this particular type of a contract subject to review by this committee?

Dr. SMYTH. Mr. VAN ZANDT, you have written in Oak Ridge, Paducah, and Portsmouth, and any further extension of those plants would certainly presumably come to this committee for general discussion and approval. It does not appear to me to be necessary or desirable to try to get the specific contracts into the bill.

Representative VAN ZANDT. In the future we may have other installations, or another Paducah.

Dr. SMYTH. Yes, but as I understand it, the way the bill is now modified, Oak Ridge, Paducah, and Portsmouth are to be inserted; is that not right?

Chairman COLE. Yes.

Representative VAN ZANDT. Then the bill as written will restrict it to Paducah, Oak Ridge, and Portsmouth.

Mr. ANDERSON. Mr. President, I have included this material only for the purpose of making it available in somewhat easier form for Members of the Senate when they start the discussion of this project in the debate tomorrow.

I think it is extremely important that a great deal of care be utilized in the consideration of the bill. Of course, there are many other matters which will require careful consideration, but surely we must be careful not to set up any cancellation rights which will permit people who have invested $5 million to recover $40 million in damages from the Government, when they have not been financially damaged. I believe it is an extremely important point to which Congress, I am sure, will wish to devote a great deal of attention.

RECESS

Mr. WATKINS. Mr. President, in accordance with the order previously entered, I move that the Senate stand in recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 8 o'clock and 38 minutes p. m.) the Senate took a recess, the recess being, under the order previously entered, until tomorrow, Wednesday, July 14, 1954, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate July 13 (legislative day of July 2), 1954:

IN THE AIR FORCE

The following named officers for temporary appointment in the United States Air Force under the provisions of section 515, Officer Personnel Act of 1947:

To be major generals

Brig. Gen. George Ferrow Smith, 380A, Regular Air Force.

Brig. Gen. John Walker Sessums, Jr., 489A, Regular Air Force.

Brig. Gen. Wycliffe Eugene Steele, 491A (colonel, Regular Air Force), United States Air Force.

Brig. Gen. Floyd Bernard Wood, 500A (colonel, Regular Air Force), United States Air Force.

Brig. Gen. Thetus Cayce Odom, 554A (colonel, Regular Air Force), United States Air Force.

Brig. Gen. Millard Lewis, 561A (colonel, Regular Air Force), United States Air Force.

Brig. Gen. Joe William Kelly, 612A (colonel, Regular Air Force), United States Air Force.

To be brigadier generals

Col. James Keller DeArmond, 257A, Regular Air Force.

Col. John Gordon Fowler, 477A, Regular Air Force.

Col. Norman Delbert Sillin, 501A, Regular Air Force.

Col. James Presnall Newberry, 530A Regular Air Force.

Col. Donald Linwood Hardy, 618A, Regular Air Force.

Col. Laurence Browning Kelley, 651A, Regular Air Force.

Col. Harley Sanford Jones, 828A, Regular Air Force.

Col. Lester William Light, 887A, Regular Air Force.

Col. Jermain Ferdinand Rodenhauser, 933A, Regular Air Force.

Col. Jack Roberts, 1134A, Regular Air Force.

Col. Noel Francis Parrish, 1143A, Regular Air Force.

Col. Charles Milton McCorkle, 1224A, Regular Air Force.

Col. Bertram Cowgill Harrison, 1425A, Regular Air Force.

Col. Edwin Shepard Chickering, 1474A, Regular Air Force.

Col. Harold Ernest Watson, 1520A, Regular Air Force.

Col. Kenneth Hodder Gibson, 1775A, Regular Air Force.

Col. Keith Karl Compton, 1849A, Regular Air Force.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 13 (legislative day of July 2), 1954:

FOREIGN OPERATIONS ADMINISTRATION

To be members of the Public Advisory Board, Foreign Operations Administration

Clement D. Johnston, of Virginia.
Mrs. Helen Chapman, of Illinois.
Harold C. McClellan, of California.
Mrs. Percy Maxim Lee, of Connecticut.

ATOMIC ENERGY COMMISSION

Herbert Bernard Loper, of Nebraska, to be Chairman, Military Liaison Committee to the Atomic Energy Commission.

COLLECTOR OF CUSTOMS

Merrill D. White, of Florida, to be collector of customs for customs collection district No. 18, with headquarters at Tampa, Fla.

HOUSE OF REPRESENTATIVES

TUESDAY, JULY 13, 1954

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Eternal and ever-blessed God, may our life in the hours of this new day be radiant with the realization of Thy presence and power which we so greatly need.

Grant that we may have the leading of Thy wise and gracious spirit in all our plans and labors to solve the difficult and perplexing problems of human relationships.

May we never go forth in our own wisdom and strength, but make us eager to seek divine counsel and guidance.

Inspire us with a confidence and courage, which knows no defeat, as we daily dedicate ourselves to the task of enthroning the spirit of peace and good will among the nations of the earth.

Hear us in Christ's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Ast, one of its clerks, announced that the Senate has passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 7664. An act to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 190. An act to establish a basic administrative workweek and pay periods of two administrative workweeks for postmasters, officers, and employees of the postal field service, and for other purposes;

S. 3028. An act to require the Postmaster General to reimburse postmasters of discontinued post offices for equipment owned by the postmaster; and

S. 3655. An act to provide that the Metropolitan Police force shall keep arrest books which are open to public inspection.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 6725) entitled "An act to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SALTONSTALL, Mr. CASE, Mr. DUFF, Mr. BYRD, and Mr. STENNIS to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 9242) entitled "An act to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SALTONSTALL, Mr. CASE, Mr. DUFF, Mr. BYRD, and Mr. STENNIS to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3378) entitled "An act to revise the Organic Act of the Virgin Islands of the United States."

SPECIAL ORDERS GRANTED

Mr. ABERNETHY asked and was given permission to address the House tomorrow for 45 minutes, at the conclusion of the legislative program and any special orders heretofore entered.

Mr. BYRD asked and was given permission to address the House tomorrow for 20 minutes, at the conclusion of the legislative program and any special orders heretofore entered.

TAKING THE GOVERNMENT OUT OF BUSINESS

Mr. OSMERS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. OSMERS. Mr. Speaker, the House Committee on Government Operations will hold 4 days of hearings, beginning on Wednesday of this week, on bills which have been introduced by the chairman [Mr. HOFFMAN of Michigan] and by me for the express purposes of establishing a policy against Government being in competitive business and of providing a method under which the Federal Government's encroachment into the fields of private enterprise may be terminated, or at least held within reasonable and sensible bounds and proportions.

Mr. HOFFMAN's bills are H. R. 9834 and 9835. My bill is H. R. 8832. The aim and intent of all three is the same; the mechanics of operation differ in slight degrees.

Mr. Speaker, the preservation of our free economy is dependent, to a very considerable degree, upon the elimination of the tax-free competition that has been established over the years by the Federal bureaucracy, and that continues to grow and expand because bureaucracy itself never sleeps and never dies.

The Subcommittee on Intergovernmental Relations of the House Committee on Government Operations has spent years in studying this situation. We have uncovered astonishing and abominable invasions of business by Government financed and operated enterprises—and yet we have only scratched the surface and we know it. You might think, Mr. Speaker, that the mammoth Federal budget would disclose these business investments and expenditures. It does nothing of the sort—and I doubt if we in Congress will ever know the extent of the Federal commercial and financial operations unless a bill is passed requiring the various agencies to report fully each year.

Nor shall we be able, in my opinion, Mr. Speaker, to put a halt to the constant expansion of Government in business until a reviewing board, such as I have suggested, is established with powers to watch and to veto.

The chief reason for taking government out of business is to protect and encourage the taxpaying businessmen—big and little—who make the Federal Government possible through tax payments. Second, if we sell all of Government's businesses, as we have sold the Mississippi Barge Lines and the Muscatine alcohol plant, we shall get a great sum of money which can be used to reduce the national debt and cut, by half a billion dollars a year or more, the interest payments that the taxpayers now make on the debt. Third, we shall collect over a billion dollars a year in additional income taxes from the companies that take over these Government-owned and Government-supported affairs. And fourth, we shall save hundreds of millions of dollars in annual appropriations to these nontaxpaying, tax-eating activities.

Mr. Speaker, I commend your attention and that of the Members, press and public to the testimony that will be given by representatives of labor and business at the Government Operations Committee's hearings beginning on Wednesday. You will hear the great American free enterprise system speaking, the system ot which this administration has pledged its support.

DUTIES AND FUNCTIONS OF SMALL BUSINESS ADMINISTRATION

Mr. HILL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, when the House on yesterday, with its deep concern for the interests of small business, passed and sent to the Senate H. R. 9144 to amend section 24 of the Federal Reserve Act, as amended, it was quite apparent to me that many members of this body were not fully informed of the functions and activities of the Small Business Administration. Statements were made, no doubt in good faith, and I do not question any one's sincerity, which were at variance with the facts and, in the interest of keeping the record straight, I have overnight obtained official figures and facts which I would now like to present to the House very briefly.

While there is great interest in the financial assistance function of the Small Business Administration, it should be remembered that this agency, as required by law, has other duties which it is performing and, I believe, performing very well within the limitations of the appropriations. In addition to financial assistance, the Small Business Administration maintains a nationwide service in obtaining for small business a fair share of Government orders for materials and supplies for the Department of Defense and the so-called civilian agencies of the Government. The Small Business Administration, pursuant to the mandate carried in the law, provides a nationwide service in management and technical aid to business firms. Both of these functions—Government procurement and management assistance—are, as every Member of this body knows, very important toward keeping our national economy on an even keel and distributing prosperity. Of course it is an accepted function of the Federal Government to disseminate knowledge and that is what the Small Business Administration is doing.

Now, regarding the financial-assistance function of the Small Business Administration: I have here the latest figures, and may I say, parenthetically, that in a discussion of this kind it is not uncommon for important figures to be overlooked and sometimes aggregate figures are lost in the great array of figures. The figures I am going to give this body came to me this morning directly from Mr. Wendell B. Barnes, the Administrator of the Small Business Administration.

The figures he has furnished me show that the Small Business Administration as of July 8, 1954, had taken action on more than 1,800 loan applications.

The figures show further that the Small Business Administration as of July 8 had approved 515 business loans for $30,145,000.

Of the loans approved, 340 loans, totaling $20,923,000, are bank-participation loans, and 175 loans, totaling $9,222,000, are direct loans.

In addition, the Small Business Administration had taken action on 195 disaster-loan applications, and as of June 30 the agency had made disbursements on 93 disaster loans, totaling $386,011.

The Small Business Administration has been active in making disbursements on the small-business loans it has approved. The figures through July 8 show that disbursement has been made on 126 loans for a total of $6,506,415.

Of these, 45 were direct loans, for a total of $2,751,803; and 68 were bank-participation loans for a total of $3,754,-612.

So much for the figures themselves. Now, I should like to say just a few words about the meaning of them.

In the first place it should be said that the Small Business Administration did not begin receiving loan applications until last October, and it was not until the first of this year that its loan program was in full operation.

There has been some criticism of the Small Business Administration because of the time that has elapsed between the approval of a loan application and the final closing and disbursing of the funds.

With regard to this criticism, I should like to say that anyone familiar with banking and business operations knows that no prudent businessman is going to draw down the money he has made arrangements to borrow until he actually needs it.

It would be wasteful for him to incur interest charges on borrowed funds until he is ready to use those funds. Therefore it is obvious that there is not necessarily any significance in the time that may elapse between tentative approval and actual closing.

You will note from the figures on loan approvals that I quoted a moment ago, that two-thirds of the loans approved by the Small Business Administration are bank-participation loans.

With regard to these loans, the banks themselves, and not the Small Business Administration, close the loans and make the disbursement. In many instances, the banks advance the needed funds on a short-term basis after tentative approval and before closing of the SBA loan, and neither the bank or its customer is then in any particular hurry for the loan closing which is under the bank's control.

So you see that the time it takes to close a loan after it has been approved by the Small Business Administration is not always under the control of the agency.

The truly significant thing with regard to the Small Business Administration's

loan program, to my way of thinking, is this:

The Agency is stepping up its action on its lending program and has made a creditable record in acting on more than 1,800 applications.

Of course, not all loan applications can be approved. The law itself requires that only sound loans shall be made, in cases where there is good chance of repayment.

It takes just about as much work for the Small Business Administration and its small but efficient staff to process an application that is declined, as it does one that is approved.

Finally, I want to make note of one more fact that to me shows that the Small Business Administration is doing a good job.

Recently the Small Business Administration delegated authority to its Regional Directors to make loans up to $50,000 on their own authority in cases where there is at least 25 percent bank participation and where at least half of this bank participation represents new money.

Within 24 hours after this delegation of authority was approved by the Small Business Administrator, the Agency's Philadelphia Regional Office had approved a loan for $50,000 to a small firm, in which a bank had agreed to take 50 percent participation.

Mr. Speaker, in conclusion, from the brief summary of activities of the Small Business Administration which I have given, I believe it will be agreed by fair-minded persons that the Small Business Administration, with the funds and personnel provided by the Congress, has done and is doing an excellent job.

SPECIAL ORDER GRANTED

Mr. EBERHARTER asked and was given permission to address the House for 15 minutes today, following the legislative program of the day and the conclusion of special orders heretofore granted.

HEALTH SERVICE PREPAYMENT PLAN REINSURANCE ACT

Mr. ALLEN of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 623 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 8356) to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Interstate and Foreign Commerce now in the bill, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instruction.

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I rise to urge the adoption of House Resolution 623, which will make in order the consideration of the bill (H. R. 8356) to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services.

House Resolution 623 provides for an open rule, waiving points of order, and allows for the consideration of the committee substitute amendment as an original bill. Two hours of general debate on the bill itself are provided.

Mr. Speaker, H. R. 8356 would provide for the establishment of a health reinsurance program in the Department of Health, Education, and Welfare. The bill would also provide for the creation of a reinsurance fund and would authorize a repayable appropriation of not to exceed $25 million to provide advances of working capital for the fund. This $25 million would be available for the first 5 years of the program.

According to the report, Mr. Speaker, the fund would be built up over a period of time from reinsurance premiums and from earnings of the fund. Reinsurance would be available, on a strictly voluntary basis and upon payment of a reinsurance premium, to private insurance companies or voluntary nonprofit health associations.

This whole proposal is designed to encourage private insurance organizations to experiment in providing broader voluntary health insurance protection to more people. The bill would also provide for technical advisory and informational services to health service prepayment plans.

Mr. Speaker, this bill has had its principal provisions approved by the Department of Health, Education, and Welfare, the Department of Agriculture, the Department of Labor, the Federal Trade Commission, and by the President himself. Outside of the field of Government, it has also been approved by such well-known insurance companies as Mutual Life Insurance Co. and the Connecticut General Life Insurance Co., of Hartford.

The Bureau of the Budget has stated that the bill, if passed, would be in line with the program of the President.

Mr. Speaker, H. R. 8356 represents a new idea in the field of improving the health of the American people. It is a bill that should be adequately discussed by the Congress in order that we all may have a clear idea of just what is entailed in the full development of a program such as is contained in this bill. I hope that the rule will be adopted so that we may fully discuss this bill.

Mr. Speaker, I yield 30 minutes to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Speaker, I yield such time as he may require to the gentleman from Virginia [Mr. SMITH].

Mr. SMITH of Virginia. Mr. Speaker, this seems to be quite a hurry-up kind of measure here this morning. It proposes to launch the Federal Government into the insurance business. I had expected to make some remarks about it because I think it is premature to consider it at this time. I think the House ought to give it very careful consideration. What this bill undertakes to do is to set up a fund of $25 million, which is to be used in connection with the health insurance business. Whether this is a forerunner of socialized medicine, I am unable to predict, but I never saw one of these new agencies set up which did not spread its wings just as far as possible and go from one thing to another. This is the beginning of putting the Federal Government into the insurance business. I do not think it ought to be done. I do not think the House would do it if it were brought up here with mature consideration and if we had time to consider it. But it came before the Rules Committee yesterday afternoon, and here we are, at the end of the session. We have had a year and a half to consider whether you want to put the Federal Government into the insurance business. You have had a year and a half to consider whether you wanted to set up this kind of a bureau and launch the Government into this kind of a new program. I do not call it a New Deal program or a Fair Deal program. I might call it a Republican program. I remember the time when that side of the aisle would hold up their hands in holy horror at any such suggestion that we put the Federal Government into the health insurance business. That is exactly what you are doing. We have not had time to consider this bill. I will warrant there is not 1 Member in 10 in this House who knows a single solitary thing about this bill or what it provides.

Here is a bill that establishes a new bureau, an expensive bureau, which is estimated I understand will cost a million and a quarter dollars a year for its administration alone, and it sets up a reinsurance fund of $25 million of the taxpayers' money and launches you full-fledged into the insurance business. Is that what you want to do? If that is what you want to do, of course you have the votes over here to do it, but I think you ought to stop, look, and listen a little bit.

This bill is opposed by the American Medical Association. They do not think the Government ought to go into the business of insuring the health of the people. It is a reinsurance bill. It looks to me like what it really is, is a subsidy to the insurance companies, in order to induce them to insure bad risks, because they expect them to insure against things that they would not ordinarily insure under the circumstances. If you need any more reinsurance—and that is what this is—a reinsurance bill, just remember this, that you have got private companies, you have got private capital to the extent of something like

$2 billion in private insurance companies that are engaged in just the business that you are proposing to place the Federal Government in competition with. If that is what you want to do, all right, go ahead.

Mr. EBERHARTER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Pennsylvania.

Mr. EBERHARTER. The gentleman just said something that I would like to comment on. The gentleman said we would put the Federal Government in competition with private insurance. Insofar as this bill is concerned, and to emphasize the need for studying it, I have heard just the opposite of that. I have heard that this bill is just to bail out a lot of insurance companies, and insure some insurance companies against any loss. There are so many conflicting impressions throughout the country concerning this bill that it seems to me it is being pushed upon us without proper consideration and study. I have also been informed, whether the information is reliable or not—I do not know whether the committee has studied it—that the rates that will be charged will be of such high nature that the employees who are reinsured under this bill will pay just as much as they would to private insurance companies, and the excess premiums will be for the benefit of the insurance companies. I am not making those charges, but just bearing out what the gentleman said. I do not think the committee has given enough study to this subject to pass a bill of this nature.

Mr. SMITH of Virginia. The gentleman's statement, for which I am grateful, is enlightening. Here is the Government launching upon a new program, launching upon a new bureau, when we do not know what we are doing, and the House does not know what it is all about. The gentleman says this may be to bail out some insurance companies. I say it is to put the Government in competition with insurance companies. The answer to that question, I think, is this, that there are all kinds of insurance companies. There are good sound solvent reinsurance companies who are amply able to reinsure every risk that is insurable or that ought to be insured. On the other hand, you have fly-by-night insurance companies—and I may say there are many of them—that would welcome this opportunity to unload their burden on the taxpayers of the United States.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. MASON. Is the kernel of this bill a proposition for the Federal Government to underwrite the insurance companies in proposed experiments they may carry on which are risky, which they ordinarily would not carry on unless the Federal Government backed them up and guaranteed them?

Mr. SMITH of Virginia. That is exactly what it is; and I think the gentleman has pretty well expressed the language that is contained in the preamble of the bill itself.

Mr. EBERHARTER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. EBERHARTER. I just want to add this comment that there are very many differences in rates on insurance, some companies perhaps charging but half of what other companies charge. This matter of rates has been studied for many years, yet in the short time the Committee on Interstate and Foreign Commerce has had this matter under consideration. It seems to me that it would be impossible that they could arrive at a rate that would be fair to both the insurance company, the reinsured, and the individuals.

Mr. SMITH of Virginia. May I say to the gentleman in response to his comment I think that is taken care of in the bill, because the bill provides and authorizes the Secretary of Health, Labor, and whatever you have to employ 10 very high-priced experts on insurance, and they are going to tell the country what to do about it and they are going to tell the Government what to do about it. You are going to spend about $25 million setting up a new bureaucracy.

Mr. EBERHARTER. Let me ask the gentleman if these so-called experts will set the rates, or will Congress have the right to set the rates?

Mr. SMITH of Virginia. They are not only going to set the rates but they are going to advise the insurance business what is good for them and what is not good for them.

Mr. EBERHARTER. It seems to me that we are always getting more experts to handle legislation rather than the Congress.

Mr. SMITH of Virginia. Absolutely, yes; all they want us to do is to pass the enabling act, give them millions of dollars, and the bureaucrats will handle it from there on.

Mr. DONDERO. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. DONDERO. I have listened with great interest to what the gentleman has had to say. I have always admired him for his forthrightness. Will the gentleman tell the House, if he knows, what is the necessity for this bill?

Mr. SMITH of Virginia. I think you will have to talk with the gentlemen who are proposing the bill. From my standpoint I do not see any necessity for it at all. It is a thing that ought not to be done.

Mr. DONDERO. Is it not another case of injecting the Federal Government into a new field of private industry?

Mr. SMITH of Virginia. Absolutely; there is no doubt about that.

Mr. MULTER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from New York.

Mr. MULTER. Is it not a fact that the insurance business is one of the biggest free enterprise businesses of the country with billions and billions of dollars of assets? If this is such a good plan why cannot the insurance companies carry it out, invest their own $25 million, rather than have the Federal Government get into it?

Mr. SMITH of Virginia. They have plenty of money to do it with. It is just another case of injecting the Federal Government into private business with the bill to be footed by the taxpayers.

Mr. Speaker, I include in my remarks at this point a telegram from the American Medical Association regarding this bill:

JUNE 29, 1954.

Hon. CHARLES A. WOLVERTON,
Chairman, House Interstate and Foreign Commerce Committee,
House of Representatives,
Washington, D. C.:

This is to make certain that the position of the American Medical Association on H. R. 7700 and H. R. 8356 is understood. We opposed the original H. R. 7700 and we oppose the amended version. On April 26 the association presented its views to the committee on the original H. R. 7700. Again on May 11 we informed you of our views on the amendments you suggested.

First, H. R. 7700 is absolutely unnecessary; private financing is meeting the need. Second, this legislation would put medical practical and medical policies under the domination of lay boards of labor and management. Congress and the public have long been aware that the practice of medicine cannot be allowed to become a political football. It is just as important that the practice of medicine not be relegated to the labor-management bargaining table.

We want to take this opportunity also to tell you that our association's opposition to H. R. 8356, the reinsurance proposal, was reaffirmed by the House of Delegates last week at our convention in San Francisco. Our reasons were presented to your committee in testimony on April 5.

FRANK E. WILSON, M. D.,
Director, Washington Office, American Medical Association.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken, and the Chair announced that the ayes appeared to have it.

Mr. SMITH of Virginia. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 274, nays 88, answering "present" 1, not voting 71, as follows:

[Roll No. 102]

So the resolution was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Dingell for, with Mr. Hays of Ohio against.

Until further notice:

Mr. Taylor with Mr. Thompson of Texas.
Mr. Short with Mr. Fisher.
Mr. Bender with Mr. Lucas.
Mr. Angell with Mr. Lyle.
Mr. Scott with Mr. Camp.
Mr. Sheehan with Mr. Long.
Mr. Weichel with Mr. Doyle.
Mr. Wilson of Indiana with Mr. Chatham.
Mr. McConnell with Mr. Morrison.
Mr. McGregor with Mr. Perkins.
Mr. Curtis of Nebraska with Mr. Regan.
Mr. Gwinn with Mr. Sikes.
Mr. Bramblett with Mr. Thompson of Louisiana.
Mr. Bonin with Mr. Willis.
Mr. Hillings with Mr. Ashmore.
Mr. Riehlman with Mr. Brooks of Louisiana.
Mr. Nelson with Mr. Davis of Georgia.
Mr. Miller of New York with Mr. Fallon.
Mr. Mailliard with Mr. Fernandez.
Mr. Kersten of Wisconsin with Mr. Patman.
Mr. Hinshaw with Mr. O'Neill.
Mr. Cotton with Mr. Moulder.
Mr. Harrison of Wyoming with Mr. Barden.
Mr. Merrow with Mr. Sheppard.

Mr. SHAFER changed his vote from "yea" to "nay."

Mr. LANE changed his vote from "nay" to "yea."

Mr. HAYS of Ohio. Mr. Speaker, I have a live pair with the gentleman from Michigan, Mr. DINGELL, who, if present, would have voted "yea." I therefore withdraw my vote of "yea" and vote "present."

The result of the vote was announced as above recorded.

The doors were opened.

PRIEST RAPIDS SITE ON COLUMBIA RIVER, WASH.

Mr. DONDERO. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 7664) to provide for the development of the Priest Rapids site on the Columbia River, Wash., under a license issued pursuant to the Federal Power Act, with Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 4, line 12, after "thereto.", insert "Power surplus to the requirements of the licensee and other non-Federal marketing agencies (public or private) within the economic marketing area, as may be economically usable to the Federal system, may be made available to and may be purchased by the Bonneville Power Administrator at rates not higher than the rates charged such non-Federal marketing agencies, and under such terms and conditions as shall be mutually agreeable to the licensee and the Secretary of the Interior. Such power may be commingled with power from Federal dams in the Columbia River system for which the Bonneville Power Administrator has been designated marketing agent and shall be sold by the Administrator in accordance with the provisions of the Bonneville Project Act at established rate schedules."

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate amendment was concurred in, and a motion to reconsider was laid on the table.

Mr. MACK of Washington. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. MACK of Washington. Mr. Speaker, the action just taken completes passage by both House and Senate of the Priest Rapids Dam bill. The bill now goes to President Eisenhower for his signature.

This bill will provide Oregon and Washington with more hydroelectric power sooner than this additional power otherwise could be obtained and therefore means much to the future development and prosperity of the Pacific Northwest States.

This bill paves the way for a State of Washington public power agency to obtain a license to build a huge hydroelectric dam at Priest Rapids in eastern Washington.

This dam will be one of the largest on the Columbia River, and when completed will have an installed capacity of 1,200,000 kilovolts.

The Priest Rapids Dam will carry 23 generators each of 53,000 kilowatts. The dam will cost an estimated $364 million.

This bill grants permission to public power agencies of the State of Washington to apply to the Federal Power Commission for a license to build the dam. The bill provides that the public agency which obtains the license to build the dam must prove it is financially able to do so and must guarantee to develop the maximum power capacity of the site.

The bill designates three Washington State power agencies any one of which is eligible to apply for and secure the license to build this power dam. These three agencies are, first, the Grant County PUD; second, an association of about 20 State of Washington County PUD's; and third, the Washington State

Power Commission. All three agencies are expected to apply for the license to build the dam. The Federal Power Commission will determine to which of the three eligible agencies the license to build the dam is issued.

The about 20 public-utility districts which form 1 group that is seeking the license includes the public-utility districts in all 9 southwest Washington counties except Thurston County.

The licensee, when a license is issued, will build the dam with funds obtained by the sale of revenue bonds.

First hearings on the bill just passed were held before the Flood Control Committee of the House of Representative of which I have the honor to be chairman. These hearings extended over many months. The committee went into every angle of the project.

The gentleman from Washington [Mr. HOLMES], the author of the bill, was most helpful in assembling witnesses and a mass of testimony in behalf of the project. All interested departments of the Federal Government testified on the bill.

Support of the bill was bipartisan. While the bill adopted by the committee was introduced by Mr. HOLMES, a Republican, Mr. MAGNUSON, a Democrat, manifest his complete support and urged the committee to approve the Priest Rapids bill and predicted that several years would be gained in getting more electricity for the Pacific Northwest if the bill was approved.

The two Democratic Senators from the State also introduced identical bills.

The bill had the support of all Representatives of the State, of the Washington State Grange, and other organizations of large membership.

We need more electric power in the Pacific Northwest. We need great quantities of this power. We need this additional power as rapidly as we can obtain it in order to keep pace with the growing population and industrial requirements of the region.

Oregon and Washington are the two most rapidly growing States in the Union. Judging the future by what happened during the past 10 years, we may confidently expect that the population of these two States by 1970 will be double what it is today. Our two States will require 3 or 4 times as much electricity by 1970 as is available now.

The Federal Government alone and singlehanded has not and probably will not build Columbia River power dams fast enough to keep pace with the growing power demands of the region. Because of this we need to have all agencies, the Federal Government, the State governments, the public utility districts, the municipal power agencies, and private enterprise all join in building power producing facilities in our region.

For a long time there has been an effort by some to have the Federal Government and the Federal Government alone install all of the power generation in the Pacific Northwest. The result has been that we have continually been threatened with a power shortage. The Federal Government during 18 years when the Democrats were in control of Congress and 4 years when the Republicans controlled Congress, have not provided Federal funds fast enough to keep pace with the growing demand of the region.

Building of the first Federal power dam in the Pacific Northwest, the Bonneville, was started in 1933, 21 years ago. In the 21 years since this first power dam was started, the Federal Government has completed about 3 million kilowatts of installed capacity on the Columbia River and its tributaries. In short, the Federal Government alone and singlehanded in 21 years, has brought into production only a little more than 150,000 kilovolts of hydroelectric power production a year.

The region requires 500,000 kilovolts of new and additional installed capacity each year to keep pace with its growing demands.

This indicates that President Eisenhower is on the right track when he advocates partnership arrangements under which the Federal Government, the States, the county PUD's, the municipal public power district, and private enterprise all unite in producing more power.

What we need in the Pacific Northwest is more power and more power soon. We will get that power sooner by partnership cooperation rather than by the Federal Government undertaking to do it all alone.

The Priest Rapids bill is the first bill to implement this partnership idea in the Pacific Northwest.

It is to be hoped that Washington power agencies eligible to seek the license to build this Priest Rapids Dam will move swiftly once the President has signed the bill.

In obtaining more power production in the Pacific Northwest time is of the essence.

AMENDMENT TO SECTION 24 OF FEDERAL RESERVE ACT

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 3480) to amend section 24 of the Federal Reserve Act, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the fourth paragraph of section 24 of the Federal Reserve Act, as amended (U. S. C., 1952 edition, title 12, sec. 371), is amended by adding in clause (d) the words "or the Small Business Administration" after the words "the Housing and Home Finance Administrator", and by adding the words "or of the Small Business Act of 1953," after the words "Housing Act of 1948, as amended."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. WOLCOTT. Mr. Speaker, the bill just passed is identical with one the House passed yesterday, H. R. 9144. I ask unanimous consent that the proceedings by which the bill H. R. 9144 was passed yesterday be vacated.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

HEALTH SERVICE PREPAYMENT PLAN REINSURANCE ACT

Mr. WOLVERTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 8356) to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 8356, with Mr. CANFIELD in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WOLVERTON. Mr. Chairman, I yield myself 24 minutes.

Mr. Chairman, the Committee on Interstate and Foreign Commerce, of which I have the honor to be chairman, has a wide and varied jurisdiction. It covers a field of activities—transportation, communications, security exchanges, interstate power, aviation, medical and scientific research, fair trade, public health, and many others. But, there is no jurisdiction or activity possessed by the committee that appeals to me so greatly as that pertaining to public health. During the many years I have served on the committee it has been my privilege to participate in many accomplishments, the object of which has been to improve the health of our people, and, make more and improved medical facilities available for their care and hospitalization. To enumerate all of these, including the Federal research activities for heart, cancer, mental, nervous and other diseases, would take more time than is at my disposal. Suffice it to say, it has been a work that has been very close to my heart.

During the present session of Congress much has been done to further promote the health of our people. We have passed legislation, first, to provide additional Federal assistance in the construction of nonprofit hospitals; second, to strengthen and improve research activities of the Public Health Service to facilitate its attack on cancer, mental illness, heart disease, blindness, and other serious ailments; third, to provide for the simplification and improvement of the Federal grants-in-aid program to the States to spur the States to greater initiative and responsibility in the handling of their own health programs; fourth, greater Federal aid to the States for the vocational rehabilitation of the physically disabled; fifth, to provide hospitals for the chronically ill and nursing homes for the convalescents.

Today, we have before us for consideration a bill (H. R. 8356) that is intended to encourage private and nonprofit health insurance organizations to offer broader health protection to more

families, by the Federal Government insuring such organizations against the additional risk assumed.

President Eisenhower, in his State of the Union Message to a joint session of the Senate and House, on January 7, 1954, said in connection with this subject of providing adequate health insurance plans the following:

> The war on disease also needs a better working relationship between Government and private initiative. Private and nonprofit hospital and medical insurance plans are already in the field, soundly based on the experience and initiative of the people in their various communities. A limited Government reinsurance service would permit the private and nonprofit insurance companies to offer broader protection to more of the many families which want and should have it. On January 18, I shall forward to the Congress a special message presenting this administration's health program in detail.

On January 18, 1954, President Eisenhower submitted his recommendations to improve the health of the American people. They were of a most comprehensive character. However, I will at this time make reference only to that portion of his message that relates to the subject matter of the pending bill, namely, a Federal reinsurance service to encourage the writing of broader and more comprehensive types of health insurance. In this connection he said:

> The best way for most of our people to provide themselves the resources to obtain good medical care is to participate in voluntary health-insurance plans. During the past decade, private and nonprofit health-insurance organizations have made striking progress in offering such plans. The most widely purchased type of health insurance, which is hospitalization insurance, already meets approximately 40 percent of all private expenditures for hospital care. This progress indicates that these voluntary organizations can reach many more people and provide better and broader benefits. They should be encouraged and helped to do so.
>
> Better health-insurance protection for more people can be provided.
>
> The Government need not and should not go into the insurance business to furnish the protection which private and nonprofit organizations do not now provide. But the Government can and should work with them to study and devise better insurance protection to meet the public need.
>
> I recommend the establishment of a limited Federal reinsurance service to encourage private and nonprofit health-insurance organizations to offer broader health protection to more families. This service would reinsure the special additional risks involved in such broader protection. It can be launched with a capital fund of $25 million, provided by the Government, to be retired from reinsurance fees.

OBJECTIVES AND PRINCIPAL FEATURES OF THE BILL

The bill now before us will effectuate the recommendation made to Congress by President Eisenhower. In general, the purpose is to encourage private efforts toward the expansion of prepayment protection.

The bill is the result of long and intensive hearings and study by the committee. The best information obtainable was sought. Leaders in the fields of health and insurance cooperated with the committee, and the Department of Health, Education, and Welfare and their respective staffs in a most unselfish and helpful manner. A tremendous amount of work and study entered into the preparation of the bill. As presented to the Congress by the Committee on Interstate and Foreign Commerce it has the approval of all the Departments of Government, leaders in insurance, insurance companies, State insurance commissioners, Blue Cross, American Hospital Association, and many other individuals and organizations engaged in health insurance.

An analysis of the bill is as follows:

IN GENERAL

The bill, as amended, provides for the establishment of a health-reinsurance program in the Department of Health, Education, and Welfare. It creates a reinsurance fund and authorizes an appropriation of not to exceed $25 million to provide advances of working capital for the fund. The fund would be built up over a period of time from reinsurance premiums and from earnings of the fund. Reinsurance would be available, on a voluntary basis and upon payment of a reinsurance premium, to private insurance companies, voluntary nonprofit health associations, such as Blue Cross and other organizations offering prepaid health-insurance plans. The proposal is designed to encourage private insurance organizations to experiment in providing broader voluntary health-insurance protection to more people.

The bill also provides for technical advisory and informational services to health-service prepayment plans.

It is an attack on the problem of making needed health services and facilities available to the maximum number of people on a prepayment basis; the bill would authorize a two-pronged program within the Department of Health, Education, and Welfare, namely (a) technical advisory and informational services, without charge, to health-service prepayment plans, and (b) reinsurance for health-service prepayment plans established and operated by commercial insurance carriers or by nonprofit carriers.

II. ADMINISTRATIVE STRUCTURE

First. The bill would vest all responsibility for the administration of the program in the Secretary of Health, Education, and Welfare. Under existing law, the Secretary could delegate all or any part of this function and either place it in an existing major unit within the Department or place it in a new unit.

Second. The bill would provide for a National Advisory Council on Health Service Prepayment Plans consisting of 12 members appointed by the President, 1 of whom would be designated by the President as chairman. The Council would advise, consult with, and make recommendations to the Secretary on matters of policy relating to the Secretary's activities and functions under the act.

Third. In addition to authorizing, in general terms, utilization of other Federal agencies, or of any other public or nonprofit agency or institution, the bill would provide for optimum utilization by the Secretary of the various State insurance departments—or other State agencies supervising carriers of health service prepayment plans—especially in determining compliance with requirements and standards prescribed by the Secretary as a condition of approval of a health service prepayment plan for reinsurance. Final responsibility for such determinations would, of course, rest with the Secretary.

Fourth. Except as may be specifically provided by the bill, no Federal officer or employee would be authorized to exercise any supervision or regulatory control over any participating carrier, or over any hospital or other health facility or personnel furnishing personal health services covered by a participating prepayment plan.

III. TECHNICAL AND ADVISORY SERVICES

Under this part of the program, the Secretary would be authorized to conduct studies and collect information on the organizational, actuarial, and other problems of health service prepayment plans, make the results of such studies and the information so collected generally available, and provide to sponsors of such plans, without charge, organizational and other technical advice and information, including information on morbidity and organizational methods.

For this part of the program a separate appropriation would be authorized.

IV. REINSURANCE PROGRAM

First. This program is designed to be self-sustaining, over a reasonable term, through reinsurance premiums paid into a revolving reinsurance fund. However, for a 5-year transitional period administrative expenses would be appropriated from the general funds of the Treasury. An appropriation of $25 million to a capital-advance account in the Treasury would be authorized, which would be available, without fiscal year limitation, as a line of credit for advances of working capital to the reinsurance fund. When and as the condition of the fund permits, such advances would be repayable to the capital-advance account and the amount so repaid would again be avilable for future advances to the fund if needed. Until repayment, interest on the outstanding balance of advances to the fund would be payable to the Treasury as miscellaneous receipts.

Second. Reinsurance premiums would, pursuant to regulation, be fixed by the Secretary at rates determined with a view to achieving the objectives of the act and fiscal self-sufficiency over a reasonable term. Such premiums could, and probably would, be fixed separately for each plan—for the intial reinsurance term, and thereafter again for each renewal term.

Third. Liabilities arising under reinsurance contracts would be limited to and paid from the fund, except that the Secretary could set up separate reinsurance accounts within the fund, in which event liability would be limited to the account to which a plan is allocated. While the bill does not so specify, it would be possible, under this provision, to establish, for example, special reinsurance accounts for classes of plans, classes of carriers, or members of a group of affiliated or associated carriers.

Fourth. The fund would be invested in Federal, or federally guaranteed, interest-bearing securities.

Fifth. Authority to write reinsurance in a given field would be subject to a standby or no-competition provision. That is to say, the Secretary could reinsure plans of a given kind or type only if, in the Secretary's judgment, reinsurance for such plans, on terms and conditions, and at premium rates, comparable to those offered under the act, is not available from private sources to an extent adequate to promote the purposes of the act. By implication, the Secretary would have to stop writing reinsurance when such a finding could no longer be made.

Sixth. Reinsurance for a plan could not be granted unless (a) the applicant carrier is operating according to law; (b) the carrier is financially sound and operates in a manner which entitles it to public confidence; (c) the plan is sound; (d) the reinsurance of the plan will promote the purposes of the act; (e) the carrier agrees to submit such reports concerning its operations under the reinsured plan as the Secretary may from time to time reasonably require; (f) the carrier has agreed to the reinsurance premium rate fixed by the Secretary for the plan; and (g) the carrier agrees to comply with the terms and conditions prescribed for reinsurance. Certification by the State insurance department—or corresponding supervisory agency—of the carrier's home State as to whether the carrier is financially sound and entitled to public confidence, as determined in accordance with criteria established by the Secretary, could be accepted by the Secretary as conclusive. As to utilization of State agencies with respect to (g), see paragraph 8.

Seventh. The Secretary would be authorized, as a condition of granting reinsurance, to establish by regulation terms, conditions, and requirements as to the types and kinds of prepayment plans which will be reinsured. In prescribing such regulations, the Secretary would be required to take into consideration the purposes of the act, with emphasis on the objective of encouraging experimentation designed to extend or adapt the prepayment method to substantive problem areas or geographic areas for which that method is, in any significant respect, new, untried, or not yet fully effective, that is, by coverage of classes of individuals not yet adequately protected, extension of protection to areas not yet adequately protected, or coverage of benefits or services not yet widely available on an adequate basis, either as to type, range, amount, or duration of such benefits or services.

Eighth. As a condition of granting reinsurance, the Secretary could, among other things, specify (a) minimum benefits; (b) safeguards against undue exclusions of preexisting conditions or of specific illnesses, or against other undue exclusions or limitations; (c) standards for deductible and coinsurance provisions, limits of maximum liability, waiting periods for benefits, and other such policy provisions; (d) standards for the duration, cancelability, and renewability of such policies or contracts; and (e) standards for plan provisions with respect to costs and charges of providers of personal health services payable by the carrier, to the extent such standards are necessary to protect the fund against abuses or arbitrary cost increases. The Secretary would be precluded from reinsuring any plan for which the carrier's premium rates are such as to make the plan financially unsound or are otherwise arbitrary or unreasonable, or any plan with respect to which the carrier's breakdown of its single premium rate, as between reinsured and nonreinsured types of benefit costs, is unreasonable, but in other respects the Secretary would be precluded from setting any standards for the carrier's premium rates. The State insurance department of corresponding State agency of a carrier's home State—as defined—would, if willing, be utilized to certify to the Secretary whether the plan complies with the terms and conditions stipulated as a condition of granting reinsurance.

Ninth. The Secretary could not approve for reinsurance any plan for direct provision of medical or dental services by the carrier through a salaried staff of physicians, surgeons, or dentists in the employ of such carrier, unless the carrier has an organizational structure vesting control over the practice of medicine or dentistry solely in duly licensed members of the professions involved.

Tenth. The liability of the reinsurance fund under the reinsurance contract would be fixed and limited as follows:

(a) The reinsurance base: The fund would not underwrite all of the carrier's annual benefit costs under the plan. Rather, the reinsured portion of such costs would be limited to the excess, if any, of (a) aggregate annual incurred benefit costs under the plan; over (b) the difference between, first, gross annual earned premium income; and, second, a portion of such income called the administrative expense allowance.

The administrative-expense allowance applicable to a given year for a reinsured plan would be determined by multiplying the gross earned premium income for the year by an administrative-expense-allowance factor predetermined for the plan prior to the commencement of the reinsurance term—or renewal term—into which such year falls. This factor would be equal to seven-eighths of the carrier's preestimated—and thus predetermined—ratio of annual administrative expenses of the carrier under the plan to annual earned premium income under the plan.

As here used, the term "administrative expenses" is intended to include all of the carrier's expenses and charges incurred under the plan, except the benefit costs and except any provision for contingencies, profits, dividends, and refunds. The Secretary would be authorized to define "administrative expenses" for such purposes more particularly.

Thus, before reinsurance would begin to apply, the carrier would, in effect, have to absorb fully out of its premium income as benefit costs, first, the anticipated portion of premium income normally devoted to benefit costs for such a plan; second, the portion anticipated as available for profits—in the case of a carrier organized for profit—and for contingencies; and, third, one-eighth of the portion of premium income anticipated as administrative expenses.

Procedurally, the ratio of administrative expenses to earned premium income of the carrier under the plan would be estimated by the carrier, and that estimate would be submitted—with supporting data—with the application for initial reinsurance or renewal of reinsurance. In order to prevent distortion, the Secretary could require the submission of an average ratio based on a period not in excess of 3 years. The carrier's estimate would have to be approved by the Secretary unless considered to be unreasonable or not in good faith.

For plans operated to a substantial extent on the basis of personal health services to be furnished by the carrier directly through its own staff or indirectly through the staff of an affiliate, or on the basis of payments made by the carrier to a provider of personal health services which is an affiliate of the carrier, the above formula would not apply, but the Secretary would, by regulation, prescribe a formula calculated to achieve for such plans reinsurance protection reasonably comparable in scope and extent to that provided for other types, taking into account their inherent differences.

(b) Coinsurance: The liability of the fund would be limited to 75 percent of the carrier's reinsured cost so arrived at. This is an adoption, for this purpose, of the principle of coinsurance.

Eleventh. The reinsurance term would be stipulated for a given—regular—period, for example, a year, in the reinsurance certificate, but the Secretary could, by or pursuant to regulation, provide for letting the reinsurance term extend beyond such regular period with respect to policies or subscriber contracts issued during such period and running beyond it and, in that event, if so provided by or pursuant to regulation by the Secretary, to combine the carrier's experience for the regular and extended periods. If a renewal of the reinsurance is granted, the Secretary could, by or pursuant to regulation, specify whether policies issued during the regular period of the preceding term and running into the period of the renewal term should be treated for reinsurance purposes as if issued during the renewal term.

Twelfth. Termination: Reinsurance for a plan could be terminated by the Secretary on any ground specified in regulations in effect not less than 90 days in advance of the commencement of the current initial or renewal term of such reinsurance. However, reinsurance with respect to policies or subscriber contracts in effect on the effective date of such termination would remain in force until the normal expiration of the term.

V. MISCELLANEOUS

First. The bill would confer broad powers on the Secretary with respect to enforcement or settlement of claims, and would authorize the Secretary to hold hearings, and so forth, in connection with investigations under the act.

Second. Criminal penalties would be imposed, not only for falsely advertising

or representing that a carrier is reinsured or has applied for reinsurance but, regardless of the truth or falsity of the representation, also if the representation is not authorized by, or fails to conform to, regulations prescribed by the Secretary.

Third. The effective date would be 30 days after enactment, but in view of the necessity for a preparatory period the Secretary would not be required to receive or consider applications for reinsurance before a date determined by the Secretary.

CONCLUSIONS IN SUPPORT OF BILL

I take it there is little or no dispute about the premises on which this proposal rests:

First. Large numbers of people have no protection—or need better protection—against the costs of care for illness or injury.

Second. Voluntary insurance for the costs of medical and hospital services had made great strides forward in recent years and is capable of substantial further improvement and expansion.

Third. Any Federal program undertaken in this field should build upon our existing system of voluntary coverage and should utilize fully all types of plans and carriers.

In my opinion the proposal now before us represents a sound, middle-of-the-road approach to these problems.

It would encourage experimentation and stimulate expansion of voluntary insurance coverage by making possible a further spreading of the risks of such expanded coverage. This it would do through a self-supporting program of reinsurance. It is not a costly general support program. It is not a subsidy to carriers. There is no compulsion to it. If they so desire, carriers could purchase reinsurance protection—for such risks as they chose to reinsure—by paying reinsurance premiums calculated on an actuarial basis for each reinsured plan. The Government's obligation under the program would be limited to the amount in the fund. The authorized advance of $25 million is to be paid back as feasible. The program would reinsure carriers only; it would not assure benefits, or benefit payments, to any individual policyholder. It is a program to encourage the greatest possible growth for plans which are capable of growing.

The objective of the program is to expand as far as possible the areas in which voluntary insurance can be effective and to reduce to a minimum these areas it cannot reach. Its success will depend upon the willingness of the carriers to undertake new coverage—and to experiment more freely with difficult enrollments and new risks—once the risk of unexpected loss can be held down to about one-quarter of what they would have otherwise had to risk in such new ventures.

Moreover, the Government program under the terms of the bill could not compete with reinsurance written by private companies. With respect to each application for reinsurance the bill would require the Secretary of Health, Education, and Welfare to make an administrative determination that reinsurance was not available from private sources on a comparable basis to an extent adequate to promote the purposes of the program.

The bill does not authorize regulation of the insurance business by the Federal Government, as some have contended. On the contrary, the bill gives full recognition to the principle of general State regulatory authority in the field of insurance. Indeed, the Committee on Interstate and Foreign Commerce wisely amended the bill to make it crystal clear that the program will not interefere with the traditional pattern of State regulation of the insurance industry. The purpose clause reaffirms the policy declared by the 79th Congress in the act of March 9, 1945, entitled "An act to express the intent of the Congress with reference to the regulation of the business of insurance" and expressly disclaims any authorization of administrative action inconsistent with that policy. Under section 304, operation in accordance with law is the first condition of approval for reinsurance, and section 302 (b) requires applicants for reinsurance to agree to operate in accordance with applicable provisions of State law. In addition, section 6 calls for optimum utilization of State insurance agencies in the administration of the program, particularly in connection with determining compliance with the terms and conditions of reinsurance as prescribed by departmental regulation and whether the carrier is financially sound and entitled to public confidence.

With the exception of the sections providing for controls over advertising, which are vital to protect the public and the Government against misleading promotion statements about reinsurance made by either carriers or brokers, the Secretary would be given no general regulatory power over any phase of the insurance business. The bill's grant of authority to make necessary regulations is limited to administrative regulations for purposes of the Federal program. What is authorized here is the establishment of reasonable conditions for participation in a governmental program which the individual carrier may take advantage of if he chooses. Departmental regulations would have no operative effect as to carriers who had filed no formal application for approval for purposes of reinsurance; nor would they apply to policies or subscriber contracts not written in pursuance of plans for which reinsurance was sought.

The bill allows a considerable area of discretion in the establishment of the terms and conditions for participation in the program but it was pretty generally agreed by those presenting testimony at the hearings that any such standards should be worked out in consultation with expert advisers, and representatives of carriers and other interested groups. However, standards have a way of changing and must be subject to modification and revision in the light of operating experience as the program develops. The bill provides several safeguards. There are specific limitations on the extent to which the Secretary may concern himself with premium rate; retroactive effect of new requirements is prohibited; and acceptance for reinsurance of a direct-service plan which permits lay control of professional matters is forbidden. Furthermore, section 303 (b) requires appropriate consultation with interested groups, including representatives of State insurance agencies, prior to the establishment of terms and conditions for reinsurance. Section 403 requires the Secretary to include in his annual report to the Congress a record of the recommendations of the Advisory Council, including minority views, if any. Incidentally, although the bill does not require it, active and close cooperation with State authorities would be promoted if at least one member of the Advisory Council were selected from among the State insurance departments.

I believe this bill as amended is a sound experimental effort to stimulate nonprofit and commercial carriers to tackle new fields of coverage which they may now feel hesitant to undertake. I believe it will encourage carriers to undertake an intensive effort to spread the advantages of voluntary insurance protection to the fartherest feasible limits. I think H. R. 8356 embodies a plan in which we have everything to gain and nothing to lose. The possible Federal expenditures are carefully limited. The role of the responsible Federal administrative agency is safeguarded in every possible way. There will be no competition or interference with voluntary carriers, nonprofit prepayment plans, or with the companies which write reinsurance. Our possible gains in voluntary health insurance protection are tremendous.

I am convinced that the pending bill, first, provides a practical and sensible way to encourage insurance companies and other organizations including Blue Cross and Blue Shield to expand and improve their services; second, will enable more and more families through prepayment plans to meet a larger part of their medical care costs; third, within the free enterprise system that is traditional in this country, will help insurance organizations to meet with private initiative in a more comprehensive way the needs of our people. In the accomplishment of this purpose it will improve the health of the Nation and make America safer and stronger for the present and the future.

The bill deserves the hearty approval of all who believe in a better, stronger, and more healthful nation.

Mr. HESELTON. Mr. Chairman, will the gentleman yield?

Mr. WOLVERTON. I yield.

Mr. HESELTON. It is a fact that in 1952 the medical bills in this country ran to $9,400,000,000. That includes hospital and doctors, dentists, nurses, and medicines. Of that $9,400,000,000 only $1,600,000,000—or 17 percent—was covered by any insurance at all.

Mr. WOLVERTON. I thank the gentleman for that information.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. WOLVERTON. I yield.

Mr. MULTER. I would like to have the gentleman inform the committee if he can as to the following matters: No.

1, since the insurance companies of the country have and control billions and billions of dollars, why should not they set up this small $25 million fund out of their own money?

Mr. WOLVERTON. The fact is that they have not done it. I will ask the gentleman: Why?

Mr. MULTER. Why should they not do it? Why should the Government have to put up this $25 million for them?

Mr. WOLVERTON. If they did it or were willing to do it, we would not have this legislation before us; but our hearings developed very plainly, very clearly, very emphatically that there are fields of insurance that no insurance company, no matter what its resources, is willing to enter and assume the risks incident to it.

Mr. MULTER. But to the extent that for the next 5 years the United States is going to pay all of the expenses of the operation of this plan——

Mr. WOLVERTON. No; you are mistaken in that.

Mr. MULTER. That is what it says in the report.

Mr. WOLVERTON. It will pay 75 percent of any losses.

Mr. MULTER. But I am talking about the administrative costs.

Mr. WOLVERTON. The gentleman asked a question; let me finish answering it. It will pay 75 percent of any losses.

Mr. MULTER. Of any losses?

Mr. WOLVERTON. And the premiums which are to be paid will be computed on an actuarial basis and will eventually be adequate to run the plan. No policy will be insured that on its face has strong possibility of loss. In the second place, the Secretary of Health will have at her elbow and for her advice as provided in this bill an outstanding advisory council the members of which will be appointed by the President.

Mr. MULTER. If the gentleman will yield further, please, let us go back to the point I am directing my attention to, this sentence in the committee report:

> For a 5-year transitional period administrative expenses would be appropriated from the general funds of the Treasury.

Mr. WOLVERTON. That is right.

Mr. MULTER. That means that the United States Treasury is going to pay for the administration of this plan for the next 5 years and at the expense of the taxpayers.

Mr. WOLVERTON. Until the premiums are sufficient to pay it back.

Mr. MULTER. Until the premiums are sufficient to pay it back. Now, if the private insurance companies——

Mr. WOLVERTON. I think you can very readily realize a plan such as this cannot immediately have all the premiums paid into it which will be necessary to carry it on. So it will be carried on until the premiums are sufficient to take care of it.

Mr. MULTER. And if private insurance companies would not enter into a plan like this up to now, what reason is there to believe that if the Government pays the costs over the next 5 years, any part of it will ever be repaid?

Mr. WOLVERTON. I think if you will look at the committee report and if you will read the letters we have put in the committee report from the insurance companies such as the John Hancock, Connecticut, and any number of them, you will see that they advise that this is good and that in their opinion it will be taken care of.

Mr. LAIRD. Mr. Chairman, will the gentleman yield?

Mr. WOLVERTON. I yield.

Mr. LAIRD. I have read the report and some of the letters but have not been able to find any case where private enterprise has been unwilling to meet this problem of reinsurance. Can the gentleman tell me some application of an insurance company for reinsurance with other insurance companies that has been turned down in the past on any type of risk?

Mr. WOLVERTON. The evidence before our committee was that it was a very insufficient field that is now in existence that would be available to reinsure the original insurance company. They are not assuming risks that they do not feel their premiums are sufficient to cover.

Mr. LAIRD. Reinsuring is a very common practice at the present time.

Mr. WOLVERTON. That is right.

Mr. LAIRD. I would like to know if there have been any cases where a primary carrier has been turned down on any reinsurance application and has been unable to place the insurance with private enterprise?

Mr. WOLVERTON. Our hearings will demonstrate that fact to the gentleman if he will take the time to read them in their entirety.

Mr. LAIRD. I would like to state to the distinguished chairman of the Committee on Interstate and Foreign Commerce that I have read over the hearings conducted on this bill. I approve and support the administration's general health program, which places primary emphasis on the provisions of services and facilities for treatment of illness or injuries. It proposes diagnostic centers, specialized institutions for specific needs, medical facilities for rural areas, rehabilitation of disabled persons, improved income-tax treatment of medical expenses, and many more important features. Considering the entire health program, it can be said that it is sound and is generally aimed at those areas where the Federal Government should play a part.

As to the reinsurance phase of the administration's health program, the administration should be congratulated for recognizing that the insurance needs of the Nation can be met by the private insurance companies and the various service plans. This is particularly true when contrasted with the Truman approach to the accident and health insurance needs of the Nation. I will vote against recommitting this bill, as there is no need for further study by the committee of this reinsurance plan. The plan should be defeated, and I will vote against final passage of the bill.

There is no need for a Government reinsurance plan because:

First. The amount of risk in most plans can be easily assumed by the insurers. This is particularly true when compared, for instance, to the liability or fire field.

Second. Perhaps the need for reinsurance in this field is increasing, inasmuch as more companies are entering the major medical expense catastrophe field. Even here, however, there is no need, because reinsurance is available today from private sources. The committee has shown no case where a company large or small has been turned down on placing any reinsurance.

Third. In this connection, it should be stressed what reinsurance does and does not do. Reinsurance is not a panacea to the health problems of the Nation. It does not make insurance any cheaper. It does not make an uninsurable risk insurable. As a result of it, the medical indigent cannot be insured.

The bill calls for the use of Federal reinsurance only in those cases where private reinsurance is not obtainable. Thus the argument has been made that the worst that can come of this is that Federal reinsurance will not be used. This is being politically naive. If the Federal reinsurance facilities are set up but not used, it is the nature of the Federal bureaucracy that efforts will soon be initiated to make this reinsurance work, to wit, competitive with private reinsurance. Once in competition, governmental monopoly is a very distinct threat.

The regulation for the companies requesting Federal reinsurance would be in the Federal Government. The bill gives the Secretary of Health, Education, and Welfare very broad powers in the regulation of the insurance companies. There are two criticisms to be made of this situation:

First. I question whether Congress should give any Cabinet member such broad powers to regulate a particular segment of private enterprise. I am aware that Congress cannot specifically spell out all details of the administration of the reinsurance bill, but I do think the bill could be more specific in an attempt to put some rein on the Secretary's activities.

Second. The Congress is on record as stating that the business of insurance shall be regulated by the various States. The States have done an admirable job in regulating the insurance industry. The regulatory aspects of the reinsurance bill are directly opposed to Public Law 15 of the 79th Congress which expressed the view that regulation of insurance should be in the hands of the various States.

Admittedly, there are certain "soft spots" of health insurance protection among groups of our population. Reinsurance will not cover these soft spots. Through experimentation the insurance industry is reducing these areas, for instance, retired employees, over age employees, rural people, individuals with physical or medical impairment, etc. However, the private insurance industry can never reach everyone. Thus, in these very limited areas there must be subsidies. In this connection, where subsidies must be made, the following safeguards should be made in the administration of the subsidy:

First. The subsidy should be applied directly and openly.

Second. The subsidy should be administered at the local level.

Third. The subsidy should vary from State to State depending on the services available and the prevailing cost patterns.

In conclusion, it should be stressed that voluntary insurance in the past 14 years has made tremendous strides. Currently, 100 million Americans have some form of hospital expense insurance, 75 million have surgical expense insurance and 40 million have medical—nonsurgical—expense insurance. As compared to 1940, the hospital insurance coverage has increased 6 times, the surgical expense insurance, 10 times, and the medical expense insurance about 40 times. Certainly there is every indication that this increase in insurance protection has not ceased. The optimism that prevails concerning the ability of the industry to meet the health expense protection of the Nation is well founded.

I understand the minority party intends to introduce a motion to recommit this bill. It seems that this bill does not go far enough into the insurance field for them and they are interested in putting the Federal Government into the insurance business even more than this bill presently contemplates. I of course am opposed to the position of the minority.

Mr. PRIEST. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, in rising to discuss this bill I find myself in a rather unusual situation insofar as I am personally concerned. As most of you know, I either like to oppose with enthusiasm or to endorse in the same manner any piece of legislation that I speak on in the well of this House. On this occasion I can do neither.

The bill before us today, as my chairman has already explained, first of all recognizes one important question that faces the American people. That question simply is that there is a heavy burden I may say, placed upon millions of people in an effort to meet medical expenses. There is not any question about that. Perhaps the problem of paying for adequate medical facilities, and of the adequate distribution of medical facilities throughout the country constitutes one of the major problems facing the country today.

Mr. JAVITS. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman from New York.

Mr. JAVITS. I would like to ask this question: Is this not the first time that the Federal Government has even contemplated entering in any way in that field?

Mr. PRIEST. No. I may say in response to the gentleman's question that there was a proposal during Pesident Truman's administration for health insurance. Recognition that there is a need for health insurance is not new. It was proposed even on a compulsory basis in the past. It is not a new proposal. President Truman appointed, as most of you know, a commission, that made a study for quite a while, of the health needs of the Nation and of proposals to help meet some of these needs. So I will say to the gentleman this is not the first time such a proposal has been made insofar as the Federal Government is concerned.

Mr. JAVITS. Is it the first time we have had any bill before us in the House on this subject which opened up this whole matter?

Mr. PRIEST. That is true, it is the first time so far as I know that we have had a bill before the House dealing with this subject.

This bill recognizes, first of all, that there is a need for wider health insurance for expanded voluntary health-insurance plans. The bill attempts to meet that need by setting up, as the chairman has already explained, a $25 million revolving fund to encourage private and nonprofit health-insurance companies to bring under additional coverage individuals or groups that are not now eligible, or that the companies now consider to be risks beyond what they are willing to assume on their own and to encourage that additional coverage. Whether the bill will do that remains to be seen.

I must be very frank and state to the House exactly what I stated to my committee on the morning this bill was reported a few days ago. I said some time ago that if the bill were tightened in some respects that I was willing to try it as an experiment, hoping that it would accomplish some good, but without too much enthusiasm in the belief that it would accomplish a great deal of the good sought. I am still willing to try it as an experiment. I think it can hardly be at this point properly classified as more than an experiment. It is a pioneer effort in this field, and I am willing to try it out, to put my faith in any sound plan that I think might bring some benefits to the American people in the field of health.

Mr. BONNER. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman from North Carolina.

Mr. BONNER. The gentleman spoke of a proposal some years ago under a former Democratic administration. Now, is it not a fact that that proposal was defeated and killed in this House largely by the leadership of the Republican Party?

Mr. PRIEST. Well, may I say to the gentleman that I believe that proposal did not come before the House for a vote at that time, if he is referring to the comprehensive compulsory health-insurance plan. It was not reported by the committee and did not come to the floor of the House for a test vote. But, I might say to the gentleman, that there was very sharp criticism, of course, of that proposal.

Mr. BONNER. There was violent opposition, I will say.

Mr. PRIEST. "Violent opposition" is a very good phrase to describe it.

Mr. BONNER. In the House, to the proposal itself.

Mr. PRIEST. That is true.

Mr. BONNER. And to all proposals of this nature that were suggested at that time, to even the creation of a department that his comes under now.

Mr. PRIEST. That is quite true, and that was defeated on the floor of the House, I might say, in a reorganization plan.

Mr. KLEIN. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman from New York.

Mr. KLEIN. I would like to recall to the gentleman's attention the question addressed to the chairman of the committee a few minutes ago by the gentleman from Massachusetts [Mr. HESELTON]. He asked to what extent the medical costs have risen, and I think he said something like $9 billion.

Mr. PRIEST. Nine billion dollars, approximately, I believe is the figure.

Mr. KLEIN. Does the gentleman believe that the passage of this legislation will have the effect of reducing the medical costs to the people of this country? I say it will not, and I am certain the gentleman believes it will not, and I know, and the members of this committee will recognize that the gentleman now addressing this committee is one of the outstanding health experts in the Congress; he has been on this committee many years; he was the former chairman of the subcommittee on health, and he knows his business. I would appreciate it if he could tell the people of this country through the Members of this House whether this bill will accomplish the purpose that it is claimed it will and whether it will reduce the cost of doctors' bills and medical expenses of the people.

Mr. PRIEST. Let me say to the gentleman that when members of the Department of Health, Education, and Welfare were before the committee, I stressed at the time—and had a favorable response from some of them—that I felt it would be a great mistake if the Department in any of its press releases or in any literature promoting this plan, assuming that it was enacted, led the people of the country to believe that this was a solution of their health-insurance problems. I think most of them at the time agreed with me and said, "We realize it is only a beginning, and we certainly shall be cautious in whatever we have to say about it as being a solution."

Mr. Chairman, I am supporting this legislation before us today, because I am willing to make the effort to see if it will work. However, I do not want the people of the country to believe that it is the answer; that it is the solution. I said I would support it, and I am, as an experiment.

I have very grave doubts that it will accomplish all that is claimed for it. But insofar as doing that which the gentleman from New York [Mr. KLEIN] has pointed out, certainly we should not hold this up as an answer to the $9 billion medical cost of the people of the country. It is not that.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. May I call the gentleman's attention to the fact that the legislation which was known as the compulsory health plan or insurance plan was attacked as socialized medicine; and the opponents of it never pro-

posed anything in substitution for it; that the position of President Truman was very much falsified and he was maligned, because he always took the position that those who opposed the bill or any part of it should make their suggestions, should approach the matter constructively, and that he would sign any bill that was constructive and that represented progress. In order words, he did not tie himself to the bill that was introduced.

Mr. PRIEST. That is correct.

Mr. McCORMACK. It was the avenue through which legislative hearings would be held and out of which, if anything constructive came, he would approve it. His position was very much falsified and maligned.

Mr. PRIEST. I think that is a very fair statement.

Mr. HESELTON. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman from Massachusetts.

Mr. HESELTON. In the first place, I want to say very frankly that I have the highest respect and regard for the gentleman. I know he is stating with great sincerity his own deep convictions on this matter. He has discussed the subject with me. He made a statement to me over the last weekend which I think should be in this RECORD. He said that this is an experiment; that the Department recognizes it, the committee recognizes it, the Congress will recognize it, and that the President has recognized it as an experiment; but that we will never know whether it will work unless we give it an opportunity.

I am delighted that the gentleman is joining the committee this afternoon in support of the bill.

There is just one more point, if I may. The gentleman from New York [Mr. KLEIN] I thought misunderstood me when I made a statement as to the extent of the 1952 medical bill of the country, and the amount of insurance involved. It has never been my contention, and I know no one who has contended, that the passage of this bill will reduce medical bills directly. But I think the gentleman will agree with me that if this program does become a success, if there is a wider coverage and a better coverage, it will reduce the direct impact on the individual and transfer it to the voluntary insurance companies.

Mr. PRIEST. I will agree with the gentleman in that respect.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield to the gentleman.

Mr. ROGERS of Colorado. I should like to ask the gentleman the question, in the event that the Secretary should approve a reinsurance plan, and that company should get into difficulty, are they reinsured to the extent of 75 percent of the policies that they have issued?

Mr. PRIEST. Does the gentleman mean retroactively?

Mr. ROGERS of Colorado. No; from now on.

Mr. PRIEST. It may be terminated. There is a provision in the bill for a termination of the reinsurance contract.

Mr. ROGERS of Colorado. Assuming that they have entered into an insurance contract, what is the obligation of the Secretary in the event that the company is unable to meet its obligations—I am referring to the company that has been reinsured.

Mr. PRIEST. If they are unable to meet their obligations so far as paying policyholders what might be due? Is that what the gentleman means?

Mr. ROGERS of Colorado. Yes.

Mr. PRIEST. The Secretary is obliged to pay 75 percent of the loss. If a company's income from premiums fails to equal the figure representing what they actually have to pay, if a company, for instance, may have earned from premiums paid $100,000 and they have obligations of $110,000 incurred during the year, 75 percent of the $10,000 difference would be paid from the insurance fund.

Mr. ROGERS of Colorado. If there were any legal action to be taken on the part of the Government, it would then naturally go into the Federal court, would it not, or would it be taken under the insurance laws of the respective States?

Mr. PRIEST. The provision there, I believe, is with respect to the States, that is, the insurance laws of the States.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield.

Mr. ARENDS. With reference to the proposition that if an insurance company has to go to the Government for 75 percent of the loss that they incur, in like manner the insurance companies would have to pay 25 percent of the loss themselves; is that not correct?

Mr. PRIEST. They pay 25 percent of the losses that they sustain. Of course, they pay a premium for their reinsurance.

Mr. ARENDS. Therefore, they are going to be very careful about their rates.

Mr. PRIEST. I would think they would be, in all fairness.

Mr. MARSHALL. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield.

Mr. MARSHALL. I wonder if the gentleman could tell us the attitude of the American Medical Association on this matter.

Mr. PRIEST. The American Medical Association is opposed to the bill. There is no question about that.

Mr. MARSHALL. I thank the gentleman.

Mr. PRIEST. Frankly, I do not think the bill is socialized medicine. I do not see that there is a question of socialized medicine involved in the bill at all and if I did I would oppose it.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield.

Mr. McCORMACK. It is at least a minor step in the direction of Democratic leadership in the past.

Mr. PRIEST. Yes.

Mr. WILLIAMS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield.

Mr. WILLIAMS of Mississippi. The gentleman has stated the position of the American Medical Association to be against the bill. I wonder if I understand the gentleman's position on the bill—I think he considers it innocuous, is that not correct?

Mr. PRIEST. I do consider it so.

Mr. WILLIAMS of Mississippi. I would like to know on the other hand, besides the President and Mrs. Hobby, does the gentleman know of anybody who is enthusiastically in favor of this bill?

Mr. PRIEST. We had some witnesses before the committee who were, I think perhaps, enthusiastic for it, but not a great number.

Mr. WILLIAMS of Mississippi. The gentleman will agree with me when I say that so far as the membership of the committee is concerned, the fires of enthusiasm which have been developed, and which have been kindled in the committee in favor of this bill, would probably freeze water, would they not?

Mr. PRIEST. The gentleman uses figurative language. I can go along with at least a part of the way toward the freezing point.

Mr. Chairman, I want to discuss one point which I expect to take up when we are considering the bill under the 5-minute rule. When we had hearings on the bill and when it was considered by the committee later, I felt all along there should be some statutory standards—that is minimum standards—that all carriers should meet before they would be eligible for reinsurance. I had at one time planned to offer an amendment to write those minimum standards into the bill. But, the more I considered that approach, the more I felt that a bill of this sort, if it is going to work at all, must work on a cooperative basis and that there is such a great variety of policies which may differ so greatly that writing definite statutory standards into the bill was, perhaps, a matter which had better be left to the question of issuing regulations pursuant to the bill, if it should become a law. Therefore, in order to be certain that those regulations are issued, I will offer at page 54 of the bill, at line 14, when the bill comes up for consideration under the 5-minute rule an amendment to change the word "may" to the word "shall." The effect of that amendment would simply be that the Secretary not alone must consult with the Advisory Council on about 8 points concerning standards, but that the Secretary shall after consultation issue regulations on these particular points. Thus we will be certain that regulations setting up very specific standards shall be issued. It is anticipated that they will be anyhow, but the language of the bill says that they may be. I want it to be very certain that they are and I will offer that amendment at that time.

Mr. WOLVERTON. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I must yield to my chairman.

Mr. WOLVERTON. I have asked the gentleman to yield for the purpose of stating to the House that I think there is merit in the amendment that the gentleman proposes to the bill. I think the word "may", with the understanding that has been had, would leave no doubt that in the administration of the

act, the things which he is most desirous of having stated definitely would be done by the Secretary. However, if it gives better assurance by substituting the word "shall" instead of "may", so far as I am personally concerned, I have no objection. Before the amendment is offered, I will confer with other members of the committee.

Mr. PRIEST. I thank the gentleman.

Mr. BONNER. Mr. Chairman, will the gentleman yield?

Mr. PRIEST. I yield briefly.

Mr. BONNER. The distinguished gentleman from New Jersey [Mr. WOLVERTON] spoke of the testimony that various outstanding insurance companies gave on this bill as to its soundness, as to the need for it. All of those insurance company stocks have quadrupled in the last 10 years. Tell me why the insurance companies, if they are so much in favor of this, did not go into it themselves; and were they asked why they did not?

Mr. PRIEST. I do not know why they have not.

Mr. BONNER. If it is so good and so sound, everybody wants private business to carry on, why should they not go into it themselves?

Mr. PRIEST. Several witnesses were asked the question, "Is it not possible for the insurance companies, by pooling some of their own assets, to set up a reinsurance program among themselves?" The answers were that it might be possible, that it certainly would be possible, but it had not been done, and there was never any definite forthright statement whether they thought it should be or should not be. It could be but it has not been done.

Mr. BONNER. They control the major part of the surplus funds of the country.

Mr. PRIEST. Unquestionably that is true. One or two, I believe, said that certain reinsurance premiums by individual companies had been taken out with Lloyd's of London. At least there was one company that made that statement.

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. WOLVERTON. Mr. Chairman, I yield 8 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Chairman, the House Committee on Interstate and Foreign Commerce has favorably reported on H. R. 8356, with an amendment, and recommends that the bill be passed. This bill represents a program to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services. The bill authorizes the creation of a reinsurance fund within the Department of Health, Education, and Welfare which would be available for the reinsurance, on a voluntary basis and upon payment of a reinsurance premium, of health-service prepayment plans operated by commercial insurance carriers or by voluntary nonprofit health associations. The proposal is designed to encourage private insurance associations to experiment in providing broader voluntary health-insurance protection to more people.

THE COMMITTEE'S HEALTH INQUIRY

Of the problem of making needed health services and facilities available to the maximum number of people, we all are aware. The rising cost of medical care is well evident, even in the less serious illnesses. A long-term illness today represents a financial catastrophe to the average American family. Heart disease, cancer, tuberculosis, arthritis, rheumatism, polio, blindness, diabetes, cerebral palsy, epilepsy, multiple sclerosis, muscular dystrophy, and like diseases represent a crippling burden, even where the best in medical care is available.

With this problem, one of the most serious and important facing our people today, your Committee on Interstate and Foreign Commerce properly has been concerned. We have been trying to see just what might be done about it.

Last October, during the recess of the Congress, this committee conducted hearings in which it received extensive testimony on the present state of research into the causes and control of some of the principal scourges of mankind. The committee had the unstinted and cordial cooperation of outstanding men and women who devoted their lives to research in the fields of these major diseases, in the committee's effort to find out just where we are in knowing what the causes might be, in preventing or curing the disease, in mitigating its effects, and what further might be done to bring successful culmination to this research.

It is obvious that in many of these fields we do not yet know how we may provide a complete cure, yet alone in others, know just what we are fighting. On the other hand, research activities have produced marvelous results in the prevention and treatment of some of them, and we may be well along the road to a solution in some.

Yet the very fact that we are now able to treat many of these diseases and prolong human lives, has resulted in new problems of an economic nature. Extended hospitalization and medical attention prove exceedingly costly, and such costs are mounting astronomically. While society makes some provision for the very poor to be taken care of, if they require extended hospitalization and medical treatment, and while the very rich are able to take care of themselves in such regard, the large majority of our people do not appear to be protected adequately from the cost resulting from extended serious illness.

What families today—with one of their number suddenly stricken—can afford from their own resources to pay the $4,380 involved in the hospitalization of a chronic heart patient for 1 year; or the monthly cost at a cerebral palsy center offering the full range of medical, psychological, and social services, averaging as much as $750 per child; or the $10,000 cost per year in keeping a seriously involved polio case in an iron lung?

Or, if from their own resources, and those of relatives, they can meet the costs of such illness, at what cost to them in financial readjustment, lowered standard of living, interrupted schooling, uprooted children, loss of layaway for old age, or assumption of the breadwinner's role by someone else?

With such background, accordingly, the committee next undertook as part of its inquiry the study of just what protection against these costs now may be available to the individual American family.

Many plans are in existence in this country which seek to give protection against hospital and medical expenses. Last fall, and again after the commencement of this session, this committee has inquired into how extensive the protection afforded by this coverage might be. We have heard from the sponsors and administrators of many group plans, like Blue Cross and Blue Shield organizations, from private clinics, and from various insurance companies which write insurance on an individual or group basis.

We have been concerned with the cost of the protection given by these various plans, and more especially, with whether this protection extends to major or catastrophic medical and hospital expenses. We have been interested in the arrangements under these plans which have been made with the hospitals and physicians, the experience which has been gained under these plans, the difficulties which have been encountered, and suggestions arising from their operation.

Without here dwelling at length on our findings, it is evident to the committee that the American people are not now getting all the protection against the costs of medical and hospital care which our present state of economic and technical development seems to indicate they should be having.

EXPENDITURES FOR MEDICAL CARE

As private individuals, the people of this country are spending about $10 billion a year for medical care. Physicians' services cost them nearly $3 billion, and hospital care almost as much. Dental care, nursing, drugs, and appliances and all the other expenditures for sickness and health come to over $4 billion more. Included in this last amount is the net cost of the health insurance millions of people buy to protect themselves in advance against some of the costs of sickness.

On the average, families spend about 4 percent of their family income, or more than $200 a year, for all personal health services. But for any 1 family these expenses may be much less than this amount, or many times more than this average. Indeed, approximately a million families paid out amounts equaling or exceeding one-half of their family incomes, and 500,000 families paid out amounts equaling or exceeding 100 percent of their incomes in a recent 12-month period. These families have obviously not found a way to budget for medical care.

AMOUNT OF INSURANCE PROVIDED AGAINST MEDICAL CARE EXPENDITURES

A 1952 survey showed that premiums for all voluntary health insurance amounted to $2 billion and expenditures

for benefits to $1.6 billion. Through their own budgeting our citizens obtained 17 percent of their expenditures for medical care from their voluntary prepaid insurance benefits. At least 38 percent of all private expenditures for hospital care and 19 percent of all expenditures for physicians' services were paid by insurance benefits—table 1. It is obvious from these data that present health insurance, while doing a great deal, is not yet completely solving the problem of meeting hospitalization, and physicians' bills, on a budgeted basis for all our people.

Nor is health insurance doing as much as it might for those people who have had the foresight to purchase it. We learned that 81 percent of families who had insurance for hospital care and had a hospital bill had at least 60 percent of the bill paid by this insurance. However, only 54 percent of families with surgical insurance and a surgical bill had as much as 60 percent paid by their insurance. And only 18 percent of families with one or more kinds of health insurance had as much as 60 percent of all their bills paid by their insurance. It, therefore, appeared that the insurance in force today is in many instances covering only part of the hospital, surgical, or medical bills people incur.

GAPS IN ENROLLMENT OF THE POPULATION IN HEALTH INSURANCE PLANS

The committee examined with great thoroughness the existing health insurance; and it found that while many millions of people have one or more forms of this protection, many millions do not, explaining in part the gap between all private expenditures and insurance benefits for medical-care cases. For example, 92 million have hospitalization insurance, but 63 million do not. While 74 million have surgical insurance, about 81 million do not. Only about 36 million people have insurance against physicians' bills other than surgery, and most of these people can call on their insurance for doctors' visits only if they are in the hospital. Only some 5 or 6 million people out of a population of 155 million have anything approaching comprehensive health insurance—table 2.

The people counted in the above figures are predominantly urban, since 70 percent of those with hospitalization insurance are urban residents. The urban population of nearly 100 million represents 64 percent of the total civilian population. Sixty-three percent of the urban population, but only 38 percent of the rural farm population—and 52 percent of the rural nonfarm population—has hospitalization insurance. There were smaller percentages insured in the South and West than in the more urban Northeast and north-central geographic regions.

The relationship of urban living and a high percentage of the population insured was further indicated by the fact that only 33 percent of families whose main earner works in agriculture, forestry, and fisheries have health insurance, while as many as 90 percent of families whose income is earned in certain manufacturing industries have health insurance. Other data showed that the percentage of families with health insurance increased as income rose. It decreased with advancing age so that only 26 percent of those aged 65 and over had hospitalization insurance compared with 59 percent of the population under age 65, in 1952.

GAPS IN THE BENEFITS PROVIDED BY VOLUNTARY HEALTH INSURANCE

In the course of the hearings we became acutely aware of two kinds of gaps in currently available health insurance: First, it was not reaching many classes of people who would be helped by it; and, second, it was not providing adequate benefits for many families who already were insured. We heard a great deal of testimony on this second point. Many insurance policies paid only $5 or $6 a day for hospital care while the hospital charges amount to $15 or $20 or more a day. Hospitalization benefits were limited to a period of 21 or 30 days in some plans. Many fee schedules listing the amounts to be paid for surgical operations represented only 50 to 75 percent of the actual charges made by surgeons. Physicians' bills—nonsurgical—were paid only if the patient were hospitalized and then only after the second or third visit from the physician. In policies purchased on an individual basis, preexisting conditions, such as heart disease or diabetes or cancer, were excluded and frequently the policy was cancellable at the company's option. Participation in a group policy was lost on retirement, and the person of 65 years had difficulty buying an individual policy. Insurance payments were inadequate to cover the costs of X-rays, laboratory tests, and the like. Major medical expenses were not widely covered by existing insurance policies.

While we were hearing about deficiencies such as these in the benefits provided, we also heard about some health insurance plans which, here and there, or in one way or another, had experimented successfully in broadening benefits and providing complete insurance protection for one, or another, or all of the types of benefits usually provided by health insurance. We heard of successful experiments in covering rural people, in increasing benefits, in adding new forms of benefits, and so forth. These numerous experiments seemed to us a desirable beginning. We want to see them increased in order to provide the actuarial data for a sound expansion of voluntary insurance in all of the following areas:

First. Coverage of more people for more benefits.

Second. Coverage of rural people.

Third. Coverage of the self-employed and those not working in groups.

Fourth. Coverage of more older people.

Fifth. Coverage of more earners, even though their incomes are low.

Sixth. Coverage of more days of hospital care and more of the extras on the hospital bill.

Seventh. Coverage of more of the surgeon's bill.

Eighth. Coverage of the nonsurgical bill.

Ninth. Expansion of insurance providing coverage of major medical expense.

Tenth. Elimination of restrictions on preexisting conditions.

Eleventh. More adequate insurance against the costs of diagnosis.

TABLE 1.—*Private expenditures for medical care and voluntary health insurance benefits, 1952*

[Amount in billions]

Item	Private expenditures	Insurance benefits	Percent met by insurance [1]
All medical-care costs	$9.4	$1.6	17
Hospitalization	[2] 2.8	1.1	38
Physicians' services	[2] 2.9	.5	19

[1] These percentages are based on the data before rounding to the figures in billions shown in the 2 preceding columns.

[2] Figures includes $0.2 billion, the net cost of insurance purchased against the risk named.

TABLE 2.—*Extent of coverage of the civilian population by voluntary health insurance, Jan. 1, 1953*

	Number of people	Percent
	Millions	
Total civilian population	155	100
Total with some insurance protection	92	59
Comprehensive insurance	5	4
Hospital, surgical, and medical insurance	31	20
Hospital and surgical insurance	38	24
Hospital insurance only	18	12
Total with no insurance protection of any kind	63	41
Against hospitalization costs	63	41
Against surgical-care costs	81	52
Against medical-care costs	119	77

In summary, the growth of voluntary health insurance has been rapid and it currently provides protection for a large part of the hospital bills of our citizens and for lesser proportions of their medical bills. Nevertheless, gaps still exist in the enrollment of that part of the population which can be expected to prepay its medical-care costs and gaps exist in the protection people can purchase from available health insurance plans. We believe that a method of stimulating the insurance carriers to expand their enrollment of rural people, self-employed persons and those working in small establishments is in the public interest. Furthermore, a method of stimulating insurance companies to experiment in the directions indicated above, to improve benefits and the protection afforded is very desirable. H. R. 8356, a bill to improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services, offers a feasible method for the Federal Government to provide this stimulus by sharing to a degree the risks involved in these experiments, without interfering with private initiative and enterprise.

Mr. PRIEST. Mr. Chairman, I yield 7 minutes to the gentleman from New York [Mr. KLEIN].

Mr. KLEIN. Mr. Chairman, the title of this bill is: "To improve the public health by encouraging more extensive use of the voluntary prepayment method in the provision of personal health services." I venture to say that if this bill were to accomplish that purpose it would pass this House almost

unanimously. But, Mr. Chairman, my purpose in taking the floor at this time is to charge that this bill will not attain that objective.

What we are all interested in—I am, certainly—is something that will accomplish that purpose, or have that effect. I voted for the rule making this bill in order because I wanted the opportunity to have the bill explained to the people of the country so that they may realize why many of us are opposed to it. My position has always been that the medical costs of this country are too high. The average person, or a person earning less than $3,000 a year, cannot afford at the present time to pay for medical costs and services. This is no reflection on our doctors or pharmaceutical companies. All costs—rents, food costs, and so forth, have risen sky-high. One of the things that retards a man's physical recovery after he has been taken ill or after he has been operated on is worry about who is going to pay the doctor's bill or who is going to take care of his family while he is in the hospital or necessarily away from work. Many people die, and the recovery of many is retarded because of this worry. So I have always favored some plan of prepayment insurance—medical insurance of some kind, if you please—whereby one's medical bill, hospital bill, the care of the family can be taken care of while the individual is ill.

Mr. Chairman, this bill does not do this. This bill is, in my opinion, a fraud on the American people. If they think it does what it is stated to do, they should be made to realize that it does not.

Let me read a little colloquy that I had with the vice president of the Aetna Insurance Co. Incidentally, I may point out that many of these men from the insurance companies who testified allegedly in favor of this plan, when pressed admitted that they were opposed to it. Yet they were members of the committee that sponsored this plan. And they had to admit they were against it.

The gentleman from Mississippi [Mr. WILLIAMS] asked a very pertinent question a few minutes ago when he inquired of the gentleman from Tennessee who is for this bill. The AMA is against it although that is one reason, in my opinion, for being for it. Usually anything they are for, I am against; anything they are against, I am for. Unfortunately I find myself on the same side with them here. As I have often said, my admiration for the doctors of this country is very great—but I do not believe that the AMA represents the views of the doctors. Who else is against this bill? Well, the insurance companies that will have to administer it are almost all against it. I, too, would like to know who is for it. The enthusiasm in the committee was indeed very lukewarm. The only ones who are "hot" for it are the administration and the leadership of the Republican Party. They want a campaign issue—but I believe it will boomerang.

Let me read you a colloquy that took place between myself and Henry S. Beers, the vice president of the Aetna Insurance Co., who testified for the bill on page 219 of the hearings:

Mr. KLEIN. Can you tell me how this bill, if enacted, would help the large mass of the people in this country who earn less than $3,000 a year and who presently cannot afford to have medical insurance?

Mr. BEERS. Well, I could say it would have almost no effect in that field at all, Mr. KLEIN.

Let us go down a little further. I asked this question:

Do you think that the passage of this legislation would provide for medical or health insurance for those people who earn so little that they cannot afford the present rates of a voluntary insurance plan?

Mr. BEERS. No.

Now, something very interesting is happening here. What was the opposition before the committee? The tycoons of the insurance companies, the ones that are going to administer this, are opposed to it. Yet, amazingly, a little conference was called at the White House, and if you will look at the report, on page 16 you will find the names of the presidents of the largest insurance companies in this country, who were called down to the White House, and lo and behold, after that session with the President, or whoever was there, they wrote letters advocating the passage of this bill. I am certain that they were not physically coerced down at the White House, but there is more than one way to coerce people—especially big-business men.

What is happening here, my friends? Nobody really wants this. I do not believe that the other body will take any action when and if it gets over there. I believe that the chairman of this committee and almost every member of this committee wants some form of medical insurance that will help the poorer people of this country, but this bill will not do it.

Mr. MARSHALL. Mr. Chairman, will the gentleman yield?

Mr. KLEIN. I yield to the gentleman from Minnesota.

Mr. MARSHALL. Could the gentleman tell me whether any medical group, doctors, or nurses, have testified in favor of this legislation?

Mr. KLEIN. Yes. I believe that the Blue Cross—and if I am not correct, the chairman will correct me—testified for it, and I say again that this group of insurance companies and Government representatives that brought out this plan—they appeared before the committee in favor of the plan. But when they were pressed individually I think most of them said they themselves or their own companies were opposed to it.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield?

Mr. KLEIN. I yield to the gentleman from Illinois.

Mr. SPRINGER. I believe I am correct—and, if not, I stand corrected—that the Senate has reported the bill out and it is ready to be heard at the present time.

Mr. KLEIN. I have enough trouble keeping up with what the House does. I cannot keep up with what the Senate does.

Mr. SPRINGER. I think that is true, and I will state it for the record. In the second place, I believe your largest insurer in this group is the Blue Cross group. Is that not true? They said they would go ahead and expand their insurance and do everything they possibly could to make this a success. Is that not the testimony?

Mr. KLEIN. Yes. But I think they could do it themselves. They do not need Government money. What we are trying to do with the $25 million is to get the big companies to go out with a plan where it is not profitable for insurance companies to operate, and encourage them. They themselves have said it would not work.

Mr. WILLIAMS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. KLEIN. I yield to the gentleman from Mississippi.

Mr. WILLIAMS of Mississippi. The Blue Cross people cannot even agree among themselves. I have a letter on my desk from the Mississippi Blue Cross people in violent opposition to this bill.

Mr. WOLVERTON. Mr. Chairman, will the gentleman yield?

Mr. KLEIN. I yield to the gentleman from New Jersey.

Mr. WOLVERTON. The gentleman asked what doctors testified in behalf of the bill. Of course, with the limited time I had, I could not give the entire list. But, I think I can give one that is indicative of the rest. Dr. Paul B. Magnuson, who was appointed by President Truman as chairman of the Presidential commission, testified strongly in behalf of this cause.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. PRIEST. Mr. Chairman, I yield 7 minutes to the gentleman from Texas [Mr. THORNBERRY].

Mr. THORNBERRY. Mr. Chairman, this is a bill which comes to the floor of the House with more lack of enthusiasm on the part of the committee sponsoring it than any bill that has ever come to the floor of this House. I want to state—and I want to be corrected by any member of the House Committee on Interstate and Foreign Commerce present if I misstate the facts in any way with reference to the consideration given this bill by that committee—it is true that the committee had long hearings, not only on this bill but other bills that were before our committee affecting health. It is true that we had extensive hearings upon a bill which was introduced to carry out the principle of reinsurance. However, the Committee on Interstate and Foreign Commerce in executive session devoted only 1 hour to a discussion of the present bill that is before this committee and reported the bill with more reservations on the part of the members than has been true of any bill since I have been a member of the committee.

I am here to speak about the integrity of committee consideration by a committee of this House and the integrity of the membership of the House of Representatives of the Congress of the United States as we are called on to give consideration of a far-reaching bill.

On Thursday we had been considering for action H. R. 7700, which is a controversial bill affecting health. On Thurs-

day a discussion had been had as to whether or not we would dispose of H. R. 7700. After an eloquent plea was made that this was a great committee which had a tradition of going fully into consideration of a bill, and a plea that the membership of the committee could work out a bill that would receive the endorsement of the committee, the committee was disposed not to take action on that bill. On Friday morning, last Friday morning, the members of this committee received a communication from the chairman stating that the leadership had informed him that it was desired that this bill, H. R. 8356, be reported to the floor of the House so that it could be taken up at the first of the week.

Mr. WILLIAMS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. THORNBERRY. I yield to the gentleman.

Mr. WILLIAMS of Mississippi. The gentleman might tell the House also that in the consideration of H. R. 7700 on the day that he mentioned, 92 amendments were pending, all being more or less technical amendments to the bill; that the leadership on the committee was so determined that we give a full and complete consideration to each and every one of these amendments, they objected to putting them en bloc and now we have 92 amendments before the committee for consideration.

I am wondering why we did not give the same kind of thorough and meticulous consideration to this proposed legislation.

Mr. SPRINGER. Mr. Chairman, will the gentleman yield, since he has raised a point of privilege of the House?

Mr. THORNBERRY. I yield to the gentleman from Illinois.

Mr. SPRINGER. I should like to make this statement—and I shall stand corrected if I am wrong—this bill was discussed on many other occasions besides this 1 day; is not that true?

Mr. THORNBERRY. I will get to that in a minute.

Mr. SPRINGER. If the gentleman wants to defer that, I am willing to withdraw my question at this time.

Mr. THORNBERRY. I believe the gentleman was not there Friday morning and I think he will withdraw his question, when he learns the facts. Let me state the facts.

Mr. SPRINGER. I am glad to be corrected if I am wrong.

Mr. THORNBERRY. If the gentleman would not be in too much of a hurry; that is the trouble about this bill, everyone appears to be in a hurry to reach a conclusion on it without proper consideration of its provisions.

On July 2, there was introduced a committee print of the bill containing 13 substantive amendments to this bill, which no member of the committee had discussed. Oh, there were discussions of the reinsurance principle. I said that to begin with, in connection with the bill originally introduced by our distinguished chairman, and then of the bill that the Department of Health, Education, and Welfare urged. But so far as the amendment, which the rule makes in order for discussion today, is concerned the committee never discussed it. It was not until Friday morning, when we got the committe print, July 2, 1954, that the committee saw or discussed it.

Mr. SPRINGER. I think that is true, but this bill is practically the same bill, is it not?

Mr. THORNBERRY. If the gentleman will read the committee report to which he referred, which says that the substitute includes 13 substantive changes from the bill as originally introduced, he will see what I am referring to.

Mr. SPRINGER. Will the gentleman point out the substantial changes?

Mr. THORNBERRY. I will be glad to, but I thought from the gentleman's statements that he understood the substantial amendments to the bill. I am not going to discuss that at this moment, because I am going to go a little further into the matter of the consideration that was given to this bill.

Mr. SPRINGER. If the gentleman will proceed, I shall be very glad to listen.

Mr. THORNBERRY. Then the committee met approximately at 10:30 and there was discussion of this bill. Every member of the committee recognized the position we were in. I do not want to disclose what anybody else had to say in executive session, but I think it is fair to say that I pointed out that this committee had considered bills far simpler than this bill—bills which had been read line by line and worked on line by line. I think the Members of this committee and of this House know that previously when this great Committee on Interstate and Foreign Commerce has brought a bill out, it has come here with the full assurance that we had discussed fully the provisions of the bill and that we had come, more or less, to some agreement on the bill. I state now, I hope the day will never come again when this great committee will take a bill of this type and, because of a direction from somewhere else, report it out with as little discussion as this bill has received. You heard the distinguished gentleman from Virginia [Mr. SMITH] tell you what had happened when the bill came to the Committee on Rules. I think the Committee on Rules took the bill up late yesterday afternoon, and now the bill is before this House. There are a great many objections to this bill. Someone has said that the Blue Cross and the Blue Shield companies are for the bill. The Blue Cross-Blue Shield plan companies of Texas are opposed to the bill. There has been a great deal of discussion about who has testified in favor of the bill or against the bill.

A statement has been made here about the position of the medical profession on this measure. I have heard from many fine doctors in the State of Texas. They tell me that they fear the bill and that they are opposed to it. I am convinced from what they tell me that they sincerely feel that this is a bill which would have the Federal Government go further into the field of health insurance than they would like to see.

Whatever may be the arguments of those who sponsor the bill here, it is a bill which should have had greater consideration in executive session in the House Committee on Interstate and Foreign Commerce than it has received. I know that the bill comes to the floor of this House with a greater lack of enthusiasm on the part of the members of the House Committee on Interstate and Foreign Commerce than has ever been evidenced by them on any bill reported by our committee since I have been a member. I feel very strongly that because of what has occurred this bill should be returned to the committee.

Mr. WOLVERTON. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I take this time in order to make a reply to the statement that has just been made by the gentleman from Texas. This bill was introduced in January of this year. Hearings upon it were held on March 24, 25, 26, 30, 31, April 1, 5, 8, May 5, 6, and 7. Anyone who reads the record of those hearings will never raise the question as to this bill not having the fullest possible consideration. If you read that record, you will find every question was put that could possibly be thought of by the members of the committee. There were long periods of questioning. At my instructions, the staff of our committee was requested to give consideration to the questions which had been raised, and were asked to prepare amendments wherever possible which would coincide with the meritorious questions which had been raised by members and witnesses. That took a period of 2 months. At the end of that time the bill was brought before the committee and no amendments were offered in the committee. Consultations with Members were held and with departments of Government, legislative draftsmen, and others who were interested in the legislation, including such as the Blue Cross and American Hospitalization, and so forth. To the end, it was hoped that we would be able to prepare a bill to which there could be no reasonable or justifiable exception taken. When this bill was presented before the committee on the days to which the gentleman referred, every opportunity was given to any Member on either side to present any amendments which they saw fit. But the opportunity was not taken advantage of. The opportunity is here. If this bill is not what it should be, then let us make it what it should be by the introduction of the necessary amendments, if there be such.

Mr. PRIEST. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Chairman, I was wondering when the rule was presented why it was necessary that the rule waive points of order against this bill, and I have patiently waited for an answer to the question which was asked during debate on the rule by the gentleman from Virginia [Mr. SMITH] as to why it was necessary to rush this bill out at this time and push it through the House.

I think I have discovered the answer. Not being a member of the majority party, I will dare to state it. I think this is good Republican propaganda, but only Republican propaganda. The title of the bill, "To Improve Public Health,"

is something you will be able to talk about during the fall campaign, trying to fool the voters. But I doubt whether you will get away with it, because there is no improvement of the public health in this bill.

The strange thing about it is, and I have compared it very carefully with the record, that of the 17 representatives of insurance companies who attended at the White House on May 17, after the hearings had been closed—the last day of the hearings was May 7—when they attended some 10 days later at the White House and issued a statement which is now given to you as supporting the bill—not one of those persons came before the committee and submitted himself to examination by members of the committee as to the merits of this bill. If you will read carefully the statement which appears in the report over the signatures of those insurance company representatives, you will find that all they have done is to endorse the principle of the plan, and they have reservations as to what is in the bill.

If you wanted to improve the bill, in my opinion what the committee should have done is to have called those representatives before the committee and let them submit proposed amendments and discuss them before the committee and let them answer questions which could have been put to them by the membership of the committee.

Dr. Magnuson has been quoted as an authority supporting the bill. His testimony is in the record. If you will read his testimony carefully, you will find that while he, too, endorsed the principle, he tells you that this bill will not give to the masses of the people a single dollar of insurance.

You are told this is a reinsurance plan and it is to be a voluntary plan, and that the insurance companies have not heretofore done anything about the matter. Somebody has forgotten about the testimony before the committee. Refer to page 113 of the hearings. You will find there a list of 18 different companies, private insurance companies, who are today selling this very reinsurance to those who want it. There is not a word of testimony in this record, and nobody can produce a single statistic or fact showing that any company that will write an insurable risk for health or disability or accident insurance cannot get the risk reinsured if they want to reinsure it. According to your own record before the committee—see page 113—there are over $2 billion of private insurance company assets in companies now writing reinsurance of the kind you want to write into this bill with United States subsidy, to administer it for 5 years at taxpayers' expense.

Let me make this one further point, with the billions of dollars controlled by all of the private insurance companies in this country, there is not a single reason you can give why they cannot contribute a fund of $25 million for this kind of reinsurance if they need it. They do not need it when they have $2 billion of assets already at work backing up their own reinsurance program.

Mr. HESELTON. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I yield to the gentleman from Massachusetts.

Mr. HESELTON. I am sure the gentleman is aware of the fact that over half of the insurance of these companies is confined exclusively to cases of polio.

Mr. MULTER. Every one of these companies I referred to which are listed in your record writes health and accident reinsurance, and if a risk is not insurable it is not reinsurable. The testimony shows what the fact is, and no one in the insurance business will say "No" to it. If it is insurable it is reinsurable.

Mr. YOUNGER. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I yield.

Mr. YOUNGER. The gentleman spoke about the billions of dollars the insurance companies have.

Mr. MULTER. Yes.

Mr. YOUNGER. If you realized the same billions of dollars increased by the billions of dollars that the banks and the savings and loan associations have, why did you then vote for the FHA insurance?

Mr. MULTER. For 6 years I have been alone in my committee and on this floor saying it is time you gave that back to the private enterprise of the country. That insurance, too, belongs in the field of private enterprise, and our Government has no right in that business.

Mr. WOLVERTON. Mr. Chairman, will the gentleman yield?

Mr. MULTER. If I have time left, I yield.

Mr. WOLVERTON. Did you vote for the Federal Deposit Insurance Corporation? And if so, why, when there were so many billions of dollars in the banks?

Mr. MULTER. Now, please—FDIC has nothing to do with this; it is not a similar program at all. The Federal deposit insurance is paid for by the banks entirely out of the earnings from the depositors' moneys.

Mr. WOLVERTON. And this will operate in the same way.

Mr. MULTER. It cannot possibly operate like FDIC.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. WOLVERTON. Mr. Chairman, I yield 5 minutes to the gentleman from Maine [Mr. HALE].

Mr. HALE. Mr. Chairman, I rise in support of this legislation, H. R. 8356, which as the Committee knows has as its purpose the establishment of a health reinsurance program.

The bill is one of a number of items on the President's health program. The idea of the bill is that private insurance organizations will take more risks and experiment more widely in health insurance programs if the Government will reinsure them for so doing.

The bill bears an obvious analogy to that providing for the insurance of bank deposits. With respect to that legislation, for example, it might have been possible to argue that good banks did not need to be insured and that the Federal Government could not afford to insure bad banks. There may be a certain amount of crude logic in such an argument, but it did not prevent the passage of the bank deposit insurance legislation, and I do not believe anybody today would favor the repeal of the legislation which provides for the insurance of bank deposits.

I wish now to devote myself very briefly to the argument advanced by the gentleman from Texas a few minutes ago. It is true that the discussion of this bill in the executive session of the committee was not prolonged, but we spent an enormous amount of time in hearings on the bill; and when the time came to vote on the bill in the executive session yesterday there was no protest from anybody that I heard that we had given insufficient consideration to the bill in executive session. Several members of the committee reserved the right to oppose the bill on the floor, which right they had as a matter of course and which is the inherent right of any member of any committee who differs from the majority of the committee.

The insinuation that this bill has been railroaded implies a criticism of the fairness of the chairman and a criticism of the fairness of the majority of the committee. I do not think such criticism is well founded. If there had been any plea that any member of the committee wanted further discussion of the bill, I am sure the chairman would have hearkened to it, and I myself would have been very willing to discuss the bill further if I had thought there was any need of further discussion.

This is a perfectly plain, straightforward piece of legislation. Either you are for it or you are against it. If you do not believe in the Government's entering into any kind of insurance plan or reinsurance plan for the benefit of the health of the people, then you ought to vote against the bill. If you do feel that maybe there is a place where the Government can function in a purely voluntary health-insurance program, I think you will vote for this bill. Perfectly frankly, it is an experimental measure, an experiment which seems to me to be worth trying. I do not believe anybody can be harmed by it.

I was impressed by a letter which I received only yesterday from the Union Mutual Life Insurance Co., which is the largest insurance company in my State. They had this to say, which I think is very interesting in view of some of the criticisms I have heard of this legislation:

> As things are now it is virtually impossible for any but the largest companies to underwrite untried risks on an experimental basis. The President's plan of voluntary reinsurance would, we feel, give the medium-sized companies, or even smaller companies, a better chance to serve the insurance-buying public on a broader and sounder basis. We also believe that with the larger number of companies who would thus be able to offer these coverages, many of whom are located in less populated areas of the country, a substantial number of presently uninsured citizens could acquire health insurance protection and service.
>
> We, of course, are quite aware of the danger of Government in the insurance field, but we prefer this voluntary method of meeting the needs of those Americans who are still uninsured though they are economically uninsurable to the other methods that have been proposed in the past. For these reasons we support the President's bills.

Mr. PRIEST. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS of Mississippi. Mr. Chairman, first, I would like to concur in what the chairman of my committee, the gentleman from New Jersey [Mr. WOLVERTON], said a few minutes ago in outlining the consideration which had been given to the principle of health reinsurance by our committee. I concede that the committee held endless hearings on this subject and that we had several executive sessions. I am sure that the information he gave the House as to the dates on which those sessions were held is correct. However, what our chairman did not tell you was that on July 2 a committee print was made and presented to the committee on the following Friday. That was last Friday. That was a committee print that we saw for the first time; and it provided for striking out all after the enacting clause and substituting 57 pages of legislation in the form of an amendment to the bill.

I stayed with the committee for about 30 minutes, then had to go to my office to answer a phone call. After I completed the call, I started back to rejoin the committee, only to learn they had passed the bill and adjourned. So what the gentleman from Texas [Mr. THORNBERRY] told you a few minutes ago about the lack of consideration given to this specific bill by the committee is definitely true; and I would wager that no member of the committee had an opportunity to read word for word the bill before it was presented to them for a vote, with the possible exception of the chairman.

Mr. Chairman, I have no intention of speaking at length on the bill itself. After all, when you have said nothing about this bill, you have said all there is to say. Shakespeare, 400 years ago, wrote a play about this kind of legislation and he entitled that play "Much Ado About Nothing." The gentleman from Tennessee [Mr. PRIEST] who stated he was going to go along on final passage of this bill spoke with less enthusiasm than any supporter of a piece of legislation I ever saw.

As a matter of fact, there has been no great demand for this legislation, other than from a few politicians; yet there is widespread opposition, as you may know by the telegrams and letters that you have received from your districts.

To hear some of these fellows tell it, why, 150 million American people have been clamoring for the passage of this legislation. I am sure of that, because now that the legislation is before us, we have been flooded with telegrams from all of them—that is, all except 150 million. The fact of the matter is that there is no real or apparent demand for it. I have not received a single communication in favor of the legislation. Others tell me they have not either. So, who really wants it? I would like to know.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Mississippi. I yield to the gentleman from New Mexico.

Mr. FERNANDEZ. I am inclined to agree with the gentleman that this probably would not do any good, but can the gentleman tell me whether or not the witnesses pointed out where it does any harm?

Mr. WILLIAMS of Mississippi. Let me say to the gentleman that I took my youngster out to the park about 2 months ago, and she saw them selling cotton candy, all pink and pretty and inviting. Naturally, she had to have some. That cotton candy was pretty. It tasted sweet and smelled sweet, but when she tried to bite into it she found nothing there. This bill is like that cotton candy, all air and no substance, but costly.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Mississippi. I yield to the gentleman from New York.

Mr. MULTER. This program, if enacted, will cause expense to the United States Treasury for the next 5 years.

Mr. WILLIAMS of Mississippi. I think that has been shown conclusively on the floor. The gentleman is absolutely right.

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Mississippi. I yield to the gentleman from Alabama.

Mr. ANDREWS. I would like to ask the gentleman: What is the purpose of this bill? As I understand, there is nothing compulsory about it.

Mr. WILLIAMS of Mississippi. I wish I knew. I have been trying to find out the purpose for the last year, and I cannot find out, in spite of having been exposed to long and almost endless hearings.

Mr. ANDREWS. The rates of insurance paid by policyholders will not be reduced. Is that not true?

Mr. WILLIAMS of Mississippi. No; they will not be reduced.

Mr. ANDREWS. Why the reason for this bill, then? Whom will it help?

Mr. WILLIAMS of Mississippi. I do not know, but I have my opinion. I think the real reason for this bill is that there is an election coming up next year. As we all know, there are a lot of people in favor of socialized medicine and a lot of people who are bitterly opposed to socialized medicine. Even now, I can see these spokesmen for the administration, the great Republican Party of free enterprise, standing on street corners in New York or Chicago or Detroit or any of the big cities where socialized medicine is popular, telling the people, "Look what we Republicans did. We did what the Democrats couldn't do. We gave you socialized medicine." Then I can see others going down South and out in the Midwest, where socialized medicine is unpopular, telling them, "Why, folks, look what we Republicans did. We passed a bill that will eliminate the danger of socialized medicine forever." Do you not know that is what is going to happen? Sure, they can argue on either side. And, the reason they think they are going to get by with it is because there is not enough time between now and election to put it into effect.

Mr. Chairman, the only real good that can possibly come from this bill is that it will keep at least $25 million in the United States, which may be all we will have left after the foreign-aid spenders get through with us.

Mr. WOLVERTON. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. DOLLIVER].

Mr. DOLLIVER. Mr. Chairman, I find myself in a rather unhappy position today; to rise in opposition to a bill which was reported by the committee of which I am proud to be a member. I find myself especially unhappy to be arrayed against my good friends on the committee, the chairman and my colleagues on both sides. The fact is, to bare my soul to you just a little, Mr. Chairman, I have tried very earnestly during the course of the hearings to bring myself into a position to support this legislation. I very meticulously and regularly attended all the hearings on the legislation from the very beginning, and I am afraid sometimes I was perhaps too active in examining the various witnesses that appeared before us.

Having now stated that I am opposed to the bill, I think it is only fair for me to state the reasons for my opposition. It is not because of the manner in which the bill was presented to the House. I voted for its being reported to the House, making the reservation of my right to oppose it on the floor.

But I have a number of reasons for my opposition. In the first place, this is an invasion of private enterprise and private industry. As has been pointed out here by other Members of this body, there is ample resource in the insurance business to reinsure all the health insurance programs that are now in existence, if that were desirable. But the fact is that there is no real need for reinsurance of health programs.

For example, take the Blue Shield program which, in my State of Iowa, is an organization operated by the medical doctors of the State. They agree, in the Blue Shield, that they will take care of the sicknesses of their subscribers for an agreed compensation. If they find at the end of the year that the premium payments are not sufficient to carry the load, then under the agreement under the Blue Shield the doctors take 50 percent or 60 percent, or whatever the percentage may be, of their compensation. That kind of thing is characteristic of the Blue Shield plans all over the country.

Here, in the District of Columbia, I was told when the Blue Shield first came into existence, the doctors in this area took 60 percent of their fees out of the fund in order to put it upon a sound financial basis. So, from the standpoint of the Blue Shield, there is no necessity for this kind of thing. They reinsure their own risks. Under that plan no advantage would be taken of this measure.

I do not have the time to go into all the details of various health plans, but there is instance after instance in this record of testimony that I wish I had the time to give you. I have nine different places marked on the outside of this book, where witness after witness said, "Even if this goes into effect, we will not take advantage of it, because we do not believe it would be of any benefit." So the result would be that you would inject the

Federal Government, through this program, into an area where it is not needed and the only people who would take advantage of it would be those who would be considered unsound in taking over risks of health insurance.

Mr. SMITH of Virginia. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. SMITH of Virginia. Does the gentleman think we should pass a bill of the magnitude and importance and far-reaching elements of this bill when the gentleman himself does not even have time to answer questions about it or explain to the House what it is all about?

Mr. DOLLIVER. I am trying to do that very thing, I will say to my colleague. I do not believe this measure is necessary. I think it invades private industry.

I have a letter in my hand which comes from one of the reinsurance companies of the Midwest. It is a five-page letter. This company is mentioned in the hearings with great favor by Mr. Faulkner who represented the United States Chamber of Commerce in opposition to this bill. He says this company is one of the leading reinsurance companies in the country. They are perfectly willing and able and are anxious to reinsure all the kind of risks that are reinsurable.

Collateral to that, of course, is another argument against the bill; that this is a complete waste of public funds. It is acknowledged to be an experimental program. Has it come to the point that the United States Government is to experiment with so important a thing as the public health? The people must depend upon their doctors to cure them of the various illnesses that afflict them? I do not think experimentation is justified. I think we can find a lot better use for the public money than to put it into this kind of enterprise. To me at least, it means an utter waste of public funds. That is a serious charge.

But I can see no use for putting up a fund of $25 million, which will either not be used at all by the legitimate insurance people of the United States or else will be dissipated by the improvident and unsound companies which write this kind of insurance.

Mr. KLEIN. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. KLEIN. Does not the gentleman think that the camel of socialized medicine will be getting his nose in the tent, if we pass this legislation?

Mr. DOLLIVER. I do not see any such danger of a camel getting his nose in the tent and bringing about socialized medicine. I see no such danger.

However, I should add at once, and this is another reason for my opposition to this legislation. The medical profession as a whole (there are some exceptions to be sure), but the medical profession as a whole, particularly in my own State, where I have received many letters to substantiate this viewpoint, is opposed to this legislation. They see no use for it. They feel that it is a threat and a trend toward socialized medicine. I do not share that view, but the fact remains that the medical profession by and large are opposed to this measure.

It is my opinion, if we are going to improve the health of the American people, we must have the cooperation of the medical profession. We may have some criticisms to offer to the various doctors and to their societies and associations. But fundamentally, those are the people who know how to cure human diseases and, if we do not go along with them, then our efforts are futile.

Mr. BELCHER. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. BELCHER. Does the gentleman think if we start this thing with $25 million, it will ever be confined to $25 million or will it not just continue and mushroom up like all these other noble experiments that we have tried?

Mr. DOLLIVER. Of course, I cannot look into the future any more than the gentleman can. But it would seem to me that if this program is not used, it will die aborning, if the reputable insurance companies do not want to use it. In that event, it will never be used, and it will be a total and complete waste of public money and public effort. If the reinsurance is used by improvident and unsound plans, then the thing you are talking about probably will take place and American taxpayers will be called upon to bail out a lot of those unsound insurance companies.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. HALLECK. I want to say first of all that we always enjoy listening to the gentleman. I am sorry on this occasion that I find myself in disagreement with him. But, I thought I might properly at this time make the observation which has impressed itself upon me, as I have listened to this debate. It is that some of our friends who were for the old Ewing plan are unhappy about this because they see in this possibly something that might be effective and helpful within our concept and ideals of medicine, as we have known it—so they are against it. Then, of course, there are some who believe that the Government has no responsibility in a field like this at all. So they are unhappy that even this very small start is being made. It just occurs to me that possibly we are close enough to the middle here that we can do something that might really be helpful and useful to the Nation as a whole.

Mr. DOLLIVER. I dissociate myself from either of the groups the majority leader the gentleman from Indiana [Mr. HALLECK] mentions. I do not favor socialized medicine, nor do I feel that the Federal Government has no responsibility in the field of health. But I do say that this bill will have no appreciable or helpful effect. On the contrary, it is a futile and very probably harmful effort, inimical to the best interests of the American people.

Mr. PRIEST. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. ROGERS].

Mr. ROGERS of Florida. Mr. Chairman, I think we should refer to this legislation as "the noble experiment," for it is. It is a noble experiment. It has a good purpose. It is something that might prove beneficial to a portion of our citizens, at least. This is not partisan legislation. May I emphasize that when the welfare of the country or the individual is involved or in question, partnership and party politics should be thrown out of the window and true Americanism substituted therefor, and it is on this basis that we should consider this bill.

Now, let us see just what we are doing. We are establishing a Federal reinsurance fund in the sum of $25 million. That fund can be used for only one purpose; that is, for reinsurance of companies who are in the business of insuring the health of the people of this Nation. The proposals contained in this legislation itself are several, and here they are:

It is voluntary for each carrier. No carrier of life insurance has got to come to them unless they want to. It is absolutely voluntary.

Regulation of carriers remains with the States. It does not make legislation as far as the States are concerned.

It operates only where comparable reinsurance is not available. That is one of the few things that appeals to me, because I am against this Government being in every kind of business. I always have been, and I always will be. If there is any place where these health-insurance companies can go and get the money, they should be made to do it, and under this bill they will be made to do it. Just like the Reconstruction Finance Corporation: If the industry could get the money from private enterprise, this Government says, "Stay away from us." The same thing applies here. If you can get reinsurance, you must write your insurance on a sound basis. This does not authorize insurance companies to lower the standards. A man who cannot get insurance now, when this bill is passed cannot get it. It may extend the coverage to some extent and permit them to write more insurance and give more benefits to more people, but that standard is there, and we must observe that. Otherwise you cannot get reinsurance.

When Mr. Miller, representing some insurance company was before our committee, I asked Mr. Miller if he did not think it best that if the Government would set up a lending fund it would be better, a lending fund to the various insurance companies for the purpose of their setting up a fund for reinsurance purposes themselves. If they could do that, well and good. But they might not do that.

Now, there is not supposed to be any loss in the operation of this legislation. The carrier, if there should be any loss, shares in the loss. If I had a policy on our distinguished chairman, I being in the insurance business, then I could apply to the Secretary of Health, Education, and Welfare to assist me in carrying that risk for a premium. Understand that for every reinsurance policy that is issued a premium is paid into this fund, just like any other reinsurance, and the carrier is still a coinsurer.

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. WOLVERTON. Mr. Chairman, I yield 10 minutes to the gentleman from Massachusetts [Mr. HESELTON].

Mr. HESELTON. Mr. Chairman, there have been so many statements made with reference to this bill which I do not think are in accordance with the testimony or the facts that I think my best efforts can be made in attempting to point out certain of the fallacies that have been presented heretofore.

My very good friend, the gentleman from Iowa [Mr. DOLLIVER], who sits beside me on the committee, quoted from a letter from the Employers' Reinsurance Corp., of Kansas City, signed by the president of the corporation, Mr. Sanford Miller. But in that letter is the answer to a question that has been asked me several times this afternoon. The point has been made that insurance companies could do this by themselves if they wanted to. Mr. Miller said in part this:

> It may be of interest to you that the largest portion of our reinsurance does not pertain to medical and hospital benefits but to other types of coverage such as coverage of loss of time. The reason for this, of course, is the very large loss which a primary carrier can sustain where it becomes obligated to pay a large monthly indemnity to an insured over a long period, possibly the lifetime of the insured.

There is the real reason for this program and why the Government needs to get into it in this fashion. May I repeat again what the chairman has said and what others have said in favor of this bill: This is a very limited, carefully guarded form of reinsurance following the precedent of the FDIC which was so successful; and I want to assure you that any suggestion that it would be taken advantage of by those persons who were not reputable or who did not have standing in the insurance field is fully countered by the letters which have been sent to the committee and which are in the committee's report and in the record.

In the matter of the suggestion that this would not be utilized—I think the gentleman from Iowa [Mr. DOLLIVER] made that suggestion—I would like to quote a paragraph from the letter of the president of the Connecticut General Life Insurance Co. of Hartford, Conn.:

> Some have stated that the reinsurance authorized by the bill would be little used. This is a premature judgment and one not possible of advance determination. The probability is strong that if this legislation is passed by the Congress, it will be used and will be useful to the country.

I can assure you, if you do not happen to know, that that company is considered to be one of the fine outstanding life insurance companies in the country and in New England.

Some suggestion has been made that there is practically nobody for this bill other than President Eisenhower and Mrs. Hobby. The report will indicate who is for the bill, and they certainly constitute a reputable group of citizens. Mr. William McNary appeared before the committee in his capacity as chairman of the Council on Government Relations of the American Hospital Association. He endorsed the bill and said it would be taken advantage of by the Blue Cross and the Blue Shield. I inquired of him how many members there were in the Blue Cross as of last December. Mr. McNary said:

> As of December 31 it was just a few thousand short of 43 million in the United States.

That is a fairly large group of people who would be interested in better coverage if it could be furnished to them.

Then I asked him how many hospitals there were in the American Hospital Association and he said:

> I think the figure is about 5,500.

Then I asked him if he could tell me the number of physicians interested in that particular program and the answer was that there were in the neighborhood of 100,000.

Statements made in particular by the chairman of the Committee on Interstate and Foreign Commerce and by the gentleman from Tennessee [Mr. PRIEST] are statements that will fully justify you in accepting the fact that this is a sound recommendation by this administration in the best interests of the health of the people of this country.

Mr. Chairman, I would like to refer to a most significant coincidence, and I would not inject this into this particular phase of the debate had it not occurred on the floor today. Among the most interesting developments here was that the gentleman from New York and the gentleman from Mississippi took the floor and practically admitted that this bill does have a very great appeal to the American people. I can assure you, Mr. Chairman, that this bill does have such an appeal to the American people, a very real appeal, that has been evidenced to this committee over a long period of time. I regret very much any suggestion that was made that there was any unfairness on the part of the chairman in the way this bill was handled. I was present and over a quorum of the committee was present at all times. The chairman repeatedly stated that he did not want to shut anybody off from any argument they wanted to make or from the offering of any amendments they wanted to offer.

This bill should receive the most careful consideration. It is true it has been changed in several aspects, changed I think for the better. Certain recommendations came from State insurance commissioners and we have placed safeguards in the bill so that there is no question about interference with State supervision.

Several questions have been asked during the course of consideration of this matter. I would like to tell you what some of them are and offer to you what I think are the answers.

Who will be helped by this program? It is designed to help those persons who now want and can pay for but cannot readily obtain insurance. Those are people in the rural areas, employees of small plants, the self-employed. They simply cannot qualify for this type of insurance. That is also true of people in the upper age brackets with preexisting conditions so that they cannot qualify.

The question is asked: Is this a subsidy to the insurance companies? Definitely not. Carriers will pay premiums into the fund at rates designed to insure solvency of the fund and liability is limited to the fund. The only Federal contribution is for the Administrator's expense during the first 5 years for an important activity that we should have gone into long ago—that is, the study and investigation and research into this very important field.

Another question: Is this putting the Government in the business of insurance? Does it put the Government in the insurance business? No. Commercial companies and voluntary nonprofit associations will continue to be the primary carriers. Furthermore, the bill specifically provides that if private insurance is available at comparable rates Federal reinsurance cannot be approved. The gentleman from Florida endorsed that.

Is the program likely to result in Federal control of the insurance business? No. State insurance authorities will continue to regulate the insurance business. In the bill the Secretary is instructed to do certain things, especially in determining financial responsibility, and so forth.

It should be again stressed that this is a voluntary program and no carrier needs to apply for it unless he elects to do so. If there is no Federal reinsurance the carrier is subject to none of the requirements applying to reinsurance plans. Furthermore, the Federal regulations apply only to that part of the carrier's business that is reinsured.

There is one important feature that I would like to cover. It has been suggested by the gentleman from Tennessee that he would have preferred standards if they could have been written into the bill. I started off myself with that point of view. Why is it the bill contains so few standards and gives so much administrative discretion to the Secretary? Discretionary authority is contained in the bill because of the rapidly changing character of health insurance. Health and accident insurance is a relatively new venture in this country. It would be exceedingly difficult, if not impossible, to write detailed standards into the legislation. Furthermore, standards are likely to need revision frequently. It is important to note, however, that the bill contains abundant policy guides as to benefit standards. They will be found in section 303 (a).

Is there any compulsion under the terms of the bill?

Answer: There is no compulsion under the plan. It is up to the carrier to determine whether or not application for reinsurance will be made.

The insured person will continue as before to purchase his insurance where and as he sees fit, in the amount for which he is prepared to budget from his family income.

Why is a Federal reinsurance program needed?

Answer: To stimulate experimentation looking to the development of better coverage for more people at a price

they can afford to pay. This is particularly important in the case of the aged, those living in rural areas, self-employed individuals, and employees of small firms. On the benefit side, better protection against the expenses of long-term illness is essential. Experimentation is inherently hazardous, and by sharing the risk the chances of financial disaster for individual carriers are sharply reduced.

Incidentally, a reinsurance program will focus public attention on the need for and desirability of prepaying for the costs of medical care.

What is the basis of the $25 million figure?

Answer: It is an estimate of the amount of capital that might be needed to get the reinsurance system started. The figure finally selected seemed to be a reasonable estimate.

How can the system possibly be self-supporting and still help the insurance companies?

Answer: The Secretary will have sound actuarial advice in setting reinsurance premium rates so that the system will be self-supporting. It is believed that the rates will be reasonable and attractive to insurance companies and that they will be encouraged to be more venturesome by reinsuring any unusual risks they may take in expanding or extending benefits.

How will the bill encourage the carriers to experiment?

Answer: The plan's success is entirely dependent on the ingenuity and voluntary action of insurance carriers. If carriers request reinsurance of plans to extend benefits to cover such items as you have mentioned, and if the plans are sound and the carriers meet the standards for reinsurance, they will be reinsured. In other words, this proposal is designed to encourage insurance companies and voluntary nonprofit associations on their own volition to provide more comprehensive coverage at a reasonable cost.

If this bill is passed, will it help rural families to get health insurance?

Answer: The cost of enrolling rural families is higher than the cost of enrolling urban residents. The proposal is designed to encourage insurance carriers to be more venturesome in trying to develop plans, especially group insurance, for rural families. Agricultural and fraternal organizations, and local governmental units might constitute appropriate groups. It is hoped that many carriers will be encouraged to tackle this important problem.

How will this proposal encourage companies to offer noncancelable policies? How will this bill take care of a worker during unemployment?

Answer: Authority is providing for setting standards with respect to the cancellability of policies. It is hoped that reinsurance will make it possible for more carriers to write plans that are less restrictive than many now marketed.

With respect to the coverage of workers during periods of unemployment, it may be possible for carriers to develop some type of plan which provides for waiver of premium during periods of forced unemployment.

What is it that the Government will reinsure under the proposed bill?

Answer: The Government will insure carriers against 75 percent of any loss from the operation of a particular approved prepayment plan or group of such plans during the course of the year. It is not reinsurance of any single risk, but insurance against abnormal loss from the operation of a plan.

Who will be eligible for reinsurance?

Answer: Any carrier—profit or nonprofit; Blue Cross or Blue Shield—with a prepayment health service plan which meets certain minimum standards of eligibility. See section 304, of the bill.

Will the bill serve as an entering wedge to socialized medicine?

Answer: Absolutely not. The Government would have no authority to control the practice of medicine. Health insurance would continue to be bought as it is now.

We should work for this bill if we want to support the President's specific recommendations. It is both a challenge and an opportunity to do our part in furthering a program for protecting the American people when their health is involved.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. PRIEST. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. SHEPPARD].

Mr. SHEPPARD. Mr. Chairman, I would like to ask the gentleman [Mr. HESELTON] 1 or 2 questions. Would this bill, that you are apparently recommending for House approval, reduce the cost of premiums paid for insurance that is now being carried by policy holders in health or medical and hospital categories?

Mr. HESELTON. Mr. Chairman, if the gentleman will yield, I do not think anybody has suggested that it would reduce the cost of premiums being paid.

Mr. SHEPPARD. Well, the gentleman is carrying the bill, and I am asking for an explanation. Will it or will it not?

Mr. HESELTON. I do not think it will.

Mr. SHEPPARD. All right. The gentleman has answered my question. Will it make insurance available for any persons who cannot now afford it?

Mr. HESELTON. I doubt that.

Mr. SHEPPARD. I thank the gentleman.

Mr. HESELTON. But I do say that it ought to and I hope will make for better coverage for more people. Consequently, instead of having to pay out of their own pockets, they can be reimbursed through added health insurance.

Mr. SHEPPARD. Instead of paying out of their own pockets, which is going to happen under this bill is subsidize them by indirection through premiums received on policies not now covered?

Mr. HESELTON. I do not believe that is true.

Mr. SHELLEY. Mr. Chairman, will the gentleman yield?

Mr. SHEPPARD. I yield to the gentleman from California.

Mr. SHELLEY. Will the fact that the insurance company has to pay premiums for the reinsurance lead to a possibility that the policy holder will have passed on to him that premium which is paid as the initial cost to him?

Mr. SHEPPARD. It could be under this bill. That is my personal opinion, and I think those guiding the bill will be better able to answer that question.

Mr. PRIEST. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. MCCARTHY.]

Mr. MCCARTHY. Mr. Chairman, I think that it has been established by the proponents of the bill that this measure is in itself inadequate to meet the great problem of improving the health of the Nation, the objective which is set forth in the title of the bill. The most frequent argument that has been made for the bill here today is that it will do no harm. I suppose that that in itself is grounds for supporting the bill, if it is not recommitted, because on many occasions during the course of this session we have not been given that happy choice.

We shall not blame the committee entirely for this bill. The gentleman from Texas [Mr. THORNBERRY] said that, apparently before the committee had come to any conclusion or decision to report the bill, the chairman came in and said that the leadership asked that the bill, H. R. 8356, be reported. In 1 or 2 instances in the course of the debate today it has been pointed out that this is the President's program. If this is the health program, it is much like the education program we passed about a month ago to meet the educational problems of the country. We can, by supporting the bill, help the majority party to fulfill one of its campaign promises in letter, at least, if we cannot help them fulfill it in substance. In the last few days we have seen the majority party repudiate the campaign promises made in regard to the farm program of the country. According to the report of the National Industrial Conference Board, the dollar, last month, fell to its lowest point in the 169 years of its history. Apparently that is the fulfillment of the hard-money promise, the sound dollar, the dignified dollar promise which was made in the course of the last campaign.

It is unnecessary to talk about the failure of balancing the budget, about the condition of the national debt, because no one should have expected the fulfillment made of these promises. But I do feel that there are certain areas in which the majority party should be held accountable for irresponsible statements, in the course of the last campaign and before that campaign, and in the early days of this administration. This is particularly true in the field of foreign policy. In this most difficult situation there is little cause to rejoice, to be encouraged to learn, that the Secretary of State has gone to Paris in order to provide initiative in foreign affairs at the Geneva Conference.

So far as this particular bill itself is concerned, it seems to me that it should have been assigned to the Committee on Banking and Currency because it deals principally and directly with financial matters rather than health matters. Other programs of this kind are under the jurisdiction of that committee. Leg-

islation for the Federal Deposit Insurance Corporation is under the jurisdiction of the Committee on Banking and Currency; the FHA program comes under that committee; the Commodity Credit Corporation underwriting operation is within the jurisdiction of the Committee on Banking and Currency. The same is true, I believe, of the crop-insurance program and other underwriting programs both domestic and international economy.

Mr. BURDICK. Mr. Chairman, will the gentleman yield?

Mr. McCARTHY. I yield to the gentleman from North Dakota.

Mr. BURDICK. As I understand from what the gentleman has said, he does not feel that this bill will give very much protection to the people who need it.

Mr. McCARTHY. That is right.

Mr. BURDICK. Then why does the gentleman support a bill like that?

Mr. McCARTHY. We have been assured that it will do no harm. It is not every day that we get a chance to support a bill which will do no harm. I would rather see it recommitted to the Banking and Currency Committee.

Mr. PRIEST. Mr. Chairman, I yield three minutes to the gentleman from New York [Mr. KLEIN].

Mr. KLEIN. Mr. Chairman, it seems to me at this late hour, after having debated this so-called bill for 2 hours, if we are not entirely confused about what this bill intends to do, we certainly must be disillusioned about what it actually will do.

The gentleman from Massachusetts [Mr. HESELTON] when he spoke here a minute ago, in that colloquy admitted that it will not decrease the cost of medical insurance throughout the country. He further admitted that it will not decrease the cost of medical care to the people of this country.

I believe I brought out when I had the floor earlier that it would not extend medical insurance coverage to people in the lower income groups, those making less than $3,000 a year who cannot afford at the present time to carry medical insurance, because the costs are too high.

Then what are we doing? What is this bill supposed to do? We are taking $25 million of Government funds and practically giving it to these insurance companies who do not want it and who certainly do not need it. Representatives of these companies testified before our committee that they do not believe that this bill will work; they do not believe it will have the effect which the proponents say it will have. Then why are we taking all this time other than, as the gentleman from Minnesota [Mr. McCARTHY] pointed out a few moments ago, to bail out this administration, to bail out the President, to help him fulfill some of the campaign promises that he has made?

We have never had any partisanship in our committee. I think the gentleman from New Jersey, the chairman of the committee [Mr. WOLVERTON] will agree to that. We made a trip under Democratic auspices. We went to England, we went to Sweden, to study various health plans, and that was done under the chairmanship of the gentleman from Ohio [Mr. CROSSER]. There was a very earnest and nonpartisan desire to do something about the problem of the medical needs of the people of this country, and the problem of extending medical insurance to the lower-income groups of this country.

Who needs medical insurance? The wealthy people do not need it. They can afford to pay private doctors, and they do. If we are going to have medical insurance, let us give it to the people who need it. If we are going to do something for them, let us do something—and this bill does not do it—that will bring medical insurance to those people who need it, who want it, but who can't afford it. There has been much talk about the Blue Cross plans and many other of the so-called prepayment plans. I tell you, Mr. Chairman, that the great majority of the people of this country do not belong to those plans for the very simple reason that they cannot afford them. Even those plans, and they cost much less than you would have to pay a private physician, but even those plans call for premiums and fees which are too high for many people. What we ought to do, and what this great committee can do, is to bring in some kind of plan of medical insurance for the people of this country which will help those less fortunate people and will enable them to subscribe to that type of insurance.

Mr. WOLVERTON. Mr. Chairman, in the 1 minute that remains, I do not have the opportunity to make as complete an answer as I would like to the statements that have just been made by the gentleman from New York. However, when they talk about the idea that it will not reduce the cost, I must point out to you that it is not intended to do that. This bill is for the purpose of operating in a field where there is no insurance, where there are no premiums, and where there is no cost, and which, if there were, would be such prohibitive costs that there would probably be no one who would be able under the circumstances to take advantage of it; but as long as it does not exist at all and the provision is made in this bill that where insurance does exist, then there is no right in the Secretary to reinsure any policy that would be in competition with any policy that is already in existence.

The CHAIRMAN. All time for general debate has expired. The Clerk will read the committee substitute as an original bill for the purpose of amendment.

Be it enacted, etc.—

SECTION 1. This act may be cited as the "Heal*h Service Prepayment Plan Reinsurance act."

Mr. NEAL. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think the last statement of the chairman of this committee is a practical admission that this bill has no particular use. I have been associated with the practice of medicine for almost half a century. I have seen the changes that have come and gone in the ways and methods and adaptations of the medical profession and of the insurance companies during that almost half century. I want to say to you this has been an evolutionary program, and that in spite of the remark that was made by one of the gentlemen this afternoon that anything the American Medical Association was for, he would be against, I want to assure you that the American Medical Association, with its farflung agencies and its associations, with the scientific, cultural and health and welfare people throughout this country in the last half century has actually done more good than any other agency. It has correlated the various activities right along. While you may criticize the American Medical Association for some of its activities and some of the things for which it stands, you must recognize it does have a lot to its credit. When it comes to this reinsurance proposition, you all know that 50 years ago, we had practically no experience upon which to base the rates for any kind of insurance—life insurance, health insurance, sickness, accident insurance or whatnot. That experience has gone on over a long period of time, and each year those of you who are acquainted with the execution of medical certificates as medical men or as one who has been connected with insurance know that year after year the provisions of those policies are more liberal and less expensive, simply as a result of trial and error. They have done that in a practical way. They have been able to accomplish what we have today in the way of insurance. Now we come along here with our Federal Government and we say that is not moving fast enough, and we put in a suggested program here that will affect only those people in our society who are employed, who have wages from which they can spare enough to pay this prepaid insurance. If they are to assume this—they have always paid their premiums—you say we will put up $25 million to get this thing started, and as the premiums accumulate then that $25 million is going to be repaid and the Government will have it back. But at the same time you have established a very great increase in the cost of insurance to every individual that carries insurance. It is not going to do them any particular good.

Insofar as chronic heart disease, tuberculosis, cerebral palsies and all those things that we have that are practically incurable, it is not going to do anything there because that is a risk that no insurance company will take. If an insurance company is not going to take the risk, certainly the people who make the premiums on those policies are not going to take it either. So I can see no reason for a bill of this kind. It is only establishing another agency from which we do not expect to get anything except a few more Government jobs and a little more bureaucracy.

Mr. BURDICK. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from North Dakota.

Mr. BURDICK. Do you see any benefits flowing from this bill that will reach the people who really need it?

Mr. NEAL. The people who actually need protection are the people who are unemployed, the people who are beyond

an age where they can pay these premiums, people who are indigent, people who, through accident or ill health, are no longer able to provide for themselves. Those people are not touched by this thing at all. If we are going to pass legislation that is intended to reach the people who need it, we will certainly not do it by this bill.

The CHAIRMAN. The time of the gentleman from West Virginia has expired.

Mr. JAVITS. Mr. Chairman, I offer an amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. JAVITS: Strike out all after the enacting clause and insert:

"SEC. 1. This act may be cited as the 'National Health Act of 1954.'

"SEC. 2. The Public Health Service Act is hereby amended by inserting at the end thereof the following:

"'TITLE VII—IMMEDIATE HEALTH AND MEDICAL SERVICE PROGRAM

"'PART A—DECLARATION OF PURPOSE

"'*Declaration of purpose*

"'SEC. 701. It is the purpose of this title to provide, pending the initial detailed study under title VIII of the present health and medical needs of the Nation, immediate Federal assistance so as (A) to enable voluntary prepayment health service plans to make their services generally available in the communities which they serve at charges based on the income of the subscribers; (B) to encourage the establishment of local administrative facilities embracing functional health service regions and districts in order to facilitate the effectuation of present and future health programs; (C) to enable nonprofit hospitals and medical and nursing schools to maintain and improve their services and facilities; and (D) to assist voluntary prepayment health service plans to construct and equip personal health service centers.

"'PART B—ADMINISTRATION

"'*Administration by Surgeon General*

"'SEC. 711. (a) The Surgeon General is authorized to make such administrative regulations and perform such other functions as he finds necessary to carry out the provisions of this title. Any such regulations shall be subject to the approval of the Administrator.

"'(b) In administering the provisions of this title, the Surgeon General, with the approval of the Administrator, is authorized to utilize the services and facilities of any executive department in accordance with an agreement with the head thereof. Payment for such services and facilities shall be made in advance or by way of reimbursement, as may be agreed upon between the Administrator and the head of the executive department furnishing them.

"'(c) In administering the provisions of this title, the Surgeon General shall cooperate with and render advice and assistance to States and appropriate public authorities therein in formulating and operating State plans under this title.

"'*Federal Health Council*

"'SEC. 712. (a) In administering this title the Surgeon General shall consult with a Federal Health Council consisting of the Surgeon General, who shall serve as Chairman ex officio, and 10 members appointed by the Administrator. No person shall be appointed by the Administrator as a member of the Federal Health Council who is professionally engaged in the provision of health or medical services. Each appointed member shall hold office for a term of 5 years, except that any person appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term, and the terms of office of the members first taking office shall expire, as designated by the Administrator at the time of appointment, two at the end of the first year, two at the end of the second year, two at the end of the third year, two at the end of the fourth year, and two at the end of the fifth year after the date of appointment. The Council is authorized and directed to appoint special advisory and technical committees of persons who are expert in the various subdivisions of the health field to assist the Council in the performance of its functions. Members of the Council appointed by the Administrator, and members of advisory or technical committees, while serving on business of the Council, shall receive compensation at rates fixed by the Administrator, but not exceeding $50 per day, and shall also be entitled to receive an allowance for actual and necessary traveling and subsistence expenses while so serving away from their places of residence. The Council shall meet as frequently as the Surgeon General deems necessary, but not less than once each year. Upon request of three or more members, it shall be the duty of the Surgeon General to call a meeting of the Council.

"'(b) The Federal Hospital Council created by section 633 of this act is hereby abolished, and its functions and duties are transferred to the Federal Health Council.

"'PART C—ASSISTANCE TO VOLUNTARY NONPROFIT PREPAYMENT HEALTH SERVICE PLANS

"'*Definitions*

"'SEC. 721. As used in this part, the term—

"'(a) "Personal health services" means services rendered to individuals by licensed physicians, licensed dentists, and, under the supervision of licensed physicians or dentists, by auxiliary personnel, including nurses and attendants, laboratory and X-ray technicians, physiotherapists, psychologists, dental hygienists, optometrists, podiatrists, medical social workers, and health educators or counselors, whenever and wherever required for the improvement or preservation of physical and mental health or for the diagnosis and treatment of disease or injury; the use by such licensed or auxiliary personnel of any and all apparatus or machines designed to aid in the diagnosis or treatment of disease or injury; the provision of bed and board in general or special hospitals, convalescent homes, sanatoria, or other institutions licensed or designated as such by a State when care in such institutions is prescribed by licensed physicians; and the provision of drugs and medicines, dressings and supplies, prostheses and appliances (including eyeglasses), and ambulance service, when prescribed by licensed physicians—except as such services or goods may be required in connection with the diagnosis or treatment of injury or disease to which the workmen's compensation law of a State or of the United States applies.

"'(b) "Prepayment health service plan" means a membership or cooperative corporation (no part of the net earnings of which inures to the benefit of any private shareholder or individual), engaged exclusively in operating a plan designed to provide benefits in respect of specified personal health services in return for prepaid subscription charges.

"'(c) "Cooperating prepayment health service plan" means a prepayment health service plan whose application to participate in at least one regional program under a State plan under this part has been approved by the appropriate public bodies (as provided in section 723) and which agrees—

"'(1) that at all times a majority of the members of the governing board shall be persons who do not themselves furnish, or represent other persons that furnish, health services;

"'(2) that the benefits offered, which are within the limits of the authorized coverage under the State's program, will be offered to subscribers under contracts with them which have been approved by the applicable health region authority (such contracts being hereinafter called "participating contracts"); and

"'(3) that, in the case of its participating contracts—

"'(A) it will make its benefits available to the subscriber, and to the subscriber's dependents (the subscriber and his dependents together being hereinafter referred to as "beneficiaries") in return for a subscription charge fixed in terms of the subscriber's income;

"'(B) it will limit the proportion of its beneficiaries who reside outside 1 State, or 1 health service district, as the case may be, to not more than 25 percent of its total number of beneficiaries;

"'(C) it will accept (subject to the requirements of subparagraph (B)) to such number, or to such proportion of total enrollment under its participating contracts, as the applicable health region authority may prescribe, any nongroup applicant as a subscriber who applies and pays the subscription charge, and will accept such applications to the number or proportion so prescribed in the order in which they are received; and

"'(D) it will maintain reserves, and contribute to a consolidated reserve held by the State for all cooperating prepayment health service plans operating therein, to the extent required by the applicable State health council.

"'(d) "Service benefits" means benefits furnished by a prepayment health service plan in the form of full payment for specified personal health services of licensed physicians, hospitals, and other health personnel and institutions, that have entered into agreements with the plan to render such services to beneficiaries of the plan for stated fees or charges (whether fee-for-service, per capita, or other fees or charges) to be paid to them by the plan in full and complete payment for such services.

"'(e) "Indemnity benefits" means benefits provided by a prepayment health service plan in the form of payment by the plan of specified sums of money toward the cost of specified personal health services to beneficiaries of the plan, such payment being made either to the beneficiary or to the provider of such services, and not necessarily covering the full cost of such services.

"'(f) "Subscriber's income" means the adjusted gross income (as defined in section 22 (n) of the Internal Revenue Code) of the subscriber, except that such term shall not include any part of his adjusted gross income that exceeds $5,000.

"'(g) "Dependent" of a subscriber means the spouse of the subscriber and each unmarried member of his family under the age of 18, provided such spouse or other member of his family, as the case may be, lives in the subscriber's household and has adjusted gross income (as defined in section 22 (n) of the Internal Revenue Code) of less than $500 per annum.

"'(h) "Health service region" means a region which is coterminous with a "region" established by the State for the purposes of the State plan under title VI of this act, or a region designated by the governor of the State with the object of delimiting a broad natural health service area.

"'(i) "Health service district" means a logical grouping of two or more health service regions (not necessarily in the same State) for achieving an interrelated network of health personnel and facilities centering on a 4-year medical college, whose central facilities can most effectively and economically provide outlying areas with services and personnel in connection with personal health

services, public health services, and medical research and education, that cannot be provided as economically and effectively by the outlying areas themselves.

"'(j) "Special need area" means a subdivision of a health service district, consisting of 1 or more health service regions no 1 of which has, on the date of the enactment of this act, more than 8 physicians in active practice per 10,000 population.

"'(k) "Selection factor" means a factor reflecting an increase or decrease in costs of furnishing benefits under prepayment health service plans that may reasonably be expected to result from an abnormal number of beneficiaries in a particular classification that statistically has an important health significance. The various selection factors shall be fixed annually by the Surgeon General and prescribed by him by regulation.

"'(l) "State" includes the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

"'Appropriation for grants to States to assist cooperating prepayment health service plans to make their services generally available throughout the regions and districts which they serve

"'SEC. 722. There is hereby authorized to be appropriated for each fiscal year up to and including the fiscal year ending June 30, 1957, a sum sufficient to carry out the purposes of this title. The sums made available pursuant to this section shall be used for making payments to States which have submitted to the Surgeon General State plans that have been certified by the governor of the State as meeting the requirements of section 723 and the regulations of the Surgeon General issued pursuant thereto. A State plan which has been so suomitted and certified is hereinafter referred to as an "approved State plan."

"'Requirements for State plans

"'SEC. 723. A State plan under this part—

"'(a) shall provide for financial assistance by the State to cooperating prepayment health service plans, as hereinafter set forth;

"'(b) shall designate a single State agency to administer the State plan (which may be the same State agency as that which administers the State plan under part C of title VI of this act), subject to the powers of the State health council and the health region authorities, as hereinafter specified;

"'(c) shall provide for a State health council, established by law in the State to advise and consult with the State agency designated to administer the State plan and to perform the functions under the State plan hereinafter specified, the State health council to be appointed by the governor and to consist of persons who are members of health region authorities provided for in subsection (d) of this section.

"'(d) shall provide for health region authorities established by law in the State, for each region that is designated by the governor of the State as being a health service region within the meaning of section 721 (h);

"'(e) shall provide that members of health region authorities shall be appointed by the governor of the State, without regard to their political affiliations, from among persons residing in the region who do not hold positions of administrative responsibility for any health program or other activity of the State or any political subdivision thereof, and who are not professionally engaged in the provision of health or medical services;

"'(f) shall (by compact or agreement with one or more States if necessary) (1) specify the groupings of health service regions that are to comprise health service districts (within the meaning of section 721 (i)), (2) establish such groupings as health service districts, (3) create a district health council for each such district, whose members are members of health region authorities of the health service regions included in the district, and (4) authorize such district health councils to institute programs designed to accomplish the purposes of the health service district (as set forth in section 721 (i));

"'(g) shall require health region authorities to establish and consult with a representative committee in each health area which is a component of the region; and shall further require health region authorities, district health councils, and the State health council to appoint and consult with technical advisory committees on the principal elements of health service, the membership of such committees to be representative of the several health professions;

"'(h) shall make adequate provision out of general revenues of the State for the expenses of health region authorities and the State health council;

"'(i) shall require the State health council—

"'(1) to determine and prescribe, on the basis of health personnel and facilities available or reasonably obtainable in each year within the various health service regions of the State, and within such limits as may be prescribed under the State law, the kinds of personal health services that may be included under participating contracts by cooperating prepayment health service plans during the calendar year next beginning, and the kinds of benefits that may be included under such contracts during such year with respect thereto; and

"'(2) to prescribe the reserve requirements for cooperating prepayment health service plans, including the proportion of the reserves that must be deposited with the State as a consolidated reserve for all cooperating prepayment health service plans.

"'(j) shall provide that no prepayment health service plan may participate in the State program unless it has filed application so to do on a form prescribed by the State health council, and has been approved as a cooperating prepayment health service plan by the health region authority of the region in which the plan principally operates or proposes to operate and also by the State health council; or, in the event the plan operates or proposes to operate through a coordinated health service system of a health service district comprising regions extending beyond the boundaries of the State, unless it has been approved by the district health council and also by the State health council of each of the participating States;

"'(k) shall provide that no prepayment health service plan which operates or proposes to operate through a coordinated health service system of a health service district may be approved as a cooperating prepayment health service plan unless it agrees that a percentage (specified by the district health council) of its gross income (including as part of gross income all Federal, State, and local grants of public funds) will be used for making payments to the medical college or colleges whose central facilities serve the health service district, adequate to finance postgraduate study by participating physicians and other professional personnel, clinical research by such personnel, the maintenance of internships, externships, and fellowships, and the operation of other programs which do not provide personal health services directly to beneficiaries but which are designed to achieve and maintain a high quality of health care in the health service district;

"'(l) shall require each health region authority, for the calendar year next beginning—

"'(1) to estimate the "cost norm" of the region, which shall be an estimate of the amount that it should normally cost, per beneficiary, for cooperating prepayment health service plans operating in the region to provide service benefits for the following combination of personal health services;

"'All services of licensed physicians in the home, office, or hospital (including periodic health examinations, diagnostic examinations and tests, and immunizations and other preventive services); hospital services while a bed patient in a hospital (including bed nursing, X-ray and laboratory examinations and tests, and all forms of treatment commonly furnished in a hospital) in minimum accommodations adequate to care of the case, for a period of 30 days in the aggregate during a subscription year; visiting-nurse service and ambulance services when prescribed by a licensed physician in attendance on the case; rehabilitation training and treatment under the supervision and direction of a licensed physician: *Provided*, That the estimate of the cost norm of the region shall not take into account medical services for (A) tuberculosis requiring treatment at a sanatorium or special hospital; (B) mental or nervous disorders, after diagnosis, for which care by a psychiatrist is required; (C) chronic illnesses in an institution other than a hospital for general care: *Provided further*, That nothing in this section shall preclude any State health council from authorizing benefits under participating contracts beyond those taken into account in estimating the cost norm of the region.

"'(2) the estimate of the cost norm of the region shall be based on the most recent available data regarding the composition of the average population group, the normal utilization of personal health services, and the prevailing form of medical practice, in the region, and on fair and reasonable fees and charges for personal health services, and shall include a reasonable allowance for overhead and other expenses of cooperating prepayment health service plans in the region;

"'(3) the estimate of the cost norm of the region shall be subject to final determination by the State health council.

"'(m) shall require each health region authority—

"'(1) to study each proposed participating contract submitted to it by cooperating prepayment health service plans in the region, for the purpose of determining whether such contract may be approved as a participating contract under the State plan, and, subject to final determination by the State health council, to approve such contracts as participating contracts if it finds that they comply with the State plan: *Provided*, That in no event shall approval be withheld because of the form of medical practice contemplated under the arrangements made with persons to furnish the personal health services under such contracts;

"'(2) in the case of participating contracts that offer all of the benefits outlined in subsection (1), to prescribe the cost norm of the region as the "allowed cost" per beneficiary of such participating contract; and

"'(3) in the case of each participating contract that offers specified benefits that are different from those outlined in subsection (1), to estimate, on the basis of the cost norm prescribed under subsection (1), the amount that it should normally cost, per beneficiary, for cooperating prepayment health service plans operating in the region to provide such specified benefits, and, subject to final determination by the State health council, to prescribe such estimated cost as the "allowed cost" per beneficiary of such participating contract.

"'(n) shall provide with respect to subscription charges of cooperating prepayment health service plans—

"'(1) that the subscription charges for participating contracts shall be fixed in terms of a percentage of the subscribers' family income, which percentage shall be the same for all subscribers under each participating contract;

"'(2) that the minimum percentage of subscribers' family income that may be fixed for a participating contract shall bear the

same ratio to 3 percent as the allowed cost of such contract bears to the cost norm of the region;

except that in no event shall the minimum subscription charge for any combination of benefits be less than $6 for any subscription year, and except that after the calendar year 1954, the Surgeon General, with the advice of the Federal Health Council, may by regulation change the percentage rate, prescribed in paragraph (2), that is used as a measure for computing minimum subscription charges;

"'(o) shall provide (1) that there shall be advanced to each cooperating prepayment health service plan at the beginning of each quarter of the applicable calendar year an amount, with respect to each person it is estimated will be a beneficiary under each participating contract during the quarter, equal to the excess, if any, of the allowed cost of such contract per beneficiary (after adjusting such cost to reflect the relevant estimated selection factors) over the estimated subscription income of the contract per beneficiary, and (2) that such advances shall be adjusted, by additions to or subtractions from subsequent advances, when the actual earned subscription income, the actual number of beneficiaries, and the actual selection factors during the quarter become known: *Provided*, That no deduction shall be made from any such advances on account of savings accruing to a cooperating prepayment health service plan to which the actual cost of providing benefits under an approved contract is less than the allowed cost of such contract (after taking into account the actual selection factors): *And provided further*, That such plan may, in its sole discretion, apply such savings to the provision of additional benefits to its beneficiaries;

"'(p) shall provide that the income, property, franchises, and transactions of cooperating prepayment health service plans shall be exempt from all taxes imposed by the State or by any political subdivision thereof;

"'(q) shall provide for the supervision of the operations of cooperating prepayment health service plans by the State agency designated to administer the State plan;

"'(r) shall authorize and direct the State agency designated to administer the State plan to appoint a receiver for any cooperating prepayment health service plan when requested so to do by the health region authority having jurisdiction over such health service plan; and shall authorize any health region authority to request the State agency to appoint a receiver for a cooperating prepayment health service plan over which the health region authority has jurisdiction whenever, by reason of excessive overhead and other expenses, or invasion of required reserves, the health region authority is of the opinion that the solvency of the health service plan or its continued economical and effective operation for the benefit of its beneficiaries is in jeopardy;

"'(s) shall provide that the health region authorities and the State health council shall make reports to the Surgeon General at such times, and containing such data, as the Surgeon General, with the advice of the Federal Health Council, may by regulations prescribe;

"'(t) shall make provision, in laws enacted by the State legislature, authorizing any group of persons in good faith proposing to establish a prepayment health service plan to incorporate for such purpose as a membership or cooperative corporation; and shall, by changes in the State laws regarding incorporation and supervision of prepayment health service plans that are in operation in the State when this title becomes effective, or by such other means as may be necessary or appropriate, permit such plans to promptly qualify for becoming cooperating prepayment health service plans under this title;

"'(u) shall make provision authorizing employers (including the State or any political subdivision when acting as an employer) to contribute to the payment of their employees' subscription charges in prepayment health service plans, and shall also make provision permitting any employee to authorize his employer (including the State or any political subdivision when acting as an employer) to deduct subscription charges in a prepayment health service plan from the employee's wages and on behalf of the employee to pay the amounts so deducted directly to the prepayment health service plan in which the employee is a subscriber;

"'(v) shall make provision for the payment, in whole or in part, of subscription charges to cooperating prepayment health service plans of persons who become entitled to receive unemployment compensation and of persons who are receiving any form of public assistance;

"'(w) shall authorize the health region authorities and the State health council to contract with the Federal Health Study and Planning Commission for the purposes specified in title VIII;

"'(x) may provide a program for special need areas, as set forth in section 724;

"'(y) shall contain provisions for the making of noninterest-bearing loans by the State to assist in the initial establishment of prepayment health service plans whose sponsors agree to operate them in conformity with the requirements for cooperating prepayment health service plans, such loans being made only for matching funds provided for the same purpose from private sources in the form of contributions or noninterest-bearing loans.

"'*State programs for special need areas*

"'SEC. 724. (a) A State plan under this part may contain provisions (including compacts or agreements with other States) for participation by the State in special programs for special need areas. Such provisions of the State plan shall require that each district health council shall, within 12 months of being appointed, estimate the net cost, for a period of 5 years, of a program designed to supply the personnel, and to maintain the facilities required to furnish in the special need areas, if any, within the district at least the services specified in section 723 (1) of this title, such estimate taking into account income to be derived from one or more cooperating prepayment health service plans furnishing the appropriate coverage and from fees paid for services rendered to residents of the district who do not, for whatever reason, become subscribers to such a plan or plans. Such estimated cost, if approved by the State health council (or in case the special need area extends beyond the boundaries of a single State, by the State health councils of all the participating States) shall be used as a basis for grants of public funds to effectuate the program for the area.

"'*Payments to States*

"'SEC. 725. (a) From the sums appropriated pursuant to section 722 for any fiscal year, the Surgeon General shall pay to each State which has an approved State plan during any part of such fiscal year, for each quarter an amount not greater than the Federal percentage of the total sums certified by the governor of the State as having been paid under the State plan during such quarter by the State and political subdivisions thereof to cooperating prepayment health service plans—

"'(1) in respect of their participating contracts, except that the amount paid by the Surgeon General for this purpose for any quarter, when divided by the number of beneficiaries of cooperating prepayment health service plans operating in the State, shall not exceed $3.75; and

"'(2) as loans pursuant to section 723 (y) to assist in the establishment of prepayment health service plans.

"'(b) From the sums appropriated pursuant to section 722 for any fiscal year, the Surgeon General shall pay to each State which has an approved State plan during any part of such fiscal year, for each quarter an amount not greater than the Federal percentage of the total sums (exclusive of administrative expenses of district health councils) certified by the governor of the State as having been paid under the State plan during such quarter by the State and political subdivisions thereof to effectuate programs under section 724 in special need areas any portions of which lie within the boundaries of the State, plus an amount equal to the total sums certified by the governor of the State as having been paid under the State plan during such quarter by the State and political subdivisions thereof as administrative expenses of district health councils for health service districts any portions of which lie within the boundaries of the State.

"'(c) The method of computing and paying such amounts to the States shall be as follows: The Surgeon General shall, prior to the beginning of each quarter, estimate the amount to be paid to the State under subsection (a), such estimate to be based on reports filed by the State containing its estimates of the various sums to be paid under the State plan in such quarter by the State and political subdivisions thereof. The Surgeon General shall then, prior to audit or settlement by the General Accounting Office, pay to the State the amounts so estimated by him, reduced or increased, as the case may be, by any sums by which he finds that his estimates for any prior quarter were greater or less than the amounts which should have been paid to the State under subsections (a) and (b).

"'(d) For the purposes of this section the "Federal percentage" for any State shall be 100 percent less that percentage which bears the same ratio to 50 percent as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska) except that (1) the Federal percentage shall in no case be more than 75 percent or less than 33⅓ percent, and (2) the Federal percentage for Alaska and Hawaii shall be 50 percent each, and the Federal percentage for Puerto Rico and the Virgin Islands shall be 75 percent each. The Federal percentages shall be promulgated by the Surgeon General between July 1 and August 31 of each year, on the basis of the average of the per capita income of the States and of the continental United States for the three most recent consecutive years for which satisfactory data are available from the Department of Commerce.

"'*Authorization of compacts between States*

"'SEC. 726. The consent of Congress is hereby granted to any two or more States to enter into compacts or agreements with respect to the administration and operation of programs under this title in health service districts portions of which lie within such States.

"'*Federal payroll deductions*

"'SEC. 727. Upon the direction of any officer or employee of the Government of the United States, including members of the Armed Forces, requesting the Government to deduct from the salary of such person a fixed sum or percentage to be paid to any prepayment health service plan, such sum or percentage shall be deducted as requested and paid as directed. "Officer or employee of the Government of the United States" as used herein shall include any officer or employee of any corporation the stock of which is wholly owned by the Government of the United States, as well as any officer or em-

ployee of any department, bureau, agency, or division of the Government of the United States.

"'*Operation of State plans*

"'SEC. 728. (a) If the Surgeon General, after reasonable notice and opportunity for hearing to the State agency, finds (1) that the State agency is not complying substantially with the provisions of the State plan, or (2) that any Federal funds have been diverted from the purposes for which they have been paid under this title, the Surgeon General, with the approval of the Administrator, shall forthwith withhold further payments to the State under section 725 until he is satisfied that the conditions which required him to withhold such payments no longer exist.

"'(b) If any State is dissatisfied with the Surgeon General's action under subsection (a), such State may appeal to the United States court of appeals for the circuit in which such State is located. The summons and notice of appeal may be served at any place in the United States. The Surgeon General shall forthwith certify and file in the court the transcript of the proceedings and record on which he based his action.

"'(c) The findings of fact by the Surgeon General, unless substantially contrary to the weight of evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Surgeon General to take further evidence, and the Surgeon General may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the transcript and record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive unless substantially contrary to the weight of the evidence.

"'(d) The court shall have jurisdiction to affirm the action of the Surgeon General or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in title 28 of the United States Code, section 1254.

"'*Saving provision*

"'SEC. 729. Nothing in this title shall modify obligations assumed by the Federal Government under other laws for the hospital and medical care of veterans or other presently authorized recipients of hospital and medical care under Federal programs'."

Mr. JAVITS. Mr. Chairman, I have offered this amendment, the National Health Act of 1954, as a substitute to the bill in order to call to the attention of the House exactly what is our situation.

This bill, which I will ask unanimous consent to withdraw when I have finished my statement, is an alternative to the original health insurance plan of former President Truman, introduced by Republicans since 1949. It was drafted in 1948 under extremely competent auspices, and has been variously sponsored in this House by Members whom we all respect very highly. For example, it was sponsored by the now Governor of Massachusetts, Mr. Herter. It was sponsored by the present Vice President, Mr. Nixon. It was sponsored by my colleague from Maine [Mr. HALE]. And it was sponsored by distinguished members of the other body.

The conception of this bill was that we could give Government aid to local voluntary health plans and thus enable them to take care of the problems of those who had low incomes and could not afford to pay the premiums now required for these plans, by some form of Government subvention to the voluntary health plans, but without any danger of what some call socialized medicine, because the cooperative plans and those who participated would choose their own physicians just as they do today. A résumé of the National Health Act of 1954 is as follows:

The proposed National Health Act of 1954 would amend the already existing Public Health Service Act by (a) adding a new title VII which provides an immediate health and medical-service program; (b) adding a new title VIII which provides for a long-range survey of national health needs; (c) expanding existing provisions for hospital construction and adding new provisions for aid to medical and nursing schools; and (d) adding provisions for local public health units.

NEW VOLUNTARY HEALTH AND MEDICAL-SERVICE PROGRAM

The purpose of this program is to provide immediate assistance so as first, to enable voluntary prepayment health-service plans to make their services generally available in the communities which they serve at charges based on the income of the subscribers; second, to encourage the establishment of local administrative facilities embracing functional health-service regions and districts in order to facilitate the effectuation of present and future health programs; third, to enable nonprofit hospitals and medical and nursing schools to maintain and improve their services and facilities; and, fourth, to assist voluntary prepayment health-service plans to construct and equip personal health-service centers.

The key to the new health and medical program is the local voluntary prepayment health-service plan. Many such plans are in operation today. Both new and existing plans, to qualify for Federal-State aid, would be required to base their rates of payment by subscribers upon a percentage of the subscribers' adjusted gross income—up to $5,000—and under each plan a majority of the Board of Directors must be laymen.

Primary responsibility for the development of adequate health service would be placed in the States and local communities. In order to participate in the program, each State would set up a State health council. This council would divide the State into several regions, a number of which have already been established under the Federal Hospital Construction Act. Each region would be managed by a health region authority, composed of laymen appointed by the Governor.

Individuals would obtain medical care for themselves and their families by voluntarily subscribing to a cooperating, voluntary, nonprofit, prepayment health plan. Membership would be in a group plan or on an individual basis—with the Health Region Authority determining the number of nongroup applicants the plans can accept. Further provision would be made regarding the limit on the number of out-of-State beneficiaries a plan might include.

A national yardstick in the form of a comprehensive range of benefits would be established. The cost for this particular coverage would be estimated by the health region authorities for each health region. The subscription charge for this range of benefits could not be less than 3 percent of the subscriber's income under $5,000. Plans could offer more or less comprehensive benefits than those contained in the national yardstick and as the range of benefits offered might vary, so the rates would be required to vary from the 3 percent minimum for national yardstick benefits. The State through the State health council would determine the maximum range of services all the plans in the State might offer. The minimum charge for participation in a plan would be $6 a year.

FEDERAL-STATE AID TO LOCAL PLANS

The States would be able to expend funds, a percentage of which would be reimbursable by the Federal Government, for payments to voluntary plans to meet any deficit between the aggregate of income from subscription charges and the allowed cost calculated by each health region authority, as the normal cost of supplying benefits under each approved contract.

The basic formula for Federal aid under this bill would follow the lines of the Hospital Construction Act. Federal aid would be granted a State in inverse proportion to its per-capita income. States qualifying for the maximum percentage would receive Federal aid at a ratio of 3 Federal dollars for every State dollar devoted to the program; those with the highest per-capita income, subject to the minimum percentage, would get 1 Federal dollar for 2 State dollars. The amount of Federal aid could not exceed $15 a year for each person covered under health plans in the respective States.

A State would begin to receive its Federal contribution as soon as it passed the appropriation legislation and the required machinery was in operation.

When financial help might be needed for the inception of a qualified nonprofit plan, the Federal Government would also help. Provision would be made for State non-interest-bearing loans, reimbursable under the Federal percentage, to match funds provided for the establishment of a plan from private contributions or non-interest-bearing loans.

This plan has been very favorably received and commented upon by some of the most distinguished experts in this country. This is the logical alternative to the compulsory health insurance plan sponsored by former President Truman. I think it is probably the only alternative that deals with the Nation's health problem and solves the difficulties without incurring the disadvantages of Government controlled medical care. We cannot offer it today because it has not had study by the necessary committees, and would only jeopardize a good program by inviting its turn down. We have to learn first to walk before we can run.

I feel that the urgency of the problem has been very well described. It mainly affects those in the lower income brackets; for example, of families with

an income under $2,000 a year, only 25 percent of such families carry any kind of prepayment health insurance. This is the overall problem on which we must start.

I am for this bill because I feel it will lead us there and I am for this bill because I represent the middle group which I hope very much is the majority of this House which wants to get started on helping all the American people, especially those of lower incomes, with their medical care costs, because we are suffering in terms of our ability to meet the Communist challenge, that we are suffering because of the skills and abilities lost through inadequate health and also considering the serious proportion of rejections we get in our calls for the Armed Forces.

This is something which we must give attention to, and we are starting to give it attention by this bill, and while this is only, I recognize, a minimal start, it attempts to accept Federal responsibility in a field that urgently needs acceptance, the field of the Nation's health.

The instant bill will help some 92 million Americans, and this is no inconsiderable number, who now have some health care insurance under voluntary plans, generally the Blue Shield, the Blue Cross and similar plans.

When it is realized that the total expenditure for hospitalization is $2,800,000,000 a year, that only 38 percent is now covered by insurance, or $1,100,000,000, we can appreciate the need and the magnitude of the problem and that there is room for help for those under existing programs. The items which are covered are limited in the bill but this is just the beginning, in my opinion the beginning for a far more comprehensive national health plan.

There are several points of view on legislation of this kind. There are those who are absolutely against it, there are those who should be for it as a beginning in accepting the Government's responsibility for the people's health and there are those who want only a full program of compulsory Federal health insurance, and nothing less. I am amazed that the middle group as well as the group who wants full Federal health insurance cannot see that this is a step in the right direction. No one can tell just which direction the program will ultimately take in, say 10 to 20 years, but this bill is an entry into a field where the Federal Government must begin to accept some national responsibility for the health of the individual. I think it is an excellent opportunity to make this beginning, although the bill's shortcomings are clear, the acceptance of the principle is the greatest gain now. I think we ought to embrace it. Inadequate as the bill is, it is a beginning, it is some recognition of the fact that as a Federal Government we have to take the responsibility in this field.

I have offered the substitute for the committee bill so that the Members may read it and study it. I think it is an excellent national health program. My other colleagues from New York who believe in health insurance very strongly may hope the principle will develop in their direction, but the point is that we can all begin to get started in this much-needed responsibility of accepting the obligation for the people's health as a national responsibility by adopting this bill.

Mr. Chairman, I ask unanimous consent to withdraw the amendment I have just mentioned.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FERNANDEZ. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am rather surprised to hear the gentleman from New York state that this bill is a start towards compulsory insurance. That, however, is not what I got up to speak about.

I listened a little while ago with very much attention to my good friend the distinguished gentleman from Florida [Mr. ROGERS]. When he got through speaking I was not quite sure whether he was for the bill or against it. But I turned back to read the testimony of Henry S. Beers, vice president of the Aetna Life Insurance Co.—and by the way I think he was one of the best-informed witnesses who testified on the bill. In answer to a question on page 224 he made a statement which I will read, because I think it throws some light on the position of my distinguished friend from Florida. I know it does as to the position I find myself in. Mr. Beers in answering a question said:

> It brings me back to a redefinition of my position, which is almost exactly yes plus no divided by two.

Under the circumstances, I shall vote to give our great President a chance to make good on his recommendation, even though I have grave doubts as to the efficacy of this proposal.

Mr. PHILLIPS. Mr. Chairman, I move to strike out the last four words.

Mr. Chairman, I rise to ask about a provision in here which may seem highly technical, yet as a member of the Committee on Appropriations, may I say we are becoming more and more concerned by a seeming desire to bypass the Congress so far as appropriations are concerned.

This appears on page 78 and is subsection (c) of section 401. I read subsection (c):

> The Secretary is authorized to determine the character and necessity of expenditures from the fund and the manner in which such expenditures are incurred, allowed, and paid, subject to provisions of law specifically applicable to wholly owned Government corporations.

I am concerned about that. We have had at least two major examples before of a desire to bypass the Congress and remove the appropriation functions from any control by the Congress.

I would also call attention to section 402. I cannot say that I have any particularly critical comment upon it except that it seems to me to be entirely unnecessary, that is,

> The Secretary shall, with respect to the financial operations arising by reason of title III—
>
> (a) prepare annually and submit a budget program—

Well, that is required under the Budget and Accounting Act of 1950.

> (b) maintain an integral set of accounts, which shall be audited annually by the General Accounting Office—

That also is provided for under the Budget and Accounting Act of 1950, so that there is no point of section 402. But, I see no great objection to it.

But, I do find objection to this subsection (c) of section 401, and if my friend, the chairman, the gentleman from New Jersey, has any comment upon that, I would be glad to yield to him, because I would not like to think that here we have in this bill another attempt to bypass the Congress in handling the money which would be appropriated to the agency that is to handle this.

My attention has been called to the Comptroller's letter on page 434 of the hearings in which he also pointed out this particular subsection of the bill and apparently recommends that it be stricken out. Does the gentleman from New Jersey care to comment on my time on that particular section?

Mr. WOLVERTON. I am fearful that maybe I do not grasp the full force of what the gentleman has said.

Mr. PHILLIPS. Page 78, lines 22, 23, and 24 and the first two lines on the next page, which, in my opinion and also, apparently, in the opinion of the Comptroller General, as indicated on page 435 of the hearings, is a technical bypassing of the Congress in regard to the appropriations which would be handled by the agency for the purposes of this act.

Mr. WOLVERTON. My confusion came from the fact that the gentleman referred to paragraph (b) of section 401, and I could not see the significance of that.

Mr. PHILLIPS. Section (c).

Mr. WOLVERTON. Now that I have my attention now directed to section (c) to which the gentleman's remarks refer, I can see the significance of his remarks.

Mr. PHILLIPS. That is correct.

Mr. WOLVERTON. I have felt this bill, in section 308 (a) and other sections as well, of the same tenor, grants merely an authority for appropriations to be made; consequently, that is not bypassing the Congress in any sense.

Mr. PHILLIPS. I think the gentleman is in error. This is not an authorization for receipt of contributions; it is an authorization to determine the necessity and character of expenditures and the manner in which they shall be incurred, allowed, and paid, which seems to me to be an appropriate function, a congressional function, through the Committee on Appropriations.

Mr. WOLVERTON. I think, notwithstanding what the gentleman says, that while this is in the nature of a revolving fund, yet fundamentally the Congress does have an opportunity to determine appropriations.

Mr. PHILLIPS. Let me ask the specific question: Will this agency be required to submit its budget to the Congress, and will the Congress determine how the appropriations and the revolving fund money shall be spent? That ought to be answered "Yes" or "No." Can that be answered "Yes"?

Mr. WOLVERTON. It is my understanding that the correct answer is "Yes."

Mr. PHILLIPS. I thank the gentleman.

The Clerk read as follows:

Declaration of purpose

SEC. 2. It is the purpose of this act to encourage and stimulate private initiative in making good and comprehensive health services generally accessible on reasonable terms, through adequate health service prepayment plans, to the maximum number of people, (a) by providing technical advice and information, without charge, to health service prepayment plans and to the carriers or sponsors thereof; and (b) by making a form of reinsurance available for voluntary health service prepayment plans where such reinsurance is needed in order to stimulate the establishment and maintenance of adequate prepayment plans in areas, and with respect to services and classes of persons, for which they are needed. Nothing in this act shall be construed to authorize any action inconsistent with the policy and provisions of the act entitled "An act to express the intent of the Congress with reference to the regulation of the business of insurance", approved March 9, 1945 (59 Stat. 33), as amended (15 U. S. C. 1011–1015).

DEFINITIONS

SEC. 3. As used in this act—

(a) The term "beneficiary" means an individual (1) with respect to whom a carrier, pursuant to a health service prepayment plan, undertakes to pay in whole or in part for specified personal health services furnished to him by others, or (2) to whom, pursuant to such a plan, it undertakes to provide specified personal health services;

(b) The term "carrier" means a voluntary association, corporation, or partnership, other than an instrumentality wholly owned or controlled by a State or political subdivision thereof, which is sponsoring, or is engaged in providing protection under insurance policies or subscriber contracts issued pursuant to, or is otherwise engaged in operating under, a health service prepayment plan;

(c) The term "Council" means the National Advisory Council on Health Service Prepayment Plans;

(d) The term "Fund" means the Health Service Prepayment Plan Reinsurance Fund established by section 307;

(e) The term "health service prepayment plan" means a set of specifications under which a carrier undertakes, through a class or classes of insurance policies or subscriber contracts (as defined by the Secretary) or both, to do any or a combination of the following in return for insurance premiums or prepaid subscription charges:

(1) To reimburse specified beneficiaries or a class or classes of beneficiaries (or others with respect to such beneficiaries) in whole or in part for expenditures incurred by them for specified personal health services;

(2) To pay (directly or through another carrier or carriers) to providers of personal health services all or part of their costs or charges for specified personal health services furnished to specified beneficiaries or a class or classes of beneficiaries: *Provided*, That, if (A) such payments are to be made in accordance with a contract or arrangement between the carrier and the provider of such services (or between the carrier and another carrier through whom such payments are to be made) and (B) such contract or arrangement fixes the basis upon which the amount of such payments shall be determined, such contract or arrangement shall be deemed to be an integral part of the plan;

(3) To provide, wholly or partly through its own staff or facilities, specified personal health services to specified beneficiaries or a class or classes of beneficiaries;

(f) The term "personal health services" includes any services rendered to individuals by licensed health personnel or, under the supervision of such personnel, by auxiliary personnel for the improvement or preservation of physical or mental health or for the diagnosis and treatment of disease or injury; the use by such licensed or auxiliary personnel of any and all apparatus or machines designed to aid in the diagnosis or treatment of disease or injury; the provision of bed and board in general or special hospitals, convalescent homes, nursing homes, sanatoria, or other institutions licensed or designated as such by a State when care in such institutions is prescribed by such licensed personnel; the provision of drugs and medicines, dressings and supplies, prostheses and appliances (including eyeglasses), when prescribed by such licensed personnel; and ambulance service;

(g) The term "Secretary", except as otherwise specified, means the Secretary of Health, Education, and Welfare; and

(h) The term "State" includes the District of Columbia, Alaska, Hawaii, Puerto Rico, and possessions of the United States.

National Advisory Council and other committees

SEC. 4. (a) There is hereby established within the Department of Health, Education, and Welfare a National Advisory Council on Health Service Prepayment Plans, which shall meet at the call of the Secretary but not less often than four times each year. The Council shall consist of 12 members appointed by the President without regard to the civil-service laws, not less than 4 of whom shall be individuals experienced in the administration of health service prepayment plans. The President, shall from time to time, designate 1 of such members to serve as chairman of the Council.

(b) The Council shall advise, consult with, and make recommendations to, the Secretary on matters of policy relating to the activities and functions of the Secretary under this act.

(c) The Secretary is authorized to utilize the services of any member or members of the Council, or of any member or members of a special advisory committee appointed by him, for advisory or consultative purposes in connection with matters related to the administration of this act, for such periods, in addition to conference periods, as he may determine.

(d) Appointed members of the Council and of other advisory and technical committees, while attending conferences or meetings of the Council or of their respective committees or subcommittees or while otherwise serving at the request of the Secretary, shall be entitled to receive compensation at a rate to be fixed by the Secretary but not exceeding $50 per diem, including travel time, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U. S. C. 73b–2) for persons in the Government service employed intermittently.

Consultants

SEC. 5. The Secretary is authorized, to the extent he deems it necessary and appropriate in order to carry out the provisions of this act, to employ experts and consultants or organizations thereof, as authorized by section 15 of the Administrative Expenses Act of 1946 (5 U. S. C. 55a). Individuals so employed may be compensated at rates not in excess of $50 per diem, including travel time, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U. S. C. 73b–2) for persons in the Government service employed intermittently.

Utilization of other agencies

SEC. 6. (a) In administering the provisions of this act, the Secretary is authorized to utilize the services and facilities of any agency of the Federal Government and, without regard to section 3709, as amended, of the Revised Statutes, of any other public or nonprofit agency or institution, in accordance with agreements between the Secretary and the head thereof. Payment for such services and facilities shall be made in advance or by way of reimbursement as may be agreed upon by the Secretary and the head of the agency or institution concerned.

(b) In administering the provisions of title III, the Secretary shall utilize to the optimum extent, in accordance with arrangements entered into pursuant to subsection (a) of this section, the services and facilities of State agencies engaged pursuant to State law in supervising carriers of health service prepayment plans with respect to such plans or with respect to policies or subscriber contracts issued pursuant thereto. The Secretary shall, in particular, endeavor to make arrangements for utilization of the appropriate agency of the carrier's home State in connection with determining compliance with the terms and conditions prescribed by the Secretary pursuant to section 303, and in determining, in accordance with criteria established by the Secretary, whether, for the purposes of section 304, there is any reason to believe that the carrier is financially unsound or that its financial or other policies and manner of operation or proposed operation are unsafe or otherwise inconsistent with the purposes of title III; and such determinations pursuant to section 304 may be accepted by the Secretary as conclusive. As used in this subsection, the term "home State" means the State under the laws of which the carrier is organized or, if the carrier's principal place of business is in a different State, then either of such States as the Secretary may determine, except that in the case of a carrier not organized under the laws of any State, the term "home State" means the State in which the carrier's principal place of business in the United States is situated.

Voluntary and uncompensated services

SEC. 7. In carrying out the provisions of this act, the Secretary may, notwithstanding any other provision of law providing for payment for services, accept and utilize voluntary and uncompensated services of individuals, or of public or nonprofit agencies, institutions, or organizations.

Exemption from conflict-of-interest statutes

SEC. 8. (a) Any person appointed, employed, or utilized in an advisory or consultative capacity under section 4 or 5 of this act is hereby exempted, with respect to such appointment, employment, or utilization, from the operation of sections 281, 283, 284, and 1914 of title 18 of the United States Code, except as otherwise specified in subsection (b) of this section.

(b) (1) The exemption granted by subsection (a) of this section shall not extend to the following acts performed as an officer or employee of the United States by any person so appointed, employed, or utilized: (A) The negotiation or execution of, or (B) the making of any recommendation with respect to, or (C) the taking of any other action with respect to, any individual application or contract for reinsurance of a health service prepayment plan operated or sponsored by the private employer of such person or by any corporation, joint stock company, association, firm, partnership, or other business entity in the pecuniary profits or contracts of which such person has any direct or indirect interest.

(2) The exemption granted by subsection (a) of this section shall, during the period of such appointment, employment, or utilization and the further period of 2 years after

the termination thereof, not to extend to the prosecution or participation in the prosecution, by any person so appointed, employed, or utilized, of any claim against the Government involving any individual application or contract for reinsurance concerning which the appointee had any responsibility during the period of such appointment, employment, or utilization.

Regulations

SEC. 9. The Secretary shall make such regulations as he may deem necessary to carry out the purposes of this act, but nothing in such regulations shall provide for supervisory or regulatory control over any carrier, or over any hospital or other health facility or personnel furnishing personal health services covered by a participating health service prepayment plan.

Disclosure of information

SEC. 10. No information concerning the business or affairs of any carrier which, in connection with any application or claim for reinsurance under this act, has been obtained from such carrier by the Secretary, or by any officer, employee, or consultant of the Department of Health, Education, and Welfare, or by any other Federal or State officer or other person utilized in carrying out the provisions of this act, shall, without the consent of such carrier, be disclosed to any person except (a), in accordance with regulations, in connection with the administration of the provisions of this act relating to reinsurance, or (b) in any judicial action or proceeding, civil or criminal, pursuant to this act: *Provided*, That nothing in this section shall be construed to prohibit the disclosure, by publication or otherwise, of statistical or other data which will not directly or indirectly reveal the identity of such carrier. Any person violating any provision of this section shall be punished by a fine not exceeding $1,000 or by imprisonment not exceeding 1 year, or both.

TITLE II—STUDIES AND ADVISORY AND INFORMATIONAL SERVICES

SEC. 201. The Secretary is authorized to conduct studies and collect information concerning the organizational, actuarial, operational, and other problems of health service prepayment plans and their carriers, make available through publications and other appropriate means the information so collected and the results of such studies, and provide to carriers and sponsors of health service prepayment plans, on request and without charge, organizational and other technical advice and information, including information on morbidity and organizational methods.

SEC. 202. There are hereby authorized to be appropriated for the purposes of this title such sums as may be necessary.

TITLE III—REINSURANCE OF HEALTH SERVICE PREPAYMENT PLANS

Authority to reinsure

SEC. 301. (a) If the Secretary, after consultation with the council, determines that reinsurance with respect to any kind or type of health service prepayment plan, upon terms and conditions and at premium rates comparable to those offered pursuant to this title, is needed to promote the purposes of this act and is not available from private sources to an extent adequate to promote such purposes, the Secretary is authorized, subject to the provisions of this title and to such terms and conditions as may be prescribed under the authority of this title, to reinsure, on behalf of the United States, any carrier with respect to a health service prepayment plan of such kind or type submitted by it.

(b) For the purposes of this title, the term "health service prepayment plan" shall not include so much of any plan, or of any risk insured pursuant to such plan, as is covered by reinsurance other than reinsurance granted pursuant to this title.

Applications for reinsurance

SEC. 302. (a) Any carrier desiring reinsurance under this title with respect to a health service prepayment plan shall file with the Secretary an application for such reinsurance. Such application shall be in such form and contain or be supported by the information required pursuant to section 305 and such additional information as the Secretary may require, and shall contain or be accompanied by a full description of the plan, including specimen copies of the kinds of insurance policies or subscriber contracts covered by the plan, and including, in the case of a plan within the scope of the proviso to section 3 (e) (2), any applicable contract or arrangement between the applicant carrier and the provider or providers to whom payments for personal health services covered by the plan are to be made (or between the applicant carrier and another carrier through whom payments to such provider or providers are to be made), which contract or arrangement fixes the basis upon which such payments are to be made.

(b) Such application shall, further, contain or be supported by an agreement by the applicant undertaking, in the event of approval of the plan for reinsurance, (1) to pay the premium charges for such reinsurance required under this title when due, (2) to comply at all times with applicable provisions of State law governing the operations of the carrier with respect to the plan, (3) to make such reports concerning its operations under the plan, in such form, and containing such information related thereto as the Secretary may from time to time reasonably require, and (4) to comply with the applicable provisions of the reinsurance contract.

(c) Any carrier desiring a renewal of reinsurance under this title shall file with the Secretary an application for such renewal, which application shall, except as otherwise provided by or pursuant to regulation, contain or be supported by such information, and such agreements and assurances as are required in the case of an initial application for reinsurance.

Terms and conditions of approval for reinsurance

SEC. 303. (a) The Secretary may prescribe such terms and conditions governing the approval, for reinsurance, of health service prepayment plans under this title as he finds will best promote the purpose specified in section 2, including, but not limited to, such reasonable requirements, provisions, or limitations as he may from time to time, after consultation with the Council, by regulation prescribe for all or particular classes of health service prepayment plans or policies or subscriber contracts issued pursuant thereto, or both, with respect to—

(1) the kinds and types of health service prepayment plans which will be eligible for reinsurance, taking into consideration the purpose declared in section 2, with special emphasis upon the objective of encouraging experimentation designed to extend or adapt the prepayment method to substantive problem areas or geographic areas for which that method is in any significant respect new, untried, or not yet fully effective or widely available on reasonable terms, such as (A) coverage of classes of individuals for which protection through such health service prepayment plans appears to be feasible but is not adequate, or (B) the offering of protection in communities or areas in which such protection (in the respects in which it is offered) is not adequately available on a prepayment basis, or (C) a coverage of benefits or services which, either as to type, range, amount, or duration of such benefits or services, is not otherwise (generally or in a given area) widely available through such plans on an adequate basis;

(2) minimum ranges of health conditions to be covered by the plan, minimum provisions as to the kind, quantity, and duration of health services to be covered or provided under the plan, and safeguards against undue exclusions of health services or health conditions from coverage or against any other undue exclusions or limitations;

(3) deductible amounts and maximum liability amounts, if any, provided or to be provided for in the plan;

(4) waiting periods as a condition of entitlement to health service benefits;

(5) plan provisions which require that a given portion of the cost of personal health services or of expenditures therefor, covered by the plan, be borne by the policyholder, subscriber, or beneficiary;

(6) plan provisions, in the case of plans within the scope of the proviso to section 3 (e) (2), as to costs or charges of providers of personal health services payable by the carrier, to the extent that, in the judgment of the Secretary, such regulations are necessary to protect the Fund against abuses or arbitrary cost increases during a reinsurance term;

(7) the duration, cancellability, and renewability of policies or subscriber contracts issued pursuant to the plan; and

(8) other policy provisions bearing on the need for limiting reinsurance under this title to plans which will promote the purposes of this act.

(b) Terms and conditions of reinsurance embodied in regulations pursuant to subsection (a) shall be prescribed after such consultation with such interested groups, including representatives of State agencies engaged pursuant to State law in supervising carriers of health service prepayment plans, as the Secretary deems appropriate.

(c) Notwithstanding the provisions of subsection (a) or any other provisions of this act, the Secretary shall not exercise any control whatsoever over the carrier's premium or subscription charges under a health service prepayment plan, except that he shall not approve for reinsurance any such plan if in the Secretary's judgment (1) the carrier's premium or subscription charges thereunder are such as to cause the plan to be financially unsound, or (2) the allocation of such premium charges by the carrier pursuant to section 305 (c) as between risks to be reinsured and risks not to be reinsured is arbitrary or unreasonable, or (3) reinsurance of the plan, considered as a whole, would not promote the purposes of this act.

(d) No term, condition, requirement, provision, or limitation, or amendment thereto, prescribed pursuant to subsection (a), shall, if initially effective less than 90 days prior to the date of approval of an application for initial reinsurance with respect to a plan, or less than 90 days prior to the date of approval of an application for renewal of such reinsurance, be applicable to such plan, without the carrier's consent, during the term of such initial reinsurance or of such renewal, as the case may be, but the same shall be applicable to any subsequent renewal of such reinsurance.

(e) The Secretary shall not approve for reinsurance any health service prepayment plan which contemplates that medical or dental care or treatment be furnished by the applicant for reinsurance through salaried physicians or dentists in the employ of such applicant unless the Secretary is satisfied that such applicant has an organizational structure which vests control over the manner in which medicine and dentistry are practiced, in connection with the health services concerned, solely in duly licensed members of the professions involved.

Reinsurance certificate

SEC. 304. If the Secretary finds—

(a) that the applicant carrier is operating and proposes to operate according to law;

(b) that on the basis of the information available to him, there is no reason to believe that the carrier is financially unsound or that its financial or other policies and manner of operation or proposed operation are unsafe or otherwise inconsistent with the purposes of this title;

(c) that the application, the health service prepayment plan submitted for reinsurance (or for renewal of reinsurance), the policies and contracts the carrier proposes to issue or has already issued under the plan, and the carrier's proposed method of operations comply with the requirements of this title and with the terms, conditions, requirements, provisions, or limitations prescribed pursuant to this title;

(d) that the plan is sound;

(e) that the carrier has agreed to the premium rates for reinsurance fixed with respect to such plan pursuant to section 306 for the term of reinsurance covered by the application; and

(f) that reinsurance of such plan pursuant to this title will promote the purposes of this title,

the Secretary is authorized to approve the application for reinsurance (or for renewal of reinsurance) and, in the event of such approval, to issue to the carrier a certificate stating that, with respect to the health service prepayment plan described in the application, the carrier is reinsured to the extent provided in this title and in accordance with the tenor of, and for the period specified in, the certificate: *Provided*, That, if the carrier has outstanding health service policies or contracts under the plan at the time of such approval, the certificate of reinsurance shall not be issued unless and until the initial premium for insurance as specified in section 306 has been paid.

Scope and extent of reinsurance obligation

SEC. 305. (a) (1) The issuance of a certificate of reinsurance pursuant to this title shall give rise to a contract between the applicant carrier and the United States, whereby the United States is obligated, upon payment of all reinsurance premium charges required pursuant to this title and upon compliance by the carrier with the other applicable terms, conditions, and requirements specified in or pursuant to this title, to pay to such carrier, for each year during the term of such reinsurance, from the fund (or from the appropriate account established under sec. 307), 75 percent of the carrier's reinsured costs incurred in such year under the plan covered by the certificate of reinsurance.

(2) Except as otherwise provided in and pursuant to subsection (b) for certain plans and carriers, the carrier's reinsured costs incurred under a reinsured plan in a given year shall be that amount, if any, by which—

(A) the carrier's aggregate benefit costs, incurred during such year under its health service prepayment policies or subscriber contracts issued under and in conformity with the reinsured plan, exceed

(B) (i) the carrier's aggregate premium income earned under the reinsured plan in such year, as reduced by (ii) the amount of the applicable administrative-expense allowance.

The administrative-expense allowance applicable to a given year with respect to a reinsured plan shall be determined by multiplying the carrier's aggregate premium income earned during such year under the reinsured plan by the applicable administrative-expense-allowance factor predetermined for such plan under paragraph (3) of this subsection.

(3) (A) The "administrative-expense-allowance factor" applicable to a given carrier and health service prepayment plan with respect to a given initial or renewal term of reinsurance shall be seven-eighths of that ratio, approved by the Secretary, which the carrier, as a part of its application for initial reinsurance or renewal of reinsurance of such plan, as the case may be, estimates to be the ratio which its annual administrative expenses, to be incurred in connection with the plan, will bear to its annual premium income to be earned under the plan: *Provided*, That when so required by the Secretary in order to prevent distortion, such ratio shall be an average ratio estimated with respect to such period of years, not in excess of three, as may be specified in regulations.

(B) The Secretary shall approve the carrier's estimate of the ratio of its annual incurred administrative expenses to its annual earned premium income, submitted under subparagraph (A) of this paragraph, unless in the Secretary's judgment the carrier's estimate or the method by which such estimate was made is not a reasonable or bona fide one, in which event the Secretary shall not give such approval and shall not issue or renew such reinsurance, but such approval may be given if the carrier furnishes an amended estimate which in the judgment of the Secretary is not subject to such objection.

(b) In the case of any health service prepayment plan which is operated, exclusively or to a substantial extent, either (1) on the basis of personal health services to be furnished by the carrier directly through its own staff or indirectly through the staff of an affiliate of the carrier, or (2) on the basis of payments to be made by the carrier to a provider of personal health services which is an affiliate of the carrier, the provisions of paragraphs (2) and (3) of subsection (a) shall not apply, but the Secretary shall by regulation prescribe for such plans (which otherwise meet the requirements of this title) the scope and extent of the reinsurance obligation which shall apply to them, with a view to making available for such plans reinsurance which, with due regard to the inherent differences between them and other types, will in the Secretary's judgment achieve for such plans reinsurance protection reasonably comparable in scope and extent to that provided for plans fully subject to subsection (a).

(c) If a plan covered by an application for reinsurance includes, in policies or subscriber contracts issued or to be issued under the plan, benefits of a type not specified in section 3 (e), reinsurance granted under this title and the provisions of this section for determining the scope and extent of the reinsurance obligation shall not be deemed to extend to so much of such plan (or of the benefit or other costs or expenses incurred or premium income earned in connection with such plan) as relates to such benefits and the plan shall specify how much of the subscription charge or premium charged or chargeable by the carrier under such policy or subscriber contract shall be attributable to such extraneous benefits and how much to benefits within the purview of this title, and only the latter shall be regarded as premiums or subscription charges for the purposes of this title.

(d) In the event that a reinsured carrier's liability with respect to risks insured or underwritten by it under a reinsured health service prepayment plan is reduced or extinguished by reason of the operation of, or proceedings under, a Federal or State bankruptcy or insolvency law, payments of reinsurance pursuant to this title shall nevertheless be applied by the carrier or by the officer acting for it to the satisfaction of the obligations otherwise arising under the plan, to the exclusion of other creditors.

(e) (1) If so specified by regulation with respect to all or a class of carriers or plans, when a single carrier has more than one health service prepayment plan reinsured under this title for the same reinsurance term, the experience under any two or more such plans of such carrier with respect to the same year shall be combined for the purposes of this section and a determination made as to the amount, if any, of a combined net reinsurance payment owing under this title.

(2) (A) The duration of an initial or renewal term of reinsurance of a plan pursuant to this title shall be for such period (hereinafter referred to as the "regular reinsurance period") as may be specified in the certificate of reinsurance pursuant to regulations, but, if so specified by or pursuant to regulation, such initial or renewal term of reinsurance shall, with respect to each policy or subscriber contract issued or renewed under the plan during the regular reinsurance period and running beyond such regular reinsurance period, be deemed to continue for such further period (hereinafter referred to as the "extended reinsurance period" for such policy or subscriber contract) as may be specified by or pursuant to such regulations.

(B) If an extended reinsurance period or periods are specified as authorized by subparagraph (A) of this paragraph, the Secretary may further, by or pursuant to regulation, incorporate in the reinsurance contract a provision for combining the carrier's experience under the reinsured plan during the regular reinsurance period with its experience under such plan during the extended reinsurance period or periods, and for determining upon expiration of the last of such extended periods, on the basis of such combined experience in lieu of the annual basis specified in subsection (a), the amount of the reinsurance obligation, if any, owing to the carrier.

(C) In the event of a renewal of reinsurance of a plan after an initial term of reinsurance or after a prior renewal term of reinsurance, the Secretary is authorized to specify as a part of the reinsurance contract, by or pursuant to regulation, that policies or subscriber contracts issued or renewed under the plan during, but running beyond, the regular reinsurance period of any such prior reinsurance term shall, to the extent provided in or pursuant to such regulation, be treated for reinsurance purposes as if issued or renewed during such subsequent renewal term of reinsurance, in lieu of the application of an extended reinsurance period or periods to such prior reinsurance term with respect to such policies or subscriber contracts.

(f) No substantive regulation, or amendment thereto, prescribed under this section shall, if initially effective less than 90 days prior to the date of approval of an application for initial reinsurance with respect to a plan, or less than 90 days prior to the date of approval of an application for renewal of such reinsurance, be applicable to such plan during the term (including any extended period of such term pursuant to subsection (e) (2) of this section) of such initial reinsurance or of such renewal, as the case may be, if less favorable to the carrier than the regulations theretofore in effect, but such regulation or amendment shall be applicable to any subsequent renewal of such reinsurance.

(g) A contract of reinsurance under this title shall not give rise to any liability of the United States beyond the amounts which from time to time shall stand to the credit of the fund, except that, if the authority to establish accounts within the fund is exercised pursuant to section 307, such liability shall be limited to the appropriate reinsurance account within the fund in accordance with the provisions of that section.

(h) For the purposes of this section—

(1) The term "administrative expenses" includes all expenditures and charges incurred by a carrier in connection with a

health service prepayment plan, except (A) benefit costs, (B) amounts set aside for reserves or contingencies, and (C) dividends, refunds, or distribution of profits, and such administrative expenses may be more particularly defined by the Secretary;

(2) The term "affiliate," in reference to a carrier, means any person, partnership, or juristic or business entity which directly or indirectly, by legally enforceable means or otherwise, owns or controls, or is owned or controlled by, the carrier, or which, together with the carrier, is directly or indirectly, by legally enforceable means or otherwise, owned or controlled by the same interests as the carrier;

(3) The terms "annual" and "year" refer to a calendar year or, alternatively, such continuous period of 12 months as may be provided by regulation;

(4) The term "benefit costs" means, with respect to a health service prepayment plan, payments incurred by the sponsoring carrier, either directly to providers as payment for personal health services furnished by them to beneficiaries under the plan or to others as indemnification or reimbursement with respect to expenditures incurred by them for such services and indemnifiable or reimbursable under the plan;

(5) The term "premium income" means the sum of (A) gross premiums or subscription charges earned and (B) policy fees earned under or with respect to policies or subscriber contracts issued under a health service prepayment plan, without regard to dividends declared and without regard to experience rating refunds; and

(6) The terms "incurred" and "earned," in reference to expenditures or income related to an accounting period, mean "allocable to" such period in accordance with generally recognized insurance accounting principles, whether or not paid or received during such period, and without regard to reduction or extinguishment of liability by reason of the operation of, or proceedings under, Federal or State laws pertaining to bankruptcy or insolvency.

Premium charges for reinsurance

SEC. 306. (a) The Secretary shall require the payment of premium charges for reinsurance under this title. Such charges shall be fixed, in accordance with actuarial principles, as a percentage of the carrier's premium income (as defined in section 305) under the reinsured plan or on such other equitable basis as may be specified by regulation prescribed after consultation with the Council, and may be so fixed at different rates for the different carriers and for the different health service prepayment plans to be reinsured as to reflect the respective hazards. In the fixing of premium rates, regard shall be had to the objective of, on the one hand, making the reinsurance program self-sustaining over a reasonable term and, on the other hand, stimulating and encouraging plans which will promote the purposes and objectives declared in section 2 and section 303 (a) (1).

(b) The applicable premium rate in effect on the initial effective date of a certificate of reinsurance issued to a carrier, or on the effective date of renewal of the reinsurance term specified therein, shall remain applicable to the reinsured plan during such initial term or renewal term, respectively, including any extended period of such term pursuant to section 305 (e) (2), except that (1) the Secretary may, if premium rates have been reduced for future reinsurance of comparable risks, and if the condition of the fund or of the account subject to the risk permits, reduce accordingly the reinsurance premiums payable with respect to the plan by such carrier for subsequent installments, and (2), if the carrier desires to amend its reinsured plan during a current reinsurance term, the Secretary may, if in his judgment such amendment would affect the reinsurance hazard, condition his consent to such amendment on the carrier's agreement to a change in the reinsurance premium rate.

(c) Premiums for reinsurance shall be payable at such times, for such periods, and in such manner as the Secretary shall by regulation prescribe.

(d) All premiums received for reinsurance under this title shall be covered into the Fund and, if reinsurance accounts are established in the Fund pursuant to section 307, shall be credited to the appropriate account.

Reinsurance fund

SEC. 307. (a) There is hereby created in the Treasury of the United States a Health Service Prepayment Plan Reinsurance Fund which shall be used by the Secretary to carry out the provisions of this title.

(b) There shall be paid into the fund, and the fund shall consist of, all reinsurance premiums received under this title, capital advances made to the fund pursuant to section 308, investments of moneys in the fund and the return from such investments, and any other moneys or assets derived by the Secretary from operations arising out of the reinsurance provisions of this title. Subject to the provisions of subsection (c), all moneys in the fund shall, upon requisition by the Secretary, be available, without fiscal-year limitation, (1) for making reinsurance payments pursuant to this title, (2) for repayment of advances made to the fund pursuant to section 308, (3) for payments of interest pursuant to section 308, and (4) for any fiscal year beginning after June 30, 1959, for defraying the expenses of administration incurred by the Secretary in connection with the reinsurance provisions of this act.

(c) If the Secretary, after consultation with the Council, determines that the purposes of this title will thereby be promoted, he may establish within the fund, by or pursuant to regulation, one or more special reinsurance accounts and, in that event, allocate to such accounts plans thereafter reinsured or for which reinsurance is thereafter renewed, and, with the consent of the sponsoring carrier with respect to a reinsurance term then current, plans theretofore reinsured. If such a special account or accounts are established, any plan not so allocated to a special account shall be allocated to a general reinsurance account to be established by the Secretary within the fund, and any liability of the United States arising with respect to a reinsured plan shall be limited to the general or special account to which such plan has been allocated. Each such special account and the general account shall be credited with the reinsurance premiums paid with respect to plans allocated to such account, its share of the earnings of the fund, advances of capital made to such account pursuant to section 308, and any other income of the fund attributable to such account, and shall be charged with all payments of reinsurance under this title with respect to plans allocated to such account, repayments of advances requisitioned for the use of such account pursuant to section 308, interest payable pursuant to section 308, and its share of administrative expenses for any fiscal year beginning after June 30, 1959, as provided in subsection (e).

(d) (1) The Secretary may authorize the Secretary of the Treasury to invest and reinvest such portions of the fund as the Secretary may determine to be in excess of current needs in any interest-bearing securities of the United States or in any securities guaranteed as to principal and interest by the United States, and the income therefrom shall constitute a part of the fund.

(2) Notwithstanding the establishment of accounts pursuant to subsection (c), the fund shall be invested as a single fund but each reinsurance account shall be credited quarterly on March 31, June 30, September 30, and December 31 of each year, on the basis of the average daily balance of such account, with a proportionate part of the earnings of the fund for the quarter ending on such date.

(e) If accounts are established pursuant to subsection (c), there shall likewise be established within the fund, on July 1, 1959, an administrative expense account, and moneys required for the expenses of administration of this title shall for each fiscal year, from time to time, be transferred by the Secretary from the several reinsurance accounts to the administrative expense account in such proportions as the Secretary finds to be equitable. Moneys remaining unobligated in the administrative expense account at the close of the fiscal year may be retransferred to the respective reinsurance accounts in such proportions as the Secretary finds to be equitable.

Advances to the fund

SEC. 308. (a) There is authorized to be appropriated to a capital-advance account to be established without fiscal-year limitation in the Treasury for this purpose $25 million. From any balance in such account there shall from time to time be transferred to the fund (or to any account within the fund), as advances of capital, such amounts as the Secretary determines are required for the purposes of the fund (or of such account within the fund).

(b) Until all advances to the fund (or to an account within the fund) made pursuant to subsection (a) have been repaid through credits as provided in this subsection, the Secretary shall, at least annually, determine any balance in the fund (or in such account) in excess of an amount determined by the Secretary to be necessary for the requirements of the fund (or of such account), and such balance shall be transferred to the capital-advance account and the amount thereof shall be credited against such advances and shall again be available for advances pursuant to subsection (a).

(c) At the close of each fiscal year, the Secretary shall pay into the Treasury from the fund (or from the appropriate account within the fund), as miscellaneous receipts, interest on the amount of any advances made to the fund (or to an account within the fund) pursuant to subsection (a) which has not been repaid as provided in subsection (b). The Secretary of the Treasury shall determine the applicable interest rate annually in advance, such rate to be calculated to reimburse the Treasury for its costs in connection with such unrepaid advances, taking into consideration the current average interest rate on outstanding marketable long-term obligations of the United States.

Payment of reinsurance claims

SEC. 309. (a) Any carrier claiming to be entitled to a reinsurance payment pursuant to the provisions of this title and according to the tenor of the reinsurance certificate shall furnish such proof of claim, upon such form, and within such period of time after the accrual of the claim as the Secretary may by regulation require. No judicial action on such claim shall be brought until such claim has been administratively denied by the Secretary, and the running of the period for the commencement of such judicial action against the United States specified in section 2401 of title 28, United States Code, shall, if such claim be filed within such period in accordance with this section, be suspended from the date of filing until the claim has been administratively denied by the Secretary and for 60 days thereafter: *Provided*, That such claim shall be deemed to have been administratively denied if not acted upon within 6 months after the date of such filing, unless the Secretary for good cause shown has otherwise agreed with the claimant.

(b) Any claim for a reinsurance payment which is not paid within 6 months after proof of claim, as required by regulation, has

been filed shall, except as to any amount which is tendered by the Secretary as admittedly owing or as a settlement of a disputed claim, bear interest at 4 percent per annum until paid.

(c) (1) Any claim for a reinsurance payment under this title which the Secretary finds to be due and payable, and any judgment of a court of competent jurisdiction based upon a claim for a reinsurance payment under this title, which judgment has become final and conclusive, shall be paid by the Secretary from any unobligated moneys in the fund or in the appropriate account chargeable therewith.

(2) Whenever, for the purpose of a proof of claim filed pursuant to this section, the carrier's reinsurance claim for a given period is computed in whole or in part on the basis of an estimate of the carrier's benefit costs (as defined in section 305) incurred in such period but not yet due and payable or paid by the carrier, the Secretary shall not make final payment with respect to so much of such claim as is based on such estimate, but in such cases the Secretary is authorized, in accordance with regulations, to approve tentatively, and to make a tentative payment on the basis of, so much of such estimate as the Secretary finds is reasonable and conservative, subject to adjustment in favor of or against the carrier when it is finally determined that such estimated costs either have become due and payable by the carrier or have not in fact been incurred, and the carrier shall be obligated, in the event of any such adjustment against the carrier, to repay to the Secretary, for the fund, the excess of the amount tentatively paid to the carrier over the amount finally found to have been payable to the carrier as reinsurance.

(3) In cases in which the carrier's experience under the plan during the regular and extended periods of a reinsurance term is to be combined pursuant to paragraph (2) (B) of section 305 (e), the reinsurance contract may, if deemed appropriate by the Secretary, provide, pursuant to regulation, for making annually during the combined period a tentative determination on the basis of the elapsed portion of the combined experience and for making annual tentative adjustments on the basis of such determinations either in favor of the carrier or by refund to the Secretary (for payment into the fund), as the case may be, with a final adjustment and payment to or by the carrier after expiration of the whole of such combined period. Nothing in this paragraph shall be construed to limit the authority of the Secretary to proceed pursuant to paragraph (2) of this subsection upon the expiration of such combined period.

(d) (1) For the purposes of this section, the question whether benefit costs have become due and payable shall be determined without regard to any extinguishment or reduction of liability of the carrier, under policies or subscriber contracts issued pursuant to the reinsured health service prepayment plan, by reason of the operation of, or proceedings under, Federal or State laws pertaining to bankruptcy or insolvency.

(2) Reinsurance payments made under this title shall not be subject to distribution or application under any Federal or State law pertaining to bankruptcy or insolvency, except in satisfaction of claims for services or money payments arising under policies or subscriber contracts issued pursuant to the reinsured health service prepayment plan with respect to which such reinsurance was paid.

Involuntary termination of reinsurance

SEC. 310. Upon any ground specified in regulations in effect not less than 90 days prior to the commencement of any initial or renewal term of reinsurance, the Secretary may, prior to the normal expiration of such term, terminate the reinsured status of a health service prepayment plan with respect to policies or subscriber contracts issued pursuant to such plan after a future date specified by the Secretary in the notice of termination.

Actions by policyholders or subscribers

SEC. 311. No policyholder or subscriber under a policy or contract issued pursuant to a reinsured health service prepayment plan shall, by virtue of the reinsured status of such plan, be deemed to have any cause of action against the United States or the Secretary or any claim against the fund, but all such persons must look solely to the carrier.

Appropriations

SEC. 312. For a transitional period of 5 fiscal years beginning July 1, 1954, there are authorized to be appropriated from the general fund of the Treasury such sums as may be necessary to defray the expenses of administration of this title.

TITLE IV—MISCELLANEOUS

Legal powers and responsibilities

SEC. 401. (a) With respect to matters arising by reason of title III, or such title as it may hereafter be amended, the Secretary shall, in addition to other powers conferred by this act, have power—

(1) to enforce, pay, or compromise, any claim under, or arising because of operations under, such title; and

(2) to enforce, pay, compromise, waive, or release any right, title, claim, lien, or demand, however acquired under such title.

(b) The Secretary is authorized, on request or on his own motion, to hold such hearings and to conduct such investigations and other proceedings as he may deem necessary or proper for the administration of this act and, in the course of any such hearing, investigation, or other proceeding, may administer oaths and affirmations, examine witnesses, and receive evidence, whether or not such evidence is admissible under rules of evidence applicable to court procedure.

(c) The Secretary is authorized to determine the character and necessity of expenditures from the fund and the manner in which such expenditures are incurred, allowed, and paid, subject to provisions of law specifically applicable to wholly owned Government corporations.

(d) In any action or claim against the United States arising under this title, the district courts of the United States shall have jurisdiction, without regard to the amounts involved, as in suits against the United States under section 1346 (a) (2) of tile 28, United States Code, and in accordance with the procedures applicable to such suits.

Accounting and audits

SEC. 402. The Secretary shall, with respect to the financial operations arising by reason of title III—

(a) prepare annually and submit a budget program as provided for wholly owned Government corporations by the Government Corporation Control Act; and

(b) maintain an integral set of accounts, which shall be audited annually by the General Accounting Office in accordance with principles and procedures applicable to commercial corporate transactions, as provided by section 105 of the Government Corporation Control Act.

Annual reports

SEC. 403. The Secretary shall include in the annual report for the Department of Health, Education, and Welfare a complete statement with respect to operations under this act and with respect to the status of the fund, together with a summary of the recommendations made by the Council, including minority views and recommendations, if any.

Criminal provisions and injunctions
